Railways. The total length of railway lines in 1980 was 8,141 km, all state-owned; 202 km are electrified.

In 1978 Turkish railways carried 13.2m. tonnes.

Aviation. The State Airways Administration, formed in 1938, has been converted into the mixed company Turkish Airlines (Türk Havayolları Anonim Ortaklığı); British Airways became a partner in July 1957. It conducts foreign services to Athens, Beirut, Brussels, Amsterdam, Munich, Rome, Frankfurt, Vienna, London, Paris, Belgrade, Nicosia, Tel-Aviv and Baghdad.

In 1977 Turkish Airlines carried 6,545,000 passengers, 1.39m. kg of mail (1972) and 144.5m. kg of freight (1972). İstanbul or Ankara are connected with all the principal countries by 27 national airlines.

Shipping. In 1977 Turkish Maritime Lines and private companies had a gross tonnage of 1,699,910, with a total of 347 ships. The main ports in order of tonnage capacity are: İstanbul, İzmir, Samsun, Mersin, İskenderun and Trabzon.

Ports built or extended since 1950 are İskenderun, Ereğli, Trabzon, Samsun, Mersin, Zonguldak, Giresun, Hopa, Antalya and Bandırma. New facilities have been provided at Haydarpaşa, Salıpazarı, Hopa, Yarımea and İzmir.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The unified legal system consists of: (1) justices of the peace (single judges

with limited but summary penal and civil jurisdiction): (2) courts of first instance (single judges, dealing with cases outside the jurisdiction of (3) and (4)); (3) central criminal courts (a president and 2 judges, dealing with cases where the crime is punishable by imprisonment over 5 years); (4) commercial courts (3 judges); (5) state security courts, to prosecute offences against the integrity of the state (a president and 4 judges, 2 of the latter being military).

The civil and military Courts of Cassation sit at Ankara.

The Council of State is the highest administration tribunal: it consists of 5 chambers. Its 31 judges are nominated from among high-ranking personalities in politics, economy, law, the army, etc.

The Military Court of Cassation in Ankara is the highest military tribunal. The Military Administrative Court deals with the judicial control of administrative acts and deeds concerning military personnel.

The Constitutional Court, set up under the Constitution, can review and annul legislation and try the President of the Republic, Ministers and senior judges. It consists of 15 regular and 5 alternate members.

The Civil Code and the Code of Obligations have been adapted from the corresponding Swiss codes. The Penal Code is largely based upon the Italian Penal Code, and the Code of Civil Procedure closely resembles that of the Canton of Neuchâtel. The Commercial Code is based on the German.

Religion. Freedom of religion is guaranteed by the Constitution. Although Islam is not the official state religion of Turkey, Moslems form 98.2% of the population. The administration of the Moslem religious organizations is in charge of the Presidency of Religious Affairs, attached to the Prime Minister's office. The Turkish Republic is a secular state.

Istanbul is the seat of the Œcumenical Patriarch, who is the head of the Orthodox Church in Turkey. The Armenian Church (Gregorian) is ruled by a Patriarch in İstanbul who is subordinate to the Katholikos of Etchmiadzin, the spiritual head of all Armenians. The Armenian Apostolic Church is ruled by the Patriarch of Cilicia. The Chaldeans (Nestorian Uniates) have a Bishop at Mardin. The Syrian Uniates have a See of Mardin and Amida, but it is united with their Patriarchate of Antioch (residence, Damascus). Greek Uniates (Byzantine Rite) have as their Ordinary in İstanbul, the Titular Bishop of Gratianopolis. The Latins have an Apostolic Delegate in İstanbul and an Archbishop in İzmir, but their Patriarch of İstanbul is titular and non-resident. There is a Grand Rabbi (Hahambaşı) in İstanbul for the Jews, who are nearly all Sephardim.

At the 1965 census there were in Turkey 31,391,421 Moslems, 73,725 Orthodox, 69,526 Gregorians, 25,833 Roman Catholics, 22,883 Protestants, 14,758 other Christians (unspecified), 38,267 Jews, 14,661 adherents of other religions, 1,212 without religion, 602 undeclared or unknown.

A law passed in Dec. 1934 forbids the wearing of clerical garb for those other than religious leaders except in places of worship and during divine service. The constitution forbids the political exploitation of religion or any impairment of the secular character of the republic.

In lieu of religious formulae, all citizens take oaths on their honour.

Education. Elementary education is compulsory and co-educational and, in state schools, free. All children from 7 to 12 are to receive primary instruction, which may be given in state schools, schools maintained by communities, or private schools, or, subject to certain tests, at home. The state schools are under the direct control of the Ministry of Education. They include primary schools, secondary or middle schools, and *lycées* or secondary schools of a superior kind. There are also training schools for male and female teachers, and technical schools. In 1979 there were 18 universities and 102 other institutes of higher education. The important non-Moslem communities in İstanbul maintain their own schools, which, like all 'private' schools, are subject to the supervision of the Ministry of Education.

Literacy of the population of 6 years and over was 10.6% in 1927, 19.2% in 1935, 29% in 1945, 40.9% in 1955, 48.7% in 1965, 49% in 1970, 61.7% in 1975.

Religious instruction in schools, hitherto prohibited, was made optional in ele-

mentary and middle schools in May 1948. There are many training schools for Moslem clergy as well as a Faculty of Theology in Ankara.

<i>Statistics for 1979-80</i>	<i>Number</i>	<i>Teachers</i>	<i>Students</i>

On 1 Nov. 1928 the Grand National Assembly voted a law for the adoption of Latin characters as from 1 Dec. 1928. The publication of books in Arabic characters was forbidden after 1 Jan. 1929.

Health. Public health is the responsibility of the Ministry of Health and Social Welfare, established in 1920; social insurance for workers comes under the Workers' Insurance Institution attached to the Ministry of Labour. A law promulgated in 1961 and being implemented from 1963 provides for the nationalization of the health services within 15 years. In 1972, 1.52m. workers and employees were covered by social insurance, including free medical care.

In 1977 there were 23,920 doctors and 87,232 beds in some 807 hospitals.

COMMUNICATIONS

Roads. There are 3,876 miles of all-weather roads maintained by the Ministry of Works, of which 796 miles are two-lane bitumenized highways, and some 11,230 miles of other roads, maintained by district governments.

Railways. On 26 Aug. 1977 Uganda Railways was formed following break-up of the East African Railways administration. The network totals 1,120 km (metre gauge).

Aviation. Entebbe had a first-class international airport which had direct flights to Europe, Rhodesia, Sudan, Kenya, Burundi, Ghana, Ethiopia, Zaïre, Nigeria, USSR, and Rwanda by Sudan Airways, Air Congo, SABENA, Air France, Ethiopian Airlines, Air Zaïre and Aeroflot. The airport was damaged during the 1979 invasion. Eleven other government airfields are used for internal communications.

Posts. There were 48,884 telephones in use at 1 Jan. 1978.

Cinemas. In 1971 there were 16 cinemas with a seating capacity of 8,000.

JUSTICE, EDUCATION AND WELFARE

Justice. The High Court of Uganda, presided over by the Chief Justice and 12 puisne judges, exercises original and appellate jurisdiction throughout Uganda. Subordinate courts, presided over by Chief Magistrates and Magistrates of the first, second and third grade, are established in all areas: jurisdiction varies with the grade of Magistrate. Chief and first-grade Magistrates are professionally qualified; second- and third-grade Magistrates are trained to diploma level at the Law School, Entebbe.

Chief Magistrates exercise supervision over and hear appeals from second- and third-grade courts.

The Court of Appeal for Eastern Africa was re-established on 9 Dec. 1962 as the Court of Appeal for Uganda; it hears appeals from the High Court.

A law school has been established at Entebbe to train magistrates in civil and criminal law.

The African courts have been integrated with the Central Government Courts so that a unified courts system has been established.

Education. Education is a joint undertaking by the Government, local authorities and, to some extent, voluntary agencies. The education system is divided into 3 sectors, primary, secondary and post-secondary. The primary course covers 7 years. There were 786,899 pupils in grant-aided primary schools in 1972. Education at secondary level falls into 4 categories, namely, secondary schools, which are the grammar type of schools with a course extending over 6 years to Higher School Certificate; technical schools; farm schools; and primary teacher-training colleges. Further education is provided at the Uganda Technical College, the National Teachers' College, the Uganda College of Commerce and Agricultural Colleges.

There are also several Departmental Training Schools for training staff for different departments.

The medical department has 8 such schools for training nurses, midwives, medical assistants, health inspectors, and other medical staff.

University level education is available at Makerere University College and the 2 other constituent Colleges of the University of East Africa: the University College, Nairobi, in Kenya, and the University College, Dar es Salaam, in Tanzania. Uganda students also go to universities and colleges outside East Africa for higher education.

Health. In 1973 there were 300 doctors and over 15,000 hospital beds.

POST-REVOLUTION HISTORY. Up to 12 March 1917 the territory now forming the USSR, together with that of Finland, Poland and certain tracts ceded in 1918 to Turkey, but less the territories then forming part of the German, Austro-Hungarian and Japanese empires—East Prussia, Eastern Galicia, Transcarpathia, Bukovina, South Sakhalin and Kurile Islands—which were acquired during and after the Second World War, was constituted as the Russian Empire. It was governed as an autocracy under the Tsar, with the aid of Ministers responsible to himself and a State Duma with limited legislative powers, elected by provincial assemblies chosen by indirect elections on a restricted franchise.

On 12 March 1917 a revolution broke out. The Duma parties, the same day, set up a Provisional Committee of the State Duma, while the factory workmen and the insurgent garrison of Petrograd elected a Council (Soviet) of Workers' and Soldiers' Deputies. Soviets were also elected by the workmen in other towns, in the Army and Navy and, as time went on, by the peasantry. On 15 March 1917 the Tsar abdicated, and the Provisional Committee, by agreement with the Petrograd Soviet, appointed a Provisional Government and, on 14 Sept., proclaimed a republic. However, a political struggle went on between the supporters of the Provisional Government—the Mensheviks and the Socialist-Revolutionaries—and the Bolsheviks, who advocated the assumption of power by the Soviets. When they had won majorities in the Soviets of the principal cities and of the armed forces on several fronts, the Bolsheviks organized an insurrection through a Military-Revolutionary Committee of the Petrograd Soviet. On 7 Nov. 1917 the Committee arrested the Provisional Government and transferred power to the second All-Russian Congress of Soviets. This elected a new government, the Council of People's Commissars, headed by Lenin.

On 31 Jan. 1918 the third All Russian Congress of Soviets issued a Declaration of Rights of the Toiling and Exploited Masses, which proclaimed Russia a Republic of Soviets of Workers', Soldiers' and Peasants' Deputies; and on 10 July 1918 the fifth Congress adopted a Constitution for the Russian Socialist Federal Soviet Republic. In the course of the civil war other Soviet Republics were set up in the Ukraine, Belorussia and Transcaucasia. These first entered into treaty relations with the RSFSR and then, in 1922, joined with it in a closely integrated Union.

AREA AND POPULATION. The total area of the Soviet Union in April, 1965 was 22.4m. sq. km (8.65m. sq. miles). The census population on 15 Jan. 1970 was 241.7m. (111.3m. males, 130.4m. females, 130m. urban, 105.7m. rural). The census population on 17 Jan. 1979 was 262.4m. (122.3m. males, 140.1m. females, 163.6m. urban, 98.8m. rural). The increase of 27.6m. in urban population between 1970 and 1979 was due to natural increase and 15.6m. rural dwellers becoming part of the urban population resulting from migration because of the development of industry and transport, and increased farm mechanization, and from the urbanization of large rural centres. Consequently, despite a natural increase of 8.7m. in rural area, there was a net decrease of 6.9m. over this period. Population at 1 Jan. 1980, 264.5m. (123.3m. males, 141.2m. females; 166.1m. urban; 98.4m. rural).

Regions, towns, streets, factories, schools, etc., named after Stalin were renamed in Nov. 1961 when Stalin's body was removed from the Lenin-Stalin tomb in Red

Square in Moscow. Similarly, in Jan. 1962 towns bearing the names of Molotov, Kaganovich and Malenkov were renamed.

The areas (in 1,000 sq. km) and population (in 1m., in Jan. 1980) of the constituent republics are as follows (capitals in brackets):

CONSTITUTION

Constituent Republics. The Union of Soviet Socialist Republics was formed by the union of the RSFSR, the Ukrainian Soviet Socialist Republic, the Belorussian Soviet Socialist Republic and the Transcaucasian Soviet Socialist Republic; the Treaty of Union was adopted by the first Soviet Congress of the USSR on 30 Dec. 1922. In May 1925 the Uzbek and Turkmen Autonomous Soviet Socialist Republics and in Dec. 1929 the Tadzhik Autonomous Soviet Socialist Republic were declared constituent members of the USSR, becoming Union Republics.

At the 8th Congress of the Soviets, on 5 Dec. 1936, a new constitution of the USSR was adopted. The Transcaucasian Republic was split up into the Armenian Soviet Socialist Republic, the Azerbaijan Soviet Socialist Republic and the Georgian Soviet Socialist Republic, each of which became constituent republics of the Union. At the same time the Kazakh Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic, previously autonomous republics within the RSFSR, were proclaimed constituent republics of the USSR.

In Sept. 1939 Soviet troops occupied eastern Poland as far as the 'Curzon line', which in 1919 had been drawn on ethnographical grounds as the eastern frontier of Poland, and incorporated it into the Ukrainian and Belorussian Soviet Socialist Republics. In Feb. 1951 some districts of the Drogobych Region of the Ukraine and the Lublin Voivodship of Poland were exchanged.

On 31 March 1940 territory ceded by Finland was joined to that of the Autonomous Soviet Socialist Republic of Karelia to form the Karelo-Finnish Soviet Socialist Republic, which was admitted into the Union as the 12th Union Republic. On the 16 July 1956 the Supreme Soviet of the USSR adopted a law altering the status of the Karelo-Finnish Republic from that of a Union (constituent) Republic of the USSR to that of an Autonomous (Karelian) Republic within the RSFSR.

On 2 Aug. 1940 the Moldavian Soviet Socialist Republic was constituted as the 13th Union Republic. It comprised the former Moldavian Autonomous Soviet Socialist Republic and Bessarabia (44,290 sq. km, ceded by Romania on 28 June

1940), except for the districts of Khotin, Akerman and Ismail, which, together with Northern Bukovina (10,440 sq. km), were incorporated in the Ukrainian Soviet Republic. The Soviet-Romanian frontier thus constituted was confirmed by the peace treaty with Romania, signed on 10 Feb. 1947. On 29 June 1945 Ruthenia (Sub-Carpathian Russia, 12,742 sq. km) was by treaty with Czechoslovakia embodied in the Ukrainian Soviet Socialist Republic.

On 3 Aug. 1940 Estonia, Latvia and Lithuania were incorporated in the Soviet Union as the 14th, 15th and 16th Union Republics. The change in the status of the Karelo-Finnish Republic has reduced the number of Union Republics to 15.

After the defeat of Germany it was agreed by the governments of the UK, the USA and the USSR (by the Potsdam declaration) that part of East Prussia should be embodied in the USSR. The area (11,655 sq. km), which includes the towns of Königsberg (renamed Kaliningrad), Tilsit (renamed Sovetsk) and Insterburg (renamed Chernyakhovsk) was joined to the RSFSR by decree of 7 April 1946.

By the peace treaty with Finland, signed on 10 Feb. 1947, the province of Petsamo (Pechenga), ceded to Finland on 14 Oct. 1920 and 12 March 1946, was returned to the Soviet Union. On 19 Sept. 1955 the Soviet Union renounced its treaty rights to the naval base of Porkkala-Udd and on 26 Jan. 1956 completed the withdrawal of the forces from Finnish territory.

In 1945, after the defeat of Japan, the southern half of Sakhalin (36,000 sq. km) and the Kurile Islands (10,200 sq. km) were, by agreement with the Allies, incorporated in the USSR.¹

¹ However, Japan asks for the return of the Etorofu and Kunashiri Islands as not belonging to the Kurile Islands proper. The Soviet Government informed Japan on 27 Jan. 1960 that the Habomai Islands and Shikotan would be handed back to Japan on the withdrawal of the American troops from Japan.

GOVERNMENT. The Soviet Union is a socialist state of the whole people (1977 constitution), the political units of which are the Soviets of Working People's Deputies. All central and local authority is vested in these Soviets.

The economic foundation of the USSR is the socialist system of economy and the socialist ownership of the means of production. There are two forms of socialist property: (1) state property (property of the whole people); (2) co-operative and collective farm (*Kolhoz*) property (property of individual collective farms and property of co-operative associations). The land, mineral deposits, waters, forests, mills, factories, mines, railways, water and air transport, banks, means of communication, large state-organized agricultural enterprises, such as state farms (*Sovhozy*), machine-repair stations and the like, as well as municipal enterprises and the principal dwelling-house properties in the cities and industrial localities, are state property, but the land occupied by collective farmers is secured to them in perpetuity so long as they use it in accordance with the laws of the country. The members of the *Kolhozy* may have small plots of land attached to their dwellings for their own use. Peasants unwilling to enter a *Kolhoz* may retain their individual farms, but they are not allowed to employ hired labour. The right of personal property of citizens in their income from work and in their savings, in their dwelling-houses and auxiliary household economy, their domestic furniture and utensils and objects of personal use and comfort, as well as the right of inheritance of personal property of citizens, are protected by law. The constitution recognizes the right of all citizens to work, rest, leisure, education, health protection, housing, maintenance in old age, sickness or incapacity, without distinction of sex, race or nationality, and lays down that any direct or indirect restriction of the rights of, or conversely, the establishment of direct or indirect privileges for, citizens on account of their race, religion or nationality, as well as the advocacy of racial or national exclusiveness or hatred and contempt, is punishable by law. The franchise is enjoyed by all citizens of the USSR, including members of the Armed Forces, who have reached the age of 18, irrespective of sex, with the exception of the insane and of persons convicted by court of law to sentences including deprivation of rights. Candidates for election to the Supreme Soviet of the USSR must be 21 years of age; for all other authorities the minimum age for candidates is 18. A member of any

Soviet may be recalled by a decision of a majority of his or her electors if he or she fails to give satisfaction (law on procedure for this, 30 Oct. 1959).

The USSR consists of 15 Union Republics, each inhabited by a major nationality which gives its name to the republic. These are divided into 127 territories and regions, and these again into 3,150 districts and 2,052 towns and 3,811 urban settlements (1 Jan. 1977). Within the districts there are 41,175 rural districts (usually each including a number of villages). The territories and regions also include a number of smaller nationalities, forming their own self-governing units—20 Autonomous Republics, 8 Autonomous Regions and 10 Autonomous Areas.

The highest legislative organ is the Supreme Soviet of the USSR. It consists of 2 chambers with equal legislative rights, elected for a term of 5 years: the Soviet of the Union and the Soviet of Nationalities.

The Soviet of the Union is elected by the citizens of the USSR on the basis of 1 deputy for every 300,000 of the population. The Chamber elected on 4 March 1979 consists of 750 members (*Chairman*, A. P. Shitikov).

The Soviet of Nationalities is elected by the citizens of the USSR, voting by Union and Autonomous Republics, Autonomous Regions and Autonomous Areas on the basis of 32 (from June 1966) deputies from each Union Republic, 11 deputies from each Autonomous Republic, 5 deputies from each Autonomous Region and 1 deputy from each Autonomous Area. The Chamber elected on 4 March 1979 consists of 750 members (*Chairman*, V. P. Rubenis).

Each chamber has 14 standing committees: planning and budget; industry; transport and communications; building; agriculture; health and social welfare; education, science and culture; trade and services; draft legislation; foreign affairs; youth affairs; natural environment; credentials; consumer goods.

The highest executive and administrative organ is the Council of Ministers (called People's Commissars before 16 March 1946); they are appointed by the Supreme Soviet.

The Presidium of the Supreme Soviet of the USSR is elected at a joint session of both chambers of the Supreme Soviet and consists of the chairman, first vice-chairman, 15 vice-chairmen (1 from each of the Union Republics), 21 members and the secretary. It acts as the supreme state authority between sessions of the Supreme Soviet and is accountable to the latter for all its activities.

Deputies are elected by the voters on the basis of universal, equal and direct suffrage by secret ballot. The only legal political party is the Communist Party; non-members are classed as non-party citizens. Candidates up to the present have been selected at a preliminary 'constituency electoral consultation' (selection conference), to which organizations which have put forward nominations send delegates, who discuss the various nominees. As a consequence, so far, a single candidate has been arrived at in each constituency, whose name has appeared on the ballot paper, to be struck out or approved by a cross as the voter desires. This procedure, however, is not laid down by the Constitution, and may be altered. At the election held on 4 March 1979, 174,920,221 electors voted. The Supreme Soviet elected on that day consists of 1,075 Communist and 425 non-party deputies; 487 were women, 522 manual workers in industry and state farms, and 244 collective farmers.

On 1 Feb. 1944 each of the constituent republics of the Union was given the right to have separate Commissariats (now Ministries) for Defence and Foreign Affairs. After the death of Stalin, 5 March 1953, a number of Ministries comprising different branches of trade, engineering, transport and electricity were merged into single Ministries. In 1957 the number of Ministries in the central government was reduced from 52 to 19, and in Dec. 1959 to 15; but in Oct. 1964 it was again increased to 47, in Aug. 1966 to 48 and in 1968 to 56.

Elections to Supreme Soviets and local authorities in Union and Autonomous Republics took place on 24 Feb. 1980.

The Council of Ministers, in July 1976 included 13 vice-chairmen, the Premiers of the 15 Union Republics, the head of the Central Statistical Department, the chairman of 8 commissions of the Presidium of the Council of Ministers (4 of them vice-chairmen of the Council), of the Committee for People's Control, State Planning Committee, the Agricultural Technique Organization and of 7 other State Committees; 62 Ministers, and the chairman of the State Bank.

Soon after the adoption of the 1936 Constitution all the constituent republics of the Union held their Soviet congresses, at which they adopted their own constitutions based in all essentials on the Constitution of the Union, but adapted where necessary to national and local requirements. Article 73 of the 1977 Constitution reserves to the central government the spheres of war and peace, diplomatic relations, defence, foreign trade, state security, economic planning, education, criminal and civil codes, etc. The right of the constituent republics to withdraw from the Union is expressly recognized. In April 1978 the Supreme Soviets of the constituent republics adopted new constitutions based on the new Constitution of the USSR.

The 20 Autonomous Republics include 16 in the RSFSR, 1 in Azerbaijan, 2 in Georgia, 1 in Uzbekistan. Five Autonomous Regions are in the RSFSR, 1 each in Georgia, Azerbaijan, Tadzhikistan; all 10 Autonomous Areas are in the RSFSR.

The Autonomous Republics are governed by their own Supreme Soviet and Council of Ministers: the regions and territories, districts, towns and rural areas have their own Soviets, elected for a term of 2½ years. In June 1975, 9,259 deputies were elected to the Supreme Soviets of Union and of Autonomous Republics: 3,393 (36.6%) were women, 3,126 (33.8%) non-Party, 3,055 (33%) industrial workers and 1,604 (17.3%) collective farmers. To the regional, district and other local Soviets in June 1977, 2,229,641 deputies were elected, 1,093,235 of them women (42.3%), 1,266,949 non-Party (56.8%), 943,240 (42.3%) industrial workers and 582,373 (26.1%) collective farmers (June 1977).

In June 1977 there were 47,412 rural and urban Soviets with 1.96m. deputies, 1.7m. voluntary co-opted members participating in their standing committees and 43,000 women were chairmen or secretaries of Soviets.

Communist Party. According to the rules adopted by the 22nd Congress of the Party on 31 Oct. 1961, the Communist Party of the Soviet Union 'unites, on a voluntary basis, the more advanced, politically more conscious section of the working class, collective-farm peasantry and intelligentsia of the USSR', whose principal objects are to build a Communist society by means of gradual transition from Socialism to Communism, to raise the material and cultural level of the people, to organize the defence of the country and to strengthen ties with the workers of other countries.

The Party is built on the territorial-industrial principle. The supreme organ is the Party Congress. Ordinary congresses are convened not less than once in 4 years. The Congress elects a Central Committee which meets at least every 6 months, carries on the work of the Party between congresses, and guides the work of central Soviet and public organizations through Party groups within them.

The Central Committee forms a Political Bureau to direct the work of the Central Committee between plenary meetings, a Secretariat to direct current work and a Commission of Party Control to consider appeals against decisions about expulsion. Similar rules hold for the Regional, Territorial and Republican Party organizations.

Over 414,000 primary Party organizations exist in mills, factories, state tractor repair stations and other economic establishments, in collective farms, units of the Soviet Army and Navy, in villages, offices, educational establishments, etc., where there are at least 3 Party members. In March 1980 over 43% of the members were industrial workers, 13% were collective farmers and 44% office and professional workers, 25.1% were women.

The Central Committee elected by the 26th Congress in March 1980 consisted of 319 members and 151 candidate members.

In March 1981 the Political Bureau of the Central Committee consisted of the following members: Y. V. Andropov, L. I. Brezhnev, K. U. Chernenko, M. S. Gorbachov, V. V. Grishin, A. A. Gromyko, A. P. Kirilenko, D. A. Kunayev, A. Y. Pelshe, G. V. Romanov, M. A. Suslov, D. F. Ustinov, V. V. Shcherbitsky, N. A. Tikhonov, and the following alternate members: G. A. Aliiev, P. N. Demichev, T. Y. Kiselev, V. V. Kuznetsov, B. N. Ponomaryov, S. R. Rashidov, E. A. Shevardnadze, M. S. Solomentsev.

Secretariat: L. I. Brezhnev (*General-Secretary*); K. U. Chernenko; V. I. Dolgikh; I. V. Kapitonov; A. P. Kirilenko; B. N. Ponomaryov; M. S. Gorbachov; K. V. Rusakov; M. A. Suslov; M. V. Zymianin.

Chairman of the Commission of Party Control: A. Y. Pelshe.

Vice-Chairman: Z. T. Serdyuk.

In March 1980 the Communist Party had 17.5m. members. Membership of the Young Communist League was 37.8m. in April 1978.

The Communist International (the Comintern), founded on the initiative of the Russian Communist Party in 1919, was dissolved on 15 May 1943. In Oct. 1947 a Communist Information Bureau (Cominform) was set up in Belgrade to serve the Communist parties of Bulgaria, Czechoslovakia, France, Hungary, Italy, Poland, Romania, USSR and Yugoslavia. On 28 June 1948 Yugoslavia was expelled from the Cominform and the bureau was transferred to Bucharest. The Cominform was on 17 April 1956 declared dissolved.

DEFENCE. On 26 Feb. 1946 the control of the Soviet Armed Forces was unified under a single Ministry of the Armed Forces. On 25 Feb. 1950 the Defence Ministry was divided into a War Ministry and a Navy Ministry; on 15 March 1953 a single Ministry of Defence was reconstituted.

In 1955 the Air Defence Command and in 1960 the Strategic Rocket Forces were established as the 4th and 5th 'branches' of the armed forces beside the army, navy and air force.

The direction of Party and political work in the Armed Forces is exercised by the Central Committee of the Communist Party of the Soviet Union through the chief political directorate of the Ministry of Defence. The chiefs of the political departments of military commands, fleets and armies must be Party members of 5 years' standing and the chiefs of political departments of divisions and regiments Party members of 3 years' standing. Nearly 90% of the officers are members of the Communist Party or Young Communist League, and 45% have had an engineering and technical education.

Military service begins at the age of 19 (or 18 for graduates of secondary schools). Active service lasts 2 years for privates in the Army and M.V.D. troops, 3 years for

n.c.o.s in the Army and M.V.D. troops and for privates and n.c.o.s in the Air Force, 4 years for privates and n.c.o.s in the Coastal Defence, 5 years for ratings in the Navy. Reserve service lasts up to the ages of 35, 45 or 50 years according to fitness, family status and other considerations. Conscientious objection is treated as a criminal offence. Students in places of higher education are freed from military service, but receive military instruction. About half the service personnel have had higher, or 10-year, education and over 80% are members of the Communist Party.

In Jan. 1960 Prime Minister Khrushchov quoted the following figures of the armed forces of the Soviet Union: 1927, 586,000; 1937, 1,433,000; 1941, 4,207,000; May 1945, 11,365,000; 1948, 2,874,000; 1955, 5,763,000; 1959, 3,623,000; 1960, 2,423,000. The reduction, according to Khrushchov, was mainly due to the switch-over to rocket and nuclear weapons.

The estimated expenditure on defence (in 1m. new roubles) for 1961 was 9,255; 1970, 17,900; 1971, 17,900; 1972, 17,900; 1973, 17,900; 1974, 17,700; 1975, 17,400; 1976, 17,400; 1977, 17,200; 1978, 17,200; 1979, 17,200.

Eastern Security Treaty. On 14 May 1955 the USSR, Albania, Bulgaria, Czechoslovakia, the German Democratic Republic, Hungary, Poland and Romania signed in Warsaw a 20-year treaty of friendship and collaboration, after the USSR had (on 7 May) annulled the 20-year treaties of alliance with the UK (1942) and France (1944).

The main provisions of the treaty are as follows:

ARTICLE 4. In case of armed aggression in Europe against one or several States party to the pact by a State or group of States, each State member of the pact . . . will afford to the State or States which are the object of such aggression immediate assistance . . . with all means which appear necessary, including the use of armed force. . . . These measures will cease as soon as the Security Council takes measures necessary for establishing and preserving international peace and security.

ARTICLE 5. The contracting Powers agree to set up a joint command of their armed forces to be allotted by agreement between the Powers, at the disposal of this command and used on the basis of jointly established principles. They will also take over agreed measures necessary to strengthen their defences.

ARTICLE 9. The present treaty is open to other States, irrespective of their social or Government regime, who declare their readiness to abide by the terms of the treaty in order to safeguard peace and security of the peoples.

ARTICLE 11. In the event of a system of collective security being set up in Europe and a pact to this effect being signed . . . to which each party to this treaty will direct its efforts . . . the present treaty will lapse from the day such a collective security treaty comes into force.

It is estimated (1978) that the armed forces of the Warsaw pact countries total 3.83m., including 3.45m. Russians, compared with 4.82m. NATO forces.

Marshal Grechko was from July 1960 to April 1967 C.-in-C. of the united Armed Forces, with headquarters in Moscow. He was succeeded by Marshal I. I. Yakubovsky in 1967 and by Marshal V. G. Kulikov in Jan. 1977.

In 1962 Albania was no longer invited to the Warsaw Pact meetings, without being formally expelled.

Two Soviet divisions are stationed in Poland, 20 divisions in German Democratic Republic, 4 divisions in Hungary and 5 in Czechoslovakia.

Army. The Army was, in 1980, thought to consist of about 173 divisions, of which some 100 are of combat readiness, numbering about 1,825,000 men.

The mechanized and tank divisions are equipped with the T54 medium tank, mounting an 85-mm gun, and with the Stalin III heavy tank, mounting a 122-mm gun. The T54 is being replaced by the T62 medium tank mounting a 115-mm gun. Rocket units are stated to be 'the main force' of the Army.

In addition to the Soviet Army, there are some 460,000 security and border troops.

Navy. The Soviet Fleet is steadily expanding and progressively modernizing under a continuity of policy and technology given by the quarter century in office of Admiral of the Fleet of the Soviet Union Sergei Georgiyevich Gorshkov, C.-in-C. of the Soviet Navy and Deputy Minister of Defence. The overall picture is of an unprecedentedly powerful and well-balanced navy, the capacity of which is increasing annually by scientific application if not by numerical strength.

The principal surface ships of the Soviet Navy are as follows:

The new construction programme includes 2 medium aircraft carriers (successors of *Kiev* and *Minsk*), 1 considerably larger aircraft carrier, 1 large battle cruiser, 6 nuclear powered ballistic missile submarines, 2 nuclear powered cruise missile submarines, 6 nuclear powered torpedo-armed submarines and 9 guided missile cruisers.

In the revised forward procurement programme more aircraft carriers of improved 'Kiev' class are envisaged, together with nuclear powered surface ships and specialized support ships, to fit into the Soviet global and strategic maritime pattern.

There are 5 shipyards in and near Leningrad; Black Sea yards are at Nikolaiev and Sevastopol, new shipyards are at Molotovsk in the White Sea region and at Komsomolsk on the Amur.

The completion of a through canal system between the Baltic and White Seas, allowing regular traffic *via* the North-East Passage (during the ice-free season), facilitates the navigation of suitable ships between the Baltic and Far East.

Estimated number of personnel in 1981 totalled 450,000, including naval aviation, naval infantry, coastal defence, cadets and apprentices (but excluding 75,000 civilians in administration and new construction); only 18% are volunteers, *i.e.*, officers and petty officers, the remainder comprising national service men serving 3 years at sea and 2 if ashore.

Air Force. The Soviet Air Force (excluding PVO air defence force) is believed to consist, in 1980, of over 470,000 officers and men and some 8,500 first-line aircraft, excluding second-line and training types. To supplement long-range rocket missiles (limited by SALT I interim agreement to 1,618 ICBM, 600 MRBM IRBM), the DA strategic bomber force has still 113 Tupolev Tu-95 ('Bear')¹ 4-turboprop bombers, 74 Myasishchev M-4 4-jet bombers and flight-refuelling tankers ('Bison'), 420 twin-jet Tupolev Tu-16 ('Badger'), and 140 supersonic Tupolev Tu-22 ('Blinder') bombers, ECM and reconnaissance aircraft, and at least 100 Tupolev ('Backfire')

¹ For convenience Soviet aircraft and missiles are usually referred to by invented English names in non-Soviet military writings.

swing-wing bombers. All types are used also by the Naval Air Force for long-range maritime reconnaissance; the Tu-16, Tu-95, Tu-22 and 'Backfire' can carry air-to-surface guided self-propelled missiles and all 5 types have provision for flight refuelling.

The FA tactical air forces, under local army command in the field, have an estimated total of 5,000 ground attack and reconnaissance aircraft, including 1,400 MiG-23 27 ('Flogger') and 500 two-seat Sukhoi Su-24 ('Fencer') supersonic swing-wing aircraft, 220 twin-jet Yakovlev Yak-28 ('Brewer') multi-purpose combat aircraft, 200 single-jet Sukhoi Su-7B ('Fitter-A'), 650 swing-wing Su-17 ('Fitter-C D G H'), and 1,000 MiG-21 ('Fishbed') fighter-bombers, 300 MiG-21 and 170 MiG-25 ('Foxbat') reconnaissance aircraft, with strong interceptor, transport and helicopter support. In service in large numbers is the Mi-24 ('Hind') assault helicopter, in transport and gunship versions. The PVO defence forces, organized as a separate service, have an estimated total of 2,600 jet interceptors. A high proportion of the squadrons are equipped with the latest MiG-23 ('Flogger'), Su-15 ('Flagon') and MiG-25 ('Foxbat') all-weather interceptors, armed with air-to-air missiles. The single-seat single-engined Su-9 and Su-11 ('Fishpot') and twin-jet Yak-28P ('Firebar') and Tu-28P ('Fiddler') make up the balance of the force. Early warning and fighter-control duties are performed by radar-carrying adaptations of the Tu-114 turboprop transport, redesignated Tu-126 ('Moss'). Very large numbers of surface-to-air guided missiles are operational, on some 10,000 launchers, including the 'Guild', 'Guideline', 'Goa', 'Gainful' and 'Ganef', the long-range 'Gammon' and the 'Galosh' which is deployed around Moscow on 64 launchers and has anti-missile capability.

Soviet Air Force transport squadrons have an estimated total of 1,550 aircraft, consisting primarily of 600 An-12 ('Cub') 4 turboprop transports and 40 An-24s ('Coke') and An-26s ('Curl'), with 40 very large An-22s ('Cock'), 75 new Il-76 ('Candid') heavy four-jet freighters, a variety of older and smaller types and over 3,200 helicopters, including the turbine-powered Mi-6, Mi-8 and Mi-10 flying crane. Training aircraft include the piston-engined Yak-18 primary trainer, the Czech-built L-29 Delfin and L-39 jet basic trainers and versions of operational types such as MiG-21, MiG-23, MiG-25, MiG-15, Su-7, Su-9, Su-17, Yak-28 and Tu-22.

Naval Air Force. Operating 1,425 fixed-wing aircraft and helicopters, the Soviet Navy has the world's second largest naval air arm. Under the control of the various naval commands, *i.e.*, Baltic, Black Sea and Pacific, the Naval Air Arm has an estimated 620 land-based maritime patrol bombers and 80 flying-boats. Primary offensive aircraft are 280 Tu-16 ('Badger') twin-jet bombers, and 50 'Backfire' swing-wing bombers, able to carry air-to-surface missiles, 40 supersonic twin-jet Tu-22 ('Blinder') reconnaissance bombers and 80 Beriev M-12 ('Mail') maritime patrol amphibians. Some 75 Tu-142 ('Bear') 4-engined bombers, as well as Tu-16s, Il-18s ('Coot-A') and 55 Il-38s ('May'), are used for long-range over-water reconnaissance and electronic intelligence missions. The Tu-142 also has an important targeting role for ships fitted with anti-shipping missile launchers. Over 250 anti-submarine helicopters, notably the Ka-25 ('Hormone'), are carried in naval vessels, including 2 aircraft carriers (which also operate Yak-36 ('Forger') VTOL attack reconnaissance aircraft) and 2 helicopter carriers. Several hundred transport, utility and training fixed-wing aircraft and shore-based ASW helicopters are also under Navy control.

INTERNATIONAL RELATIONS

Membership. USSR is a member of UN, Comecon and the Warsaw Pact.

External Debt. The debts contracted by the tsarist régime, *i.e.*, before 1917, have been repudiated by the Soviet Government.

After the Second World War the USSR has become one of the biggest creditor

countries in the world. Between 1945 and Jan. 1978 economic aid in the form of 2% or 2½% loans to be repaid, as a rule, over 12 years has been advanced for 2,628 industrial and agricultural enterprises in Socialist countries and 1,035 enterprises in developing countries; the latter including loans (in 1m. old roubles): India, 2,500m.; Egypt, 2,300m.; Iraq, 550m.; Afghanistan, 480m.; Indonesia, 443m.; Argentina, 400m.; Ethiopia, 400m.; Guinea, 140m.; Cuba, US\$100m. 76% of aid is for industrial development and 14% for agriculture and transport. 1,403 industrial plants have been completed in these countries, and nearly as many are being completed; 340,000 native skilled workers have been trained by Soviet specialists in Africa and Asia alone, and many thousands more in the USSR. Agreements for economic co-operation operate with 45 developing countries in all.

ECONOMY

Planning. Planning is based on public ownership in industry and trade, and on mixed public and collective (co-operative) ownership in agriculture. The first plan drawn up by Gosplan (the State Planning Commission) was the 'Goelro' drawn up in 1920. This was to be the basis for the economic development of the country and for the construction of a system of electrical power plants with an aggregate capacity of 1.75m. kw., in the course of 15 years. By 1927-28 the capacity of the electrical stations in operation was already 1,792,000 kw. with an output of 5,160m. kwh.

In 1925 Gosplan started to draw up annual plans for the national economy, and in 1927-29 undertook to draw up the first 5-year plan, which was to have run from 1 Oct. 1928 to 30 Sept. 1933. It was considered completed in Dec. 1932, when 93.7% of the planned industrial output for the 5 years had been carried out. Stress was laid on the development of the heavy industries, particularly in the outlying areas rich in natural resources and inhabited by the national minorities.

The second 5-year plan ran from 1933 to 1937. It aimed at strengthening the defensive capacity of the Soviet Union, and more stress was laid than in the first 5-year plan on increasing the output and improving the quality of consumer goods. About one-half of the total investments in new heavy industrial constructions was allocated to the eastern areas. By the end of 1937 the plan for large-scale industry was overfulfilled by 4%, but the target for the light industries and consumer goods was not reached.

The third 5-year plan, 1938-42, envisaged an average annual increase in output of 13.5%, but that of the means of production was to be 15.25% and the means of consumption 11%; stress was to be laid on war industry. During the first 3½ years, industrial output was increasing annually by an average of 13%. In the Urals, the Volga area, Siberia and Central Asia industrial output increased during 1938-40 by about 50%. One of the richest grain-growing areas of the Soviet Union was created in the eastern part of the country. Capital construction amounted in value to a total of 130,000m. roubles; more than one-third fell to the eastern areas. The plan was interrupted in June 1941, when Hitler attacked the USSR. The whole of the national economy was switched to help the war effort, and whole industries were shifted from the western areas to the east.

For details of the fourth 5-year plan, 1946-50, see THE STATESMAN'S YEAR-BOOK, 1952, pp. 1424 f. The 1950 target of the gross output of industry was exceeded by 2%.

On 10 Oct. 1952 the 19th Congress of the Communist Party issued directives for the fifth 5-year plan, 1951-55; for details, see THE STATESMAN'S YEAR-BOOK, 1953, pp. 1435-36. During Sept. and Oct. 1953 the Government issued a number of decrees to stimulate the development of agriculture, the output of consumer goods and the expansion of the home trade. For details of these decrees, see THE STATESMAN'S YEAR-BOOK, 1955, pp. 1448-50.

The directive for the sixth 5-year plan, 1956-60, was adopted by the 20th Congress of the Communist Party on 25 Feb. 1956; for details see THE STATESMAN'S YEAR-BOOK, 1958, p. 1472.

In May 1955 Gosplan was reorganized to consist of 2 state commissions for long-term planning (Gosplan) and for current planning (Goseconomcommissiya); at the same time a committee was set up to improve the application to industry of advanced science and technology (Gostekhnika).

Between 1954 and 1956 considerable changes were made in planning methods. In March 1954 collective farms were given greater authority over planning their own output, only the quantities required by the State in fixed deliveries being determined beforehand, and voluntary sales by contract. In 1955 they were authorized to make changes in their statutes, which had followed a fixed model since 1935. In 1955-57 over 15,000 industrial establishments in various basic industries, previously controlled by the Union Government, and later a number of entire light industries were turned over to the Constituent (Union) Republics. By 1962 they controlled from 95 to 100% of all industrial output.

In 1957 a comprehensive plan for decentralization of management of industry was initiated. Industrial establishments responsible for about 71% of all Soviet industrial output were turned over to Economic Councils set up in 104 (in 1963: 47) economic administrative areas. These in 1962 controlled 73% of all industrial production. The Ministries previously responsible for the industries concerned were either abolished or transformed into purely planning and supervisory bodies. The State Committee for current planning was abolished, and Gosplan was given wider powers.

In consequence of this change a 7-year plan for 1959-65 was adopted by the 21st Congress of the Communist Party in Feb. 1959. Industrial output was to increase by 80%; it was in fact, in 1965, 84% above that of 1959. Capital investments would roughly equal the total for 1917-58: special attention was to be given to mechanization of agriculture and arduous industrial labour, automation and new technological processes, and housing. Diesel or electric traction of railway freight was to rise to 85%. Real incomes were to rise 40%, the 7-hour day (6 hours for miners) became general in 1960 and the 40-hour week in 1961, and introduction of the 35-hour week (30 hours for miners) began in 1964.

In Oct. 1965 the regional and Republic Economic Councils were abolished and also 28 Ministries for various branches of industry (17 Union-Republican, *i.e.*, corresponding to similar Ministries in the Union Republics, and 11 all-Union).

A 20-year plan was adopted by the 22nd Congress of the Communist Party on 31 Oct. 1961, which envisaged a ninefold growth in electricity output and big increases in production of steel, oil, coal, machinery and cement, and also in grain, milk and meat. Two new iron and steel centres were to be developed in Kazakhstan and in Kursk region. A single deepwater system was to link the main inland waterways in the European USSR. Some rivers in northern Asia were to be diverted south for irrigation purposes. A 6-hour day for a 6-day week or 35 hours for a 5-day week were to be achieved by 1970. Housing, water, gas, heating, public urban transport and school meals were to be free by 1980. These and cognate measures were to provide 'the material and technical basis of communism'.

The 23rd Congress of the Communist Party in April 1966 adopted 'directives' for a 5-year plan for 1966-70. Under these, power output was to reach 830,000-850,000m. kwh.; oil, 345-355m. tons; coal, 665-675m. tons; steel, 124-129m. tons; mineral fertilizers, 62-65m. tons; machine-tools, 220,000-230,000; cars, 700,000-800,000; tractors, 600,000-625,000; paper, 5-5.3m. tons; cement, 100-105m. tons; fabrics, 9.5-9.8m. sq. metres; leather footwear, 610-630m. pairs; meat, 5.9-6.2m. tons; butter, 1.2m. tons; sugar, 9.8-10m. tons. The average annual output of grain was to increase 30% over 1964-65, 7,000 km of new railway line, 63,000 km of new motor roads and 35-40 new airports were to be built; marine tonnage was to be increased by 50%.

The 9th Five-Year Plan adopted in 1971 provided for an increase in electric power output to 1,065,000m. kwh.; oil to 496m. tons; gas, 320,000m. cu. metres; steel, 146m. tons; coal, 695m. tons; mineral fertilizers, 90m. tons; tractors, 575,000; passenger cars, 1.26m., and lorries, 750,000. Grain output was to rise to 195m. tons in 1975; meat, approximately 16m. tons, milk, 100m. tons; textiles, 11,000m. sq. metres; leather footwear, 830m. pairs. Average wages were to increase by 22%, incomes of collective farmers 30-35%, and the average of real incomes by 31%. 3,400 miles of new railway tracks were to be built and 3,700 miles electrified, with 17,000 miles of new oil pipelines, and 40% more cargo carried by sea. Over 16m. flats and houses were to be built.

By July 1972, 43,000 industrial plants had been transferred to the new system of

decentralized cost-accounting; they produced 94% of total output of Soviet industry and 95% of its total profit. All public establishments in trade and catering and all the state farms have gone over to the new system.

On 29 Oct. 1976, the Supreme Soviet adopted the 10th Five-Year Plan (1976–80). This provided for an increase of industrial output from 104.3% of the 1975 level to 136%, an average annual increase of agricultural output by 16%, freight traffic (all forms) from 105.7% to 132%, state capital investments from 105.1% of the 1975 level in 1976 to 114.6% in 1980, real income per head from 103.7% to 121%, retail commodity turnover from 103.6% to 128.7%, 550m. sq. metres of new housing were to be built. Children in pre-school establishments would increase by 104.4% in 1976 and 125.5% in 1980, pupils in day schools from 108.9% to 148.8%, and students in higher education from 100.4% to 105.4%. Hospital beds were to increase from 102.2% in the first year to 109.7% in the final year.

A far-reaching plan for land improvement, increasing of agricultural, housing and road facilities and expansion of village amenities, from 1976 to 1980, in the 'Non-Black-Earth Zone' (northern and central European Russia), was begun in 1975–76, at a total cost of 35,000m. roubles.

In 1979 it was decided that from 1981 detailed plans would be drawn up at the outset for each year of a 5-year plan, so that enterprises could spread their potential more rationally over the whole period.

The national income was assessed (in 1,000m. roubles) at 152.9 in 1961, 225 in 1967, 261.9 in 1969, 289.9 in 1970, 305 in 1971, 313.6 in 1972, 337.8 in 1973, 353.7 in 1974, 363.3 in 1975, 385.7 in 1976, 403 in 1977, 422.5 in 1978 and 430 in 1979.

Income tax was abolished on 1 Oct. 1961 for earnings up to 60 roubles per month and reduced for earnings between 61 and 70 roubles; in Dec. 1967 further cuts of 25% were made for earnings from 61 to 80 roubles; in 1972 earnings up to 70 roubles were freed of income tax, and taxes on incomes up to 90 roubles were cut by about 33%.

Capital investment (1979) was 130,600m. roubles, including 117,100m. by State and co-operative enterprises, 11,800m. by collective farms and 1,700m. by individuals (on housing).

Currency. As from 1 Jan. 1961 the gold content of the *rouble* was raised from 0.222 168 to 0.987 412 gramme. The official exchange rates (Feb. 1981) 1.666 roubles = £1; 0.654 roubles = US\$1.

The gold holdings of the USSR were, in Dec. 1955, estimated at about 200m. fine oz. (US\$7,000m.), or about 20% of the world total of monetary gold.

The currency in circulation is: (1) State Bank notes in denominations of 10, 25, 50 and 100 roubles; (2) Treasury notes in denominations of 1, 3 and 5 roubles; (3) cupro-nickel coins in denominations of 10, 15, 20 and 50 kopeks and 1 rouble; (4) cupro-zinc coins in denominations of 1, 2, 3 and 5 kopeks.

Banking. The State Bank began operations on 16 Nov. 1921. By an edict of 7 April 1959 a number of specialized banks for planned long-term investments, which

had existed since 1932, were abolished. The State Bank, in addition to short-term credits, effects long-term investments in agriculture and in individual rural house-building. The Bank for Financing Capital Investments (*Stroibank*) covers industry, transport, urban housing schemes and public utilities and individual house-building in towns.

Deposits in 80,500 savings banks were over 135,500m. new roubles to the credit of 135.5m. depositors at 1 Jan. 1980.

Weights and Measures. The metric system has been in use since 1 Jan. 1927.

The Gregorian Calendar was adopted as from 14 Feb. 1918.

ENERGY AND NATURAL RESOURCES

Electricity. Many hydro-electrical power stations are being constructed. The Irkutsk station (4,500m. kwh. output per annum) is in operation; Bratsk (4.5m. kw. capacity) was completed in 1967. Ust-Ilimskaya, of 3.6m. kw. capacity (Central Siberia) was completed in Nov. 1977. Krasnoyarsk (6m. kw. capacity) was completed and began full production in July 1972. A 1.26m. kw. power station was completed on the Pechora (far north) by Dec. 1978. The first unit of Sayano-Shushenskaya was in operation by Nov. 1978 (6.4m. kw.). Three units at the Inguri hydro-electrical station and a 500,000 kw. unit at the Reftinskaya state district thermal power station, Sverdlovsk region, were also commissioned in 1978.

The Kremenchug power station (625,000 kw. capacity) was completed in Nov. 1960, rendering the Dnieper navigable for large vessels from Kaney to the Black Sea (over 800 km). Two power stations in Central Asia are under construction: at Nurek on the Amu-Darya (2.7m. kw.) and at Toktogul in the Syr-Darya basin (1.2m. kw.). Their reservoirs will irrigate 1.5m. hectares. A large hydroelectric station was under construction (1981) on the river Kureika in Siberia which will provide energy for the mining and metallurgical centre at Noril'ska in the Arctic.

Total installed capacity of power stations in 1938 was 8.7m. kw. and 245.4m. kw. in 1978. Industry consumes about 70% of the total electricity. Over 35,000 small rural power stations have been closed in recent years owing to supply from State stations becoming available, but there are still many operating in the countryside. 800 towns and urban settlements were heated by central thermal plants.

A nuclear power station, with capacity of 5,000 kw., was put into operation at Obninsk (Kaluga region), 27 June 1954; the Novo-Voronezh station (now 1.5m. kw.) began operating Dec. 1964, and Beloyarsk (1m. kw.) 1965. A fast neutron reactor, with a capacity of 600,000 kw., was started up at the Beloyarsk nuclear power station in 1980. The fourth 1m. kw. reactor at the Leningrad nuclear power station became operational in 1981. By 31 Dec. 1980, 12 nuclear power stations were operational. An experimental tidal energy station is working at Kislaya Guba (Murmansk coast).

The country's integrated power grid is now in operation, covering over 700 power stations with a total capacity of 220m. kw., which are handled by a central control panel.

A unified power grid ('Mir') with all the Socialist countries of eastern Europe was built up between 1962 and 1967. Total capacity (1972) was 58m. kw.

Oil. In the 1930s practically all Soviet oil came from the Caucasian fields, of which the Baku fields yielded 75-80% and the Grozny and Maikop fields between them 15%. Since then, the distribution has considerably changed. The Ural Volga area, the 'Second Baku', has 4 large centres in operation, at Samarska Luka (Kuibyshev), Tuimazy (Bashkiria), Ishimbaev (Bashkiria) and Perm.

A large new oilfield has been developed in the Trans-Volga area of the Saratov region. The Tyumen (West Siberian) complex, now accounts for over 50% of the USSR's oil output. In 1980 the USSR extracted over 600m. tonnes of oil.

The total length of pipeline on 1 Jan. 1939 was 4,212 km, divided as follows: Baku-Batumi, 1,717 km; Grozny-Mahachkala, 150 km; Grozny-Armavir-Tuapse, 618 km; Armavir-Trudovaya, 488 km; Guriev-Orsk, 845 km, and other, 394 km. One pipeline (1,700 km) was completed in 1955, connecting Tuimazy in Bashkiria with the refineries of Omsk. In 1957 the Almetyevsk-Gorky pipeline (580 km) and

479 km of the Stavropol-Moscow pipeline were completed. At the end of 1979 there were 67,400 km of pipeline, through which (in 1979) were conveyed over 600m. tonnes of oil.

The construction of the 'Druzhba' pipeline of about 5,327 km from the oilfields near Kuibyshev to Poland and the German Democratic Republic (northern branch) and to Czechoslovakia and Hungary (southern branch)—separating in Belorussia—began in 1960, was completed in 1965.

In 1976 the USSR exported 111m. tonnes of crude oil and oil products.

Gas. A natural-gas pipeline from Gazli, near Khiva, to Voskresensk, near Moscow (2,750 km), with a planned capacity of 100m. cu. metres per day, began operating in Oct. 1967. Since then it has been extended to Czechoslovakia, where a 1,000-km extension, for transmission of Soviet gas to Austria, Italy and German Democratic Republic and Federal Republic of Germany, is under construction and another to Bulgaria. Another natural-gas pipeline, over 3,000 km from Medvezhye (Tyumen Region) to Moscow, began operating in Oct. 1974. A second pipeline from this region, linking the Urengoi deposit with Petrovsky in the Central European area of the USSR, became operational in 1980, and is to be continued to the southern Ukraine, to a total length of 3,000 km. A gas pipeline starting from Orenburg (Urals), passing across the Volga at Kamyshin, and continuing across the Ukraine via Kremenchug and Vinnitsa to Czechoslovakia (2,750 km), reached the Soviet frontier in Jan. 1979. When completed, it is to supply Czechoslovakia, Poland, Bulgaria and Hungary with 14,000m. cu. metres annually and Romania with 1,500m. A unified gas-grid exceeding 124,000 km now exists.

Minerals. Mining experts are trained in 6 mining, 3 oil and 1 peat institutes, the mining faculties of 17 higher educational establishments, oil faculties of 2 industrial institutes and a peat faculty at the Belorussian Polytechnical Institute.

The Soviet Union is rich in minerals. Soviet scientists claim that it contains 58% of the world's coal deposits, 58.7% of its oil, 41% of its iron ore, 76.7% of its apatite, 25% of all timber land, 88% of its manganese, 54% of its potassium salts and nearly one-third of its phosphates.

Estimated output (in tonnes) in 1962: Copper, 634,900; zinc, 399,000; lead, 363,000; tungsten, 10,500; antimony, 5,980; silver, 27m. fine oz. Output in 1963: Baryte, 199,500; magnesium, 31,745; aluminium, 961,400; manganese ore (1977), 8.6m.; graphite, 54,000; bauxite, 4.3m.; asbestos, 1.3m.; phosphate rock, 3.7m. (plus 7.4m. apatite); chromite, 1.23m.; gold, 12.5m. fine oz.; molybdenum, 12.5m. lb.; cadmium (1956), 160.

Coal production (in 1m. tonnes) was 29.1 in 1913, 64.4 in 1932, 165.9 in 1940, 261.1 in 1950, 513 in 1960, 624 in 1970, 668 in 1973, 685 in 1974, 701 in 1975, 711 in 1976, 722 in 1977, 724 in 1978, 719 in 1979, 716 in 1980.

The main centre of the atomic industry is at Ust-Kamenogorsk in the Altai Mountains. Uranium deposits are being worked near Taboshar (south-east of Tashkent), Andizhan (in the Tynya-Muyan Mountains), Slyudianka (near Lake Baikal), on the Kolyma River and in Southern Armenia.

Output of natural gas reached 407,000m. cu. metres in 1979; oil (including gas condensate), 586m. tonnes.

Agriculture. The Soviet Union, up to about 1928 predominantly agricultural in character, has become an industrial agricultural country. Of the gross social product, industry and transport accounted for 42.1% in 1913 and 78.8% in 1977; agriculture for 57.9% in 1913 and 14.6% in 1977. Of the total state land fund of 2,227.5m. hectares, agricultural land in use in 1979 amounted to 1,050.3m., state forests and

state reserves to 1,114.4m. hectares. 21% of all gainfully employed in 1979 were engaged in agriculture (1913, 75%).

The total area under cultivation (including single-owner peasant farms, state farms and collective farms) was (in the same territory) 118.8m. hectares in 1913, 129.7m. in 1933, 146.3m. in 1950, 203m. in 1960, 206.7m. in 1970, 217.9 in 1976, 217.6m. in 1977, 226.9m. in 1978, 226.3m. in 1979.

Collective farms on 1 Nov. 1979 possessed 245.9m. hectares, of which 103.1m. were under crops of various kinds; state farms and other state agricultural undertakings possessed 793.4m. hectares, of which 119.9m. were under crops; manual and clerical workers held 4m. hectares as allotments.

In Nov. 1969 the Third Congress of collective farmers adopted a new model constitution, considerably enlarging the planning powers of collective farms and making payments to their members a priority.

Since 1969 conferences of collective farms have elected 2,417 district collective farm councils with 85,000 members, to study and co-ordinate local experience in methods and finance. Processing and other joint agricultural productive establishments in 1978 numbered 8,906.

Produce marketed (after consumption by collective farmers) was, in 1m. tonnes, for the present area of the USSR:

Since 1954 grain crops have been measured in 'barn crop' (*i.e.*, net quantities delivered to barns) and not in 'gross harvest' or 'biological yield' (*i.e.*, calculated as growing crops) as previously. Average annual crops (in 1m. tonnes): 1909 13, 72.5; 1946-50, 64.8; 1951 55, 88.5; 1956-60, 121.5; 1961 65, 130.3; 1966 70, 167.5; 1971 75, 181.6; 1978-79, 179; 1979-80, 189.2.

Other produce (in 1m. tonnes) in 1979: Milk, 93.3; sugar-beet, 90.3; potatoes, 76; vegetables, 25.8; meat (slaughter weight), 15.5; raw cotton, 9.2; sunflower, 5.4; 61,180m. eggs.

In Dec. 1963 collective farms comprised 99.7% of all peasant holdings. In 1978 they produced 90% of all sugar-beet, cotton 70%, milk 52%, marketed grain 45%, meat 41%, potatoes 30%, other vegetables 31%, eggs 11%.

Between 1953 and 1 Jan. 1980 the number of collective farms was reduced, mainly by amalgamation and partly by transformation into state farms, from 93,300 to 26,000, their cultivated area falling from 132m. hectares to 95.5m. The number of state farms rose in the same period from 4,857 to 20,800, their cultivated area from 15.2m. hectares to 119.9m.

State purchases in 1979 (in 1m. tonnes; 1978 figures in brackets): Grain, 62.8 (95.9); sugar-beet, 69.3 (80.1); milk, 59 (60.4); meat (slaughter weight), 10.4 (10.6); cotton, 9.2 (8.5); eggs (1,000m.), 41 (39.3).

By 1978 the main field work on state and collective farms and joint inter-farm enterprises (ploughing, sowing of grain, cotton and sugar-beet, and the harvesting of grain and silage crops) was fully mechanized; 83% of sugar-beet pulling and 65% of cotton-picking were mechanized, as was 87% of the milking.

Rural power stations in 1940 had a capacity of 265,000 kw.; in 1976, 2.9m. kw. 99.9% of collective farms and 99.9% of state farms were using electric power in 1973. In 1979 agriculture consumed 102,300m. kwh. of electric power.

Investments in agriculture in 1979 were 21,600m. roubles by the state and 10,200m. by collective farms. Total agricultural output in 1979 was valued at 123,500m. roubles.

In 1913 the total of irrigated land was 4m. hectares; in 1953, 11m.; in 1979, 17m. The total of land drained was 8.4m. hectares in 1956 and 16.3m. in 1979. In 1975 nearly 85m. hectares were treated from the air against weed, pest and disease.

In 1913, 188,000 tonnes of mineral fertilizers were used; in 1950, 5.3m. tonnes, and in 1980, 82m. On 1 Jan. 1980 there were 2.5m. tractors, 706,300 grain combine harvesters and 1.6m. lorries in the countryside.

An All-Union Academy of Agricultural Sciences, founded in 1929, has regional branches in Siberia and Central Asia and 196 research institutes.

Livestock (1 Jan. 1980), in 1m. head: Cattle, 115 (including 43 milch cows); pigs, 73.7; sheep, 143. Since 1957 the enumeration of livestock has been made on 1 Jan. instead of 1 Oct., i.e., after the winter sales and slaughter for the market. Percentage of farm production in 1978:

Forestry. On the 747m. hectares of forest land of the USSR, a large portion is administered and worked by the State, and the other, about 38m. hectares in extent, is granted for use to the peasantry free of charge.

The largest forest areas are 515m. hectares in the Asiatic part of USSR, 51.4m. along the northern seaboard, 25.4m. in the Urals and 17.95m. in the north-west.

On 24 Oct. 1948 a plan was published for planting crop-protecting forest belts, introducing crop rotation with grasses and building of ponds and water reservoirs in the steppe and forest-steppe areas of the European part of the USSR. By the middle of 1952 some 2.6m. hectares had been planted with shelter-belt trees and 13,500 ponds and reservoirs had been built. The planting of the shelter belts in the Kamyshin-Volgograd and Byelgorod-Don areas has in the main been completed. A Volga forest belt has been planted along 1,200 km of railway. Re-afforestation was carried out on 2.2m. hectares of land in 1980.

Fisheries. The fishing catch including whaling (in 1,000 tonnes): 1913, 1,051; 1940, 1,422; 1960, 3,541; 1979, 9,359.

INDUSTRY AND TRADE

Industry. The organization of industry in the USSR is based on state ownership and control, administered by a separate Ministry for each large industry.

Under the successive 5-year plans, large-scale modern industrial works have been constructed, namely: 1st, over 1,500; 2nd, 4,500; 3rd (up to June 1941), 3,000; war-time, 3,500 (apart from reconstruction of destroyed plants); 4th, 6,200; 5th, 3,200; 6th, 2,700; 7th (1959-65), 5,470; 8th (1966-70), 1,870; 9th (1971-75), 2,000.

Output of some heavy industries was as follows:

¹ Excluding collective farm production.

The process of industrial mechanization and the installation of automatic remote control is being pushed ahead. About 90% of Soviet pig-iron and 87% of the steel is produced in fully automatic furnaces. All hydro-electric plants (in terms of capacity) are fully automatic. Coal production in open-cast mines has been completely meech-

anized; hydraulic mining is coming into general use. Coal-cutting and underground haulage was over 99%, mechanized by the end of 1962 (loading on inclined seams 56%); peat-cutting, 100%, and loading, nearly 80%; timber-cutting, 98%; haulage to loading centres, 93%, and despatch, 97%.

Output in some consumer industries was as follows:

¹ Excluding collective farm and other home production, home-killed meat, etc.

Since 1945 the cotton industry has expanded, especially in the Urals, Central Asia and Siberia. Large mills have been built at Kamyshin, Kherson, Barnaul, Engels, Alma-Ata, Chernigov and Frunze.

Trade Unions and Labour. Trade unions are organized on an industrial basis, all workers, whether manual or brain, in every branch of a given industry being eligible for membership of the same union. Collective farmers may join trade unions.

Since 1933 the trade unions have carried out the functions of the former Labour Commissariat; they control and supervise the application of labour laws, introduce new labour laws for approval by the Government and administer social insurance and factory inspection. Social insurance is non-contributory. The All-Union Congress has met at irregular intervals; the 14th Congress met in 1968, the 15th in 1972 and the 16th in 1977. Membership (1978) 121m.

In 1944 there were 176 unions. This number was reduced by amalgamation of unions to 22 in 1958, but increased to 30 in 1977. Contributions range from 0.5 to 6% of wages. There are 167 regional and Republican Trades Councils.

Chairman, Central Council of Trade Unions: A. I. Shibayev.

The average number of industrial and clerical workers engaged (1979) in the whole national economy of the Soviet Union was 110.6m., 51% of them women. The 7-hour day (6 hours for miners underground and other heavy trades) was generally in operation by the end of 1960. The average working week since 1970 has been 39.4 hours and the working day in industry 6.93 hours. The 5-day week (without reduction of total working hours) was introduced in 1967.

New 'Fundamentals of Labour Legislation', intended to codify and extend labour laws adopted in the last 40 years, were adopted by the Supreme Soviet in July 1970. They lay down, *inter alia*, the right to receive wages irrespective of the income of the enterprise concerned, the right to free vocational and advanced technical training; the right to form trade unions without state registration, the right of trade unions to participate in and supervise management and planning, labour legislation, safety regulation and housing, fixing of working conditions and wages, etc. Pensioners in Jan. 1980 numbered 48.7m., including 33.1m. old age. Average monthly wages were 180 roubles in 1980.

Commerce. Retail home trade takes three forms—state, co-operative and the free market, *i.e.*, sales by individual collective-farm members and by the collective farms of their surplus products, after having fulfilled their statutory deliveries and made their regular allocations to their members.

In 1979 the consumer co-operative societies had 63m. members and did over 23% of the retail trade of the USSR. They were organized in 5,100 societies, employing about 3m. workers, with 369,000 retail shops, 90,000 catering establishments, 12,700 bakeries and 324 canneries. Their central union is affiliated to the International Co-operative Alliance. Retail trade by the State and co-operatives totalled 252,200m. roubles in 1979; by collective farm markets (agricultural produce), 6,200m. roubles. Total state and co-operative retail trade turnover represented (in comparable prices) an increase of 1% on 1976.

Foreign trade is organized as a state monopoly. Importation and exportation of goods are effected under licences issued by the Ministry for Foreign Trade and its respective departments in pursuance of a plan annually sanctioned by the Government. The right of purchasing goods for importation, and that of selling Soviet exports abroad, is vested in Trade Delegations and representatives of the appropriate state corporations in foreign countries.

There are 29 state import and export organizations, including chartering and tourist corporations (one, Vostokintorg, dealing with Mongolia, Sinkiang and Afghanistan). The Central Union of Consumers' Societies (Centrosoyuz) is also authorized to conduct foreign trade operations.

For foreign trade up to 1938 *see* THE STATESMAN'S YEAR-BOOK, 1951, p. 1465. The Central Statistical Department of the USSR estimates that, in comparable prices, the volume of foreign trade in 1938 was less than one-third that of 1913, but was in 1978, 31 times as large as in 1913. Exports in 1979 were valued at 42,400m. roubles (23,600m. to the Socialist countries), and imports at 37,900m. roubles (21,500m. from the Socialist countries).

Russia's imports of fuel and raw materials, between 1913 and 1977, declined from 43.5 to 21.7% of machinery and equipment increased from 16.6 to 38.1%, imports of foodstuffs and manufactured consumer goods increased from 31.5% in 1913 to 33.7% in 1977.

Tourism. Pre-revolutionary Russia was never a country for any but the most hardy and better-off tourists, as the introductory pages of Baedeker's guide made clear. For her subjects, too, touring was no more inviting. Acute shortage of hotels and boarding-houses, poor roads, lack of ordinary services for visitors were among the least of their difficulties.

These have not by any means been fully overcome but very great efforts to meet them have been made.

Within the USSR, tourism by Soviet citizens has been much encouraged by the trade unions, which are developing an extensive network of facilities, particularly for hikers, campers and climbers. These facilities number more than 10,000 tourist camps, 650 tourist 'bases' (supply depots for hiring equipment), and over 4,000 cabins for anglers, hunters and mountaineers. The Central Council of Trade Unions also

owns or controls 137 river or seagoing ships, 120 trains and 8,000 motor coaches exclusively for tourist use.

Soviet tourists recorded by this network numbered 40,000 in 1950; 1,997,000 in 1965; 5,041,000 in 1970 and about 19m. in 1978.

COMMUNICATIONS

Roads. By 1941 there were over 1.5m. km of constructed roads, of which 143,000 km were suitable for motor traffic. The total length of motor roads in 1979 was 770,000 km. Road freights by lorry amounted to 859m. tonnes in 1940 and 23,175m. tonnes in 1979. Passengers carried were 590m. in 1940 and 41,300m. in 1979. In 1979, 21,800 inter-urban bus routes had a total length of 3,205,000 km.

Railways. The length of railways in Jan. 1980 was 141,125 km (1913: 58,500). By the end of 1979, 140,500 km of main-line railways had changed to electric and diesel traction, 42,461 km wholly electrified, and 99.9% of railway freight went by these means. In 1979, 60% of all goods traffic and 40% of passenger transport went by rail (in 1913, 57% and 91% respectively). The Moscow-Donetz, Leningrad-Leninakan (3,400 km) and western frontier Baikal (7,500 km) lines have been electrified.

There are 43 main railway systems which may be grouped as follows:

In the west: Estonian (1,388 km), Latvian (3,100 km) and Lithuanian (2,100 km), Kalinin (2,064 km), Moscow-Orsha and Moscow-Zilupe, centre at Smolensk), Belorussian (5,800 km), October (Moscow-Leningrad, centre Leningrad, 3,857 km), Lvov (south-western Ukraine, 4,257 km), South-Western (centre Kiev western Ukraine and southern Belorussia, 3,888 km), Moscow-Kiev (centre Kaluga western Russia, eastern Belorussia, north-Ukraine, western 3,821 km).

The entire route from Leningrad to Simferopol (Crimea) was electrified during 1970.

In eastern European Russia: Moscow-Ryazan (centre Moscow, 2,089 km), Kazan (centre Kazan, links Volga with Urals, 2,783 km), Gorky (Moscow-Ryazan north-eastern Russia, centre Gorky, 1,543 km), Ufa (links Bashkir and Tartar Republics and northern Volga regions, centre Ufa, 1,866 km), Kuibyshev (centre Kuibyshev, links Volga regions with Urals, 2,012 km), Volga (centre Saratov, links it with Volgograd and Astrakhan, 3,149 km).

In the Urals and western Asia: Sverdlovsk (centre Sverdlovsk, links northern Urals with western Siberia, 4,000 km), South Urals (centre Chelyabinsk, links eastern regions of Russia in Europe with northern Kazakhstan, 2,875 km), Orenburg (centre Orenburg, links southern Urals with Siberia, 3,150 km), Omsk (centre Omsk, links western Siberia with northern Kazakhstan and Altai, 2,050 km), Tomsk (centre Novosibirsk, links western Siberia, Kemerovo coalfield and Altai, 3,039 km).

In south-western Asia: Transcaucasian (centre Tbilisi, links Black Sea coast with Yerevan, 1,887 km), Azerbaijan (centre Baku, 1,650 km).

In Central Asia: Tashkent (centre Tashkent, links Tadzhik, Uzbek, Kirgiz and Kazakh republics with Orenburg, 2,420 km), Ashkhabad (centre Ashkhabad, links Caspian coast and Turkmen Republic with Uzbekistan, 2,647 km), Kazakh (centre Alma-Ata, 9,000 km). The 334-km Guriev-Astrakhan railway, across the Caspian desert, began operating on 1 Jan. 1971, shortening the route from Central Asia to the Caucasus by nearly 700 km. New lines, Kokchetav-Volodarskoye and Kustanai-Uritskoye, are under construction in Kazakhstan, and a Termez-Yavan line in Tadzhikistan.

In central and eastern Siberia: Krasnoyarsk (centre Krasnoyarsk, a part of Trans-Siberian line but with new branches serving the Khakass and Tuva republics, 1,279 km). East Siberia (centre Irkutsk, serves Irkutsk region and Buryat Republic with link to Mongolian People's Republic, 1,696 km). Transbaikal (centre Chita, part of Trans-Siberian line but serving Buryatia and linked with China and Mongolia, 3,320 km). The Abakan-Taishet line, connecting the South-Siberian and main Trans-Siberian lines and linking the Bratsk and Kuznetsk industrial areas (640 km), began operating in 1964 with electric traction. A Tyumen-Surgut Nizhnevartovsk (on the upper Ob) line, of nearly 1,000 km is under construction.

A line from Khrebtovaya, on the Taishet-Zena railway in East Siberia, to Ust-Ilimskaya on the Angara (215 km) has been opened, as the first section of a new North Siberian main line, skirting the northern shore of Lake Baikal, and stretching from Lena, on the Lena River, 3,145 km to Komsomolsk-on-Amur. This line is scheduled for full electrification and operation in 1982. Electrification of the first 640 km began in June 1975.

The Baikal-Amur Magistral (BAM) will provide a more direct route to the Pacific ports of Nakhodka and Vladivostok than that offered by the Trans-Siberian railway and much of its route will lie several hundred km north of the Trans-Siberian railway, avoiding the latter's lengthy detour round Lake Baikal. It will give access to valuable raw materials such as coal, iron ore, copper, nickel and timber. The Baikal-Amur Magistral will ease the very heavy pressure on the Trans-Siberian route, which is only partially electrified and is not double-track throughout. Development of new port facilities on the east coast will create even greater strain on the existing facilities and the Baikal-Amur Magistral will become the principal route for export traffic to these ports. Oil from the Tyumen fields will be among the major commodities.

Construction of the Baikal-Amur Magistral is the most arduous railway-building project ever tackled by Soviet engineers and the greatest drawback to development of the region has been its severe climatic and geological conditions. There is permafrost throughout the area, and winter temperatures fall to -60°C . Severe danger exists in the mountains in winter from avalanches and in summer freak streams of mud fill river beds and valleys, hindering construction.

Work is being carried out from 7 major construction sites, each equipped with its own reinforced concrete plant, steel fabrication works and extensive engineering plant. When the line is completed in 1982 these sites will remain to form the nucleus of new heavy industry towns.

Over 3,200 bridges, tunnels and culverts are being built for the Baikal-Amur Magistral, including 140 major river crossings and a 1,200-metre bridge 40 metres high over the river Zeya reservoir. One of the first projects tackled was the 1,450-metre-long crossing of the river Amur near Komsomolsk. Extraordinary conditions here necessitated development of entirely new construction techniques. Large bridge spans are being used wherever possible to minimize the number of piles to be driven in permafrost conditions. Two tunnels are of particular note—a 15-km bore through the Severo-Muisky range, and one of 7 km through the Baikal ridge.

A 180-km link from the Trans-Siberian railway at Skovorodino to Tyndin, about midway between Ust-Kut and Komsomolsk, was opened in 1975, and a northwards extension of this route, to Berkakit, was opened in 1978. This line will reach the rich Chulman coalfields, allowing exploitation to begin well ahead of completion of the Baikal-Amur Magistral. The 700-km eastern section of the line from Ural to Komsomolsk-on-Amur, was opened to service traffic in June 1979. About 2,000 km of line have been laid since work started in 1975.

Many thousands of workers are involved in this major project, but despite the huge commitment of labour and equipment construction of at least a further 1,500 km of lines is due to begin during the next 5 years. Two major extensions of the Tyumen-Surgut line will exploit oil, natural gas and timber in Northern Siberia. One will serve Nizhne-Vartovskoye on the river Ob, while the other will reach Urengoi on the river Pur. Survey work has also been completed for a 400-km line in the Yamal Peninsula from Khal'mer-Yu to Cape Kharasavei. This will extend to more than 73°N on the coast of the Kara Sea, making it the world's most

northerly railway. Included is a 600-km crossing of the Baydaratskaya Gulf, which will be achieved by ice-breaking train ferries.

See map in *THE STATESMAN'S YEAR-BOOK*, 1977-78.

In the Far East: Far Eastern (centre Khabarovsk, serves Maritime regions, 1,712 km), Amur (centre Blagoveshchensk, part of Trans-Siberian line, serves the Amur valley, 2,468 km), South Sahalin (centre Yuzhno-Sahalinsk, 752 km).

Underground railways have been built in Moscow, Leningrad, Kiev, Tbilisi, Kharkov, Tashkent, Baku and Yerevan. Others are under construction at Minsk, Novosibirsk and Gorky. Surveys are in progress for lines in Kuibyshev, Riga, Sverdlovsk and Dnepropetrovsk.

Aviation. In 1979 total length of internal airlines in the USSR was approximately 957,000 km; 102m. passengers were carried internally and externally. The Central Asian Airways in some instances provide the only means of communication across the desert and mountainous regions of the local republics. An 8,500-km air service was opened in Feb. 1941 between Moscow and Anadyr (Eastern Siberia), through Archangel, Igarka, Khatanga, Tiksi Bay and Cape Schmidt, *i.e.*, along the entire course of the Northern Sea Route. There are also other Arctic airlines, *e.g.*, Igarka-Gulf of Kozhevnikov; Igarka-Dickson Island; Yakutsk Tiksi Bay; Yakutsk Viluisk; Yakutsk-Verkhoiansk.

Direct air services are maintained throughout the year between Moscow and the capitals of all Soviet republics as well as London, New York, Montreal, Tōkyō, Delhi, Rangoon, Belgrade, Peking, Pyongyang, Ulan Bator, Kābul, Tirana, Paris, Warsaw, Prague, Budapest, Bucharest, Sofia, Vienna, Berlin, Helsinki, Stockholm, Copenhagen, Jakarta, Dakar and Gander. During 1979 direct services have been opened from Kiev to Paris and Dusseldorf; Leningrad to Vienna and Gdansk; Moscow to Saigon, Kinshasa, Kuwait and Kingston (Jamaica); Yerevan to Aleppo.

Soviet air services reach 62 countries, and 20 foreign lines have regular services to the USSR, including British Airways, KLM, SAS, Air France, SABENA, Air India, PANAM.

Shipping. In 1977 the Soviet mercantile marine comprised 7,000 self-propelled vessels, of which 80% were built between 1957 and 1966. By May 1977 the gross cargo capacity was (including fishing vessels) 20.8m. registered tonnes (16m. tonnes dead-weight).

Freights carried were: In 1913 (present frontiers), 15.1m. tonnes; in 1940, 32.9m. tonnes; in 1950, 33.7m. tonnes, and in 1977, 220m. tonnes; 51.9m. passengers were carried. The Soviet share in world marine tonnage was 2% in 1960 and 6% in 1977. Deep-sea ports are under construction at Vostochny (Far East) and Grigorevsky (Black Sea) with new deep-sea wharves at Ventspils (Latvia), Murmansk and Archangel (for Arctic traffic). Archangel is kept open by icebreakers all the year round from 1979. Foreign freights in 1977 totalled 14% of all Soviet seaborne trade.

The North Sea route affords convenient communication between the European USSR and the Far East along the Soviet coast, for the produce of the basins of the Ob, Yenisei, Lena and Kolyma rivers.

The length of navigable rivers and canals in exploitation was (1977) 143,100 km, of which the length of floatable rivers is 89,500 km. There are several thousand miles of canals and other artificial waterways; among them the Baltic and White Sea Canal (235 km), the Moscow-Volga Canal (130 km). Goods turnover on inland waterways was 28,900m. tonne-km in 1913, 35,900m. in 1940, 45,900m. in 1950 and 230,700m. in 1977; freight carried rose from 35.1m. tonnes in 1913 to 521m. tonnes in 1977.

The Volga-Don Shipping Canal was opened for traffic in 1952. The Volga-Don waterway from Volgograd to Rostov is 540 km long, of which the Volga-Don canal comprises 101 km. The canal has transformed the section of the river from Kalach, where the Don is joined by the Volga-Don canal, to Rostov into a deep-water highway suitable for big Volga shipping. The canal links the White, Baltic, Caspian, Azov and Black Seas into a single water transport system. In Oct. 1964 the 2,430-km Baltic-Volga waterway, linking Klaipėda on the Baltic to Kakhovka at the mouth of the Dnieper and suitable for 5,000-tonne vessels, was begun. Reconstruction of

the 18th-century Mariinsky canal system in north-west Russia was completed, providing a through waterway from Leningrad to Rybinsk (on the Upper Volga) and cutting the passage of freight from 18 to 2½ days.

At the end of 1977 the longest train ferry route in the world was opened between the Soviet Union and Bulgaria (Ilyichovsk-Varna).

The first section of Vostochny port, in Wrangel Bay on the Pacific coast, is completed. It will be the country's largest deep-sea port.

In 1962 a canal was completed across the Kara-Kum desert in southern Turkmenistan (replacing an earlier project for a more costly scheme across the north of the republic). The canal, from Bussag on the river Amu-Darya to Archnan, north-west of Ashkhabad, through the Murgab oasis, 900 km long, supplies water to an area exceeding 200,000 hectares, suitable for cotton, fruit, vineyards and live-stock. An extension to the Caspian (500 km) is under construction; the complete system will irrigate 1m. hectares.

An irrigation canal system (250 miles), bringing water from Kakhovka on the Dnieper to the North Crimea, is nearing completion. Work to divert water from the Pechora and Vychegda rivers (flowing into the White Sea) south to the Volga is in progress. Work has begun on a 300-mile canal which will supply water from the Irtysh to Karaganda in Central Kazakhstan, irrigating over 150,000 acres; the first 37 miles were opened in 1965 and another 45 miles in Dec. 1967. Most of the 11 reservoirs required had been completed by 1 Jan. 1972. Other irrigation canals under construction are Kuibyshev (279 km long, to supply over 100,000 hectares) and Stavropol (481 km, irrigating 200,000 hectares); the second section of the latter went into commission in Nov. 1974, 14 months ahead of schedule. In Sept. 1972 the Saratov Canal (irrigating 1m. hectares) went into commission.

By 1 Jan. 1979, over 29m. hectares of land reclaimed by irrigation or drainage were under crops (nearly 25% of total output). In 1980 the reclaimed area was brought up to 33m. hectares.

Post and Broadcasting. In Dec. 1979 the number of post, telegraph and telephone offices was 90,000 and of public telephones 22.3m.

The international radio-telecommunications services are operated by the Ministry of Communications of the USSR. The Great Northern Telegraph Co., Ltd. of Denmark, operates cables connecting Denmark with Leningrad, whence connexion is made by means of a trans-Siberian landline with Vladivostok. From the latter place the Great Northern Telegraph Co. owns cables connecting with Japan, China and Hong Kong. Direct radio and telephone communication with India is provided for in an agreement concluded in 1955.

The State Committee for Broadcasting and Television produces 3 programmes in Moscow, broadcasting throughout the Union. In addition the regional radio stations produce 1, 2 or 3 programmes for the republics as well as local programmes for a town or region. The foreign service from Moscow is beamed to all parts of the world, in 64 languages. Chinese is broadcast for 28½ hours a day. In addition, several republics have their own foreign services. English is broadcast from Moscow, Kiev, Tashkent, Vilnius and Yerevan. There are 122 TV centres in the USSR, several of them producing more than 1 programme. In Moscow there are 4 programmes. Colour programmes are broadcast by SECAM system. A nationwide system of space telecommunications, consisting of satellites and ground stations, takes TV broadcasts to distant parts of the country.

Number of receivers, Jan. 1980: radio, 66m.; television, 64.3m.

Cinemas and theatres (Jan. 1980). There were 144,000 permanent and 8,800 mobile cinemas. In Jan. 1980 there were 596 theatres, to which 119.3m. visits were made in 1979.

Newspapers. In 1979, 8,019 newspapers with a total circulation of 173m. copies were published in 57 languages of the USSR.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The basis of the judiciary system is the same throughout the Soviet Union, but the constituent republics have the right to introduce modifications and to make

their own rules for the application of the code of laws. The Supreme Court of the USSR is the chief court and supervising organ for all constituent republics and is elected by the Supreme Soviet of the USSR for 5 years. Supreme Courts of the Union and Autonomous Republics are elected by the Supreme Soviets of these republics, and Territorial, Regional and Area Courts by the respective Soviets, each for a term of 5 years.

Court proceedings are conducted in the local language with full interpreting facilities as required. All cases are heard in public, unless otherwise provided for by law, and the accused is guaranteed the right of defence.

Laws establishing common principles of criminal legislation, criminal responsibility for state and military crimes, judicial and criminal procedure and military tribunals were adopted by the Supreme Soviet on 25 Dec. 1958 for the courts both of the USSR and the constituent Republics.

The Law Courts are divided into People's Courts and higher courts. The People's Courts consist of the People's Judge and 2 Assessors, and their function is to examine, as the first instance, most of the civil and criminal cases, except the more important ones, some of which are tried at the Regional Court, and those of the highest importance at the Supreme Court. The Regional Courts supervise the activities of the People's Courts and also act as Courts of Appeal from the decisions of the People's Court. Special chambers of the higher courts deal with offences committed in the Army and the public transport services.

People's Judges and Assessors, who serve on a rota basis, are elected directly by the citizens of each constituency: judges for 5 years, assessors for 2½. Should a judge be found not to perform his duties conscientiously and in accordance with the mandate of the people, he may be recalled by his electors.

The People's Assessors are called upon for duty for 2 weeks in a year. The People's Assessors for the Regional Court must have had at least 2 years' experience in public or trade-union work. The list of Assessors for the Supreme Court is drawn up by the Supreme Soviet of the republic.

The Labour Session of the People's Court supervises the regulations relating to the working conditions and the protection of labour and gives decisions on conflicts arising between managements and employees, or the violation of regulations.

Disputes between State institutions must be referred to an arbitration commission. Disputes between Soviet State institutions and foreign business firms may be referred by agreement to a Foreign Trade Arbitration Commission of the All-Union Chamber of Commerce.

The Procurator-General of the USSR is appointed for 5 years by the Supreme Soviet. All procurators of the republics, autonomous republics and autonomous regions are appointed by the Procurator-General of the USSR for a term of 5 years. The procurators supervise the correct application of the law by all state organs, and have special responsibility for the observance of the law in places of detention. The procurators of the Union republics are subordinate to the Procurator-General of the USSR, whose duty it is to see that acts of all institutions of the USSR are legal, that the law is correctly interpreted and uniformly applied; he has to participate in important cases in the capacity of State Prosecutor.

Capital punishment was abolished on 26 May 1947, but was restored on 12 Jan. 1950 for treason, espionage and sabotage, on 7 May 1954 for certain categories of murder, in Dec. 1958 for terrorism and banditry, on 7 May 1961 for embezzlement of public property, counterfeiting and attack on prison warders and, in particular circumstances, for attacks on the police and public order volunteers and for rape (15 Feb. 1962) and for accepting bribes (20 Feb. 1962).

In view of criminal abuses, extending over many years, discovered in the security system, the powers of administrative trial and exile previously vested in the security authorities (MVD) were abolished in 1953; accelerated procedures for trial on charges of high treason, espionage, wrecking, etc., by the Supreme Court were abolished in 1955; and extensive powers of protection of persons under arrest or serving prison terms were vested in the Procurator-General's Office (1955). Supervisory commissions, composed of representatives of trade unions, youth organizations and local authorities, were set up in 1956 to inspect places of detention.

Further reforms of the civil and criminal codes were decreed on 25 Dec. 1958.

Thereby the age of criminal responsibility has been raised from 14 to 16 years; deportation and banishment have been abolished; a presumption of innocence is not accepted, but the burden of proof of guilt has been placed upon the prosecutor; secret trials and the charge of 'enemy of the people' have been abolished.

Religion. With the Revolution the Orthodox Church lost its position as the dominant religion and all religions were placed on an equal footing. Article 52 of the 1977 Soviet Constitution reads as follows: 'Citizens of the USSR are guaranteed freedom of conscience; that is, the right to profess or not to profess any religion, and to conduct religious worship or atheistic propaganda. Incitement of hostility or hatred on religious grounds is prohibited. In the USSR the church is separated from the state and school from the church.'

By decree of 23 Jan. 1918 the Orthodox Church was disestablished; its property, together with that of all other denominations, was nationalized. The congregations themselves have to maintain their churches and clergy, regardless of confession or denomination, and may organize a minimum of 20 persons, which may request and receive the use of a church building, free of charge, except for maintenance, insurance, land taxes, etc. About two-thirds of all the churches have been closed. Religious instruction may be given in private, but otherwise only in church classes. The income of religious communities is not subject to taxation. The state supplies paper and printing facilities to all denominations for producing the Bible, the Koran, prayer books, missals, etc.

Relations between the religious communities of all creeds and the Government are maintained through a Council for Religious Affairs (*Chairman*, V. A. Kuroyedov).

The Russian Orthodox Church, represented by the Patriarchate of Moscow, had, in 1967, 30m. regular worshippers. There are still many Old Believers, whose schism from the Orthodox Church dates from the 17th century. The Russian Church is headed by the Patriarch of Moscow and All Russia, assisted by the Holy Synod, which has 6 members – the Patriarch himself and the Metropolitans of Krutitsy and Kolomna (Moscow), Leningrad and Kiev *ex officio*, and 3 bishops alternating for 6 months in order of seniority from the 3 regions forming the Moscow Patriarchate. In 1967 there were 20,000 places of worship (54,000 before the Revolution). Religious instruction in classes for persons under 18 is forbidden. The Patriarchate of Moscow maintains jurisdiction over a few parishes of Russian Orthodox abroad, at Tehrân, Jerusalem, German Democratic Republic, France (1 archbishop), England, North and South America (2 bishops). There are 20 monasteries and nunneries, and 6 Orthodox academies and seminaries with 6 journals.

After the Russian Orthodox Church the next Christian community in importance are the Armenians; their Catholicos (Patriarch), whose seat is at Etchmiadzin, is head of all the Armenian (Gregorian) communities throughout the world.

There is an Armenian Orthodox academy and a seminary.

The Georgian Church has its own organization under a Catholicos (Patriarch) and a seminary.

Protestantism is represented chiefly by the Evangelical Christian Baptists, with over 512,000 baptized adult members and some 5,000 churches; the Lutherans are concentrated mainly in the Baltic States (350,000 in Estonia, 600,000 in Latvia), the Reformed in the Transcarpathian Region of the Ukraine (70,000). Both Baptists and Lutherans conduct theological courses.

The Roman Catholics are most numerous in Lithuania and the western Ukraine. There are 2 Roman Catholic archepiscopates and 4 episcopates in Lithuania with 630 churches and a seminary at Kaunas providing a 5-year course. In 1946 some 3.5m. Uniates in the USSR withdrew their allegiance to Rome and came under the jurisdiction of the Orthodox Patriarchate in Moscow. In Latvia there are an archepiscopate and 1 episcopate (Riga and Liepaja) of the Roman Catholic Church.

The Moslems, mainly Sunnis, are divided into 4 administrative regions: 3 of them (Central Asia, European Russia and Siberia, Northern Caucasus) headed by a Mufti; the largest (Transcaucasia, with its centre at Baku) by a Shaikh-ul-Islam.

There is a Moslem academy and a madrasah in Central Asia. Several editions of the Koran have appeared in recent years.

There are various Jewish communities, the chief being in Moscow and Kiev.

Large synagogues maintain bakeries for producing unleavened bread. There is a Jewish Yeshiva. The Central Buddhist Council of the USSR is headed by a Lama with communities in Buryatia, Tuva, Kalmykia and in the national (minority) areas of the Chita and Irkutsk regions.

Education. Education is free and compulsory from 7 to 16-17. Co-education was reintroduced in all schools on 1 Sept. 1954. There are 2 types of general schools—with an 8-year or a 10-year curriculum; the minimum school-leaving age is now 17. Pupils who leave an 8-year school continue their education at either a 10-year school or a vocational training school. A 10-year school pupil may also transfer to vocational school after the 8th year. Vocational school pupils must reach the same standard of general education as those at 10-year general schools, and so stay on at school longer. Instruction is given in more than 100 languages.

In 1979-80 there were 147,000 primary and secondary schools. Pupils in general educational schools numbered 44.4m. (10.2m. of them in the 16-18 age-groups) and the teachers 2.6m. Those at vocational and specialized technical secondary schools numbered 6.7m.

At the end of 1940 labour reserve schools (both vocational and industrial) were organized, admitting applicants from 14 to 17 years of age. From 1959 onwards these and other technical schools were reorganized as town and rural vocational and technical schools, at which pupils stay for a year longer than at general schools, combining completion of general secondary education with vocational training. From 1940 to 1977 inclusive they trained 35m. skilled workers. In 1978, 2.3m. graduated from such schools, including 628,000 for agriculture; 600,000 agricultural mechanics were trained in state and collective farms. Over 6,900 vocational training schools existed in 1979, training 3.5m. boys and girls, about one-third providing full secondary education. In 1979, 13.9m. children of from 3 to 7 years of age attended kindergartens. Children in boarding schools numbered over 800,000 in 1972-73.

In 1979-80 there were 4,357 technical colleges with 4.6m. students, and 870 universities, institutes and other places of higher education, with 5.2m. students (including 1.74m. taking correspondence or evening courses). 68,000 part-time students from factories, collective farms, or the armed forces were attending preparatory courses at 524 places of higher education (similar to the 'workers' faculties' of early Soviet years).

Among the 65 university towns are: Moscow, Leningrad, Kharkov, Odessa, Tartu, Kazan, Saratov, Tomsk, Kiev, Sverdlovsk, Tbilisi, Alma-Ata, Tashkent, Minsk, Gorky and Vladivostok. On 1 Jan. 1980 there were 1.34m. scientific workers in places of higher education, research institutes and Academies of Sciences. There are 33,000 foreign students from 130 countries.

The Academy of Sciences of the USSR had 753 members and corresponding members. Total learned institutions under the USSR Academy of Sciences number 244, with 46,000 scientific staff. Fourteen of the Union Republics have their own Academies of Sciences, with scientific staff numbering 47,340. There are also Siberian, Far Eastern and other branches of the USSR Academy. On 1 Jan. 1980 there were 96,075 post-graduate students.

The Academy of Pedagogical Sciences had 14 research institutes with 1,700 staff.

In Jan. 1980 there were employed in the national economy 11.1m. specialists with a completed higher education and 15.3m. with a completed secondary technical education.

In 1979-80 about 98.3m. people were studying at schools, colleges and training or

correspondence courses. 100 per 1,000 of the employed population had a higher education (1939, 13; 1959, 33).

Health and Social Security. All health services are free of charge; but private practice exists. Health is administered by the Ministry of Health of the USSR, which supervises the work of the Health Ministries of the Union Republics and the Autonomous Republics.

In 1944 an Academy of Medical Sciences was formed; it has under its direct control 42 research institutes. In all, there were, in 1976, 393 medical research institutions with 70,000 research staff. Smallpox, trachoma and malaria have been virtually eliminated.

In 1979-80, 98 institutes and medical faculties had a total of 374,400 students taking a 6-year course.

In Dec. 1979 there were 23,200 civil hospitals with 3.3m. beds. There were 1m. infants in day nurseries and another 2.7m. in the crèche-sections of kindergartens. 960,000 doctors (including dentists) were in the health service. All confinements in towns and 75% in the country were in hospital.

There were 35,961 outpatients' clinics, apart from the 24,000 women's consultation centres and children's clinics.

The death-rate in the USSR in 1979 was 10.1 per 1,000, and the birth rate 18.2 per 1,000. Infant death rate was 27.9 (per 1,000 live births) in 1974, compared with 273 in 1913, 184 in 1940 and 81 in 1950. Average expectation of life, 70 (1913, 32).

Social insurance is administered by the trade unions, through social insurance councils elected in places of work and social insurance sub-committees of factory committees: about 5m. volunteers are engaged in this work. 37.7m. people were sent to holiday sanatoria or rest homes in 1979. 48.7m. people, including 11.4m. collective farmers, were receiving state pensions in Jan. 1980; of these, 10m. were old-age pensioners.

Total number of holiday sanatoria providing toning-up treatment at resorts in 1979 was 2,355, with accommodation for 542,000; in addition, there were 2,481 overnight sanatoria at large plants for treatment of mild disorders without absence from work, accommodating 201,000. There were also 1,208 trade union-managed holiday hotels with a capacity of 380,000, holidays being partly or wholly at trade unions' expense.

State expenditure (in 1m. new roubles) on health services proper, 1960, 4,800; 1970, 9,300; 1976, 11,800; 1977, 12,500; 1978, 13,500; 1979, 14,100.

Between 1950 and 1977 56,748,000 apartments (in towns) and houses (in rural areas) were built. In 1979, 2.5m. apartments and houses were built. By the end of 1977, 71% of all housing in urban settlements and 65% in villages, had gas supply installed.

Rossiskaya Sovetskaya Federativnaya
Sotsialisticheskaya Respublika

AREA AND POPULATION. The RSFSR occupies over 76% of the total area of the USSR stretching from the Far North to the Black Sea in the south and from the Far East to Kaliningrad in the west. 82.6% of its population in Jan. 1979 were Russians, the rest being 38 national minorities such as the Tartars, Jews, Mordovians, Chuvashis, Bashkirs, Poles, Germans, Udmurts, Buryats, Mari, Yakuts and Ossetians. The 2 principal cities are Moscow, the capital, with a population (Jan. 1980) of 8.1m. (without suburbs, 7,914,000) and Leningrad, the second capital, 4,636,000 (without suburbs, 4,073,000). Among other important large towns are Gorki, Rostov-on-Don, Volgograd, Sverdlovsk, Novosibirsk, Chelyabinsk, Kazan, Omsk and Kuibyshev.

UKRAINE

Ukrainska Radyanska Sotsialistichna Respublika

HISTORY. The Ukrainian Soviet Socialist Republic was proclaimed on 27 Dec. 1917 and was finally established in Dec. 1919. In Dec. 1920 it concluded a military and economic alliance with the RSFSR and on 6 July 1923 formed, together with the other Soviet Socialist Republics, the Union of Soviet Socialist Republics. On 1 Nov. 1939 Western Ukraine (about 88,000 sq. km) was incorporated in the Ukrainian SSR. On 2 Aug. 1940 Northern Bukovina (about 6,000 sq. km) ceded to the USSR by Romania 28 June 1940, and the Khotin, Akkerman and Izmail provinces of Bessarabia were included in the Ukrainian SSR, and on 29 June 1945 Ruthenia (Sub-Carpathian Russia), about 7,000 sq. km, was also incorporated. From the new territories 2 new regions (provinces) were formed, Chernovitz and Izmail.

AREA AND POPULATION. The Ukraine is in south-west USSR; it has a Black Sea coast and western frontiers with Romania, Hungary, Poland and Czechoslovakia. It is bounded north by Belorussia and otherwise by the RSFSR. In 1938 the Ukrainian SSR covered an area of 445,000 sq. km (171,770 sq. miles); it now covers 603,700 sq. km (231,990 sq. miles).

The population in Jan. 1959 was 41,869,000. Population, Jan. 1980, 49,936,000 (in 1970, 75% Ukrainians, 19.4% Russians, 1.6% Jews, 0.8% Belorussians).

The principal towns are the capital Kiev, Kharkov, Donetsk, Odessa, Dnepropetrovsk, Lvov, Zaporozhye and Krivoi Rog.

The Ukrainian Soviet Socialist Republic consists of the following regions: Cherkassy, Chernigov, Chernovtzy, Crimea (transferred from the RSFSR on 19 Feb. 1954), Dnepropetrovsk, Donetsk, Ivan Franko, Khmelnytsky (formerly Kamenetz-Podolsk), Kharkov, Kherson, Kiev, Kirovograd, Lvov, Nikolayev, Odessa, Poltava, Rovno, Sumy, Ternopol, Vinnitza, Volhynia, Voroshilovgrad, Zakarpatskaya (Transcarpathia), Zaporozhye, Zhitomir.

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected on 24 Feb. 1980, consists of 650 deputies (1 per 90,000 population); 447 are Communists and 234 women. A new Constitution, based on that of the USSR, was adopted in April 1978.

At elections to regional, district, urban and rural Soviets (19 June 1977), out of 521,984 deputies returned, 248,260 (47.6%) were women, 286,142 (54.8%) non-Party and 378,018 (72.4%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: K. M. Sytnik.

Chairman, Council of Ministers: A. P. Lyashko.

AGRICULTURE. The Ukraine contains some of the richest land in the USSR.

It raises wheat, buckwheat, beet, sunflower, cotton, flax, tobacco, soya, hops, the rubber plant kok-sagyz, fruit and vegetables, and in 1976 provided nearly 20% of the grain production in the USSR and over 62% of the sugar-beet. Nine-tenths of the grain exported from USSR came from the Ukraine. The area under cultivation was 27.9m. hectares in 1913, 27m. in 1939 before the new territories were added, and 34.2m. in 1978.

Output (in 1m. tonnes) in 1979 (1913 figures in tons in brackets): Sugar-beet, 47.1 (9.3); sunflower seed, 2.4 (0.07); flax, 0.014 (0.004); potatoes, 23.9 (8.5); meat and fats, 3.6 (1.1); milk, 22.5 (4.7); wool, 0.028 (0.015); 13,747m. eggs (3,005m.); grain, 50.6m.

On 1 Jan. 1979 there were 25.4m. cattle, 20.7m. pigs, 9.2m. sheep and goats. In 1949 silver-fox breeding farms were started.

INDUSTRY. Coal in the Donetz field (25,900 sq. km stretching from Donetsk to Rostov), estimated to contain 60% of the bituminous and anthracite-coal reserves of the USSR, yielded, in 1961, 186.1m. tonnes — about 36% of the USSR production. Large new seams have been found near Novo-Moskovsk (Dnipropetrovsk region), Kharkov, Lugansk (beyond the Don) and on the left bank of the Dnieper. Within the present frontiers of the Ukraine, coal output was 22.8m. tons in 1913, 83.8m. tons in 1940, 78m. tons in 1950 and 217m. tons in 1977.

Combining coal from the Donetz field with the iron-ore from the mines in Krivoy Rog has made possible the development of a large ferrous metallurgical industry in the Ukraine. Output of iron ore was 6.9m. tons in 1913, 18.9m. tons in 1940 and 126m. tons in 1977.

Manganese is also available at Nikopol; output in 1976, 6.7m. tons.

The Ukraine also contains oil, rich deposits of salt and various important chemicals. Oil output was 1m. tons in 1913 (in present frontiers), 353,000 tons in 1940 and 10.5m. tons in 1977; with 68.7m. cu. metres of natural gas.

The Ukraine has highly developed chemical and machine-construction industries producing one-fifth of the total output of machinery and chemicals in the USSR. 142,000 tractors and 3,500 main-line diesel locomotives were produced in 1979.

In Northern Bukovina there are deposits of gypsum, oil, alabaster, brown coal and timber. Output of mineral fertilizers was 36,000 tons in 1913 and 19.5m. tons in 1979; cement output increased in the same years from 269,000 to 22.5m. tons (in present frontiers in both cases). Paper output in 1977 was 250,000 tons (1913: 26,900).

Consumer goods and food industries are important. Output of cotton fabrics was (in present frontiers) 4.7m. linear metres in 1913, 13.8m. in 1940, 20.6m. in 1950 and 429.4m. in 1975. Granulated sugar output was 1913, 1.1m. tons; 1940, 1.6m. tons, 1950, 1.8m. tons, and 1977, 6.8m. tons. Leather footwear manufactured in 1940 totalled 40.8m. pairs; 1979, 176m.

During the first 5-year plan (1929–32) the Dnieper power-station was built; destroyed during the War, it was restored during the fourth plan (1946–50). Another large hydro-electric station at Kahovka began operations during the fifth plan (1951–55). Power output (in 1,000m. kwh.) increased as follows: 1913, 0.5; 1940, 12.4; 1950, 14.7; 1978, 222.

BELORUSSIA

Belaruskaya Sovietskaya Sotsialistychnaya Respublika

HISTORY. The Belorussian Soviet Socialist Republic was set up on 1 Jan. 1919. It forms one of the constituent republics of the USSR.

AREA AND POPULATION. Belorussia is situated along the Western Dvina and Dnieper. It is bounded west by Poland, north by Latvia and Lithuania, east by the RSFSR and south by the Ukraine. The area is 207,600 sq. km (80,134 sq. miles). The capital is Minsk. Other important towns are Gomel, Vitebsk, Mogilev, Bobruisk, Grodno and Brest. On 2 Nov. 1939 western Belorussia was incorporated with an area of over 108,000 sq. km and a population of 4.8m. The population (Jan. 1980) was 9.6m. About 81% of this population in 1970 were Belorussians, 10.4% Poles, 2.1% Russians, 4.3% Ukrainians and 1.6% Jews.

Belorussia now comprises the following regions: Brest, Gomel, Grodno, Mogilev, Minsk, Vitebsk.

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1980, consists of 485 deputies (1 per 20,000 population); 328 are Communists and 180 women. A new Constitution was adopted in April 1978.

At elections to regional, district, urban and rural Soviets (19 June 1977), of 79,815 deputies returned, 38,233 (47.9%) were women, 45,096 (56.5%) non-Party and 54,001 (67.7%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: I. E. Poliakov.

Chairman, Council of Ministers: A. N. Aksyonov.

Foreign Minister: A. E. Gurinovich.

First Secretary, Communist Party: T. Y. Kiselyov.

NATURAL RESOURCES. Belorussia is hilly, with a general slope towards the south. It contains large tracts of marsh land, particularly to the south-west, and valuable forest land wooded with oak, elm, maple and white beech: there are over 6,500 peat deposits.

AGRICULTURE. Agriculturally, Belorussia may be divided into three main sections—Northern: growing flax, fodder, grasses and breeding cattle for meat and dairy produce; Central: potato growing and pig breeding; Southern: good natural pasture land, hemp cultivation and cattle breeding for meat and dairy produce. The area under cultivation (in hectares) was 4.5m. in 1913, 5.2m. in 1940 and 6.3m. in 1979. There were 6.8m. cattle, 4.6m. pigs and 540,000 sheep and goats on 1 Jan. 1980.

Output of main agricultural products (in 1,000 tonnes) in 1979 (1913 figures in brackets): Flax, 78 (33); sugar-beet, 1,383 (0), potatoes, 15,253 (4,024); meat, 915 (219); milk, 6.3 (1.4); wool, 1.1 (2.3); grain 4.6 (2.6); 2,894m. eggs (413m.).

At the end of 1977 there were 1,887 collective farms and 894 state farms. About 2.5m. hectares of marsh land had been drained for agricultural use, 828,200 of these for crops. This land has been found to be as rich as the soil of the Black Earth Zone, and yields good harvests of grain, fodder, potatoes, koksagyz and other crops. In Jan. 1980, 2.6m. hectares were drained and 36,300 hectares of land irrigated.

In Jan. 1980 there were 27,700 tractors and grain combine harvesters.

INDUSTRY. Industry in this republic was almost completely destroyed during the years 1941–45. By 1956, aggregate industrial output was three times what it had been in 1940. Plants producing tip-lorries, machine-tools and agricultural machinery are prominent.

The republic also contains timber works; a match factory in Borisov; building materials, machine, pre-fabricated house construction, glass-blowing and other factories; canneries, creameries and other food industries; chemical, textiles, artificial-silk, flax-spinning and leather works.

The automobile and tractor industry produced 89,100 tractors and 32,500 lorries in 1979. Cement output, 33,000 tons in 1913, was 2.17m. tons in 1975. Leather footwear output, 9.8m. pairs in 1940, was 41.6m. pairs in 1979. Linen fabrics, 13,000 linear metres in 1913, 68.4m. in 1975; woollens, 37,000 linear metres in 1913, 29m. in 1975.

Particular attention has been paid to the development of the peat industry with a view to making Belorussia as far as possible self-supporting in fuel, and in 1939 local peat provided 67.5% of her total requirements of fuel. The average annual output is about 18m. tonnes.

There are also rich deposits of rock salt. In 1951 the first sugar refinery in Belorussia was opened in Grodno; sugar output in 1979 was 313,900 tonnes.

Output of electricity in 1978, 32,700m. kwh. (508m. in 1940). New power-plants have been built in Baranovichi, Grodno, Molodechno and Lida.

The number of industrial and office workers at the end of 1979 was 3.9m.

AZERBAIJAN

Azərbaycan Sovet Sosialistik Respublikası

HISTORY. The 'Mussavat' (Nationalist) party, which dominated the National Council or Constituent Assembly of the Tartars, declared the independence of Azerbaijan on 28 May 1918, with a capital, first at Ganja (Elizavetpol) and later at Baku. On 28 April 1920 Azerbaijan was proclaimed a Soviet Socialist Republic. With Georgia and Armenia it formed the Transcaucasian Soviet Federal Socialist Republic. In 1936 it assumed the status of one of the Union (constituent) republics of the USSR.

AREA AND POPULATION. Azerbaijan covers an area of 86,600 sq. km (33,430 sq. miles) and has a population (Jan. 1980) of 6,117,000. Its capital is Baku. Other important towns are Kirovabad and Sumgait. Nahichevan is the capital of the Autonomous Republic of the same name.

Azerbaijan includes the Nahichevan Autonomous Republic and the Nagorno-Karabagh Autonomous Region. Situated in the eastern area of Transcaucasia, it is protected by mountains in the west and north, washed by the Caspian Sea in the east and bounded by Iran in the south. Its climate is inclined to drought.

In 1970 about 74% of the population were Azerbaijanis. Other nationalities were Russians (10%), Armenians (9%) and Georgians (2.7%).

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1980, consists of 450 deputies (1 per 10,000 population); 312 are Communists and 179 women. A new Constitution was adopted in April 1978.

At elections to the Nagorno-Karabagh regional Soviet and the district, urban and rural Soviets (19 June 1977), of 48,911 deputies returned, 22,731 (46.5%) were women, 26,841 (54.9%) non-Party and 32,061 (65.6%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: K. A. Halilov.

Chairman, Council of Ministers: A. I. Ibrahimov.

Azerbaijan has become an important cotton-growing and sub-tropical base. About 70% of cultivated land is irrigated. On the irrigated land crops of Egyptian and Sea-Island cotton are obtained. Here, too, rice and lucerne are cultivated, and in the mountain valleys there are also orchards, vineyards and silk cultures.

In the south along the coast of the Caspian, where the climate is more moist, there are tea plantations, and citrus fruits and other sub-tropical plants are grown.

In 1941 a scientific research institute for sub-tropical research was opened to develop the culture of sub-tropical plants in Azerbaijan and other parts of Transcaucasia. A forestry research institute was opened in 1949.

There were on 1 Jan. 1980, 625 collective farms, 676 state farms, 34,500 tractors and 4,400 grain combine harvesters.

INDUSTRY. The republic is rich in natural resources: oil, iron, aluminium, copper, lead, zinc, precious metals, sulphur pyrites, limestone and salt. Iron and steel and aluminium works have been built at Sumgait.

The most important industry is the oil industry, especially in the Baku region. The output of oil was 7.7m. tonnes in 1913, 22.2m. tonnes in 1940 and 16.5m. tonnes in 1976. The largest producing area lies along the western shore of the Caspian Sea, north and south of Baku, where the largest refineries are located. Other wells lie west of Baku, and some have been drilled in the Caspian itself, off the Apsheron Peninsula. Baku is connected by a double pipeline with Batum on the Black Sea. All the oilfields have been electrified and are connected with Baku.

Synthetic rubber works (Sumgait), tyre works and a worsted combine (Baku) and a large textile combine (Mingeaur) have been built.

The number of industrial and office workers in 1979 (average for year) was 1.75m.

COMMUNICATIONS. Railway lines, apart from narrow gauge, 1,880 km. The first electrical railway (42 km) in the USSR was constructed in Azerbaijan in 1924; in 1949, 27 km was added, and the line now runs Baku-Surakhany-Sabunchi-Buzovny-Baku. The capital is also linked by rail with Tbilisi, Yerevan, Derbent, Julfa and Astara. There were, in 1978, 23,800 km of motor roads (17,100 km hard-surface) and 500 km of inland waterways.

GEORGIA

Sakartvelos Sabchota Sotsialisturi Respublica

HISTORY. The independence of the Georgian Social Democratic Republic was declared at Tiflis on 26 May 1918 by the National Council, elected by the National Assembly of Georgia on 22 Nov. 1917. The independence of Georgia was recognized by the USSR on 7 May 1920. On 12 Feb. 1921 a rising broke out in Mingrelia, Abkhazia and Adjara, and Soviet troops invaded the country, which, on 25 Feb. 1921, was proclaimed the Georgian Soviet Socialist Republic. At the first Transcaucasian Soviet Congress, 15 Dec. 1922, Georgia, together with Armenia and Azerbaijan, united to form the Transcaucasian Soviet Federal Socialist Republic, and a federal constitution was adopted and published 10 Jan. 1923. In 1936 the Georgian Soviet Socialist Republic became one of the constituent republics of the USSR and, like other republics of USSR, adopted a new Constitution.

AREA AND POPULATION. Georgia is bounded west by the Black Sea and south by Turkey, Armenia and Azerbaijan. It occupies the whole of the western part of Transcaucasia and covers an area of 69,700 sq. km (26,900 sq. miles). Its population on 1 Jan. 1980 was 5m. The capital is Tbilisi (Tiflis). Protected from the north by the Caucasian mountains, and receiving in the west the warm, moist winds from the Black Sea, into which most of its rivers flow, Georgia is outstanding for its fine, warm climate and its natural wealth, variety and beauty. It has the highest snow-capped peaks of the Caucasian mountains. Georgia contains valuable sulphur and other medicinal springs. Georgians, an ancient

people, were (1970) 66.8% of the population: Armenians, 9.7%; Russians, 8.5%; Azerbaijanis, 4.6%; Ossetians, 3.2%; Abkhazians, 1.7%.

CONSTITUTION AND GOVERNMENT. The Georgian Soviet Socialist Republic includes the Abkhazian ASSR, the Adjarian ASSR and the South Ossetian Autonomous Region.

The Supreme Soviet, elected in 1980, consists of 440 deputies (1 per 10,000 population); 158 are women, 290 Communists. A new Constitution was adopted in April 1978.

At elections to the district, rural and urban Soviets, and that of the South Ossetian region (19 June 1977), of 49,371 deputies returned 23,903 (48.5%) were women, 28,064 (56.8%) non-Party and 33,303 (67.3%) industrial workers and collective farmers.

The most important mining industry of Georgia is the exploitation of the manganese deposits, the richest of which lie in the Chiatura region, where 1.6m. tonnes of ore were produced in 1971. Manganese deposits in Georgia are calculated at 250m. tonnes, distributed over an area of 140 sq. km. Georgia's fast flowing rivers form an abundant source of energy. One of the most

powerful stations completed in recent years is Tbilisi (1m. kw.). Power output in 1979 was 13,800m. kwh. (742m. in 1940).

There were 1.9m. industrial and office workers in 1979.

COMMUNICATIONS. Length of railways in 1978 was 1,420 km. The trunk line leading from Batumi through Tbilisi to Baku on the Caspian Sea has several narrow-gauge branches on Georgian territory to the coalmines of Tkibuli, to the port of Poti, to the manganese mines of Chiatura, to the mineral springs of Borjom and the health resort Bakuriani, to the towns Signakh and Telavi, in Kakhetia, and to the Armenian frontier, across the coalmine district of Alaverdi. The last branch divides in Armenia, going on the one side to Tabriz in Iran, and on the other to Erzerum in Anatolia. A railway line from Akhal-Senaki along the Black Sea coast, through Sukhumi to Tuapse, was completed in 1946. All lines are electrified or work on diesel traction. From the 2nd century B.C. onwards, it was a prey to many invaders—Romans, Byzantines, Arabs, Ottoman Turks—before accepting a Russian protectorate in 1810. However, from the 4th century A.D. a West Georgian kingdom was established by the Lazi princes in the territory (known to the Romans as 'Lazica') and by the 8th century the prevailing language was Georgian and the name Abkhazia.

On 4 March 1921 a congress of local Soviets proclaimed it a Soviet Republic, and its status as an Autonomous Republic, within Georgia, was confirmed on 17 April 1930.

140 deputies were elected on 24 Feb. 1980, 57 of them women.

ESTONIA

Eesti Nõukogude Sotsialistlik Vabariik

HISTORY. The workers' and soldiers' Soviets in Estonia took over power on 8 Nov. 1917, were overthrown by the German occupying forces in March 1918, and were restored to power as the Germans withdrew in Nov. 1918, establishing the 'Estland Labour Commune'. It was overthrown with the assistance of British naval forces in May 1919, and a democratic republic proclaimed.

The secret protocol of the Soviet German agreement of 23 Aug. 1939 assigned Estonia to the Soviet sphere of interest. An ultimatum (16 June 1940) led to the

formation of a government acceptable to the USSR: on 21 July the State Duma proclaimed Soviet power and applied to join the USSR: on 6 Aug. the Supreme Soviet accepted the application. The incorporation has been accorded *de facto* recognition by the British Government, but not by the US Government, which continues to recognize an Estonian consul-general in New York.

AREA AND POPULATION. Estonia is bounded west and north by the Baltic, east by the RSFSR and south by Latvia. Area, 45,100 sq. km (17,410 sq. miles); population, 1.47m. (Jan. 1980). 68.2% are Estonians, 24.7% Russians, 1.4% Finns. The capital is Tallinn. Other large towns are Tartu (106,000), Pärnu, Narva (74,000). There are 15 districts, 33 towns and 26 urban settlements.

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1980, consists of 285 deputies (1 per 10,000 population); 101 are women, 193 Communists. A new Constitution was adopted in April 1978.

Estonia has rich high-quality shale deposits (particularly in the north-east) which are estimated at 3,700m. tons. Shale output was 1.9m. tons in 1940 and 30m. in 1977. A factory for the production of gas from shale and a pipeline (208 km long) from Kohtla-Järve supplies shale gas to Leningrad and Tallinn. Estonian factories are now turning out agricultural and peat-digging machines, complex control and measuring instruments. The 'Volta' factory in Tallinn produces electric motors.

In the neighbourhood of Tallinn, phosphorites have been found, and in 1947 a plant for refining and for the production of superphosphates was started. Estonia also contains valuable peat deposits, and some of her electrical stations work on peat. A hydro-electric station was erected in 1955 on the Narva. There are 350 rural electric stations. There were 25,400 students in 6 higher educational establishments, including Tartu (Dorpat) University, founded in 1632, and 24,500 students in 37 technical colleges.

The Estonian Academy of Sciences, founded in 1946, has 24 institutions with 985 scientific staff; in all, 6,000 scientists are working in 72 institutions.

An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR; on 21 July a People's Diet established Soviet power and applied to join the USSR; the Supreme Soviet accepted the application on 5 Aug. LITHUANIA

Lietuvos Tarybu Socialistinė Respublika

HISTORY. In 1914–15 the German army occupied the whole of Lithuania. On its withdrawal (Dec. 1918) Soviets were elected in all towns and a Soviet republic was proclaimed. In the summer of 1919 it was overthrown by Polish, German and nationalist Lithuanian forces, and a democratic republic established.

The secret protocol of the Soviet–German frontier treaty of 28 Sept. 1939 assigned the greater part of Lithuania to the Soviet sphere of influence. In Oct. 1939 the province and city of Vilnius (in Polish occupation 1920–39) were ceded by the USSR. An ultimatum (16 June 1940) led to the formation of a government acceptable to the USSR. A people's Diet, elected on 14–15 July, applied for Lithuania's admission to the Soviet Union on 22 July, which was effected by decree of the Supreme Soviet on 3 Aug. and included also those parts of Lithuania which had been reserved for inclusion in Germany. SOVIET CENTRAL ASIA

Soviet Central Asia embraces the Kazakh Soviet Socialist Republic, the Uzbek Soviet Socialist Republic, the Turkmen Soviet Socialist Republic, the Tadzhik Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic.

Turkestan (by which name part of this territory was then known) was conquered by the Russians in the 1860s. In 1866 Tashkent was occupied and in 1868 Samarkand, and subsequently further territory was conquered and united with Russian Turkestan. In the 1870s Bokhara was subjugated, the emir, by the agreement of 1873, recognizing the suzerainty of Russia. In the same year Khiva became a vassal state to Russia. Until 1917 Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan.

In the summer of 1919 the authority of the Soviet Government became definitely established in these regions. The Khan of Khiva was deposed in Feb. 1920, and a People's Soviet Republic was set up, the medieval name of Khorezm being revived. In Aug. 1920 the Emir of Bokhara suffered the same fate, and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was constituted an Autonomous Soviet Socialist Republic within the RSFSR on 11 April 1921.

In the autumn of 1924 the Soviets of the Turkestan, Bokhara and Khiva Republics decided to redistribute the territories of these republics on a nationality basis; at the same time Bokhara and Khiva became Socialist Republics. The redistribution was completed in May 1925, when the new states of Uzbekistan, Turkmenistan and Tadzhikistan and several autonomous regions were established. The remaining districts of Turkestan populated by Kazakhs were united with Kazakhstan. Kirghizia, until then part of the RSFSR, was established as a Union Republic in 1936.

It was made a constituent republic of the USSR on 5 Dec. 1936. To this republic were added the parts of the former Governorship of Turkestan inhabited by a majority of Kazakhs. It consists of the following regions: Aktyubinsk, Alma-Ata, Chimkent, Dzhambul, Dzhezkazgan, East Kazakhstan, Guryev, Karaganda, Kokchetav, Kustanai, Kzyl-Orda, Mangyshlak, North Kazakhstan, Pavlodar, Semipalatinsk, Taldy-Kurgan, Tselinograd, Turgai, Uralsk.

AREA AND POPULATION. Kazakhstan is bounded on the west by the Caspian Sea and the RSFSR, on the east by China, on the north by the RSFSR and on the south by Uzbekistan and Kirghizia. The area of the republic is 2,717,300 sq. km (1,049,155 sq. miles). It is the next in size to the RSFSR, is far larger than all the other Central Asian Soviet Republics combined and stretches nearly 3,000 km from west to east and over 1,500 km from north to south. Population (Jan. 1980) 14.8m., of whom 55% live in urban areas. The Kazakhs form 32.6%, Russians 42% and Ukrainians 7.2% (owing to the industrialization of the country since 1941 and the opening of virgin lands since 1945). The population includes over 100 nationalities.

The capital is Alma-Ata, formerly Verny; other large towns are Karaganda, Semipalatinsk, Chimkent and Petropavlovsk. In all there are 82 towns, 189 urban settlements and 218 rural districts.

1,827,000 hectares of land have an irrigation network.

The 'Ukrainka' winter wheat has been transformed into a spring wheat suitable for cultivation in Kazakhstan. Tobacco, rubber plants and mustard are also cultivated. Kazakhstan has rich orchards and vineyards; 25,000 hectares were under vines and 101,000 under orchards in 1978. Between 1954 and 1959, over 23m. hectares of virgin and long fallow land were opened up, 544 new state grain farms being organized for the purpose. Grain deliveries to the state were 10.5m. tons in 1960; 2.4m. in 1965; 13.4m. in 1970; 5.1m. in 1975; 8.2m. in 1977; 16,784 in 1978.

Kazakhstan is noted for its livestock, particularly its sheep, from which excellent quality wool is obtained. The Akharomerino is a newly developed crossbreed of merino sheep and the wild Akhar mountain ram. Livestock on 1 Jan. 1979 included 8.01m. cattle, 34.2m. sheep and goats and 2.6m. pigs.

Coal and tungsten in Karaganda (in the centre), oil along the river Emba (in the west), copper, lead and zinc—Kazakhstan contains about one-half of the total deposits of these three metals contained in the USSR—Iceland spar (in the south), nickel and chromium in the Kustanai and Semipalatinsk regions, molybdenum and other minerals.

In 1943 big deposits of manganese were found in Eastern Kazakhstan; new coal seams were also discovered there. In South Kazakhstan new copper and bauxite deposits have been found.

Coal, oil, non-ferrous metallurgy, heavy engineering and chemical industries have brought Kazakhstan to the third place among the industrial republics of the USSR.

Coal output in 1977 was 93.7m. tons; oil, 23.3m. tons; steel, 5.6m. tons; rolled metal, 4.4m. tons; cement, 6.8m. tons; mineral fertilizers, 6.5m. tons; cotton fabrics, 101.2m. linear metres; leather footwear, 31.2m. pairs; woollen fabrics, 16.7m. linear metres; granulated sugar, 120,100 tons. The Leninogorsk and Chimkent lead plants, the Balkhash, Irtysh and Karaskpai copper-smelting works and others supply the country with nonferrous metals. A meat-packing plant has been built in Semipalatinsk, a fish cannery in Guryev, a chemical plant in Aktyubinsk, a tractor works at Pavlodar, and a superphosphate plant in Dzhambul. The oil industry in Emba and Aktyubinsk yields high-quality aviation oil. Iron ore output in 1977 was 23.4m. tons.

Aviation plays an important part in agriculture. About 14m. hectares were in 1970 treated from the air (destruction of pests, surface feeding of sugar-beet plantations, pollination of orchards, etc.).

Among recent enterprises are a large textile combine at Kustanai, hosiery factories at Djezkazgan, Leninogorsk and Aktyubinsk, a sugar factory at Aksu, meat canneries at Djetygar and Kzyl-Orda.

Electric power output in 1979 was 59,700m. kwh.

There were, in 1979, 5.9m. (average for year) industrial and office workers in the national economy.

UZBEKISTAN

Ozbekiston Soviet Sotsialistik Respublikasy

HISTORY. In Oct. 1917 the Tashkent Soviet assumed authority, and in the following years established its power throughout Turkestan. The semi-independent Khanates of Khiva and Bokhara were first (1920) transformed into 'People's Republics', then (1923-24) into Soviet Socialist Republics and finally merged in the Uzbek SSR and other republics.

The Uzbek Soviet Socialist Republic was formed on 27 Oct. 1924 from lands formerly included in Turkestan. It includes a large part of the Samarkand region, the southern part of the Syr Darya, Western Ferghana, the western plains of Bukhara, the Kara-Kalpak ASSR and the Uzbek regions of Khorezm. In May 1925 Uzbekistan, by the decision of the Congress of Soviets of the USSR, was accepted as one of the constituent republics in the Soviet Union.

AREA AND POPULATION. Uzbekistan is bordered on the north by the Kazakh Soviet Socialist Republic, on the east by the Kirghiz Soviet Socialist Republic and the Tadzhik Soviet Socialist Republic, on the south by Afghanistan and on the west by the Turkmen Soviet Socialist Republic. The Uzbeks, who form 65% of the population, were the ruling race in Central Asia, until the arrival of the Russians during the third quarter of the 19th century. The several native states over which Uzbek dynasties formerly ruled were founded in the 15th century upon the ruins of Tamerlane's empire. The Uzbeks speak Jagatai Turkish, which is related to Osmanli and Azerbaijan Turkish; many are Sunni Moslems. Russians number 12.5%, other Central Asians 10.7%, Tartars 4.9%.

The area of Uzbekistan is 447,400 sq. km (172,741 sq. miles). The population in Jan. 1980 was 15,774,000 (40% urban). The country comprises the following regions: Andizhan, Bukhara, Dzhizak (formed 29 Dec. 1973), Ferghana, Kashkadar, Khorezm, Namangan, Samarkand, Surkhan-Darya, Syr-Darya (formed 16 Feb. 1963), Tashkent and the Autonomous Soviet Republic of Kara Kalpakia. The capital of the Republic is Tashkent; other large towns are Samarkand, Andizhan, Namangan. There are 87 towns, 84 urban settlements and 138 rural districts.

On 19 Sept. 1963 the Supreme Soviet of the USSR confirmed decisions of the Supreme Soviets of Kazakhstan and Uzbekistan, transferring over 40,000 sq. km from the former to the latter to ensure more efficient use of the 'Hungry Steppe'.

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1980, consists of 510 deputies (1 per 15,000 population); 178 are women, 346 Communists. A new Constitution was adopted in April 1978.

At elections to the regional, district, urban and rural Soviets (19 June 1977), of 93,430 deputies returned, 44,953 (48.1%) were women, 51,691 (55.3%) non-Party and 64,600 (69.1%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: I. B. Usmanhodjayev (Dec. 1978).

Chairman, Council of Ministers: N. D. Hudaiberdyev.

First Secretary, Communist Party: S. R. Rashidov.

FINANCE. Budget estimates (in 1m. new roubles), 1965, 2,133; 1970, 3,228; 1977, 4,465; 1978, 4,636; 1980, 5,225; 1981, 5,659.

AGRICULTURE. Uzbekistan is a land of intensive farming, based on artificial irrigation. It is the chief cotton-growing area in the USSR and the third in the world. About 3.3m. hectares of collective and state farmland have irrigation networks, totalling 150,000 km in length, and all are in full use.

In 1939 the Ferghana Canal (270 km) was built. During 1940, among the irrigation canals completed were: the North Ferghana Canal (165 km), and Andreyev South Ferghana Canal (108 km) and the first section of the Tashkent Canal (63 km). A canal from the Amu-Darya to Bokhara across the Kzyl-Kum and Ust-Urt deserts (180 km) was completed in 1965. A 200-km canal joining the river Zeravshan with the Kashka Darya at the village of Paruz was completed in Aug. 1955; it is part of the Iski-Angara Canal. The first section (93 km) of a canal irrigating the southern 'Hungry Steppe' was opened in 1960; 500,000 hectares of this desert were under cultivation in 1967.

Agriculture flourishes, particularly in the well-watered, warm, rich oases areas, such as the Ferghana valley, Zeravshan, Tashkent and Khorezm, where cotton, fruit, silk and rice are cultivated. In the higher-lying plains grain is grown; the wide desert and semi-desert area of Western Uzbekistan is mainly given to pasture land and the breeding of the Karakul sheep; there is a Karakul institute at Samarkand.

Orchards occupied 195,000 hectares and the vineyards 70,000 hectares in 1977. The Central Asian Branch of the Scientific Research Institute of Viticulture in Tashkent has produced new frost resistant grapes by crossing the wild Amur grape with Central Asian and European types. In 1979 there were 927 collective farms and 744 state farms, with 151,800 tractors and 27,400 cotton picking and grain combines. Ploughing, cotton-sowing and cultivation are completely mechanized; cotton-picking over 46%.

Uzbekistan provides 67% of the total cotton, 50% of the total rice and 60% of the total lucerne grown in the USSR. The area under crops was 2,189,000 hectares in 1913, 3,036,000 hectares in 1940 and 3.9m. hectares in 1978.

Livestock on 1 Jan. 1979: 3.23m. cattle, 8.1m. sheep and goats and 368,000 pigs.

Output of main agricultural products (in 1,000 tonnes) in 1978 (1913 figures in tons in brackets): Wheat, 757 (513); maize, 1,052 (39); cotton, 5,763 (517); potatoes, 227 (46); fruit, 124; grapes, 103; meat, 302 (89); milk, 2,073 (231); wool, 28.4 (5.3); 1,397m. eggs (87m.).

Afforestation over an area of 50,000 hectares has been carried out to protect the Bokhara and Karakul oases from the advancing Kzyl-Kum sands and to stop the sand-drifts in a number of districts of Central Ferghana.

INDUSTRY. Of its mineral resources, in addition to oil and coal, copper and building materials and ozocerite deposits are now also exploited. New very rich coal deposits were discovered in 1944 and 1947 near Tashkent.

There are nearly 1,600 factories and mills. They include a factory of agricultural machinery (in Tashkent), a cement factory, a sulphur-mine, an oxygen factory, a paper-mill, a leather factory, textile-mills, clothing factories, iron and steel works, the Chirchik electro-chemical plant, a superphosphate plant in Kokand and oil refineries, coalmines, etc. Output in 1977 included 5.4m. tons of coal, 411,000 tons of steel, 1.4m. tons of oil, 3.54m. tons of cement, 5.9m. tons of mineral fertilizers, 223.1m. linear metres of cotton fabrics, 107m. linear metres of silk fabrics, 27.1m. pairs of leather footwear, 784,000 hectolitres of wine (apart from collective farm output). Gold is being worked at Muruntau, Chadak and Kochbulak.

The Tashkent power station (2m. kw.) was completed in 1971. Power output in 1977 was 34,900m. kwh. (481m. kwh. in 1940). Two natural-gas pipelines (Djaikak-Tashkent, Ferghana-Kokand) and a third from Bokhara to the Urals are operating. Natural gas output (1976) was 36,100m. cu. metres.

In 1979 there were 4m. industrial and office workers in the national economy.

TADZHIKISTAN

Respublikai Sovieth Sotsialistii Tojikiston

HISTORY. The Tadzhik Soviet Socialist Republic was formed from those regions of Bokhara and Turkestan where the population consisted mainly of Tadzhiks. It was admitted as a constituent republic of the Soviet Union on 5 Dec. 1929.

AREA AND POPULATION. Tadzhikistan is situated between 39° 40' and 36° 40' N. lat. and 67° 20' and 75° E. long., north of the Oxus (Amu-Darya). On the west and north it is bordered by Uzbekistan and by the Kirghiz Soviet Socialist Republic; on the east by Chinese Turkestan and on the south by Afghanistan. It includes three regions (Leninabad, Kurgan-Tyube and Kulyab) and 41 rural districts, 18 towns and 49 urban settlements, together with the Gorno-Badakhshan Autonomous Region. Its highest mountains are Communism Peak (7,495 metres) and Lenin Peak (7,127 metres). Even the lowest valleys in the Pamirs are not below 3,500 metres above sea-level. The huge mountain glaciers are the source of

many rapid rivers—the tributaries of the Amu-Darya, which flows from east to west along the southern border of Tadzhikistan. About 56% of the population are Tadzhiks. They speak an Iranian dialect, little different from Persian, and they are considered to be the descendants of the original Aryan population of Turkestan. Unlike the Persians, the Tadzhiks are mostly Sunnis. Of the rest, 23% are Uzbeks living in the north-west of the republic. Russians and Ukrainians number 13% (1970 census).

The area of the territory is 143,100 sq. km (55,240 sq. miles). Population (Jan. 1980), 3.9m. The capital is Dushanbe. Other large towns are Leninabad (130,000), Kurgan-Tyube, Kulyab.

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1980, consists of 349 deputies (1 per 5,000 population); 123 are women and 238 Communists. A new Constitution was adopted in April 1978.

Tadzhikistan grows many varieties of fruit, including apricots, figs, olives, pomegranates, a local variety of lemons and oranges, and in the south sugar-cane has been grown. Even on the highest mountain plateaux of the Pamirs, 'the roof of the world', the biological station of Tadzhikistan (3,860 metres above sea-level) has succeeded in raising crops of 60 varieties of barley, 10 varieties of oats, 4 of wheat, as well as vegetables. Eucalyptus and geranium are grown for the perfumery industry. Jute, rice and millet are also grown.

The mountainous nature of the republic makes ordinary railway construction difficult; accordingly 345 km of narrow gauge railways have been constructed (Kurgan-Tyube-Piandzh and Dushanbe-Kurgan-Tyube, connecting Dushanbe with the cotton-growing Vakhsh valley are particularly important).

Aviation. Dushanbe is connected by air with Moscow, Tashkent, Baku and the regional and district centres of the republic.

In 1951 an Academy of Sciences was established; it has 17 institutions, the scientific staff of which numbers 1,267; there are 61 research institutions in all, with 6,900 scientific personnel. The Pamir research station is the highest altitude meteorological observatory in the world.

KIRGHIZIA

Kyrgyz Sovietik Sotsialistik Respublikasy

HISTORY. After the establishment of the Soviet regime in Russia, Kirghizia was part of Soviet Turkestan, which itself became an Autonomous Soviet Socialist Republic within the RSFSR in April 1921. In 1924, when Central Asia was reorganized territorially on a national basis, Kirghizia was separated from Turkestan and formed into an autonomous region within the RSFSR. On 1 Feb. 1926 the Government of the RSFSR transformed Kirghizia into an Autonomous Soviet Socialist Republic within the RSFSR, and finally in Dec. 1936 Kirghizia was proclaimed one of the constituent Soviet Socialist Republics of the USSR.

AREA AND POPULATION. The territory of Kirghizia covers 198,500 sq. km (76,460 sq. miles), and its population in Jan. 1980 was 3.6m. The republic comprises 3 regions: Issyk-Kul, Naryn and Osh. There are 18 towns, 31 urban settlements and 37 rural districts. Its capital is Frunze (formerly Pishpek). Other large towns are Osh (173,000), Przhevalsk (52,000), Kyzyl-Kia, Tokmak.

Kirghizia is situated on the Tian-Shan mountains and bordered on the east by China, on the west by Kazakhstan and Uzbekistan, on the north by Kazakhstan and in the south by Tadzhikistan. The Kirghizians are of Turkic origin and form 44% of the population; the rest are Russians (29%), Ukrainians (4%), Uzbeks (11.3%) and others (1970 census).

CONSTITUTION AND GOVERNMENT. The Supreme Soviet, elected in 1980, consists of 350 deputies (1 per 5,000 population); 126 are women, 235 Communists. A new Constitution was adopted in April 1978.

At elections to the regional, district, urban and rural Soviets (19 June 1977), of the 24,890 deputies returned, 11,813 (47.5%) were women, 13,817 (55.5%) non-Party and 17,239 (69.2%) industrial workers and collective farmers.

President, Presidium of the Supreme Soviet: S. I. Ibraimov.

Chairman, Council of Ministers: A. S. Suyumbayev.

First Secretary, Communist Party: T. U. Usubaliev.

Yaks are bred as meat and dairy cattle, and graze on high altitudes unsuitable for other cattle. Crossed with domestic cattle, hybrids are produced much heavier than ordinary Kirghiz cattle and giving twice the yield of milk. The Kirghizian horse is famed for its endurance, but it is of small stature; it has in recent years been crossed with Don, Arab and other breeds.

On 1 Jan. 1979 there were 182 collective and 214 state farms. Area under crops (1978), 1.3m. hectares (1913, 640,000; 1940, 1,056,000). There were 25,900 tractors and 4,200 grain combine harvesters and 1,600 cotton combines in 1978; nearly all collective and state farms received electric power.

Kirghizia raises wheat sufficient for its own use and other grains and fodder, particularly lucerne; also sugar-beet, hemp, kenaf, kender, tobacco, medicinal plants and rice. Sericulture, fruit, grapes and vegetables and bee-keeping are major branches of Kirghiz agriculture. Agriculture is highly mechanized; nearly all the area under crops is worked by tractors. In 1977 irrigation networks in collective and state farms covered 933,000 hectares; practically all were in use. A canal in the western Tien-Shan ranges and a reservoir in the Urto-Tokoi mountains are being constructed.

Towns in the southern valleys are linked by short lines with the Ursatyevskaya-Andizhan railway in Uzbekistan. Total length of railway is 370 km. Most of the traffic is by road; there were 22,300 km of motor roads (15,200 hard surface) in 1978. A road tunnel through the Tien Shan mountains at an altitude of 9,600 ft. connecting Frunze and Osh, is being constructed. Inland waterways, 600 km. Airlines link Frunze with Moscow and Tashkent.

UNITED ARAB EMIRATES

Population: 1·04m. (1980)

GNP per capita: US\$14,230 (1978)

HISTORY. From Sha'am, 35 miles south-west of Ras Musam dam, for nearly 400 miles to Khor al Odeid at the south-eastern end of the peninsula of Qatar, the coast, formerly known as the Trucial Coast, of the Gulf (together with 50 miles of the coast of the Gulf of Oman) belongs to the rulers of the 7 Trucial States. In 1820 these rulers signed a treaty prescribing peace with the British Government. This treaty was followed by further agreements providing for the suppression of the slave trade and by a series of other engagements, of which the most important are the Perpetual Maritime Truce (May 1853) and the Exclusive Agreement (March 1892). Under the latter, the sheikhs, on behalf of themselves, their heirs and successors, undertook that they would on no account enter into any agreement or correspondence with any power other than the British Government, receive foreign agents, cede, sell or give for occupation any part of their territory save to the British Government.

British forces withdrew from the Gulf at the end of 1971 and the treaties whereby Britain had been responsible for the defence and foreign relations of the Trucial States were terminated, being replaced on 2 Dec. 1971 by a treaty of friendship between Britain and the United Arab Emirates. The United Arab Emirates (formed 2 Dec. 1971) consists of the former Trucial States: Abu Dhabi, Dubai, Sharjah, Ajman, Umm al Qawain, Ras al Khaimah (joined in Feb. 1972) and Fujairah. The small state of Kalba was merged with Sharjah in 1952. *See* map in THE STATESMAN'S YEAR-BOOK, 1972-73, The Gulf States of the Middle East.

External Debt. The UAE (mainly the government of Dubai) borrowed about \$205m. on Eurocurrency markets in 1976 and about \$850m. in 1977.

Aid. Abu Dhabi committed 25% of government oil revenues to external aid 1971-76; this included aid to other Arab countries and loans at concessionary rates through the Abu Dhabi Fund for Arab Economic Development. The Government of Abu Dhabi has also committed funds to the IMF and the World Bank.

ECONOMY

Planning. Public projects completed include the 15-berth Port Rashid harbour opened 1972. A municipal sewerage scheme is under way and a police headquarters is planned. Further developments include reclamation of part of the seafront, improvement of the creek unloading facilities, a traffic tunnel, and additional bridge over the creek. In Sharjah, Mina Khalid is now operational and ships are using the

new jetty, while improvement of the creek entrance and additional wharfage are now being undertaken. There are plans for a cement works and a flour-mill in Dubai in the near future and a large deep-water harbour is being constructed in Abu Dhabi.

Budget. Revenue is principally derived from oil-concession payments. The federal budget (1980) UD 15,972m.

Currency. The UAE issued its own currency in 1972 based on the *dirham*. 1 UAE *dirham* = 10 *dinar* = 1,000 *fls*. There are notes of 1, 5, 10, 50, 100 and 1,000 *dirham* and coins of 1, 5, 10, 25, 50 and 100 *fls*. Rate of exchange, March 1981: £1 = 7.48 *dirham*; US\$1 = 3.672 *dirham*.

The UAE is to become the headquarters of the new Arab Monetary Fund, which will have an initial capital of 250m. Arab Dinar units of account, worth about US\$900m., and is providing 15m. units of account as its contribution.

ENERGY AND NATURAL RESOURCES

Oil. *Abu Dhabi.* Until the end of 1972 production was in the hands of 2 major companies, the Abu Dhabi Petroleum Co. and the Abu Dhabi Marine Area. The Government has acquired a 60% interest in both companies. Ownership in 1976 was as follows: ADPC, 60% Government; 9.5% BP; 9.5% Shell; 9.5% CFP; 4.75% Mobil; 2% Partex. ADMA, 60% Government; 26.7% BP Japan Oil Development Co.; 13.3% CFP. A Japanese company, Abu Dhabi Oil Co. (ADOCO) began production from its Mubarratz field in 1973. There are other companies which have concessions in the State: Japan's Middle East Oil; a US consortium led by Pan Ocean Oil and Sunningdale Oils of Canada. A State Petroleum Co., the Abu Dhabi National Oil Co. (ADNOC), was formed in 1971 and began to set up its own tanker fleet known as the Abu Dhabi National Tankers Co. (ADNATCO). At the end of 1972 Abu Dhabi signed a participation agreement which would have given it an immediate 25% interest in the companies, rising to 51% by 1982. Oil production, 1979, 534.1m. bbls.

Dubai. In July 1975 Dubai decided to take full control of all foreign oil and gas operations in the State. The companies were to remain however. A Dubai producing group was set up to comprise the foreign interests—US and continental companies, Dubai Petroleum Co. (DPC—a subsidiary of Continental Oil) has a 30% interest in this group; the other members are Dubai Marine Areas (*Compagnie Française des Pétroles*) with 50%; Deutsche Texaco with 10%; Dubai Sun Oil 5%; and Delfzee Dubai Petroleum (Wintershall) 5%. Oil production, 1979, 129.3m. bbls.

Sharjah. In Sharjah the concession is given to Crescent Oil, its shareholders are: Ashland Oil, Skelly Oil, Kerr-McGee, Cities Services and Juniper. Other oil concessions have recently been given to the Crystal Oil Co. of USA and the Reserves Oil and Gas Co. Oil production, 1979, 3.1m. bbls.

Ajman. An oil concession was awarded to United Refining in 1974.

Umm al Quawain. The concession here was given to US Occidental Petroleum; another was awarded to a consortium led by the US company United Refinery.

Ras al Khaimah. The Dutch oil firm Vitol took over Union's concession in 1973. Shell began prospecting in 1969 but pulled out in 1971. A concession in the same area was awarded to Peninsula Petroleum, a subsidiary of the US California Time Group, in 1973.

Gas. Abu Dhabi has reserves of natural gas, nationalized in 1976. The Abu Dhabi Gas Liquefaction Plant at Das Island (51% ADNOC) has a capacity of 2m. tons LNG, 1m. tons LPG, 220,000 tons of light distillate and 230,000 tons of pelletized sulphur.

Agriculture. The fertile Buraimi Oasis, known as Al Ain, is largely in Abu Dhabi territory, but owing to lack of water and good soil there is little agriculture in the rest of UAE. There are 15,000 hectares of cultivated land. However, since the establishment of an agricultural trials station and an agricultural school in Ras al Khaimah the number of gardens under cultivation has more than doubled and there have been remarkable increases in the variety of crops and the length of the agricultural season. An experimental agricultural farm exists in Al Ain which produces vegetables for Abu Dhabi.

Livestock (1979): Cattle, 25,000; camels, 50,000; sheep, 125,000; goats, 290,000.

Fisheries. The industry is still a major employer. Sharjah exports shrimps and prawns; a fishmeal plant is operating in Ras al Khaimah and plants are planned for Ajman and Sharjah.

INDUSTRY. Main industries in Abu Dhabi relate to the construction industry and to oil and gas extraction; there is also a steel rolling mill. Dubai has a cement factory of 500,000 tons annual capacity, and a dry dock. Work has also begun on a complex at Jebal Ali consisting of a liquefied petroleum gas plant. An aluminium smelter with power station and desalination plant was opened in Feb. 1979. Sharjah has a cement factory and various manufacturing estates. Ras al Khaimah also produces cement and crushed rock.

COMMERCE. Imports in 1979 for UAE were US\$6,483m. Exports and re-exports totalled 13,475.1m. Oil exports accounted for 95% of the total.

Total trade between the UAE (excluding Abu Dhabi) and UK (British Department of Trade returns, in £1,000 sterling):

COMMUNICATIONS

Aviation. International airports at Dubai and Abu Dhabi are served by a large number of major airlines, as well as by Gulf Air partially owned by the Government of the UAE. Plans are underway for the construction of a new Abu Dhabi airport. A new international airport was inaugurated at Sharjah in 1979. A Ras al Khaimah international airport was opened early in 1976 although it initially had only one scheduled service by Kuwait Airways. An airstrip exists at Al Ain, in the Buraimi Oasis, and in the oilfields, both onshore and offshore, on Das Island, while construction of a strip at Khor Fakkan is planned.

Abu Dhabi and Dubai are served by Alia, Air France, Air India, British Airways, Egyptair, Iran Air, Kuwait Airways, Middle East Airlines, PIA, KLM, Gulf Air, Iraqi Airways, Olympic, SABENA, Saudia, Syrian Arab Airlines and TMA. Lufthansa and Singapore Airlines initiated scheduled flights to Dubai in mid-1976.

while Sharjah is served by Gulf Air and TMA. A number of cargo airlines also fly regularly to the country's major airports. An air-taxi service, Emirates Air Services, flying between Abu Dhabi and Dubai, began in June 1976.

Shipping. British and European shipping lines call at Dubai (30–40 vessels a month) and Abu Dhabi. In 1972 Port Rashid, equipped with 15 deep-water berths, was opened, making Dubai harbour the largest in the Middle East, and a new contract was granted to a British company in 1976 to build a further 22 berths. A major dry dock, capable of handling super-tankers has also been built. Abu Dhabi has also become an important port since the opening of the first stage of its artificial harbour, Port Zayed, which, when completed, will have 17 deep-water berths.

In 1976, the Government of the UAE joined with Qatar, Bahrain, Saudi Arabia, Kuwait and Iraq in forming the United Arab Shipping Co.

Post and Broadcasting. In 1978 there were 96,847 telephones, of which 32,071 were in Abu Dhabi. In Sharjah a new telephone company has been formed and the other Northern States are now linked by telephone. The new Cable and Wireless Station at Jebel Ali in the State of Dubai links the system with the international communication network.

Television stations are at Abu Dhabi and Dubai, with extension of the service well advanced to the rest of the Emirates. Stations for The Voice of the United Arab Emirates began broadcasting in 1972 at Abu Dhabi, Dubai, Ras al Khaimah and Sharjah. Estimated radios (1976) 50,000 and television sets over 16,000.

The UAE is a founder member of the New Arab Space Communications Organization, having one satellite ground station at Jebel Ali in Dubai connected to the Indian ocean satellite; another is building and a link with the Atlantic ocean satellite is well underway.

Newspapers (1978). There are a number of daily and weekly publications mostly in Arabic, but some in English, notably *The Emirates News* of Abu Dhabi, and *The Gulf Mirror*, a weekly, published in Bahrain.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. UAE subjects and citizens of all Arab and Moslem states are subject to the jurisdiction of the local courts. In the local courts the rules of Islamic law prevail. A new code of law is being produced for Abu Dhabi. In Dubai there is a court run by a *qadi*, while in some of the other States all legal cases are referred immediately to the Ruler or a member of his family, who will refer to a *qadi* only if he cannot settle the matter himself. In Abu Dhabi a professional Jordanian judge presides over the Ruler's Court. The 95th article of the provisional Constitution of 1971 provided for the setting up of a Union Supreme Court and Union Primary Tribunals.

Religion. Nearly all the inhabitants are Moslems of the Sunni and Shi'ite sects.

Education (1977–78). Primary and secondary education for boys and girls is available in the UAE, and there are now 206 schools with over 86,000 pupils, with 10 under construction. There are 4 junior colleges and 112 adult education centres, established in order to eliminate illiteracy. The education system is the same as that followed in Kuwait, and many of the teachers are supplied by the Kuwait, Qatar, Egypt, Jordan and Bahrain education departments. The oil companies in Abu Dhabi operate apprentice training schools and there is also a vocational training institute. A vocational training centre is under construction.

There are trade schools in Sharjah, Dubai and Ras al Khaimah. The UAE university had 519 students (205 females) in 1977–78.

Health. A tuberculosis sanatorium is to be constructed by the State of Kuwait in Sharjah. In 1978 there were 20 hospitals (1,503 beds) and 47 clinics. There were 774 doctors.

UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND

Capital: London

Population: 55.93m. (1976)

GNP per capita: US\$5,030 (1978)

'Great Britain' is a geographical term describing the main island of the British Isles which comprises England, Scotland and Wales (so called to distinguish it from 'Little Britain' or Brittany). By the Act of Union, 1801, Great Britain and Ireland formed a legislative union as the United Kingdom of Great Britain and Ireland. Since the separation of Great Britain and Ireland in 1921 Northern Ireland remained within the Union which is now the United Kingdom of Great Britain and Northern Ireland. The United Kingdom does not include the Channel Islands or the Isle of Man which are direct dependencies of the Crown with their own legislative and taxation systems.

Emigration and Immigration. The UK has traditionally been a net exporter of population. In the two 30-year periods 1871–1901 and 1901–31 there was a net loss of population due to emigration of 1.6m. and 2.4m. persons respectively. Since then there have been two periods when this trend was reversed. During the 1930s there was an inflow of refugees from Europe and during the decade centred on 1960 there was an inflow from the new Commonwealth countries. More recently there has been a return to the traditional pattern with a new outflow during the period 1965–75 of 700,000 persons.

The following table shows a summary of migration statistics for 1979 based on the International Passenger Survey which is conducted by the Office of Population Censuses and Surveys for the Department of Trade and Industry and covers all the principal air and sea routes to the UK except those to and from the Irish Republic.

CONSTITUTION AND GOVERNMENT. The supreme legislative power is vested in Parliament, which in its present form, as divided into two Houses of Legislature, the Lords and the Commons, dates from the middle of the 14th century.

Parliament is summoned by the writ of the sovereign issued out of Chancery, by advice of the Privy Council, at least 20 days previous to its assembling. Every session must end with a prorogation, and all Bills which have not been passed during the session then lapse.

A dissolution may occur by the will of the sovereign, or, as is most usual, during the recess, by proclamation, or finally by lapse of time, the statutory limit of the duration of any Parliament being 5 years.

Under the Parliament Acts 1911 (1 and 2 Geo. V, ch. 13) and 1949 (12, 13 and 14 Geo. VI, ch. 103), all Money Bills (so certified by the Speaker of the House of Commons), if not passed by the House of Lords without amendment, may become law without their concurrence on the royal assent being signified within 1 month. Public Bills, other than Money Bills or a Bill extending the maximum duration of Parliament, if passed by the House of Commons in 2 successive sessions, whether of the same Parliament or not, and rejected each time, or not passed, by the House of Lords, may become law without their concurrence on the royal assent being signified, provided that 1 year has elapsed between the second reading in the first session of the House of Commons and the third reading in the second session. All Bills coming under this Act must reach the House of Lords at least 1 month before the end of the session.

The House of Lords consists of: (1) 808 hereditary peers and peeresses sitting by virtue of creation or descent, other than those who have disclaimed their titles for life under the provisions of the Peerage Act, 1963; (2) life peers being (a) 18 Lords of Appeal (active and retired), under the Appellate Jurisdiction Act, 1876, as amended; (b) (Jan. 1981) 316 life peers and peeresses under the Life Peerages Act, 1958; (3) 2 archbishops and 24 bishops of the Church of England (as long as they hold their sees).

The full House thus consists of 1,168, and the average attendance is about 300; in Jan. 1981 169 peers were on leave of absence and 87 peers (including 6 minors) were without writs of summons.

The House of Commons consists of members representing county and borough constituencies. Persons under 21 years of age, Clergymen of the Church of England, Ministers of the Church of Scotland, Roman Catholic clergymen, civil servants, members of the regular armed forces, policemen and most judicial officers are

disqualified from sitting in the House of Commons. No English or Scottish peer can be elected to the House of Commons unless he has disclaimed his title for life under the Peerage Act, 1963, but Irish peers and holders of courtesy titles, who are not members of the House of Lords, are eligible. Under the Parliament (Qualification of Women) Act, 1918, women are also eligible.

In Aug. 1911 provision was first made for the payment of a salary of £400 per annum to members, other than those already in receipt of salaries as officers of the House, as Ministers or as officers of Her Majesty's household. As from June 1980 the salaries of members are £10,725 per annum, with income-tax relief on expenses incurred in the course of parliamentary duties. There is a secretarial allowance of up to £4,600 per annum and a living allowance, for an additional home, of up to £3,886 per annum. Members of the House of Lords are entitled to recover expenses incurred for the purpose of attendance at sittings of the House within a maximum of £11 for each day's attendance. For those Lords who incur the additional expense of overnight accommodation away from their main residence the limit is £23 for each day of such attendance and for general office expenses or on secretarial and research assistance, £10 for each day's attendance. Members of the House may also recover travelling expenses incurred between permanent places of residence and London.

The Representation of the People Act, 1948, abolished the business premises and University franchises, and the only persons entitled to vote at Parliamentary elections are those registered as residents or as service voters. No person may vote in more than one constituency at a general election. Persons may apply on certain grounds to vote by post or by proxy.

All persons over 17 years old and not subject to any legal incapacity to vote and who are either British subjects or citizens of the Irish Republic are entitled to be included in the register of electors for the constituency containing the address at which they were residing on the qualifying date for the register and are entitled to vote at elections held during the period for which the register remains in force. The current register was published in Feb. 1980.

Members of the armed forces, Crown servants employed abroad, and the wives accompanying their husbands, are entitled, if otherwise qualified, to be registered as 'service voters' provided they make a 'service declaration'. To be effective for a particular register, the declaration must be made on or before the qualifying date for that register.

The Representation of the People Act, 1969, abolished the occupier's qualification for voting in Local Government elections.

The House of Commons (Redistribution of Seats) Acts, 1944, 1949 and 1958, provided for the setting up of Boundary Commissions for England, Wales, Scotland and Northern Ireland. The Commissions are required to make general reports at intervals of not less than 3 and not more than 7 years and to submit reports from time to time with respect to the area comprised in any particular constituency or constituencies where some change appears necessary. Any changes giving effect to reports of the Commissions are to be made by Orders in Council laid before Parliament for approval by resolution of each House. The electorate of the United Kingdom and Northern Ireland in the register used at the election of 3 May 1979 numbered 41,569,787, of whom 34,608,491 were in England, 2,083,771 in Wales, 3,837,019 in Scotland and 1,040,506 in Northern Ireland.

At the general election held in May 1979, 635 members were returned, 516 from England, 71 from Scotland, 36 from Wales and 12 from Northern Ireland. Every constituency returns a single member.

Devolution in Wales and Scotland was decided by referendum on 1 March 1979. In Wales the result was 956,330 against a regional Assembly and 243,048 for. In Scotland 1,230,937 (32.85% of those entitled to vote) voted for an Assembly and 1,153,502 against. However, the Scotland and Wales Acts stated that the relevant Secretary of State must lay order for the repeal of legislation if less than 40% of those entitled to vote, voted 'Yes' and the Act was repealed in June 1979.

The executive government is vested nominally in the Crown, but practically in a committee of Ministers, called the Cabinet, which is dependent on the support of a majority in the House of Commons.

The head of the Ministry is the Prime Minister, a position first constitutionally recognized, and special precedence accorded to the holder, in 1905. His colleagues in the Ministry are appointed on his recommendation, and he dispenses the greater portion of the patronage of the Crown.

European Parliament: On 7 June 1979 Great Britain elected 81 representatives to the European Parliament, of which 66 came from England, 8 from Scotland and 4 from Wales, each constituency returning a single member by a first past the post system. Northern Ireland returned 3 members by single transferable vote. 13,446,076 votes were cast, on a 33% poll. The seats were won as follows: Conservative 60, Labour 17, Scottish Nationalists 1, Ulster Unionists 1, Democratic Unionists 1, Social, Democratic and Labour Party 1.

Local Government. Local Administration is carried out by four different types of bodies, namely: (i) local branches of some central ministries, such as the Department of Health and Social Security; (ii) local sub-managements of nationalized industries (coal, electricity, gas, public transport and the post office); (iii) specialist authorities such as water authorities; and (iv) the system of *local government* described below. The phrase 'local government' has come to mean that part of the local administration conducted by elected councils.

There are two separate systems: one for England and Wales and one for Scotland, but both systems are financed by a species of tax on property, levied locally, combined with government grants which, in the aggregate, amount to more than the yield of the local tax. This local tax is called 'the rate'. The system of financing local government was the subject of a major review in 1975.

Local Government: England and Wales—Outside London. England and Wales have slightly differing systems. Each country has three types of councils namely, county, district and English parish or Welsh Community Councils. In addition, England has some metropolitan county and district councils.

Councillors are elected by their local electors for 4 years. The chairman of the council is one of the councillors elected by the rest. In a district with the status of city or borough his title is mayor, or in a few famous places Lord Mayor. Any parish or community council can by simple resolution adopt the style 'town council' and the status of town for the parish or community with the town mayor as chairman.

Counties and Districts: There are 47 non-metropolitan counties (of which 8 are in Wales) and 6 metropolitan counties (Greater Manchester, Merseyside, South Yorkshire, Tyne and Wear, West Yorkshire and West Midlands). Within the counties there are 369 districts (36 metropolitan and 333 non-metropolitan, of which 37 are in Wales).

Parishes and Communities: There are some 10,000 parishes within the English districts, of which 7,000 or so have councils. About 300 are former small boroughs or urban districts which became successor parishes. Parishes generally, however, remain comparatively unaffected by reorganization.

In Wales, parishes have been replaced by communities. Unlike England, where many areas are not in any parish, communities have been established for the whole

of Wales. There is one for each former parish, county borough, borough or urban district (or part thereof where the former area is divided by a new boundary). There are 1,004 communities altogether, of which 800 or so have councils.

The Local Government Act 1972 laid down the boundaries for all the counties and districts in England and Wales except the English non-metropolitan districts.

Permanent Local Government Commissions for England and for Wales advise the Secretary of State on boundaries and electoral arrangements.

A council has only those powers which have been conferred upon it expressly by Act of Parliament, and no more. The relationship between the different types of council is one of specialization, not of hierarchy. The larger do not supervise the smaller; each being, within its own sphere, entitled to make its own decisions. Government sanction, however, is required to borrow money and to sell land below its market value, and certain types of land use are subject to planning control.

Councils are kept within the law by a system of publicly regulated audit, and in the last resort they can be restrained from exceeding their powers by the courts.

Local government functions may be classified into county, district and parish or community functions, but whereas county and district functions are distinct, the parish and community functions are mostly concurrent with those of the districts. Arrangements may, however, be made so that any council may discharge functions of any other as its agent.

The following is the classification of powers given above: *Parish and Community Functions*. Allotments, burial and cremation, halls, meeting places and entertainments, facilities for exercise and recreation, public lavatories, street lighting, off-street vehicle parking, footpaths, the support of local arts and crafts, the encouragement of tourism and the right to be consulted by the district council on planning application and certain byelaws. *District Functions*. In addition to the Parish and Community functions, aerodromes, civic restaurants, housing, markets, refuse collection, the administration of planning control, the formulation of local plans, sewerage, on behalf of the water authority, museums, the licensing of places of entertainment and refreshment, and the constitutional oversight of parishes and communities. *County Functions*. The formulation of structure plans, traffic, transportation and roads, education, public libraries and museums, youth employment and social services.

There are, in addition, a number of special arrangements. Four district councils in Wales have been designated as library authorities and Welsh district councils have powers in relation to allotments currently with community councils. The county councils in England and Wales separately or jointly appoint the fire and police authorities, and the bodies responsible for national parks. In Metropolitan counties the district not the county councils are responsible for education, social services and libraries.

The total number of local government electors in England and Wales was 36,927,947 in 1980.

Greater London. Since 1965 London has been governed by the Greater London Council covering the whole metropolitan area, and by 32 London Boroughs and the City of London, each with responsibilities in its own area. In the City and the 12 boroughs covering the inner part of Greater London education is the responsibility of the Inner London Education Authority, a special Committee of the GLC but independent of it, while in the 20 outer boroughs the London Borough Council is the education authority. Other functions are divided between the GLC and the boroughs. The main responsibilities of the GLC are strategic planning, major roads, public transport (through the London Transport Executive, which is responsible to it), housing, major parks and open spaces, the fire service, refuse disposal and Thames flood prevention. The boroughs are the primary housing authorities in their own areas, while the GLC is concerned with matters affecting the whole of London. The City has preserved a large measure of independence and has its own powers regarding police, justice, bridges, sanitation, etc. Except in the City the police authority covering the whole of Greater London is the Metropolitan Police, which is responsible direct to the Central Government.

Estimated population of Greater London in June 1980 was 6,916,495, and rateable value at 1 April 1980 (estimate) was £1,935,826,000. Estimated gross revenue ex-

penditure of the GLC in 1980-81 was £2,198.2m. (including £709.7m. for the ILEA and £547m. for London Transport). Estimated gross capital expenditure, 1980-82 was £490m., including ILEA £18m., London Transport £110m. and £92m. for housing loans. The GLC outstanding debt at 1 April 1980 was £1,805,455,000; ILEA, £188,542,000.

Scotland. Under the system, which came into effect in 1975, the Scots mainland is divided into 9 regions, and in addition there are the 3 islands areas of Orkney, Shetland and the Western Isles. There is no equivalent to the English metropolitan county. The regions are divided into districts which total 53. All these units have a council consisting of councillors elected for 4 years and a chairman elected by the councillors for 4 years. Community councils have been established under schemes submitted by district and island councils. These community councils cannot claim public funds as of right, nor do they have powers directly conferred by Statute: consequently they are not local authorities in the sense that Welsh Community Councils are.

As in England and Wales a permanent Local Government Boundary Commission advises the Secretary of State on Local Authority Boundaries and electoral arrangements.

On the mainland, functions are allocated between regional and district authorities, in the same way (with minor exceptions) as they are allocated between English counties on the one hand and English districts and parishes on the other, but the councils of the islands areas, which have no districts, perform both sets of functions.

Despite differences of nomenclature the effect of the reforms of 1972 (England) and 1973 (Scotland) is to assimilate the systems of mainland Scotland and of England and Wales more closely than has been the case in the past.

The total number of local government electors in Scotland was 3,860,551 in 1980.

Complaints. Under both systems, complaints, by members of the public, of maladministration may be investigated by a Commissioner for Local Administration. Initially a complaint must be referred to him through a councillor, but a direct approach to him is possible if this fails. He can deal only with matters for which there is no other remedy; he reports to the council concerned and may publish his report.

DEFENCE. The Defence Council was established on 1 April 1964 under the chairmanship of the Secretary of State for Defence, who is responsible to the Sovereign and Parliament for the defence of the realm. Vested in the Defence Council are the functions of commanding and administering the Armed Forces. The Secretary of State heads the Ministry of Defence as a Department of State. There are 4 subordinate Ministers: The Minister of State for Defence and 3 Parliamentary Under-Secretaries of State, 1 for each of the Services.

Defence Council membership comprises the Secretary of State, the Minister of State, the 3 Parliamentary Under-Secretaries, the Chief of the Defence Staff, the 3 single Service Chiefs of Staff, the Vice Chief of Defence Staff (Personnel and Logistics), the Chief of Defence Procurement, the Chief Scientific Adviser and the Permanent Under-Secretary of State.

There are 3 Service Boards, each of which enjoys delegated powers for the administration of matters relating to the naval, military and air forces respectively.

Defence policy decision making is a collective Governmental responsibility. Important matters of policy are considered by the full Cabinet or, more frequently, by the Defence and Overseas Policy Committee under the chairmanship of the Prime Minister. Other members of this Committee include the Secretary of State for Defence, the Foreign and Commonwealth Secretary and the Home Secretary.

Logistics Services. Since the inception of a unified Ministry of Defence in 1964, progress has been made in the rationalization of the logistics services of the Royal Navy, the Army and the Royal Air Force. Airfield construction for all Services is now the responsibility of the Army's Royal Engineers; the Air Force Department is responsible for accommodation stores for maintenance and for the initial furnishing of new buildings; the Army Department is the single management authority for the

design, development, procurement and inspection of clothing other than certain specialized clothing; the Navy Department has for some time been responsible for ration policy provisioning, procurement, storing and distribution of food to main depots and to Army forward supply depots in BAOR and is responsible for water transport to its tri-service responsibilities. The supply of Naval air stores has been integrated with those of the RAF. Considerable savings in money and in Service and civilian manpower have already been realized and are expected to continue.

The Procurement Executive. An important development in 1971 was the creation of a Procurement Executive to combine the Defence Procurement responsibilities of the Ministry of Defence and the former Ministry of Aviation Supply.

Service Strengths at 1 Jan. 1981, all ranks, males and females, UK personnel only: Royal Navy and Royal Marines, 73,627; Army, 167,311; Royal Air Force, 92,977; Total, 333,915.

Defence Budget Estimates: 1980-81, £11,300m.; 1980-81, £12,138m.

Army. Control of the British Army is vested in the Defence Council and is exercised through the Army Board, which consists of 6 civilian and 5 military members. The Secretary of State for Defence is Chairman of the Army Board. The other civilian members are the Minister of State for Defence and the Parliamentary Under-Secretary of State for Defence for the Army, the Chief Scientist (Army) and the Deputy Under-Secretary of State (Army) and the Second Permanent Under-Secretary of State who attend meetings as appropriate.

The Military members of the Army Board are the Chief of the General Staff, the Adjutant-General, the Quartermaster-General, the Master-General of the Ordnance and the Vice-Chief of the General Staff. The Chief of the General Staff is the professional head of his Service and the professional adviser to Ministers on the Army aspects of military problems. He is responsible for the fighting efficiency of his Service; for the consideration of all Army aspects of policy planning; for Army advice on the conduct of operations; and for the issuing of such single Service operational orders as may be appropriate resulting from defence policy decisions. He is also responsible for the Territorial Army. The Chief of the General Staff is a member of the Chiefs of Staff Committee which is collectively responsible to HM Government for professional advice on strategy and military operations and on the military implication of defence policy. This advice is tendered to the Secretary of State for Defence by the Chairman of the Chiefs of Staff Committee, the Chief of the Defence Staff. In exercise of his General Staff responsibilities the Chief of the General Staff is assisted by the Vice-Chief of the General Staff. The Adjutant-General is responsible for Army manpower within the policy set up by the General Staff; for recruiting and selection; for the administration and individual training of military personnel; for the discipline of the Army; for pay and allowances and pensions; for Army medical services; for dental and nursing services; for legal services; for the veterinary and remount services; for the Army Cadet Forces; for questions of Army welfare and education including school children overseas; and for resettlement and sports. The Master General of the Ordnance is a member of both of the Army Board and of the Procurement Executive Management Board. He is responsible to the Chief of Defence Procurement for the financial and technical management of the approved programme for the procurement of land service equipment for the Armed Services, and to the Army Board for the co-ordination of the Army's total equipment programme. The Chief Scientist (Army) is responsible for providing scientific advice to the Army Board and its members and for ensuring that the Defence Research Programme properly reflects their needs. He is also a member of the Procurement Executive as Deputy Controller, Research and Development Establishments, and Research (B). The Deputy Under-Secretary of State (Army) is responsible for the general co-ordination of Army Board business

and, under the Permanent Under-Secretary of State and the Second Permanent Under-Secretary of State, for providing the Board with financial and administrative guidance.

Headquarters United Kingdom Land Forces at Wilton commands all Army units in UK except Ministry of Defence controlled units. The Ministry of Defence retains direct operational control of units in Northern Ireland. Command by HQ United Kingdom Land Forces is exercised through 9 district headquarters. There are 3 major overseas Commands: Land Forces Cyprus, Hong Kong and the British Army of the Rhine. There are also garrisons in Berlin, Gibraltar and Belize.

The strength of the Regular Army (less the Brigade of Gurkhas and locally enlisted personnel) on 1 Jan. 1981 was 160,697 men and 6,632 women. The citizen force is the Territorial Army.

The Territorial Army has an establishment of about 73,000. Its role is to provide a national reserve for employment on specific tasks at home and overseas and to meet the unexpected when required; and, in particular, to complete the Army Order of Battle of NATO committed forces and to provide certain units for the support of NATO Headquarters, to assist in maintaining a secure UK base in support of forces deployed on the Continent of Europe and to provide a framework for any future expansion of the Reserves. In addition, men who have completed service in the Regular Army normally have some liability to serve in the Regular Reserve. All members of the TA and Regular Reserve may be called out by a Queen's Order in time of emergency or imminent national danger and most of the TA and a large proportion of the Regular Reserve may be called out by a Queen's Order when warlike operations are in preparation or in progress. There is a special reserve force in Northern Ireland, the Ulster Defence Regiment, 7,500 strong, which gives support to the regular army.

Men, women and juniors enlist in the Army for 22 years' active and reserve service. However, under a scheme introduced in May 1981 they are entitled to give 12 months' notice to leave active service provided they serve for a minimum of 3 years. Alternatively, they can agree to serve for 6 or 9 years to receive the benefit of higher rates of pay. Those enlisting in certain technical trades must agree to serve for a minimum of 6 years. Recruits under the age of 17½ on reaching the age of 18 are entitled either to confirm their original engagement or to reduce their period of service to 3 years.

Women serve in both the Regular Army and the TA in the Queen Alexandra's Royal Army Nursing Corps, the Ulster Defence Regiment and the Women's Royal Army Corps, the latter's employments including communications, motor transport, clerical and catering duties. Some officers of the Women's Royal Army Corps are employed on the staffs of military headquarters.

Navy. The Royal Navy is a permanent establishment, governed by the Admiralty Board of the Defence Council. The Secretary of State for Defence is Chairman of the Admiralty Board; the Minister of State for Defence is Vice-Chairman. The members of the Admiralty Board and their responsibilities are as follows: The Parliamentary Under-Secretary of State for Defence for the Royal Navy; The Chief of the Naval Staff and First Sea Lord (professional head of the Royal Navy), assisted by the Vice-Chief of the Naval Staff, responsible for fighting efficiency, policy planning and operations advice; The Chief of Naval Personnel and Second Sea Lord, responsible for the manning of the Fleet, service conditions, training, discipline and welfare; The Controller of the Navy (formerly also Third Sea Lord), responsible for research and development, design, production, inspection, repair and maintenance of ships, their weapons and equipment; The Chief of Fleet Support, known until 1968 as Chief of Naval Supplies and Transport and Vice-Controller (formerly also Fourth Sea Lord), responsible for the provision of naval armament, victualling and medical stores and fuels, and for the movement of transport of persons and material, and superintending Dockyard organization and main-

tenance of the Fleet; and The Chief Scientist (Royal Navy), responsible for superintending the conduct of all research and development and the deployment of scientific effort. The post of Second Permanent Under-Secretary of State (Royal Navy) (formerly Permanent Secretary) lapsed in 1968 (he was Civil Service head, responsible for general co-ordination of the Admiralty Board business, the interior economy of the Navy department, Navy contracts and the administration of civil staff, and accounting officer for Navy Votes responsible for the control of expenditure and adviser to the Admiralty Board on financial questions). Thus the office of Samuel Pepys, of which the last holder was the 33rd, passed into history. The Deputy Under-Secretary of State (Navy) is the Board Member now responsible for some of these functions. Financial and staff control is vested in the Second Permanent Under-Secretary for Administration and the Second Permanent Under-Secretary for Equipment.

Air Force. In May 1912 the Royal Flying Corps first came into existence with military and naval wings, of which the latter became the independent Royal Naval Air Service in July 1914. On 2 Jan. 1918 an Air Ministry was formed, and on 1 April 1918 the Royal Flying Corps and the Royal Naval Air Service were amalgamated, under the Air Ministry, as the Royal Air Force.

In 1937 the units based on aircraft carriers and naval shore stations again passed to the operational and administrative control of the Admiralty, as the Fleet Air Arm. In 1964 control of the Royal Air Force became a responsibility of the unified Ministry of Defence.

The Royal Air Force is administered by the Air Force Board, of which the Secretary of State for Defence is Chairman. The Minister of State for Defence is Vice-Chairman, as is the Under-Secretary of State for Defence for the Royal Air Force, who normally acts as Chairman on behalf of the Secretary of State. Other members of the Board are, Chief of the Air Staff, who is assisted by, Vice-Chief of the Air Staff, Air Member for Personnel, Air Member for Supply and Organization, Controller of Aircraft, Chief Scientist (Royal Air Force), Deputy Under-Secretary of State (Air) and Second Permanent Under-Secretary of State for Administration. The Royal Air Force is organized into commands:

Home Commands. Strike and Support Commands. The Air Training Corps and the Air Sections of the Combined Cadet Force are under the administrative control of Support Command and functionally controlled by the Ministry of Defence.

Overseas Commands. Royal Air Force Germany. Small units in Gibraltar, Cyprus and Hong Kong.

The RAF College, which trains general-duties, engineering, and supply and secretarial graduates for permanent commissions, is at Cranwell. The RAF Staff College is at Bracknell. The Department of Air Warfare is at Cranwell. The RAF Central Flying School is at Leeming. Estimated strength in April 1980, including WRAF and boys, was 87,500.

There is a single multi-role operational command in the UK, known as Strike Command, made up of 5 Groups. No. 1 Group is responsible for control and training of the strike/attack, air-to-air refuelling and reconnaissance forces. There are home-based squadrons of Vulcan Mk. 2 medium bombers; Buccaneer low-level strike and maritime attack aircraft; Victor flight refuelling tankers; and reconnaissance squadrons of Vulcan SR. Mk. 2 and Canberra aircraft. No. 11 Group controls air defence squadrons of Lightning and Phantom supersonic all-weather fighters armed with air-to-air missiles, and their associated communications and ground environment radars, including the Ballistic Missile Early Warning System station at Fylingdales. No. 11 Group also has Shackleton AEW. Mk. 2 airborne early warning aircraft, and Bloodhound surface-to-air missiles. No. 18 Group has Nimrod MR. Mk. 1 and 2 maritime reconnaissance aircraft and Whirlwind, Wessex and Sea King helicopters for search and rescue. No. 38 Group is responsible for the UK ground attack force of Jaguars and V/STOL Harriers; reconnaissance Jaguars; VC10 jets, turboprop Hercules transports, and smaller communications aircraft; and the Queen's Flight, with 3 Andover and 2 Wessex helicopters; Wessex and Puma helicopters for tactical and logistic support in the battlefield area; RAF Regiment UK squadrons, equipped with Bofors L40/70 guns, Tigercat and Rapier missiles, and other weapons for airfield defence; and the Tactical Communications Wing. Strike Command has NATO commitments, but is available for overseas reinforcement. Its fifth Group is Military Air Traffic Operations. The training element of RAF Support Command utilizes Bulldog and Chipmunk primary trainers, Jet Provost basic trainers, Hawk and Hunter advanced trainers, Jetstreams for multi-engine pilot training, twin-jet Dominies for training navigators and other non-pilot aircrew, and Gazelle, Wessex and Whirlwind helicopters.

Squadrons of RAF Germany, which forms part of NATO's 2nd Allied Tactical Air Force under SACEUR, have Harrier V/STOL and Jaguar attack and reconnaissance aircraft, Phantom fighters, Buccaneer strike aircraft, Wessex helicopters, Pembroke communications aircraft and Rapier surface-to-air missiles. A squadron of Wessex helicopters is based in Hong Kong. New types of aircraft under development include the Tornado multi-role combat aircraft, an AEW conversion of the Nimrod, a version of the Chinook helicopter, and flight refuelling tanker conversions of the VC10.

Deductions of tax under PAYE extend over the full range of unified tax rates and not merely the basic rate. Similarly, assessment on business profits and on other income which was directly assessed to tax, such as rents and interest on bank deposits, are made by reference to the full scale of rates, including where appropriate the investment income surcharge.

The standard rate of 30% is the rate at which tax is deducted from payments of interest, etc., and corresponds under the new corporation tax system, to the tax credit on dividends. Where an individual's total income is such that he is liable on this taxed investment income at rates exceeding 30%, or if his investment income is high enough to make him liable to the surcharge, the higher rate or surcharge liability on this taxed investment income will in general be assessed separately after the end of the tax year.

Corporation Tax. Corporation Tax applies, with certain exceptions, to trades or businesses carried on by bodies corporate or by unincorporated societies or other bodies and this tax came into force from April 1966 replacing Profits Tax. The rate of this tax for 1969-71, 45%; but in Oct. 1970 this was reduced to 42.5% for financial year 1969-70 and reduced again to 40% in 1970-71. There are reduced rates of Corporation Tax for small companies and for 1981-82 the rate is 42% and the limit for that rate £80,000, limit for marginal relief £200,000.

Capital Gains Tax. Gains resulting from the disposal of capital assets (other than British Government and Government guaranteed securities and certain exempted forms of property such as a private car and personal residences) are taxed under the Finance Act 1965. In 1980-81 exemption was granted for all gains made in a financial year which in total did not exceed £3,000 and a lower rate of 15% and most trusts on the first £1,500.

Value Added Tax. Value Added Tax was introduced from 1 April 1973 at the rate of 10% on the supply of goods (with certain exceptions) and services. From 18 June 1979 the rate of tax was fixed at 15%.

Local Taxation. The rateable value on which rates were leviable in England and Wales on 1 April 1980 was £7,318m. In England and Wales, the average amount of the rates collected per £ of rateable value was £0.34 in 1913-14; and estimated to be 109.16p for 1980-81. In Scotland the rateable value on which rates are leviable on 1 April 1980 was £1,281m, and the average amount per £ of rateable value of the rates was 81p. The average water rate was 6.6p in the £.

Under the Local Government Planning and Land Act 1980, the Government gives general financial assistance to local authorities by means of rate support grants. The Rate Support Grant Report (England) 1980 deals with the distribution of these grants to local authorities in England only. The grants for 1981-82 contain (i) Block Grant £8,364m., the object of which is to give authorities sufficient grant to put them in a position where they can provide similar standards of service for a similar rate in the £, and (ii) Domestic Grant £663m., which will provide a relief of 18½p for domestic ratepayers. There is also provisions in the 1980 Act for payment of National Parks Supplementary Grant (£4.5m.) to county councils with all or part of a national park in their area, and Transport Supplementary Grant (£416.5m.) payable to county councils and the Greater London Council. Grants are also payable on

revenue expenditure for specific services, including police and housing, and capital expenditure on certain services also attracts grant.

In Scotland, rate support grants are paid under the Local Government (Scotland) Act 1966, as amended by the Local Government (Scotland) Act 1975. The total rate support grant and the amounts of the component parts for the local authority financial year 1981-82, as prescribed in the Rate Support Grant (Scotland) Order 1980 are as follows: £1,503.1m.; needs element £1,340.2m.; resources element £148.9m.; domestic element £14m. The domestic element is paid to rating authorities to offset the cost of reducing by 3p in the £ the rates payable on domestic properties. A small part of the needs element, £10.8m. in 1981-82, is apportioned among those local authorities incurring extraordinary expenses in connection with developments relating to exploration for or exploitation of offshore petroleum. Payments under Part V of the Local Government Act 1948 have been repealed in so far as they relate to years commencing on or after 1 April 1978. The lands and heritages concerned are now valued by formula as prescribed by Order. As in England and Wales capital and revenue grants are also payable on expenditure for certain specific services.

Local authority loan debt at 31 March 1974 amounted to £19,391m.

The rateable value of Greater London was £1,909,619,000 on 1 April 1979. The outstanding debt of the Greater London Council on 1 April 1979 was £1,667,718,000 and the Inner London Education Authority, £187,063,000.

National Economic Development Council. The NEDC (Neddy), which first met in 1962, is the national forum for economic consultation between government, management and unions. It includes leading representatives of the Government, CBI and TUC and also chairmen of nationalized industries and independent members. It meets usually under the chairmanship of the Chancellor of the Exchequer although the Prime Minister takes the chair from time to time. Discussions at the monthly council meetings are normally based on papers, presented by the participating parties, which deal primarily with questions of medium-term national economic performance and prospects, besides seeking to agree on ways of improving industrial efficiency. Council meetings are held in private to encourage the frank exchange of views between members, and discussions are summarized at a press conference taken by the Director-General of the National Economic Development Office (NEDO) following each meeting. The Economic Development Committees (Little Neddies), and the Sector Working Parties, like the NEDC, bring together representatives of management and unions and officials from Government, who use this neutral meeting place to study the efficiency and prospects of individual industries and sectors and to suggest ways in which these could be improved. The National Economic Development Office (NEDO) provides the professional staff for the NEDC, the EDCs and the Sector Working Parties.

Currency. The monetary unit of Great Britain is the *pound sterling*. A gold standard was adopted in 1816, the sovereign or twenty-shilling piece weighing 7.98805 grammes 0.916 $\frac{2}{3}$ fine. Currency notes for £1 and 10s. were first issued by the Treasury in 1914, replacing the circulation of sovereigns. The issue of £1 and 10s. notes was taken over by the Bank of England in 1928. The issue of 10s. notes ceased on the issue of the 50p coin in 1969.

Following the post-war fluctuations in the value of the pound, Great Britain returned to the Gold Standard in 1925 with the pound fixed at the pre-war parity of US\$4.8665. But the world financial crisis of 1931 forced the country off the Gold Standard again, and in the following year the Exchange Equalization Account was set up for the purpose of checking undue fluctuations in the exchange value of the pound. With the relative stability of the pound which followed, a 'Sterling Bloc' emerged consisting of most Empire countries and those others who voluntarily pegged their currencies to the pound.

The Bloc was superseded at the outbreak of the Second World War by the 'Sterling Area'. The pound was then fixed at \$4.03 and remained at that rate until Sept. 1949, when it was devalued to \$2.80. On 18 Nov. 1967 it was further devalued to \$2.40. Following the general international currency re-alignment of Dec. 1971, the rate for the pound, in terms of the US\$, was fixed at £1 = \$2.6057 but in June 1972 the pound was allowed to float.

When the pound was floated in June 1972 measures were also introduced to control payments between the 'Scheduled Territories' (*i.e.*, the UK including the Channel Islands, the Isle of Man and the Irish Republic), and the rest of the Sterling Area as well as the rest of the world. Exchange control restrictions were

lifted in Oct. 1979 except for Rhodesia (Zimbabwe) and these were lifted in Dec. 1979.

Coinage. The sovereign (£1) weighs 123.27447 grains, or 7.98805 grammes, 0.916 $\frac{2}{3}$ (or eleven-twelfths) fine, and consequently it contains 113.00159 grains or 7.32238 grammes of fine gold. On 15 Feb. 1971 (Decimalization Day) a decimal currency system was introduced retaining the *pound sterling* as the major unit but now divided into 100 *new pence* instead of 240 old pence. The decimal coins are the 50p (equilateral curve heptagon, 30 mm diameter, 13.5 grammes weight); 10p (28.5 mm, 11.31 grammes); 5p (23.6 mm, 5.65 grammes); 2p (25.9 mm, 7.12 grammes); 1p (20.3 mm, 3.56 grammes) and $\frac{1}{2}$ p (17.1 mm, 1.78 grammes). The Decimal Currency Act, 1967 and the Proclamation of 27 Dec. 1968 required that the 50p, 10p and 5p be made of three-quarters copper and one-quarter nickel (75/25 cupro-nickel) and the 2p, 1p and $\frac{1}{2}$ p of mixed metal: copper, tin and zinc (bronze). The Decimal Currency Act, 1969, provided that the coins of the Queen's Maundy Money should continue to be made in silver to a millesimal fineness of 925; and, if issued before Decimalization Day, should be treated as denominated in the same number of new pence in which they were de-nominated.

By Proclamation dated 28 July 1971, which came into force on 30 Aug. 1971, the crown, double-florin, the florin, the shilling and the sixpence are to be treated as coins of the new currency and as being of the denominations respectively of 25, 20, 10, 5 and 2 $\frac{1}{2}$ new pence.

The Coinage Act, 1971, specified that the legal tender limits for coins were: Gold coins, for payment of any amount; coins of cupro-nickel and silver of denominations of more than 10p, for payment of any amount not exceeding £10; coins of cupro-nickel and silver of not more than 10p, for payment of any amount not exceeding £5; coins of bronze, for payment of any amount not exceeding 20p.

The value of money issued in the 12 months up to March 1978 was, cupro-nickel £38.4m., and bronze £6.8m.

By the end of 1975 the transfer to Llantrisant of all of the functions of the London Mint had been completed.

UK coins produced in 1977-78 totalled 806.7m., as follows, in millions: 50p 35.7, 25p 25.5, 10p 41.8, 5p 39, 2p 127.1, 1p 326.2, $\frac{1}{2}$ p 211.4.

It is estimated that the following coins were in circulation in the UK at 31 March 1978, in millions: 50p 349.8, 25p 66.6, 10p 1,901.6, 5p 1,588, 2 $\frac{1}{2}$ p 173.6, 2p 1,572, 1p 2,453, $\frac{1}{2}$ p 2,218 making a total of 10,322.6m. coins with a face value of £532.5m

Bank-notes. The Bank of England issues notes in denominations of £1, £5, £10, £20 and £50 for the amount of the fiduciary note issue. Under the provisions of the Currency and Bank Notes Act, 1954, which came into force on 22 Feb. 1954, the amount of the fiduciary note issue was fixed at £1,575m., but this figure might be altered by direction of HM Treasury and after representations made by the Bank of England.

All Bank of England notes are legal tender in England and Wales, and notes of denominations less than £5 are legal tender in Scotland and Northern Ireland. The banks in Scotland and Northern Ireland have certain note-issuing powers. The average circulations of such notes were £483m. (Scotland—15 Oct. 1980) and £51m. (Northern Ireland—15 Oct. 1980).

The total amount of notes issued at 31 Dec. 1980 was £10,825m., of which £10,819m. were in the hands of other banks and the public and £6m. in the Banking Department of the Bank of England.

Banking. The Bank of England, Threadneedle Street, London, is the Government's banker and the 'banker's bank'. It has the sole right of note issue in England and Wales and manages the National Debt. The Bank operates under royal charters of 1694 and 1946 and the Bank of England Act, 1946. The capital stock has, since 1 March 1946, been held by the Treasury.

The statutory return is published weekly. End-December figures for the past 6 years are as follows (in £1m.):

Total net profits from the operations of clearing bank groups in 1980 amounted to £1,027m., of which £167m. in gross dividends, £861m. transferred to reserves.

Most commercial banking business in Britain is conducted by clearing banks. Industrial and overseas trading business is handled primarily by the merchant banks, who also deal with such matters as the issue of shares to the public for new companies and act as registrars for public companies.

Trustee Savings Banks. Trustee Savings Banks started in Scotland in 1810. They are managed by Boards of Trustees, under the terms of the Trustee Savings Bank Acts 1969, 1976 and 1978. There are 16 banks with a network of 1,650 branches throughout the UK and the Channel Islands. The banks are supervised by the TSB Central Board, a statutory body established by the TSB Act 1976.

On 20 Nov. 1980 the funds of all Trustee Savings Banks totalled £5,700m., the total number of accounts exceeded 14m.

ENERGY AND NATURAL RESOURCES

Electricity. The electricity industry was vested in the British Electricity Authority on 1 April 1948. Following the re-organization of the electricity supply industry after the passing of the Electricity Act, 1957, the statutory bodies comprising the electricity service in England and Wales are the Electricity Council, the Central Electricity Generating Board and the 12 Area Electricity Boards.

The Electricity Council has functioned from Jan. 1958 as the central council for the supply industry in England and Wales for consultation on, and formulation of, general policy; its main functions are to advise the Secretary of State for Energy on all matters affecting the supply industry, and to promote and assist the maintenance and development by the Central Electricity Generating Board and the Area Boards (known collectively as Electricity Boards) of an efficient, co-ordinated and economical system of electricity supply. The Council can also perform services for the Boards, and, in addition, has certain specific functions, particularly in matters of finance, research and industrial relations.

The Central Electricity Generating Board is responsible for the generation and bulk supply of electricity to the 12 Area Boards in England and Wales. It therefore plans the provision of new generating and transmission capacity, including the siting and construction of new generating stations, both conventional and nuclear, and is responsible for the operation and maintenance of generating stations and the main transmission system.

Area Electricity Boards. Each of the 12 Area Electricity Boards acquires bulk supplies of electricity from the Generating Board and is responsible for distribution networks and sales of electricity to its Area consumers. Thus distribution and utilization of electricity, and also the contracting and sale of appliances side of the industry, are their responsibilities.

The number of power stations owned by the Generating Board in England and Wales on 31 March 1980 was 132 with a total output capacity of 57,029 mw. Total number of consumers in England and Wales on 31 March 1979 was 20,118,057 (on 31 March 1980, 20,334,146).

Electricity sold in England and Wales in 1979-80 amounted to 204,762m. units. Revenue from sales of electricity in 1979-80 was £5,742m. Coal used for electricity generation in 1979-80 amounted to 80.4m. tonnes (75.2m. tonnes in 1978-9). Total fuel (coal equivalent) used in 1979-80 amounted to 104.7m. tonnes and in 1978-79 to 104.2m. tonnes. Nine nuclear stations of total output capacity 4,427 mw provided 11.4% of total units supplied in 1979-80. Eight of these are gas-cooled graphite-moderated stations using natural uranium fuel canned in magnesium alloy (Magnox) and 1 is an advanced gas-cooled station (AGR). With 3 AGR stations under construction, installed capacity will reach 7,400 mw by Dec. 1985.

The number of persons employed by the Generating Board, the Electricity Council and Area Boards at the end of March 1980 was 158,780.

The North of Scotland Hydro-Electric Board, established under the Hydro-Electric Development (Scotland) Act 1943, is the nationalized authority responsible not only for generating and transmitting electricity but also for distributing and selling it to over 500,000 consumers.

The Board's district covers a quarter of the land mass of Great Britain and lies generally north and west of a line joining the firths of Clyde and Tay as well as all the island groups extending to the Outer Hebrides, Orkney and Shetland. About 99% of potential consumers have now been provided with supply. On the mainland the Board operates generating stations with a total installed generating capacity of 2,116 mw consisting of 1,752 mw of hydro power and pumped storage, together with 240 mw of steam. Diesel stations with a total installed capacity of 121 mw supply the principal island groups while a further 1,320 mw of oil gas fired thermal plant is nearing completion at Peterhead.

The main transmission system consists of 5,097 circuit km of 275 kv and 132 kv lines linking the power stations and the bulk supply points serving the distribution networks. The system control centre at Pitlochry co-ordinates the operation of the transmission system and power stations together with the continuous interchange of power with the South of Scotland Electricity Board. The number of staff at the end of the year was 4,146.

The South of Scotland Electricity Board was established in April 1955 by the Electricity Reorganisation (Scotland) Act 1954, replacing in South Scotland 2 Electricity Boards and 2 Divisions of the British Electricity Authority. The area of Scotland served by the Board lies south of a line from the Firth of Clyde to the Firth of Tay and extends to about 8,000 sq. miles, including the industrial belt of Scotland, with a population of 4m. By special arrangement a small part of North-East England is also supplied. The remainder of Scotland is served by the North of Scotland Hydro-Electric Board.

The Board differs from those established in England and Wales in that its responsibilities cover not only the distribution of electricity and retail sale of electrical appliances but also the generation and transmission of bulk power within South Scotland.

At 31 March 1980 the Board operated 17 generating stations (including 2 nuclear and 7 hydro-electric stations) with a total output capacity of 7,826 mw. In 1979-80 the Board sold 18,374m. units to more than 1.5m. consumers and had a total revenue of £519m. The number of staff employed at the end of the year was 13,658.

Oil. Production 1979, in 1,000 tons (1978 in brackets): Throughput of crude and process oils, 97,854 (96,390); refinery use, 6,538 (6,423); gases, 1,772 (1,760); naphtha, 5,242 (4,626); motor spirits, 16,111 (15,958); kerosene, 7,945 (7,397); diesel oil, 25,450 (24,024); fuel oil, 28,600 (30,518); lubricating oils, 1,330 (1,203); bitumen, 2,065 (1,886). Total output, 90,583 (89,156). 1979 investment in North Sea oil and gas production: £2,062m. (£2,168m.).

Gas. The British gas industry, nationalized in 1949, was reorganized as the British Gas Corporation on 1 Jan. 1973. Under the terms of the Gas Act 1972, the Corporation has the general duty 'to develop and maintain an efficient, co-ordinated and economical system of gas supply'. The chairman and members of the Corporation are appointed by the Secretary of State for Energy. British Gas explores for and produces natural gas, manufactures substitute natural gas, transmits, distributes and sells gas, and sells, installs and maintains gas appliances.

Gas Council (Exploration) Ltd and Hydrocarbons Great Britain Ltd, wholly owned subsidiaries of British Gas, have been involved in exploration for oil and gas in the Irish Sea, the English Channel and Celtic Sea and, in partnership with oil companies, in the North Sea and onshore. British Gas is a partner in gasfields in the southern North Sea, and the Beryl, Hutton and Montrose oilfields in the northern North Sea and discovered the Morecambe gasfield in the Irish Sea and the Wytch Farm oilfield in Dorset.

In 1979-80, British Gas sold 16,736m. therms of gas. Conversion to natural gas was completed in 1977. There were 14.69m. domestic customers, who used 8,163m. therms; 78,000 industrial customers, who used 6,513m. therms; and 492,000 commercial customers, who used 2,060m. therms.

The turnover of British Gas in 1979-80 was £3,513m. and the average capital employed was £2,379m. The surplus for the year was £426m. before tax. In March 1980, there were 104,400 employees.

Minerals. The number of National Coal Board mines producing coal on 31 March 1980 was 219. Statistics of the coalmining industry (including licensed mines) for recent years are as follows:

	1976-77 ¹	1977-78 ¹	1978-79	1979-80

There was a Deficit grant of £159.3m. from the Government for the year ended 31 March 1980 (which was not applicable in the year 1978-79).

¹ Finished steel (ingot equivalent).

In 1979 imports of iron ore amounted to 17.69m. tonnes. Exports of finished steel products were 4.4m. tonnes in 1979.

Iron Castings. Production of iron castings was 2.7m. tonnes in 1979 (2.7m. tonnes in 1978).

The industry is divided between the 'public sector' and the 'private sector'.

The British Steel Corporation, which was established by the Iron and Steel Act 1967, took over the 14 largest UK iron and steel making concerns (and their subsidiaries) in July 1967 and merged them into a single publicly owned business. With a turnover of more than £3,105m. and a liquid steel output of 14.1m. tonnes in 1979-80, the British Steel Corporation ranks as one of Britain's major manufacturing industries and is one of the world's largest steel makers. The number of employees as at 29 March 1980 was 166,400. A substantial part of the British steel industry remains in private ownership and although responsible for only 20% of UK crude steel production, produces about half the UK requirements of engineering steels and much higher proportions of steel in finished form. For some products such as bright bars, wire, open-die forgings and high speed and tool steels, nearly all

UK production is in the private sector. Because of the private sector involvement in higher value steels it accounts for over a third of the total turnover of the British steel industry but employs a smaller proportion of the total labour force at about 70,000 people. Private sector companies have been engaged in recent years in a heavy programme of investment, particularly in crude steel production, and a number of new companies, some with overseas ownership, have become established in the UK for this purpose.

Production of non-ferrous metals in 1979 (in 1,000 tonnes): Refined copper, 121.7 (125.6 in 1978); refined lead, 244.2 (222.9 in 1978); tin metal, 11.2 (1978); virgin aluminium, 359.5 (346.2 in 1978); slab zinc, 76.7 (73.6 in 1978).

Labour. The distribution of total manpower in Great Britain was in June 1979 (in 1,000): Total working populaion, 25,731 (15,678 males, 10,054 females). Total employed in armed forces and women's services, 314. Total engaged in civil employment, 22,311, including agriculture, 336; mining and quarrying, 335; metal manufacture, 449; national and local government service, 1,580; transport and communications, 1,461; construction, 1,255; distributive trades, 2,749; insurance, banking, business, professional and scientific services, 1,181.

The average monthly numbers (in 1,000) of registered unemployed in Great Britain were: 1974, 600 (males 501; females, 99); 1975, 936 (males, 747; females, 188); 1976, 1,304 (11 months total; males, 988; females, 315); 1977, 1,423 (males, 1,027; females, 395); 1978, 1,410 (males, 995; females, 414); 1979, 1,326 (males, 920; females, 406).

Trade Unions. In Dec. 1980 there were 109 unions affiliated to the Trades Union Congress with a total membership of 12,172,508 (including (1976) 3,033,591 women). The unions affiliated to the TUC in 1980 ranged in size from the Transport and General Workers' Union, with 2,086,281 members, to the Cloth Pressers' Society with 30 members. Non-manual workers accounted for nearly a third of the total TUC membership.

The TUC's executive body, the General Council, is elected at the annual Congress. It is composed of 41 members elected from 18 industrial groupings of unions (railways, mining and quarrying, etc.), to ensure that the Council is broadly representative of the whole trade union movement. Two members are elected to represent women workers.

The General Secretary is elected by the Congress but is not subject to annual re-election.

The TUC General Council appoints committees, which draw upon the services of specialist departments in preparing policies on economic, education, international, employment, industrial organization, and social questions.

The TUC is affiliated to the International Confederation of Free Trade Unions, the Trade Union Advisory Committee of OECD, the Commonwealth Trade Union Council and the European Trade Union Confederation. The TUC provides a service of trade union education. It provides members to serve, with representatives of employers, on joint committees advising the Government on issues of national importance (e.g., National Economic Development Council and various Royal Commissions) and on the managing boards of such bodies as the Health and Safety Commission; Advisory, Conciliation and Arbitration Service; and Manpower Services Commission.

The following table is a statistical summary relating to trade disputes for recent years:

	<i>No. of stoppages</i>	<i>No. of workers involved</i>	<i>Working days lost through stoppages</i>
1977	2,703	1,165,800	10,142,000

Commerce. Value of the imports and exports of merchandise (excluding bullion and specie and foreign merchandise transhipped under bond) of the UK for 6 recent years (in £1,000):

	<i>Total imports</i>	<i>Total exports</i>		<i>Total imports</i>	<i>Total exports</i>
1975	24,028,143	19,762,403	1978	40,969,066	37,362,739
1976	31,212,619	25,777,537	1979	48,467,400	42,803,609
1977	36,493,152	32,951,476	1980	51,650,267	49,510,791

The value of goods imported is generally taken to be that at the port and time of entry, including all incidental expenses (cost, insurance and freight) up to the landing on the quay. For goods consigned for sale, the market value in this country is

required and recorded in the returns. For exports, the value at the port of shipment (including the charges of delivering the goods on board) is taken. Imports are entered as from the country whence the goods were consigned to the UK, which may, or may not, be the country whence the goods were last shipped. Exports are credited to the country of ultimate destination as declared by the exporters.

For details of imports and exports for 1979 and 1980, *see* pp. 1325–26.

COMMUNICATIONS

Roads. Central government responsibility for highways in England rests with the Secretary of State for Transport. His responsibilities are administered by the Department of Transport through a number of Directorates at Headquarters together with 8 Regional Offices and 6 Road Construction Units. For Welsh and Scottish roads central government responsibility rests with the Secretaries of State for Wales and Scotland respectively.

The Secretary of State is responsible for all trunk roads. Under the local government system introduced in 1974, the responsible authorities for principal roads are the County Councils. District Councils may claim maintenance powers for urban

roads which are neither trunk roads nor classified roads. In London responsibility is shared between the Greater London Council and the London Boroughs.

The Secretary of State has powers to provide roads designed for limited classes of motor traffic, and to confirm schemes for the provision of such special roads by local authorities. The former have the status of trunk roads; the latter principal roads. They are generally referred to as motorways. About 1,350 miles of motorways in England were open to traffic by Sept. 1979 and some 500 miles are under construction.

The Road Construction Units' responsibilities for the design and supervision of the construction of major trunk roads (including motorways) are being transferred to firms of consulting engineers, and to county councils who will act as the Secretary of State's agents. The six Road Construction Unit Headquarters will continue to perform work which proceeds directly from the Secretary of State's statutory and financial responsibilities. Units are responsible for designing and supervising the construction of major trunk roads (including motorways). Regional Controllers (Roads and Transportation) are responsible for smaller trunk road schemes (generally those costing under £2.5m.) and for the maintenance of all trunk roads (including motorways). Local authorities act as the Secretary of State's agents for construction and maintenance, the work being carried out by them or by contractors acting on their behalf. Central government bears the full cost.

On 1 April 1975 specific grants to local authorities for the construction or improvement of principal roads were abolished. All aid to local authorities for transport expenditure is now given through the rate support grant and through a transport supplementary grant which is paid to County Councils whose expenditure for the year, as accepted by the Secretary of State, exceeds the level determined by a formula prescribed in the Rate Support Grant Order.

Public highways in Great Britain at 1 April 1979, excluding mileages of unsurfaced roads (green lanes), had a total length of 210,046 miles (England, 160,112 miles; Wales, 19,400; Scotland, 30,533). There were 7,744 miles of all-purpose trunk roads, 1,544 of motorways (both trunk and principal), 21,442 were principal roads and 179,389 were other roads.

At 1 April 1974 there were about 6,000 miles of unsurfaced roads (green lanes) in England and 2,000 in Wales.

Motor vehicles for which licences were current under the Vehicles (Excise) Act, 1971, numbered, at 31 Dec. 1979, 18.6m., including 14.5m. cars, 1.3m. mopeds, scooters and motor cycles, 111,000 public transport vehicles (including taxis) and 1.8m. goods vehicles.

New vehicle registrations in 1980 numbered 2.16m.

Road casualties in Great Britain numbered in 1979, 335,000 (47,400 under 15) including 6,352 killed, in 1978, 350,000 (50,800 under 15) including 6,831 killed

Railways. The nationalized railway system, known as 'British Rail', together with British Transport Hotels Ltd, British Rail Engineering Ltd, British Rail Hovercraft Ltd, Freightliners Ltd, Transportation Systems and Market Research Ltd (Transmark), Sealink UK Ltd and the British Rail Property Board are owned and managed by a public authority, the British Railways Board. The Board is required to direct its affairs in such a way as to ensure that standards of public service and safety are maintained while at the same time keeping within specified financial constraints.

The role of the British Railways Board is to determine policies and objectives, establish the organization to carry them out, monitor performance and take major decisions.

The management of the railways, which forms the bulk of the Board's activity, is the responsibility of the Chief Executive (Railways). In this role he establishes plans and budgets for the achievement of objectives set by the Board, monitors and achieves results against those plans and budgets and directs the organization and deployment of manpower resources. He is assisted by Executive Board Members with functional responsibility for Engineering and Research, Finance and Planning, Marketing, Operating and Productivity, and Personnel.

He also directs the General Managers of the 5 operating Regions of the railways. The responsibilities of these managers are for the day-to-day operation of the passenger and freight railway systems throughout the country.

The management of each subsidiary activity is the responsibility of each Managing Director, directed by a Subsidiary Board.

The Transport Act, 1968, reduced the railways commencing debt from £1,562m. to £300m. The Act also enabled the Secretary of State for the Environment to make grants for the maintenance of unremunerative passenger services and, additionally, to make grants, until 1973, towards the cost of surplus track and signalling equipment. The Railways Act, 1974, introduced a new system of financial support in accordance with EEC Regulations 1191/69 and 1192/69. On 1 Jan. 1975, the Board's capital debt was reduced to £250m. and their borrowing limit, including commencing debt, was increased to £600m. extendable to £900m. The power to make grants for unremunerative passenger services was withdrawn. The Secretary of State is authorized to impose general obligations on the Board in respect of passenger services and is empowered to compensate the Board for providing adequate transport services. Aggregate compensation is limited to £900m., extendable to £1,500m. subject to Parliamentary approval.

In 1979 the total freight traffic amounted to 169.3m. tonnes, comprising coal and coke 93.5m. tonnes, iron and steel 25m. tonnes and other freight, excluding carryings for Freightliners Ltd and National Carriers Ltd, for which tonnage figures are not available, 50.8m. tonnes. Passenger journeys amounted to 736.2m. Rolling stock (standard gauge) at the end of 1979 included 3,712 locomotives (including 136 high speed power units), 17,175 passenger-carrying vehicles (including Pullman carriages), 4,336 luggage and parcel vans and 137,589 freight vehicles. At the end of the year 11,123 (standard gauge) route-miles were open to traffic.

The London Transport Executive, in Jan. 1980, had 241 route-miles of railway open for traffic and also operated over 19 miles of track owned by British Rail. Rolling stock owned: Underground, 4,228 (2,843 motor cars, 1,385 trailer cars); buses, 6,481. Total number of miles run in passenger service (1979) was 367m. miles. The number of passengers carried in 1979 was: Underground, 594m.; buses, 1,234m. Average takings per passenger journey (1979) were: Underground, 34.5p; buses, 13.2p.

Under the provisions of the Transport Act, 1947, the 4 main-line railways, together with their associated lines, docks, steamships and hotels, the London Passenger Transport Board and the major canal undertakings, passed on 1 Jan. 1948 into the ownership of the British Transport Commission, as the instrument of the State.

The Transport Act, 1962, dissolved the Commission and created in its stead separate Boards for British Railways, London Transport, British Transport Docks and British Waterways. The new Boards assumed their responsibilities as from 1 Jan. 1963. Other main provisions of the Act reconstructed the finances of the Boards and gave them a greater measure of commercial freedom.

The Transport Act, 1968, set up 3 new state-owned transport organizations. The National Freight Corporation inherited the road haulage subsidiaries of the THC, British Rail sundries division, now National Carriers Ltd, and 51% of BR's freightliner company. The National Bus Company acquired the assets of 65 companies, mainly concerned with road passenger transport in England and Wales, including those companies operated by the THC.

From 1 Jan. 1969 the Scottish Transport Group acquired the assets of the THC's road passenger transport companies in Scotland, and also certain ships, ferry services and British Railways domestic Scottish shipping services.

On 1 Jan. 1970, the responsibility for the London Transport Board was transferred to the Greater London Council and renamed London Transport Executive. The LTB Country Bus services and Green Line services were transferred at the same time to the National Bus Company and renamed London Country Buses.

Gross receipts in 1979 for these Boards were: British Railways Board, from 1975 the Railways Act 1974 introduced, *inter alia*, new arrangements for the financial support of the railway passenger system and provided for the reconstruction of the finances of the Board, £1,775.1m.¹; London Transport Executive, £368.1m.¹; British Transport Docks Board, £131.2m.; National Bus Company, £4,603m.¹; National Freight Corporation, £417m.; and British Waterways Board, £13.1m.¹

On 4 Aug. 1978, Freightliners Ltd became a wholly owned subsidiary of the British Railways Board.

¹ Excludes support grants.

Aviation. The British Airways Board was set up by the Civil Aviation Act 1971 to incorporate the 2 state-owned airlines (BOAC and BEA) as the British Airways divisions of a larger group to be known as the British Airways Group.

The British Overseas Airways Corporation (BOAC) was set up under the British Overseas Airways Act 1939 and British European Airways (BEA) was established under the Civil Aviation Act 1946. In addition to the nationalized corporation, there are about 20 independent air transport operators.

British Airways is engaged on long-haul operations. Its scheduled services link Britain with Europe, the Middle East, the Far East, Australasia, Africa and North America. It co-operates closely with airlines of several other Commonwealth countries and has financial interests in companies operating local and regional services adjacent to its main routes as well. British Airways also operates a network of short-haul services to over 150 places in Britain, Europe, North Africa and the Middle East. It also has a financial interest in several associated companies both in Britain and abroad, most of which collaborate in providing local services.

The 2 State Corporations had a statutory monopoly up to 1961, although there was an arrangement by which independent operators could provide services as private companies associated with the Corporations. There has been a significant expansion by independent operators who have carried increasing numbers of passengers and volumes of freight on a network of scheduled and non-scheduled domestic and international services, in particular British Caledonian Airways has emerged as the principal independent scheduled airline.

British Airways carried 17.3m. passengers in 1979-80. In March 1980 there were 215 aircraft and 56,866 personnel were employed.

Following the Civil Aviation Act 1971, the Civil Aviation Authority was established as an independent public body responsible for the economic and safety regulation of British civil aviation. It took over the responsibilities of the former Air Transport Licensing Board and Air Registration Board, and also runs the National Air Traffic Services in conjunction with the Ministry of Defence.

In addition to the public transport operators there are a number of companies engaged in miscellaneous aviation activities such as crop-spraying, aerial survey and photography, and flying instruction.

The operating and traffic statistics of the UK airlines on scheduled services during the calendar year 1978 (and 1979) are as follows: Aircraft km flown, 347m. (373m.); revenue passengers carried, 20.3m. (22m.); cargo (freight and mail) carried 278,016 (294,000) tonnes.

Traffic between the UK airports and places abroad in 1977 (and 1978) included 479,000 (499,000) air transport aircraft movements.

There were 6,534 civil aircraft registered in the UK at 1 Jan. 1981.

Shipping. The UK flag merchant fleet in July 1980 totalled 43m. DWT (dry cargo, 16.9m. DWT; tankers, 26.1m. DWT) representing 6.4% of the world fleet. The total number of UK flag ships was 1,698. The number of UK nationality seafarers was about 66,000 as at 30 Sept. 1980.

Capital investment in new tonnage and facilities by British shipping companies 1970-79 (inclusive) was over £4,600m. In 1979 capital expenditure was an estimated £228m. The average age of UK owned and registered tonnage in mid-1980 was 8 years.

Total gross earnings by UK owned and registered ships in 1979 amounted to £2,193m. The net contribution to UK balance of payments was £1,139m. and, in addition, there were gross import savings of £525m.

On 30 Nov. 1980, 22 UK flag ships (1.4m. DWT) were laid up out of a world total of 401 ships (10.6m. DWT).

Inland Waterways. There are approximately 2,500 miles of navigable canals and locked river navigations in Great Britain. Of these, the British Waterways Board is responsible for some 300 miles of commercial waterways (maintained for freight traffic) and some 1,100 miles of cruising waterways (maintained for pleasure cruising, fishing and amenity). The Board is also responsible for a further 600 miles of canals, some of which are no longer navigable and whose future is being considered in conjunction with local authorities; a number of these lengths have been restored for cruising or as local amenities. The Board's gross receipts for the year 1979 were £13.1m. The total traffic on their waterways was 5.2m. tonnes.

The most important of the river navigations and canals under other authorities include the rivers Thames, Great Ouse, Nene and Yorkshire Ouse, the Norfolk Broads and the Manchester Ship Canal.

Manchester, one of the leading ports in the UK, was opened to maritime traffic in 1894 by the construction of the Manchester Ship Canal, which is 35½ miles in length and owned and operated by the Manchester Ship Canal Company. The entrance lock is 80 ft (24.38 metres) wide and the maximum width of other locks within the canal is 65 ft (19.81 metres). Ships up to 28 ft 10 in. (8.78 metres) fresh-water draught can navigate to Ince Oil Berth; between Ince Oil Berth and Manchester the maximum draught is 26 ft 6 in. (8.07 metres) in fresh water.

The Port of Manchester includes the Queen Elizabeth II Oil Dock at Eastham (separate entrance lock 100 ft wide), the oil docks at Stanlow and a considerable number of public and private wharves and installations along the canal, as well as the terminal docks at Manchester. Total sea-borne and barge traffic in 1980 amounted to 12.5m. tonnes; operating revenue, £25.54m.; operating deficit, £2,092,000. The total issued capital at 31 Dec. 1980 was £19,457,000.

On 31 March 1980 the total number of telegraph acceptance offices was 8,824 and the London Telecommunications Region had 508 local exchanges, 37 auto-manual and dedicated main network switching centres, 10,865 call offices and 5,706,049 telephone stations. In the provinces there were 5,792 local exchanges, 245 auto-manual and dedicated main network switching centres, 66,202 call offices and 20,763,648 telephone stations. The accrued revenue derived in 1979-80 from private telephone circuits amounted to £105.2m.

1977, 1978, 1979 and 1980 resulted in a surplus of income over expenditure of £298.5m., £366.5m., £373.8m. and £295.3m. respectively.

Broadcasting. Radio and television services are provided by the BBC and by the Independent Broadcasting Authority and its programme contractors. The BBC, constituted by Royal Charter until 31 July 1981, has responsibility for providing domestic and external broadcast services, the former financed from the television licence revenue, the latter by Government grant. The domestic services include 2 national television services, 4 national radio network services and an expanding local radio service.

The IBA constituted by statute provides an independent television service serving the franchise areas, covering the country, of its programme contractors. The Broadcasting Act 1980 provides for the establishment of a fourth television channel. It also provides independent local radio services. These services are financed by the sale of broadcast advertising time.

The BBC's domestic radio services are available on LF, MF and VHF; those of the IBA on MF and VHF. The television services of the 2 authorities BBC1, BBC2 and ITV are broadcast at UHF in 625-line definition and in colour.

The broadcasting authorities, whose governing bodies are appointed (by HM the Queen in the case of the BBC and by the Home Secretary in the case of the IBA) as trustees for the public interest in broadcasting, are independent of government in matters of programme content and are publicly accountable to Parliament for the discharge of their responsibilities.

The number of broadcast receiving licences in force on 31 Dec. 1980 was 18.52m., including 13.49m. for colour.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. *England and Wales.* The legal system of England and Wales, divided into civil and criminal courts has at the head of the superior courts, as the ultimate court of appeal, the House of Lords, which hears each year a number of appeals in civil matters, including a certain number from Scotland and Northern Ireland, as well as some appeals in criminal cases. In order that civil cases may go from the Court of Appeal to the House of Lords, it is necessary to obtain the leave of either the Court of Appeal or the House itself, although in certain cases an appeal may lie direct to the House of Lords from the decision of the High Court. An appeal can be brought from a decision of the Court of Appeal or the Divisional Court of the Queen's Bench Division of the High Court in a criminal case provided that the Court is satisfied that a point of law 'of general public importance' is involved, and either the Court or the House of Lords is of the opinion that it is desirable in the public interest that a further appeal should be brought. As a judicial body, the House of Lords consists of the Lord Chancellor, the Lords of Appeal in Ordinary, commonly called Law Lords, and such other members of the House as hold or have held high judicial office. The final court of appeal for certain of the Commonwealth countries is the Judicial Committee of the Privy Council which, in addition to Privy Counsellors who are or have held high judicial office in the UK, includes others who are or have been Chief Justices or Judges of the Superior Courts of Commonwealth countries.

Civil Law. The main courts of original civil jurisdiction are the county courts for less important cases, and the High Court for the more important ones.

There are about 300 county courts located throughout the country, grouped in districts, and each presided over by a circuit judge. They have a general jurisdiction (subject to certain rights of transfer to the High Court given to defendants) to determine all actions founded on contract or tort involving sums of not more than £2,000. Certain matters, such as actions of libel and slander, are entirely reserved for the High Court. In addition, certain designated county courts have jurisdiction in matrimonial proceedings. Divorce proceedings must now commence in these courts

and, subject to being transferred to the High Court upon becoming defended, are determined in the County Court.

The High Court has both appellate and original jurisdiction, covering virtually all civil causes not determined in the county court. The judges of the High Court are attached to one of its 3 divisions: Chancery; Queen's Bench; and Family; each with its separate field of jurisdiction. There are 75 such judges, called *puisne* judges. For the hearing of cases at first instance, the High Court judges sit singly. Appellate jurisdiction is usually exercised by Divisional Courts consisting of 3 (sometimes 2) judges, though in certain circumstances a judge sitting alone may hear the appeal.

The Restrictive Practices Court was set up in 1956 under the Restrictive Trade Practices Act, and is responsible for deciding whether a restrictive trade agreement is in the public interest. It is presided over by a judge, but laymen sit on the bench also.

The Court of Appeal (Civil Division) hears appeals in civil actions from both the High Court and County Courts. It includes the Lord Chancellor, who is President of the Chancery Division, and the heads of the other 2 divisions (the Lord Chief Justice and the President) of the High Court, but effectively the head of the Civil Division is the Master of the Rolls, aided by 17 Lords Justices of Appeal sitting in 5 divisions.

Civil proceedings are instituted by the aggrieved person, but, as they are a private matter, they are frequently settled by the parties to a dispute through their lawyers before the matter actually comes to court. In some cases, at the instance of either party, a jury may sit to decide questions of fact and award of damages.

Criminal Law. At the base of the system of criminal courts are the lay justices who try the great proportion of minor offenders (over 98% of all criminal cases) as well as undertaking a small proportion of civil work. Magistrates' courts are comprised of 3 lay justices who are unpaid and need not possess legal qualifications (though they undergo a course of training), though they do have the assistance on points of law of a professional clerk to justices. In central London and large cities there exist stipendiary magistrates, paid for their duties. These are professional lawyers and usually sit alone. Exercising summary jurisdiction in petty sessions, justices have power to pass sentences of imprisonment up to, in general, 6 months, and to impose fines up to, in general, £1,000. One of their functions is to examine persons charged with indictable offences and to determine whether they should be committed for trial at the Crown Court. Justices deal each year with almost 2m. cases, including thefts, assaults, road traffic infringements, drug abuse, breaches of licensing laws, etc. There are some 21,964 justices who are appointed to the Commission of the Peace by the Lord Chancellor, and some 3,471 justices appointed by the Chancellor of the Duchy of Lancaster; each assisted by advisory committees. Women are eligible to be appointed justices, and the number on the Commission of the Peace is 9,484.

Specially qualified justices sit in juvenile courts to deal with cases involving persons under 17 years of age charged with criminal offences (other than homicide and other grave offences) or brought before the court as being in need of care or control. These courts normally sit with 3 justices, including 1 woman, and are accommodated separately from other courts.

Specially qualified justices also sit in the domestic courts to deal with matrimonial proceedings, custody, guardianship and maintenance of children, affiliation and adoption. These courts normally sit with 3 justices including 1 woman.

Above the magistrates' courts is the Crown Court. This was set up by the Courts Act 1971 to replace quarter sessions and assizes. Unlike quarter sessions and assizes, which were individual courts, the Crown Court is a single court which is capable of sitting anywhere in England and Wales. It has power to deal with all trials on indictment and has inherited the jurisdiction of quarter sessions to hear appeals, proceedings on committal of persons for sentence, and certain original proceedings on civil matters under individual statutes.

The jurisdiction of the Crown Court is exercisable by a High Court judge, a

Circuit judge or a Recorder (who is a part-time judge) sitting alone, or, in specified circumstances, with justices of the peace. The Lord Chief Justice has given directions as to the types of case to be allocated to High Court judges (the more serious cases) and to Circuit judges or Recorders respectively.

Appeals from magistrates' courts go either to a Divisional Court of the High Court (when a point of law alone is involved) or to the Crown Court which is empowered to deal with appeals against conviction and or sentence. Appeals from the Crown Court lie to the Court of Appeal (Criminal Division). Appeals on questions of law go by right, and appeals on other matters by leave. The Lord Chief Justice and the other judges of the High Court may sit with the Master of the Rolls and the Lords Justices to constitute this court.

There remains as a last resort the invocation of the royal prerogative exercised on the advice of the Home Secretary. In 1965 the death penalty was abolished for murder.

All contested criminal trials, except those which come before the magistrates' courts, are tried by a judge and a jury consisting of 12 members. The defence may object, without showing cause, to up to 3 jurors. The prosecution may ask that any number may 'stand by' until the jury panel is exhausted, and only then need to show cause. When these peremptory challenges have been exhausted further challenges may only be made for cause and this rarely happens. The jury decides whether the accused is guilty or not. The judge is responsible for summing up on the facts and explaining the law; he sentences convicted offenders. If, after at least 2 hours of deliberation, a jury is unable to reach a unanimous verdict it may, provided that in a full jury of 12 at least 10 of its members are agreed, bring in a majority verdict. The failure of a jury to agree on a unanimous verdict or to bring in a majority verdict involves the retrial of the case before a new jury.

The Employment Appeal Tribunal. The Employment Appeal Tribunal which is a superior Court of Record with the like powers, rights, privileges and authority of the High Court, was set up in 1976 to hear appeals on questions of law against decisions of industrial tribunals and on questions of fact and law against decisions of the Certification Officer. The appeals are heard by a High Court Judge sitting with 2 members (in exceptional cases 4) appointed for their special knowledge or experience of industrial relations either on the employer or the trade union side, with always an equal number on each side. Industrial tribunals are responsible for deciding questions under Employment Protection (Consolidation) Act, 1978, Equal Pay Act, 1970, Sex Discrimination Act 1975, Employment Protection Act 1975, Employment Act 1980 and Race Relations Act, 1976. The great bulk of their work is concerned with the problems which can arise between employees and their employers. The Certification Officer is responsible for deciding questions under the Trade Union Act 1913, the Trade Union (Amalgamations, etc.) Act 1964, the Trade Union and Labour Relations Act 1974 and the Employment Protection Act 1975.

Military Courts. Offences by persons subject to service law against the system of military law created under the powers of the Army Act, Air Force Act or Naval Discipline Act are dealt with either summarily or by courts-martial. Petitions may be made to the Defence Council. Subsequent appeals lie to a Courts-Martial Appeals Court, and from that court an appeal may lie to the House of Lords.

The Personnel of the Law. All judicial officers except the Lord Chancellor (who is a member of the Cabinet) are independent of Parliament and the Executive. They are all appointed by the Crown on the advice of the Prime Minister or the Lord Chancellor and hold office until retiring age. The legal profession is divided; barristers, who advise on legal problems and conduct cases in court, usually act for the public only through solicitors, who deal directly with the legal business brought to them by the public. Most judicial appointments are made from barristers of long standing, though solicitors are eligible for appointment as Recorders, who may, after 3 years, be appointed Circuit Judges.

There are 2 kinds of civil legal aid. Firstly there is legal advice and assistance,

otherwise known as the 'Green Form' scheme. This includes advice and help on anything that is normally regarded as being within a solicitor's practice but except in rare circumstances it does not cover representation. Secondly, there is legal aid for civil court proceedings which covers all the work up to and including the court proceedings and representation. Under the provisions of the Legal Aid Act 1974, aid is available to those of low or moderate means either free or subject to a contribution, depending on means. In 1979-80 there were over 430,000 applications for advice and assistance under the Legal Advice and Assistance Scheme and over 189,000 applications for legal aid. The cost of legal aid in civil cases is met from (a) contributions from assisted persons; (b) the operation of the statutory charge which gives the Law Society a first charge on money or property recovered or preserved for an assisted person to the extent of that person's liability for his own costs; (c) costs recovered from opposing parties and (d) a grant from the Exchequer. The cost of civil legal aid to the state in the year 1979-80 amounted to £35.8m. and the cost of the legal advice and assistance scheme was £11.8m.

Under Part II of the Legal Aid Act 1974 a court dealing with criminal proceedings may order legal aid to be given if it considers it is desirable in the interests of justice and if it also considers that the defendant (or appellant) requires financial assistance in meeting the costs he may incur. The interests of justice are not statutorily defined but may include, for example, situations where the defendant is in real danger of going to prison or losing his job, where substantial questions of law are to be argued or where the defendant is unable to follow the proceedings and explain his case due to inadequate knowledge of English, mental illness or other mental or physical disability. Legal aid must be granted where a person is committed for trial on a charge of murder or where the prosecutor appeals or applies for leave to appeal from the criminal division of the Court of Appeal or the Courts-Martial Appeal Court to the House of Lords.

The costs of legal aid in criminal proceedings are paid by the central government, but courts have power to require legally aided persons to contribute towards the cost of legal aid given to them. The cost of legal aid in criminal proceedings in the year 1979-80 was £61m., £31.5m. of this was for legal aid in the higher courts which is paid for out of the Home Office vote and £29.5m. for legal aid in the magistrates' courts which is paid from the legal aid fund.

Under the Parliamentary Commissioner Act, passed 22 March 1967, M.P.s may refer to the Parliamentary Commissioner complaints received from the public regarding improper or inequitable administration in most spheres of central government affairs. Generally, other available remedies (such as legal action) must be exhausted before a complaint can be investigated. If a complaint is found to require a remedy the Parliamentary Commissioner makes a report to Parliament.

Commissions for Local Administration in England and Wales were set up under the Local Government Act 1974. The Commissioners carry out similar functions in relation to local government bodies to those the Parliamentary Commissioner discharges with regard to maladministration in central government.

Police. The authorized strength of the police force in England and Wales in Dec. 1980 was 120,261: the actual strength was 106,993 men and 10,430 women. In addition there were 15,067 special constables (including 2,629 women). Total police net expenditure (estimated) in England and Wales for 1978-79 was £1,060.8m.

SCOTLAND. The High Court of Justiciary is the supreme criminal court in Scotland and has jurisdiction in all cases of crime committed in any part of Scotland, unless expressly excluded by statute. It consists of the Lord Justice-General, the Lord Justice-Clerk and 19 other judges, who are the same judges as of the Court of Session, the Scottish supreme civil court. The Court, which is presided over by the Lord Justice-General, whom failing, the Lord Justice-Clerk, exercises an appellate jurisdiction as well as one of first instance, sits as business requires in Edinburgh as

a Court of Appeal (the *quorum* being 3 judges) and on circuit as a court of first instance. The decisions of the Court in either case are not subject to review by the House of Lords. One judge sitting with a jury of 15 persons can, and usually does, try cases, but 2 or more (with a jury) may do so in important or complex cases. It has a privative jurisdiction over cases of treason, murder, rape, deforcement of messengers and breach of duty by magistrates. It also, in practice, is the only court which tries cases of incest, sodomy and other serious or aggravated crimes against person or property and generally those cases in which a sentence greater than imprisonment for 2 years may be imposed either under statute or common law. Moreover, the Court has inherent power to try and to punish all acts which are plainly criminal though previously unknown and not dealt with by any statute.

The appellate jurisdiction of the High Court of Justiciary extends to all cases tried on indictment, whether in the High Court or the Sheriff Court, and persons so convicted may appeal to the Court on any ground involving a question of law alone, or apply for leave to appeal, on any question of fact or of mixed law and fact, or on any other sufficient ground, and also against sentence unless it is one fixed by law. It is also a court of review from courts of summary criminal jurisdiction, and on the final determination of any summary prosecution either party may appeal to the Court by way of stated case on questions of law, procedure, etc., but not on questions of fact. A further or complementary form of process of review which can be resorted to by convicted persons in these courts is by Bill of Suspension (and Liberation), but it is of strictly limited application. A prosecutor in these courts may also bring under review a decision in law, prior to final judgment of the case, by way of Bill of Advocation, but this process is infrequently resorted to. The Court also hears appeals under the Courts-Martial (Appeals) Act 1951.

The Sheriff Court has an inherent universal criminal jurisdiction (as well as an extensive civil one) limited in general to crimes and offences committed within a sheriffdom (a specifically defined region), which has, however, been curtailed by statute or practice under which the High Court of Justiciary has exclusive jurisdiction in relation to the crimes above-mentioned. This Court is presided over by a Sheriff-Principal or a Sheriff, and when trying cases on indictment sits with a jury of 15 persons. His power of awarding punishment involving imprisonment is restricted to 2 years in the maximum, but he may under certain statutory powers remit the prisoner to the High Court for sentence. The Sheriff also exercises a wide summary criminal jurisdiction and when doing so sits without a jury; and he has concurrent jurisdiction with every other court within his sheriffdom in regard to all offences competent for trial in summary courts. The great majority of offences which come before the courts are of a minor nature and, as such, are disposed of in the Sheriff Courts. In cases indicated for trial in the High Court of Justiciary the Pleading, or First Diet, is always held in the Sheriff Court and, in these cases, the Sheriff may dispose of any objection of a preliminary nature, whether to the competency or relevancy or otherwise, or may refrain from doing so. In either case the Sheriff's decision can be reviewed by the High Court at the second, or trial, Diet.

New procedures will be introduced during 1981 by the introduction of the Criminal Justice (Scotland) Act 1980.

District Courts in each local authority district have jurisdiction in minor offences occurring within the district. These courts are presided over by lay magistrates, known as justices, and have limited powers of fine and imprisonment.

The Court of Session, presided over by the Lord President (the Lord Justice-General in criminal cases), is divided into an Inner House comprising 2 divisions of 4 judges each with mainly appellate function, and an Outer House comprising 13 single judges, sitting individually at first instance; it exercises the highest civil jurisdiction in Scotland, with the House of Lords as a court of appeal.

Police. The police forces in Scotland at the end of 1979 had an authorized establishment of 13,274; the strength was 12,424 men and 790 women. Whole-time 'additional' policemen numbered 148, and there were 3,128 part-time special constables. The total police net expenditure in Scotland was £118.2m. for 1978-79.

Religion. The Anglican Communion has originated from the Church of England and parallels in its fellowship of autonomous churches the evolution of British influence beyond the seas from colonies to dominions and independent nations. There is no terrestrial head of the Anglican Communion; the Archbishop of Canterbury presides as *primus inter pares* at the decennial meetings of the bishops of the Anglican Communion at the Lambeth Conference.

The Anglican churches, in addition to the Church of England, comprise the churches, councils, and provinces in communion with the see of Canterbury; which are situated in Wales; Ireland; Scotland; United States of America; Canada; Australia; New Zealand; West Indies; Brazil; South Africa; Central Africa; West and East Africa; Jerusalem and the Middle East; South East Asia; Burma; Sri Lanka; Japan; South America; China.

In addition to the dioceses included within the Provinces of Canterbury and York, there are several dioceses overseas over which the Archbishop of Canterbury exercises metropolitan jurisdiction, while Church of England chaplaincies in North and Central Europe formerly under the jurisdiction of the Bishop of London now form the new diocese of Europe.

England and Wales. The established Church of England, which baptizes about 40% of the children born in England (*i.e.*, excluding Wales but including the Isle of Man and the Channel Islands), is Protestant Episcopal. Civil disabilities on account of religion do not attach to any class of British subject. Under the Welsh Church Acts, 1914 and 1919, the Church in Wales and Monmouthshire was disestablished as from 1 April 1920, and Wales was formed into a separate Province.

The Queen is, under God, the supreme governor of the Church of England, with the right, regulated by statute, to nominate to the vacant archbishoprics and bishoprics. The Queen, on the advice of the First Lord of the Treasury, also appoints to such deaneries, prebendaries and canonries as are in the gift of the Crown, while a large number of livings and also some canonries are in the gift of the Lord Chancellor.

There are 2 archbishops (at the head of the 2 Provinces of Canterbury and York), and 42 diocesan bishops and including the bishop of the diocese of Europe, which is part of the Province of Canterbury. Each archbishop has also his own particular diocese, wherein he exercises episcopal, as in his Province he exercises metropolitan, jurisdiction. In Dec. 1980 there were 67 suffragan and assistant bishops, 37 deans and provosts of cathedrals and 104 archdeacons. The General Synod, in England, consists of a House of Bishops, a House of Clergy and a House of Laity, and has power to frame legislation regarding Church matters. The first two Houses consist of the members of the Convocations of Canterbury and York, each of which consists of the diocesan bishops and elected representatives of the suffragan bishops, 6 for Canterbury province and 3 for York (forming an Upper House), deans, provosts, and archdeacons, and a certain number of proctors elected as the representatives of the inferior clergy, together with, in the case of Canterbury Convocation, representatives of the Universities of Oxford, Cambridge and London and in the case of York a representative for the Universities of Durham and Newcastle; the chaplains in the Forces (forming the Lower House). They are elected by their fellow suffragans. The House of Laity is elected by the lay members of the Deanery Synods. Parochial affairs are managed by annual parochial church meetings and parochial church councils. Every Measure passed by the General Synod must be submitted to the Ecclesiastical Committee, consisting of 15 members of the House of Lords nominated by the Lord Chancellor and 15 members of the House of Commons nominated by the Speaker. This committee reports on each Measure to Parliament, and the Measure receives the Royal Assent and becomes law if each House of Parliament resolves that the Measure be presented to the Queen.

At 31 Dec. 1978 there were 13,750 ecclesiastical parishes, inclusive of the Isle of Man and the Channel Islands. These parishes do not, in many cases, coincide with civil parishes. Owing to the pastoral re-organization, although most parishes have their own churches, not every parish nowadays can have its own incumbent or minister; so that in some areas one or more parishes may be served by a clergyman, who must be in priest's orders, and in these cases he holds the parishes in plurality. In 1979 there were 10,815 parochial incumbencies in which 1,899 benefices were under suspension of presentation. In 1980 there were 7,380 beneficed clergymen

excluding dignitaries, 1,368 other clergymen of incumbent status and 1,815 assistant curates working in the parishes.

Private persons possess the right of presentation to over 2,000 benefices; the patronage of the others belongs mainly to the Queen, the bishops and cathedrals, the Lord Chancellor, and the universities of Oxford and Cambridge. In addition to the 10,563 parochial incumbents and assistant curates, there were (1980) 371 dignitaries, 308 non-parochial clergymen working within the diocesan framework and approximately 2,000 non-parochial clergymen outside the framework.

The membership of the Church at 30 June 1979 was estimated to be 26.8m. baptized members, of whom 8.7m. were confirmed.

Of the 40,508 churches and chapels registered for the solemnization of marriages at 30 June 1980, 16,721 belonged to the Established Church and the Church in Wales and 23,787 to other religious denominations. Of the 368,853 marriages celebrated in 1979 (368,258 in 1978), 32% were in the Established Church and the Church in Wales, 17% in churches or chapels of other denominations and 51% were civil marriages in a Register Office.

Roman Catholics in England and Wales were 4,298,050 in 1980. There were 5 archdioceses and 16 dioceses, 7,016 clergy and 2,602 parish churches and 1,173 other churches open to the public. Convents, 1,296.

The Unitarians have about 330 places of worship, the Catholic Apostolic Church over 80, the New Jerusalem Church about 75. The Salvation Army, a religious body with a quasi-military organization, carries on both spiritual and social work at home and abroad, and had, in British Territory, 1973, 2,100 officers, 1,035 corps, 31 Red Shield Centres and 51 Red Shield Mobile Units. There were also 38 eventide homes, 13 maternity homes, 2 maternity hospitals, 46 hostels for men, 14 hostels for women and girls, and 9 approved and training schools.

The following is a summary of statistics of certain churches in England and Wales, Channel Islands and Isle of Man:

There are about 410,000 Jews in the UK with about 240 synagogues.

Scotland. The Church of Scotland (established in 1560 at the Reformation and re-established in 1688 as part of the Revolution Settlement) is Presbyterian, the ministers all being of equal rank. There is in each parish a kirk session, consisting of the minister and a number of laymen called elders. There are presbyteries (formed by groups of parishes), meeting frequently throughout the year, and these are again grouped in synods, which meet half-yearly and can be appealed to against the decisions of the presbyteries.

The supreme court is the General Assembly, which now consists of some 1,250 members, half clerical and half lay, chosen by the different presbyteries. It meets annually in May (under the presidency of a Moderator appointed by the Assembly, the Sovereign being present or represented by a Lord High Commissioner, appointed by the Queen on the nomination of the Government of the day), and sits for 7 days. Any matters not decided during this period may be left to a Commission which sits at stated intervals until the meeting of the next General Assembly.

On 2 Oct. 1929 the Church of Scotland and the United Free Church of Scotland were reunited under the name of The Church of Scotland, and the two bodies met in General Assembly in Edinburgh as one. The united Church had, in Scotland, on 31 Dec. 1979, 1,873 congregations, 970,741 members; 20,740 teachers and 127,256 scholars in attendance in Sunday schools. The Church courts are the General Assembly, 12 synods, 47 presbyteries in Scotland, 1 in England and 2 on the Continent. Income in 1977 was £26,231,984. There are divinity faculties in 4 Scottish

universities of Edinburgh, Glasgow, Aberdeen and St Andrews, with 60 professors and lecturers who are mostly ministers of the Church of Scotland.

The Episcopal Church of Scotland is a province of the Anglican Church and is one of the historic Scottish churches. It consists of 7 dioceses. As at 31 Dec. 1980 it had 296 churches and missions, 201 clergy and 71,422 members, of whom 41,044 were communicants.

There are in Scotland some small outstanding Presbyterian bodies and also Baptists, Congregationalists, Methodists and Unitarians.

The Roman Catholic Church which celebrated the centenary of the restoration of the hierarchy in 1978, had in Scotland (1979) 1 cardinal, 1 archbishop and 9 bishops, 1,173 clergy, 474 parishes, and 823,600 adherents.

The proportion of marriages in Scotland according to the rites of the various Churches in 1979 was: Church of Scotland, 40.3%; Roman Catholic, 15%; Episcopal, 1.3%; United Free, 0.5%; others, 4.2%; civil, 38.7%.

Education. *The Publicly Maintained System of Education in England and Wales:* Compulsory schooling begins at the age of 5 and the minimum leaving age for all pupils is 16.¹ No tuition fees are payable in any publicly maintained school (but it is open to parents, if they choose, to pay for their children to attend other schools). The post-school stage, which is voluntary, includes universities, polytechnics and other further education establishments (including those which provide courses for the training of teachers), as well as adult education and the youth service. Financial assistance is generally available to students on higher education courses in the university and non-university sectors and to many students on other courses in further education.

Nursery Education. Children under 5 may be provided for in nursery schools and nursery classes in primary schools. In the public sector no fees are payable and there were (1980) 596 such nursery schools accommodating about 48,456 children while some 4,027 nursery classes accommodate about 166,995 children. Over 78% of all these children attend on a part-time basis. There are also nearly 213,469 children under the compulsory school age attending maintained primary schools.

Primary Schools. Children normally begin primary school when they are 5. Nearly half of the 20,482 primary schools take the complete age-range from 5 upwards. About 3,900 take infants only, up to about 7 years; the rest take juniors only, from 7 or 8 on. The great majority of primary schools take both boys and girls. Nearly 13,000 of these schools had between 100 and 300 pupils each; of the remainder, over half had 100 pupils or less.

There are 1,930 primary schools in Wales. In those primary schools (and some secondary schools) which are in the predominantly Welsh-speaking areas, the main language of instruction is Welsh. There are also 'Welsh', or, more accurately, bilingual schools in mainly English-speaking parts of Wales. Generally children transfer from primary to secondary schools at 11.

Middle Schools. In some areas middle schools are being developed. These cover the age-ranges 8 to 12, 9 to 12, 9 to 13, 10 to 13 or 10 to 14. In Jan. 1980 there were 1,396 middle schools (there were only 15 in 1969) and more are planned as local education authorities introduce a 3-tier system of comprehensive education to replace the traditional 2-tier system.

Secondary Education. In some areas, pupils are still selected at 11 for grammar schools on the basis of ability. The grammar schools, of which there were 254 at

¹ As a result of the Education (School Leaving Dates) Act 1976, one of the two former leaving dates was amended. This means that pupils whose dates of birth fall between 1 Feb. and 31 Aug. (inclusive) cease to be of compulsory school age on the Friday before the last Monday in May. Some of these pupils will leave school before their 16th birthdays. Pupils whose dates of birth fall between 1 Sept. and 31 Jan. (inclusive) remain of compulsory school age until the end of the Easter term following their 16th birthdays.

Jan. 1980, provide a mainly academic course from age 11 to 18. There were also a small number of technical schools which are the academic equals of grammar schools but can specialize to a greater or lesser extent in technical studies. Modern schools provide a general education up to the minimum school leaving age, though some pupils can, and increasingly do, stay on beyond that age. At Jan. 1980 there were 433 of these schools. There are also a small number of other schools which are various combinations of grammar, technical and modern schools.

Many authorities now operate comprehensive schools to which pupils are admitted without reference to ability or aptitude. In Jan. 1980 there were 3,318 fully comprehensive schools with over 3.14m. pupils, in comparison with 221 such schools with about 210,000 pupils in 1965. With the development of comprehensive education various patterns of secondary school organization have come into operation, of which the main ones are: all through schools with an age-range of 11-18 or 11-16 (with possible transfer to an 11-18 school or to a sixth form college (*i.e.*, 16-19) for further studies); 3-tier systems, which incorporate middle schools with a transfer age of 12, 13 or 14, and corresponding 12-18, 13-18 or 14-18 schools; or a system of junior and senior comprehensive schools, catering for the 11-18 age group with a transfer age of 13 or 14.

Direct Grant Grammar Schools. These schools receive grants direct from the Department of Education and Science for their secondary departments (or 'upper schools') and are independent of local education authorities. In 1975 the Government decided to phase out direct grant and invited the schools to join the maintained sector as comprehensive schools. 51 out of the total of 170 schools in England and Wales decided to accept the invitation, but a small number of these schools are now expected either to close or to become independent along with 118 other schools (1 closed in July 1976) which originally opted for independent status. By Sept. 1979, 35 schools had entered the maintained sector.

Pupils who were admitted before Sept. 1976, to those schools which are becoming independent will continue to attract grant aid (thereby paying lower fees), and will also be eligible for fee remission related to their parents' income until they leave. An assisted places scheme is to operate from Sept. 1981.

Special Schools. Special education is provided for children who are deaf, partially hearing, blind, partially sighted, physically handicapped, educationally sub-normal, epileptic, delicate, maladjusted, autistic or suffering from speech defects not due to deafness. The educationally sub-normal are the largest category in this group. Some handicapped children attend ordinary schools. Others attend special schools: there are at present nearly 1,500 of these, catering (in Jan. 1980) for about 125,000 pupils, including about 4,700 pupils in schools in hospitals for children receiving medical treatment as in-patients. In addition nearly 7,500 pupils attend independent schools catering wholly or mainly for handicapped pupils (the majority placed by local education authorities) and a further 16,000 attend classes in ordinary county or voluntary schools. Special education is intended to enable handicapped children to overcome their difficulties in order that they may, as far as possible, take their place in society. To this end special schools have a more generous staffing ratio and provide physiotherapy, speech therapy and other medical treatment as well as special teaching facilities. Over three-quarters of the maintained special schools are day schools. For children with severe handicaps, for whom day special schools cannot cater, and for children who live out of reach of a suitable day school, free boarding education is provided. Attendance is compulsory from 5 to 16. In addition, local authorities can provide special educational treatment below the age of 5 for those ascertained as being in need of it and until the age of 18 for those who want it (education from 16-18 may be provided either in a school or a college of further education). In addition to the provision in special schools, authorities make special arrangements for educating children at home, in small groups or in hospitals when there is no special school. In Jan. 1980 about 4,800 pupils were being educated otherwise than at school. There are also some establishments which provide further education, pre-vocational training and for assessment for employment purely for handicapped school leavers (these students are usually those who cannot attend ordinary establishments for further education).

Ancillary Services. Local education authorities may provide registered pupils at any school maintained by them with milk, meals and refreshment and they may make such charges as they think fit for anything they provide. For pupils whose parents are in receipt of supplementary benefit or family income supplement, however, authorities are required to ensure that such provision is made for the pupil at mid-day as appears to be requisite and anything which is provided must be free of charge. Authorities are also required to remit the charge for anything they provide for other pupils if having regard to the circumstances, they consider it appropriate to do so. Facilities must also be provided, free of charge, for consuming any meals or other refreshments which pupils bring to school themselves.

Local education authorities also have power to provide milk, meals and refreshment for pupils in non-maintained schools, if they wish to do so, under such terms as may be agreed with the proprietors as long as the cost does not exceed what it would have been if the pupils had been at a school maintained by an authority.

Further Education. In Nov. 1979 there were about 590 institutions in England and Wales providing courses of further education, ranging from shorthand instruction to degree-level, postgraduate work and courses of teacher-training. Course enrolments numbered nearly 496,000 full-time (including 58,000 sandwich students) and 1.48m. part-time and evening; students released by their employers numbered 581,000. There were in addition nearly 4,900 adult education centres (formerly known as evening institutes), which provided mainly part-time courses of non-advanced general education and were attended by 1.85m. students. At the top end of this range are the 23 polytechnics, these are engaged almost entirely in higher education, offering degrees of a standard comparable to those of universities, professional qualifications and courses in a wide range of disciplines leading to Higher National Diplomas and Certificates and to awards of the Technician Education Council and Business Education Council. Many other colleges of further education are however involved to a greater or lesser extent in the higher education sector of further education; and all polytechnics and most further education colleges cater for full-time, part-time and sandwich students, whose periods of study at college alternate with periods of practical training in industry.

Courses were also provided by the Workers' Educational Association (6,581), the University extramural departments (7,832) and the Welsh National Council of YMCAs (80). The total number of students registered at these courses was 272,973.

Education at institutions of further education is not free, but fees are generally low, and are remitted for most students under the age of 18 by the local authority.

The Youth Service. A wide range of facilities for the leisure-time recreation and informal special education of young people primarily of post-school age is provided by local education authorities and voluntary youth organizations. A duty is laid upon local education authorities by the provisions of the 1944 Education Act to secure the adequacy of such facilities for young people in their areas; to this end they either provide, maintain and staff youth clubs, centres and other facilities from their own resources or assist voluntary agencies to do so.

Grants to voluntary agencies to help meet the cost of capital projects and to national voluntary bodies towards their headquarters and training expenses are made by the Government.

Awards to Students. Local education authorities are responsible for making mandatory awards to suitably qualified students taking first-degree and comparable courses, courses of initial teacher-training and certain other advanced level courses. These awards cover fees and maintenance but the maintenance grants are subject to the income of the student and his parents or spouse. In addition scholarships may be available both from universities and other sources. The authorities may also give discretionary awards to students who do not qualify for mandatory awards including those taking non-degree level courses.

In 1978-79 there were 369,246 full value awards current in all, 50% at university and 51,300 were for teacher-training courses. These include awards to students at university departments of education for which responsibility was transferred to local authorities in 1975-76. Lesser value awards, for which the maximum rate of grant payable is below the full cost of the student's fees and maintenance, were also made by the authorities. There were 62,748 awards taken up in the calendar year 1978-79.

The Research Councils (generally in science and social science subjects) and the Department of Education and Science (generally in the arts and the humanities) make awards to students at postgraduate level. The Research Councils gave 6,170 new awards in 1980-81 and there were 12,350 current awards in that academic year. The Department gave 2,126 new awards (state studentships and state bursaries) in 1978-79 and current awards totalled about 3,414.

Teachers. In order to qualify for work in maintained schools, most teachers take a course of professional training. Graduates and holders of some specialist qualifications obtained before 1 Jan. 1970 are regarded as qualified to teach without training, but anyone obtaining these qualifications after that date is obliged to take a training course before being appointed for the first time to a primary school, and since 1 Jan. 1974 before first appointment to a secondary school. For the time being, however, this requirement has been waived for graduates in science and mathematics because of the acute shortage of teachers in these subjects.

In 1980 there were some 60 non-university institutions (including 23 polytechnics) and 30 university departments of education providing courses of initial teaching in England and Wales.

In Oct. 1980 there were about 34,000 students on initial teacher-training courses.

On 30 Sept. 1980, 430,928 full-time teachers (176,794 men and 254,134 women) were employed by local education authorities in maintained nursery, primary and secondary schools in England and Wales.

Finance. Total current and capital expenditure on education in England from public funds (excluding university education) is estimated at £7,009m. for 1979-80 as compared with £6,955m. for 1978-79.

Scotland. The statistics on schools relate to education authority and grant-aided schools. From 1974-75 all teachers employed in these schools require to be qualified.

Nursery Education. In Sept. 1978 there were 493 nursery schools and departments, with a total enrolment of 31,461 pupils.

Primary Education. In Sept. 1978 there were 2,554 primary schools and departments and the number on the registers was 575,696.

In Sept. 1978, 26,945 teachers were employed in primary schools and departments.

Secondary Education. In Sept. 1978 there were 466 secondary schools with 422,263 pupils. Of these schools, 355 were all-through comprehensive establishments providing the full range of Scottish Certificate of Education courses and also non-certificate courses. A further 81 schools were comprehensive in intake and provided both non-certificate and certificate courses, the latter however only up to Ordinary grade. Of the remaining 31 schools, these were selective in intake, 20 provided certificate courses only (Ordinary grade and Higher grade) and 10 non-certificate and certificate courses, the latter again not extending beyond Ordinary grade. Pupils who start their secondary education in schools which do not cater for courses beyond Ordinary grade may in the light of their performance, or for other reasons, be transferred at the end of their second or fourth year to schools providing Higher grade courses.

There were 29,068 teachers in secondary schools at Sept. 1978.

Special Schools. In Sept. 1978 there were 319 special schools and departments. The total number of handicapped children under instruction was 12,999, of which 9,928 were mentally handicapped, 982 were physically handicapped, 356 were blind or partially blind and 718 were deaf or partially deaf, and 1,015 were otherwise handicapped.

At Sept. 1978 there were 26 'List D' schools (these establishments correspond to Community Homes in England and Wales) with a total enrolment of 1,304.

Further Education. Centres and colleges for formal further education numbered 177 in 1978-79.

The student population was 176,538, of whom 38,151 attended full-time (advanced courses, 19,100; non-advanced, 19,051) and 138,387 part-time (advanced courses, 14,670; non-advanced, 123,717).

Teacher-Training. In Nov. 1978 there were 5,438 students in 10 colleges of education on pre-service courses of teacher-training.

Finance. Total expenditure on education met from revenue in 1978-79 was £792.1m. (excluding university education and loan charges).

Independent Schools. Outside the state system of education there were in England and Wales nearly 2,300 independent schools in Jan. 1980, ranging from large 'public' schools to small local ones; there were (1980) 435,058 full-time and 10,605 part-time pupils in these schools. Fees are charged by all these schools, which receive no grant from central government sources. Recognized as efficient status has been discontinued but the requirement for the registration of all independent schools by the Department and their inspection by HM Inspectors, remains unchanged. The term 'public schools' refers to independent schools in membership of the Headmasters' Conference, Governing Bodies Association or the Governing Bodies of Girls' Schools Association. Qualifications under which a school may be represented at the Headmasters' Conference include the measure of independence enjoyed by the governing body and the amount of advanced courses undertaken. Some of these schools are for boarders only, but the majority include non-resident 'day-pupils'. In Scotland there were 95 independent schools, with a total of 16,652 pupils in Sept. 1978. A small number of the Scottish independent schools are of the 'public school' type but they are not known as 'public schools' since in Scotland this term is used to denote education authority (*i.e.*, state) schools.

The earliest of the schools were founded by, and attached to, the medieval churches. Many were founded as 'grammar' (classical) schools in the 16th century, receiving charters from the reigning sovereign. Reformed mainly in the middle of the 19th century, these schools now provide the highest form of English pre-university education. Among the most well-known independent schools are Eton College, founded in 1440 by Henry VI, with 1,250 boys; Winchester College, 1394, founded by William of Wykeham, Bishop of Winchester, 600 boys; Harrow School, founded in 1560 as a grammar school by John Lyon, a yeoman, 740 boys; Charterhouse, 1611, 670 boys. Among the earliest foundations are King's School, Canterbury, founded 600; King's School, Rochester, 604; St Peter's, York, 627.

Universities. In *England* there are 33 traditional degree-giving universities. In addition there are the University of Manchester Institute of Science and Technology; the London and Manchester Business Schools and the Open University. Eight new universities have been established since 1961.

In *Wales* there is 1 university, the University of Wales, with colleges at Aberystwyth, Bangor, Cardiff, Lampeter and Swansea. The Welsh National School of Medicine is a school of the University, and the University of Wales Institute of Science and Technology became a constituent college in Nov. 1967.

In *Scotland* there are 8 universities, Aberdeen, Dundee, Edinburgh, Stirling, Strathclyde, Heriot-Watt, Glasgow and St Andrews. The Carnegie Trust

for Scottish Universities (founded, 1901) has a capital (1980) of £7m. and an annual income of £490,000; 50% of the income is devoted to the improvement and expansion of Scottish Universities and 50% to assist students with their fees.

All these universities and colleges are independent, self-governing institutions, although they receive substantial aid from the State (in the case of the Open University by direct grant from the Department of Education and Science, and the traditional universities through the University Grants Committee). The UGC is a committee appointed by the Secretary of State for Education and Science designed to advise the Government on the needs of the universities, and to prepare plans for future development. The members are drawn from education and industry. The Government receives advice on the universities' requirements for central computing facilities from the Computer Board for the Universities and Research Councils whose members are also drawn from the universities and industry.

The Royal College of Art and the Cranfield Institute of Technology are post-graduate institutions which award higher degrees under charters granted in 1967 and 1969 respectively. They receive grants direct from the Department of Education and Science.

The local education authorities have no responsibility for universities.

The Open University received its charter on 1 June 1969 and is an independent, self-governing institution, awarding its own degrees. It is financed by the Government through the Department of Education and Science and by the receipt of students' fees.

Tuition is by means of correspondence textbooks, radio and television broadcasts and summer schools. Students can also attend one of 260 local study centres. No formal qualifications are required for entry to undergraduate or associate student courses.

Anyone resident in the UK aged 21 or over may apply. In the 1980 Feb.-Oct. teaching year there were 60,000 undergraduates and 8,000 associate students; 5,600 part-time tutors and counsellors; 413 full-time academic staff at the University's headquarters in Milton Keynes and 282 full-time academic staff (*i.e.*, in tutorial and counselling posts) based in 13 regional offices.

The University College at Buckingham, an independent institution of higher education, took its first students in Feb. 1976. It offers a first degree (licence) in 2 academic years of 40 weeks each (the academic year Jan.-Dec. and has 4 terms). There are schools of study: Law; economics; politics, economics and law; history, politics and English literature; accounting and financial management; biology and society; European studies. The licence in European studies takes 3 years including 1 year abroad. In 1980 there were 350 full-time students.

All universities charge fees, but financial help is available to students from several sources.

The universities themselves provide scholarships of various kinds and all local education authorities have a system of awards to help suitable students to attend university.

The amount of aid given generally depends upon the parents' means. The majority of the students at the English and Welsh universities are in receipt of some form of financial assistance.

Awards known as state studentships are offered on a competitive basis by the Department from among candidates considered by the universities to be qualified for post-graduate studies in the humanities; similar awards, tenable at universities or technical colleges, are offered by the Research Councils to students studying science, mathematics and technology at the post-graduate level.

The British Council. The British Council was established in Nov. 1934 and incorporated by Royal Charter in 1940. Its aims are the promotion of a wider knowledge of Britain and the English language abroad and the development of closer cultural relations between Britain and other countries.

The Council's expenditure in 1979-80 amounted to £109.3m. Funds were provided by a grant-in-aid of £28.9m. from the Overseas Information (Foreign and Commonwealth Office) vote and a contribution of £16m. from the Overseas Aid Vote. A further £43.6m. was provided by the Overseas Development Administration to cover the cost of administration of, and the reimbursement of sums expended on, technical co-operation schemes. The balance of £20.8m. was derived from Council earnings and from international agencies, overseas governments, etc. for educational services.

The Council is governed by a board consisting of up to 30 members, 6 of whom are nominated by Ministers. There are advisory committees for Scotland and Wales and also advisory committees or panels for the main branches of the Council's work. In Jan. 1981 the Council had staff in 79 countries.

The Council is designated by the British Government to carry out over 30 bilateral cultural agreements, including that with the Soviet Union. The Council's work broadly divides into English language teaching and other educational work, the promotion of wider use and availability of British books and periodicals, the development of personal contacts and the exchange of information, especially in the fields of education, medicine, science, technology and the arts.

The general policy in the field of English language teaching is to advise and assist education authorities overseas, particularly in curriculum and materials development and the training of local teachers of English; courses are provided in Britain and abroad for the further training of English language teaching experts from overseas. In many countries the Council runs its own English teaching centres. The Council acts as a centre for the dissemination of information about British educa-

tional thought and practice at all levels and, through its complement of education specialists working overseas, it has become closely involved with the administration of aid on behalf of the Overseas Development Administration. It assists in producing English teaching and other educational television and radio programmes overseas and arranges training courses in TV, radio and audio-visual aids both in Britain and overseas. A prominent aspect of its education work is the assistance given in developing countries to the adoption of modern and locally relevant methods of science and mathematics teaching in schools, and for this work the Council maintains a growing group of science educationists and administers the ODA funded Aid for Commonwealth Teaching of Science scheme. Over 800 lecturers etc., mainly in the field of English language, are working overseas, having been recruited by the British Council on behalf of universities, schools etc. in over 100 different countries. The Council is concerned to promote closer international academic collaboration through a variety of interchange and linking schemes, and through the provision of information and advice on educational institutions; it also administers the British Government's Technical Co-operation Training Programme and scholarship programmes on behalf of a large number of international organizations, notably UN and EEC. It administers examinations on behalf of a number of British examining boards; and it also circulates films for general educational purposes.

During recent years the Council has collaborated with British educational institutions and firms in designing and implementing a wide range of education projects, for which overseas authorities or multilateral agencies pay the full cost.

The sciences, including medicine, technology and agriculture, form an increasingly important part of Council work. Contacts are built up and information collected and distributed through the specialist departments in London and the qualified scientists serving overseas, who also advise on training in Britain and the provision of experts abroad.

The importance of the arts as a medium for fostering cultural relations is reflected in the Council's encouragement of the appreciation of British achievements in the performing and the visual arts, both by supporting local activity and by sending theatre and ballet companies, orchestras and chamber groups, and exhibitions both of fine arts and photographs, from Britain on tours overseas. The Council also produces booklets, records and tapes on a wide range of literary and artistic subjects.

The Council runs, or is associated with, over 100 libraries in the countries in which it is represented. It arranges touring exhibitions of new British books and periodicals (some 95,000 books were exhibited in 290 exhibitions in 1979-80). Additional publicity for British books is provided by the publication *British Book News*, the distribution of specialized book lists and the operation of a review scheme. The Council also administers for ODA funds (approximately £3m. in 1979-80) for library development, the presentation of books and periodicals to educational institutions in developing countries and the subsidized publication of low-priced books for students under the imprint of the English Language Book Society.

The Council arranges short advisory tours overseas by British experts. In a number of countries it is also the overseas administrative arm of the British Volunteer Programme. It awards scholarships and bursaries and arranges study programmes for some 30,000 visitors a year in Britain. It administers central government funds for youth exchanges with other countries.

In Britain the Council administers the programmes of award schemes for overseas students, meets many students on arrival from overseas, and provides an accommodation service, mainly for students from overseas for whom it has a special responsibility. The Council runs offices in Britain, mainly in university cities, for these purposes.

The Council is increasingly called on to administer training schemes and educational services financed by overseas authorities, or by multilateral agencies, on a contractual basis. The Council's specialist courses and summer schools provide advanced study in a number of fields, notably medicine, science, literature and the arts, English language and education. Payment is made by the student, or his parent organization, or by some other sponsor.

The Council publishes the following periodicals: *British Medical Bulletin*, *Educational Broadcasting International* and *British Book News*. Other publications produced include the series *Writers and their Work*, *Notes on Literature*, *British Education*, *British Books and Libraries*, a number of booklets including *Higher Education in the United Kingdom*, *Introducing Wales*, *How to Live in Britain* and *Statistics of Overseas Students in Britain*. The Council has sponsored two major series of literature recordings, *The Complete Works of Shakespeare* and *The English Poets from Chaucer to Yeats*.

Arts Council of Great Britain. The Arts Council is an independent organization established by Royal Charter in 1946, and is one of the principal channels for British Government aid to the arts. The Council's objects are to develop and improve the knowledge, understanding and practice of the arts, to increase their accessibility to the public, and to advise and co-operate with government departments, local authorities and other organizations.

The Council consists of a Chairman and not more than 19 other members who are appointed by the Secretary of State for Education and Science, after consultation with the Secretaries of State for Scotland and Wales. The Council is advised by panels and committees concerned with different aspects of the arts. With the approval of the appropriate Minister, the Council appoints committees for Scotland and Wales known respectively as the Scottish Arts Council and the Welsh Arts Council.

The Council receives a grant-in-aid from the Government voted annually by Parliament. The grant-in-aid for 1981-82 is £80m., including £1m. for special capital purposes and £1½m. for the Housing the Arts Fund.

As well as giving financial help and advice to 1,200 artistic organizations from the major opera, dance, drama companies, orchestras and festivals, to the smallest touring theatre and experimental group, the Council encourages such diverse interests as contemporary dance, photography, art films, and helps professional creative writers, dramatists, poets, musicians, composers, artists and photographers by means of bursary and award schemes. The Council provides funds for specialist training courses in the arts, and assists projects for the construction of new buildings, or improvements to existing ones under its 'Housing the Arts' scheme.

A growing proportion of the Council's funds is channelled to the network of regional arts associations which practically covers the whole of England and Wales. The regional arts associations are not branches of the Arts Council, but are autonomous bodies, financed by a combination of Arts Council, local authority and private funds.

The Council mounts art exhibitions at the Hayward and Serpentine and other galleries in London and also in the regions. Other direct promotions include tours of opera and drama companies, of the Council's own films on the arts and of music groups under the Contemporary Music Network scheme. The Council has a library of contemporary British poetry at 9 Long Acre, London, WC2E 9LG.

National Insurance. The National Insurance Act, 1946, came into operation on 5 July 1948, repealing the existing schemes of health, pensions and unemployment insurance. This Act, along with later legislation, was consolidated as the National Insurance Act, 1965.

The Social Security Act 1975 introduced, from 6 April 1975, a new system of national insurance contributions to replace the previous system of flat-rate and graduated contributions. Since 6 April 1975, Class 1 contributions have been related to the employee's earnings and are collected with PAYE income tax, instead of by affixing stamps to a card. Class 2 and Class 3 contributions remain flat-rate, but, in

addition to Class 2 contributions, those who are self-employed may be liable to pay Class 4 contributions, which for the year 1981-82 will be at the rate of 5.75% on profits or gains between £3,150 and £10,000, which are assessable for income tax under Schedule D. The non-employed and others whose contribution record is not sufficient to give entitlement to benefits are able to pay a Class 3 contribution voluntarily to qualify for a limited range of benefits. Class 2 contributions for 1981-82 are £3.40 a week for men and women. Class 3 contributions are £3.30 a week.

From 6 April 1978 the Social Security Pensions Act 1975 introduced earnings-related retirement, invalidity and widows' pensions. Employee's national insurance contribution liability depends on whether he is in contracted out or not contracted out employment. The not-contracted out employee pays 7.75% on all earnings up to £200 a week. The employer's rate is 10.2% and a 3½% surcharge of the same earnings. An employee's contracted-out contribution is 7.75% of the first £27 a week of earnings and 5.25% of earnings between £27 and £200 a week. The employer's contribution is 10.2% (and the 3½% surcharge) of the first £27 of weekly earnings and 5.7 (and the 3½% surcharge) of earnings up to £200 a week.

The State supplements the contributions paid by contributors and employers, from general taxation. Contributions (other than the surcharge) and supplement together with interest on investments form the income of the National Insurance Fund from which benefits are paid.

Benefits. The range of benefits are unaffected by the new arrangements from 5 April 1975. The benefits are: (1) Unemployment benefit; (2) Sickness benefit; (3) Invalidity benefit; (4) Maternity benefit; (5) Widow's benefit; (6) Guardian's allowance; (7) Child's special allowance; (8) Retirement pension; (9) Death grant.

Employed persons may qualify for all the benefits; self-employed may qualify for all except unemployment; non-employed may qualify for all except unemployment, sickness, invalidity and maternity allowance. Qualification for any benefit depends upon the fulfilment of the appropriate contribution and other conditions.

Sickness and Unemployment Benefit. From 23 Nov. 1981 the normal rate is £22.50 a week plus £13.90 a week for an adult dependant, plus £0.80 for each child for whom child benefit is in payment. An earnings-related supplement may be payable from the 13th to 168th day of a period of interruption of employment to persons under minimum pension age (65 for men, 60 for women) who are entitled to standard-rate sickness benefit, unemployment benefit or maternity allowance and who have paid Class 1 (employee's) National Insurance contributions on earnings of more than 50 times the lower weekly earnings limit for contributions in the relevant income-tax year.

Unemployment benefit is paid through the local unemployment benefit offices of the Department of Employment.

Invalidity Benefit replaces sickness benefit after 168 days of entitlement. It comprises a basic invalidity pension of £28.35 weekly and an invalidity allowance of £6.20 if incapacity began before age 40; £4 if incapacity began between 40 and 50 or £2 if it began between 50 and 60 (55 for women). Increases are: £17 for an adult dependant plus £7.70 for each child for whom child benefit is payable.

Maternity Benefit. For a confinement a woman may receive a maternity grant of £25 and, where 2 or more children are born at the confinement, a further grant of £25 for each additional child who is alive 12 hours after its birth. If the woman has been gainfully employed or self-employed, and has paid sufficient full-rate national insurance contributions in the relevant income tax year, she may receive a maternity allowance of £22.50 a week normally payable for 18 weeks commencing 11 weeks before the expected week of confinement, provided she does not work during this period. Maternity allowance may be increased in certain circumstances in respect of dependants in the same way as sickness and unemployment benefits and an earnings-related supplement may be payable.

Widow's Benefit. On her husband's death a widow normally qualifies for 26 weeks for an allowance of £41.40 a week for herself plus an increase for each child for

whom child benefit is payable at £7.70 a week. An earnings related addition based on the amount on which her late husband had paid Class 1 (employee's) contributions in the relevant tax year may also be paid, but ceased after 2 Jan. 1982. At the end of the 26 weeks she may qualify for a widowed mother's allowance of £29.60 for herself, and the increases for the children for whom child benefit is payable continue at the same rate as for the first 26 weeks of widowhood. She may also receive her allowance at the personal rate of £29.60 a week if she has living with her a son or daughter who is under 19. The child increase for widow's allowance and widowed mother's allowance is, generally speaking, payable only in respect of a child for whom child benefit is payable.

A widow's pension may be paid to: (i) A widow after the termination of her widow's allowance, if she does not qualify for widowed mother's allowance and was over the age of 40 when her husband died. (ii) A widow after she ceases to be entitled to a widowed mother's allowance if she is then over the age of 40. The standard rate of this pension is £29.60 a week if the widow was over 50 when her husband died or when her entitlement to widowed mother's allowance ended. If she was between 40 and 50, however, the standard rates of total pension range in 7% steps from 93% of the full age-50 rate (i.e., £27.53 a week) for the widow who was 49 at that time to 30% (i.e., £8.88 a week) for the widow who was then 40.

Child's Special Allowance. An allowance may be payable for the children of divorced parents where the father has died. It is payable to the mother if she has not remarried and her former husband was contributing, or legally liable to contribute, at least 25p a week towards the children's support in cash or kind or if she took reasonable steps to enforce maintenance and she was entitled to child benefit for the child(ren) when her former husband died or it is her child by her former husband and he was entitled to child benefit for the child(ren) when he died. It is similar to the increases for widow's children and is payable at the same rates.

Guardian's Allowance. A person who is responsible for an orphan child may be entitled to a guardian's allowance of £7.70 a week in addition to the amount of child benefit payable in respect of that child. Normally both the child's parents must be dead but when the child is illegitimate, or the parents were divorced, or one parent is missing, or serving a long sentence of imprisonment, the allowance may, in certain circumstances, be paid on the death of one parent only.

Retirement Pension. In order to receive a retirement pension, men between 65 and 70, and women between 60 and 65 must have retired from regular employment. From 6 April 1979 a woman divorced over the age of 60 must satisfy the retired conditions before a pension is payable. The standard rates of basic pensions are £29.60 a week for a man or a woman on his or her own contributions and £17.75 for a married woman through her husband's contributions. Proportionately reduced pensions are payable where contribution records are deficient. For a person who reaches pension age on or after 6 April 1979, additional pension may also be payable. This is based on the earnings on which he or she has paid Class 1 contributions in each complete tax year between April 1978 and pension age. If the person has been a member of a contracted-out occupational pension scheme, that scheme will be responsible for paying the whole or part of the additional pension. An increase of £17.75 a week may be payable for a dependent wife. If she resides with the beneficiary the increase is gradually reduced for earnings over £52 a week. If she does not reside with the beneficiary an increase is not payable if she earns more than £17.75 a week. In addition £7.70 a week may be payable for each child for whom child benefit is payable. In certain circumstances an increase of £17.75 a week may be payable for a woman having care of the pensioner's children. In addition, a man who had paid graduated contributions receives 3.54p per week for every £7.50 of graduated contributions paid, and a woman 3.54p per week for every £9 paid. Although no further graduated contributions have been paid after April 1975, pension already earned will be paid along with the basic pension in the normal way. If, after being awarded a retirement pension, a man under 70 or a woman under 65 earns more than £52 in a calendar week the pension for the next pension week, including any

increase for dependants, will be reduced by 5p for every 10p earned between £52 and £56 and by 5p for every 5p earned over £56. If retirement is postponed after minimum pension age increments of basic pension can be earned for periods of deferred retirement: Between 6 April 1975 and 5 April 1979 increments were earned at the rate of one-eighth penny per £1 of the pension rate for every 6 days (excluding Sundays) for which the pension had been forgone. From 6 April 1979 increments are earned at the rate of one-seventh penny per £1 of basic pension for every 6 days (excluding Sundays) for which pension has been forgone. Any days for which another benefit has been paid will not count. These increments must be at least 1% of the pension rate unless the minimum was earned under the arrangements which applied before 6 April 1979. For periods between 6 April 1975 and that date, the rate was one-eighth penny per £1 of the basic pension rate for every 6 days and for periods of deferred retirement before 6 April 1975 increments were based on the number of contributions paid as an employed or self-employed person. At age 70 for a man (65 for a woman) the pension for which a person has qualified may be paid in full whether a person continues in work or not irrespective of the amount of earnings. At the age of 80 an age addition of £0.25 a week is payable. In addition non-contributory pensions are now payable, subject to residence conditions, to persons aged 80 and over who do not qualify for a retirement pension or qualify for one at a low rate. The rates of these pensions, which are financed by Exchequer funds, are £17.75 a week for a single person and £10.65 for a married woman. These amounts do not include the £0.25 age addition.

Death Grant. This is a lump sum paid on the death of an insured person or his close relative. The normal amount of the payment is: For an adult, £30; for a child aged 6 but under 18, £22.50; for a child aged 3 but under 6, £15; for a child under 3, £9. For the death of a person who was within 10 years of pensionable age on 5 July 1948 (*i.e.*, a man over 55 and a woman over 50 on that date) only half the standard amount is payable. No grant is payable for the death of a person who was over the pensionable age on 5 July 1948.

The Industrial Injuries Provisions of the Social Security Act, 1975. The Industrial Injuries Act, which also came into operation on 5 July 1948, with its later amending Acts, was consolidated as the National Insurance (Industrial Injuries) Act, 1965. This legislation was incorporated in the Social Security Act, 1975. The scheme provides a system of insurance against 'personal injury by accident arising out of and in the course of employment' and against certain prescribed diseases and injuries due to the nature of the employment. It takes the place of the Workmen's Compensation Acts and covers persons who are employed earners under the Social Security Act. There are no contribution conditions for the payment of benefit. Three types of benefit are provided:

(1) *Injury benefit*, payable for incapacity for work due to an industrial accident or certain of the prescribed diseases for a maximum of 26 weeks from the date of the accident or the development of the disease. The rate of this benefit is £25.25 a week, with increases of £13.90 for 1 adult dependant and £0.80 for each child for whom child benefit is payable. An earnings-related supplement may be payable where there would otherwise be entitlement to earnings-related supplement of sickness benefit or maternity allowance. If the employed earner is under 18 years of age and is not entitled to a dependant's increase, benefit will be payable at a reduced rate—£22.50. For children under 16 years of age in part-time employment, the rate is £6.80.

(2) *Disablement benefit*. This is payable where, as the result of an industrial accident or prescribed disease, there is a loss of faculty usually after injury benefit ceases to be payable. The loss of faculty will be assessed at a percentage by comparison with a person of the same age and sex whose condition is normal. If the assessment is 20% or more, benefit will be a pension varying according to the assessment, from £8.90 a week to £48.30 a week. If the assessment is under 20% benefit will normally be a gratuity of an amount not exceeding £2,950. Unemployability supplement plus age additions similar to invalidity allowance, may be payable to a disablement pensioner who, as a result of the relevant loss of faculty is incapable of work and likely to remain permanently so incapable. Increases for dependants at the same rates as

for invalidity pension are also payable to a disablement pensioner who is entitled to unemployability supplement. The supplement cannot be paid at the same time as certain other benefits payable under the Social Security Act or out of public funds. Other increases of disablement benefit may be payable where the loss of faculty causes special hardship, *i.e.*, it prevents the beneficiary from undertaking his regular job or one of an equivalent standard of earnings; where there is a need for constant attendance; where there is exceptionally severe disablement and the need for constant attendance is likely to be permanent or where disablement is assessed at less than 100% and the beneficiary is in hospital for treatment for his injury or prescribed disease. Pensions for persons under 18 are reduced similarly to injury benefit.

(3) *Death Benefit.* On the death of a person as the result of an industrial accident or a prescribed disease, certain dependants may qualify for benefit. Benefit for a widow is a pension normally of £41.40 weekly for the first 26 weeks and thereafter £30.15, depending on such factors as age, entitlement to a child's allowance and permanent incapacity for self-support. If the conditions for pension at the higher rate are not satisfied the widow may receive a pension of £8.88 a week. Child allowances may be payable to the widow, or other person, entitled to child benefit for children of the deceased. For widows, these allowances are usually at the rate of £7.70 a week for each child; for other persons, the rate is £0.80 for each child. An allowance of £1 is payable to a woman having care of a child of the deceased. Benefit for widowers, parents and certain other relatives takes the form of pensions, allowances or gratuities according to the relationship to, and degree of maintenance by, the deceased.

War Pensions. The number of beneficiaries in receipt of war (1914-18) pensions or allowances as at 26 Sept. 1980 was 38,000. The number of beneficiaries in receipt of war (1939-45 and later) pensions or allowances in payment as at 26 Sept. 1980 was 317,300. The estimated expenditure for both wars for 1980-81 was £429m. The expenditure is exclusive of administrative expenses.

National Insurance Fund. At 1 April 1979 the balance of the National Insurance Fund amounted to £4,090,473,000. Income during the period 1 April 1979 to 31 March 1980, consisting of contributions from insured persons and employers, payments from the Exchequer and interest on investments, etc., was £13,297.45m. Payments of benefit in respect of unemployment were £652,881,000; sickness, £594,659,000; invalidity, £994,829,000; maternity, £141m.; widows, £563m.; guardian's allowance and child's special allowance, £1.9m.; retirement pension, £8,814.42m.; death grants, £16.08m.; injury benefit, £46,548,000; disablement benefits, £244,185,000; death benefit, £36m.; pensioners' lump sum payments, £95.65m. Included in these figures are the following estimated amounts of earnings-related supplement: unemployment benefit, £88m.; sickness benefit, £138m.; maternity allowance, £28m.; widow's benefit, £13m.; graduated retirement benefit, £124m.; additional component, £4m. Administrative and other payments cost approximately £560,996,000. The balance at 31 March 1980 was £4,625,775,000.

From 1 April 1975 the National Insurance Reserve Fund and the Industrial Injuries Fund were merged with the National Insurance Fund. All basic scheme contributions payable under the 1975 Social Security Act are paid into the single fund out of which the existing range of benefits will continue to be financed. The new national insurance fund will continue to receive a Treasury Supplement set at a level of 18% of total contribution income.

Child Benefit. Child benefit is a tax-free cash allowance for all children. The weekly rate for each child is £5.25 from Nov. 1981. Child benefit is payable for all children under age 16 and for those under age 19 receiving full-time non-advanced education at a college or school. Child Benefit Increase (One Parent Benefit). This is a tax-free cash allowance for certain people bringing up children alone. It is payable for the first or only child in the family in addition to child benefit. The weekly rate from Nov. 1980 is £3.

Family Income Supplement. Family income supplement is payable to families with at

least 1 dependent child where the head of the household is in remunerative work for at least 30 hours a week (24 hours for lone parents), and where the family's normal gross weekly income (but excluding child benefits) is below a prescribed amount. The prescribed amount for a 1-child family is £74, this amount being increased by £8 for each additional child in the family. The weekly rate of benefit payable is one-half of the difference between the prescribed amount and the family's normal income, subject to a maximum weekly payment of £18.50 for families with 1 child, increasing by £1.50 for each additional child. Benefit is usually payable for 52 weeks and is not affected by changes in circumstances. The prescribed amounts are the same for both 1- and 2-parent families.

Attendance allowance. This is a tax-free allowance for severely disabled people, including children aged 2 or over, who require a lot of help from another person. There are 2 rates, the higher rate of £23.65 a week for those who require attention or supervision by day and night, and the lower rate of £15.75 a week for those who need the attendance either by day or night. In addition to the medical requirements a simple test of residence and presence in Great Britain must also be satisfied.

Invalid Care Allowance. Payable to those under pensionable age for caring for a severely disabled relative. Current rate £16.30 a week.

Supplementary Benefit. Under the Supplementary Benefits Act, 1976, as amended by the Social Security Act 1980, benefit is payable to any persons in Great Britain aged 16 years or over (excluding persons at school or college or anyone directly involved in a trade dispute) who are not in full-time remunerative work and who are without resources, or whose resources (including national insurance benefits) need to be supplemented in order to meet their requirements. A person who is excluded from benefit under the normal rules may, nevertheless, receive payments to meet urgent need. The general standards by reference to which supplementary benefit is granted are determined by statutory regulations approved by Parliament. Persons who are dissatisfied with the amount of benefit granted to them may appeal to an independent Appeal Tribunal established under the Act.

During the financial year 1979-80 net payments on supplementary benefit amounted to £2,155m.

National Health. The National Health Service in England and Wales started on 5 July 1948 under the National Health Service Act, 1946. There is a separate Act for Scotland and also one for Northern Ireland, where the Health Services are run on similar lines to those in England and Wales.

The National Health Service, which is available to every man, woman and child, is a charge on the national income in the same way as the armed forces and other facilities.

Every person normally resident in this country is entitled to use any complete part of the services, and no insurance qualification is necessary.

Most of the cost of running the service is met from the national exchequer, *i.e.*, from taxes.

Since Sept. 1957 a small weekly National Health Service contribution has been payable by contributors and where applicable by their employers. For convenience this contribution is collected with the National Insurance contribution and for 1980-81 is estimated to be £990m. for Great Britain.

Organization. Under the provisions of the National Health Service Act 1977, the administration of the National Health Service in England and Wales is organized under a system of regional and area health authorities accountable to the Secretary of State for the Social Services and the Secretary of State for Wales. In Scotland the National Health Service is administered under the National Health Service (Scotland) Act 1978, by 15 Health Boards and a Common Services Agency all accountable to the Secretary of State for Scotland.

There are 90 area health authorities in England responsible for the administration and development of all the health services in their areas. Fourteen regional health

authorities, each consisting of a number of complete health areas, are responsible for allocating resources between the area health authorities in their regions and for monitoring their performance. The regional health authorities are responsible for developing strategic plans and priorities and for carrying out certain executive functions.

Services. The National Health Service broadly consists of hospital and specialist services, general medical, dental and ophthalmic services, pharmaceutical services, community health services and school health services. All these services are free of charge except for such things as prescriptions, spectacles, dentures and dental treatment, amenity beds in hospitals and for some of the community services, for which charges are made with certain exemptions.

The total cost of the Health and Personal Social Services (England and Wales) is estimated at £12.081m. for 1980-81 and the estimated net expenditure by the Exchequer (except for the Local Authority Personal Social Services, where the rates and the Exchequer grants are estimated at about £1.334m.) in 1980-81 is £9,373m.

The number of abortion notifications received in 1979 under the provisions of the Abortion Act, 1967, was 147,451, of which 120,611 related to England and Wales residents. Of these 119,028 notifications, 62,000 (51.9%) were to single women, 43,278 (35.9%) were to married women, and 14,540 (12.2%) were to widowed, divorced or separated women and to women who did not state their marital status.

The number of abortion notifications received in Scotland in 1979 under the provisions of the Abortion Act 1967, was 7,754, of which 7,668 related to Scottish residents. Of these 7,754 notifications, 3,831 (49.4%) were to single women, 2,954 (38.1%) were to married women, and 969 (12.5%) were to widowed, divorced or separated women and to women who did not state their marital status.

In 1977 there were 26,810 general medical practitioners, 13,564 general dental practitioners and 219,900 qualified nurses and midwives. There were (1977) 469,849 allocated hospital beds.

Personal Social Services. Under the Local Authority Social Services Act 1970 and in Scotland the Social Work (Scotland) Act 1968 the welfare and social work services provided by local authorities were made the responsibility of a new local authority department—the Social Services Department in England and Wales, and Social Work Departments in Scotland headed by a Director of Social Work. The social services thus administered include: the fostering, care and adoption of children, welfare services and social workers for the mentally disordered, the disabled and the aged, and accommodation for those needing residential care services. In Scotland the social work departments' functions also include the supervision of persons on probation, of adult offenders and of persons released from penal institutions or subject to fine supervision orders.

The number of persons in residential and temporary accommodation provided by or on behalf of local authorities was as follows:

CONSTITUTION AND GOVERNMENT. The Northern Ireland Constitution Act 1973 as amended by the Northern Ireland Constitution (Amendment) Act 1973 and the Northern Ireland Assembly Act 1973 provide for a Northern Ireland Assembly of 78 members and a Northern Ireland Executive of not more than 11 members (including the Chief Executive Member). The Secretary of State appointed this full number to take office from 1 Jan. 1974. He may also, under the Amendment Act, appoint others to carry out particular functions in the Administration up to a total (including members of the Executive) of 15. This additional number were appointed.

Devolution of legislative and executive responsibility to the Northern Ireland Assembly and the new Administration under Section 2 of the Constitution Act was given effect by the Northern Ireland Constitution (Devolution) Order 1973 from 1

Jan. 1974 ('the appointed day'). On that day, Section 1 of the Northern Ireland (Temporary Provisions) Act 1972 expired and, with it, the power to legislate for Northern Ireland by Order in Council under that Act.

Power to make laws (to be known as Measures) in respect of 'transferred' matters, that is on matters other than those listed in Schedules 2 and 3 to the Constitution Act was vested in the Assembly subject to the overriding power of the UK Parliament to legislate on such matters and subject to Section 17 of the Constitution Act which declares void any provision which discriminates against any person or class of persons on the ground of religious belief or political opinion. The procedure for Measures is set out in the Standing Orders of the Assembly. All Measures require the approval of the Queen in Council before they become law. The first election of Members to the 78 seats in the Northern Ireland Assembly was held in 1973. The state of the parties following the election was: Social Democratic and Labour Party 19; Democratic Unionist Loyalist Coalition 8; Official Unionist 24; Northern Ireland Labour 1; Other Unionist 8; Alliance 8; Vanguard Unionist Coalition 7; Other Loyalist Coalition 2; Other Loyalist 1. Northern Ireland also returns 12 members of the UK House of Commons.

On 28 May 1974 the Unionist members of the Administration resigned, as a result of which the Secretary of State terminated the appointments of members, and HM the Queen prorogued the Assembly for a period of 4 months (thus preventing it from legislating). Parliament subsequently enacted the Northern Ireland Act 1974 extending the prorogation of the Assembly and providing for its dissolution. The Act also reintroduced the power to legislate for Northern Ireland by Order in Council.

The Assembly was dissolved on 28 March 1975, and an election, provided for under the 1974 Act, of a Constitutional Convention took place on 1 May 1975. The Convention had the purpose of considering what provision for the government of Northern Ireland was likely to command the most widespread acceptance throughout the community there. The Convention was dissolved on 5 March 1976 as there was no prospect of agreement. Direct rule continues in being under the terms of the Northern Ireland Act 1974.

In Jan. 1980, the main political parties were invited by the Secretary of State to take part in a Conference with the object of seeking the highest level of agreement on the future government of the Province. The conference, which was attended by 3 of the 4 main parties was adjourned in March 1980.

What began ostensibly as a Civil Rights campaign in 1968, escalated into a full-scale offensive designed to overthrow the State. This offensive was originally mounted by an illegal organization, the Irish Republican Army (not to be confused with the legitimate Army of the Republic of Ireland). At times counter-measures have required the services of over 20,000 regular troops, in addition to the Royal Ulster Constabulary, the RUC Reserve and the part-time Ulster Defence Regiment.

Secretary of State for Northern Ireland: Right Hon. Humphrey Atkins, MP.

Local Government. Northern Ireland has a single-tier system of 26 district councils based on main centres of population.

The district councils are responsible for the provision of a wide range of local services including refuse collection and disposal, street cleansing, litter prevention, consumer protection, environmental health, miscellaneous licensing, the provision and management of recreational and cultural facilities, the promotion of tourist development schemes, the enforcement of building regulations and gas supply. They have in addition both a representative role in which they send forward representatives to sit as members of statutory bodies including the Northern Ireland Housing Council, the Fire Authority and the Area Boards for health and personal social services and education and libraries; and a consultative role under which the Department of Environment (NI) and the Northern Ireland Housing Executive, among others, have an obligation to consult them regarding the provision of the regional services for which these bodies are responsible.

Regional development strategy in Northern Ireland throughout the late sixties and early seventies was based on the *Matthew Report* of 1963, which marked the

beginning of a new era in regional planning in the Province. This in turn was endorsed by the economic plan prepared by Professor Wilson in 1965, which modified and up-dated a number of the original Matthew proposals. The Northern Ireland Development Programme 1970-75 extended the scope of the regional strategy and basically identified two categories of interest: (i) centres of accelerated growth consisting of the greater Belfast area (including the Belfast Urban Area, Craigavon, Antrim, Bangor, Carrickfergus and Newtownards), Londonderry and Ballymena.

These were centres where a proportionately large expansion was deliberately planned and where population growth was to be actively encouraged. (ii) Eight key centres which were to be made as attractive as possible to potential new industry and where significant expansion was anticipated. The 8 centres were the provincial towns of Newry, Dungannon, Coleraine, Enniskillen, Omagh, Larne, Downpatrick and Strabane. This growth and key centre policy had a twofold purpose: to maintain a Development Stopline around Belfast and to encourage movement of population from the city and elsewhere to the major towns outside the Belfast Urban Area.

In 1975 the Development Programme of 1970 having run its full course, the Government published a discussion paper which outlined and evaluated 6 very broad options for the future development of the Province for the period 1975-95. Following comments from a wide variety of sources the Government announced its decision to adopt in principle the District Towns Strategy. Basically the strategy advocates that the growth and key centre strategy should be extended to embrace the major town in each local government district. A detailed exposition *Northern Ireland Regional Physical Development Strategy 1975-95* was published in May 1977.

While the physical strategy sets out the Government's aims and objectives on a regional basis, the details required to pursue these aims and objectives at local level are promulgated in Area Plans. These have been published for the Belfast Urban Area, the North Down, Londonderry, West Tyrone, Newry, Limavady, Armagh, East Antrim, East Tyrone, Magherafelt, Fermanagh and the north-east of the Province which incorporates the Coleraine Portrush Portstewart area. Work is continuing on the preparation of a plan for the Lisburn, Banbridge, Mourne, and Downpatrick areas. Statements of the Department's conclusions and decisions have been published on the Belfast Urban, North Down, Londonderry, Armagh, Newry, West Tyrone, Limavady, East Antrim and East Tyrone Plans following consideration of the Reports of Public Inquiries held into objections to the Plans, and the latter 8 Plans have been adopted as statutory development plans under Article 7(2) of the Planning (NI) Order 1972. Public Inquiries have been held into the North-East and Magherafelt Area Plans. A major review of the Belfast Urban Area Transportation Strategy has been carried out and a public inquiry held. A statement has been issued by the Department of the Environment (NI) indicating the future system of transport in Belfast.

Provisions in Part VII of the Planning (NI) Order 1972 enable the Department of the Environment (NI) to deal with areas requiring to be developed or redeveloped in overall schemes involving the participation of several agencies. Land when acquired is not normally developed by the Department itself but is disposed of to other agencies for the carrying out of their development. The Department is currently using these powers for two main purposes, the promotion of commercial redevelopment of certain town centre sites and the acquisition overall of large areas, principally in Belfast, which are in need of redevelopment and are proposed to be redeveloped for mainly other than housing purposes. Where land is to be developed by the private sector then disposal by the Department is on the basis of a lease rather than by transfer of the freehold.

The legislative framework for planning in Northern Ireland is contained in the Planning (NI) Order 1972 and the Planning (Amendment) (NI) Order 1978. Under the 1972 Order the Department of the Environment (NI) is the sole planning authority for Northern Ireland. The Order includes procedures for the preparation of plans and development control, establishes a Planning Appeals Commission, contains provisions for the protection of buildings of special architectural or

historic merit and trees and gives powers for the carrying out of town-centre redevelopment.

FINANCE. There exists a separate Northern Ireland Consolidated Fund from which is met the expenditure of Northern Ireland Departments. Its main sources of revenue are: (i) The Northern Ireland attributed share of UK taxes; (ii) A non-specific grant in aid of Northern Ireland's revenue, payable by the Secretary of State for Northern Ireland; (iii) Rates and other receipts of Northern Ireland Departments.

The general principle underlying the financial arrangements is that Northern Ireland should have parity of taxation and services with Great Britain.

Since the financial year 1978-79 the income of the Northern Ireland Consolidated Fund has been as follows (in £ sterling):

	1978-79	1979-80 ¹	1980-81 ²

The public debt at 31 March 1980 was as follows: Northern Ireland 7%, Exchequer Stock 1982-84, £20m.; Ulster Savings Certificates, £98,143,000; Ulster Development Bonds, £8,199,000; borrowing from UK Government, £598,843,147; borrowing from Northern Ireland Government Funds, £165,672,000; borrowing from bank, £1m.; borrowing from building societies, £17m.; European Investment Bank Loan, £14,714,458; total, £923,571,605.

The above amount of public debt is offset by equal assets in the form of loans from Government to public and local bodies and of cash balances.

ENERGY AND NATURAL RESOURCES

Electricity. The planning, generation and distribution of electricity supplies are the responsibility of the Northern Ireland Electricity Service.

The installed capacity of the system is 1,845 mw largely provided from 3 thermal power-stations. Work is in progress on the construction of a power-station designed to accommodate four 300 mw turbines and one 60 mw gas turbine in Kilroot, Co. Antrim. This station is due for commissioning progressively from early 1981.

The total sales of electricity in Northern Ireland in the year ended 31 March 1980 amounted to 5,051m. units supplied to a total of 522,192 consumers.

Water Supplies and Sewerage. The Water Service Division of the Department of the Environment (NI) is responsible for water supply and sewerage. Over 140m. gallons of water a day are supplied throughout the Province. More than 90% of the population have a mains supply of water and about 85% live in property connected to public sewers.

The Department is also responsible for the conservation and planned development of water resources in Northern Ireland.

Minerals. The output of minerals (in 1,000 tonnes) during 1979 was approximately. Basalt and igneous rock (other than granite), 7,080; chalk, 320; clay and shale, 257; grit and conglomerate, 3,025; limestone, 2,602; sand and gravel, 4,300; and other minerals (rocksalt, flint, sandstone, diatomite and granite), 388.

INDUSTRY AND TRADE

Industry. Industry makes a considerable contribution to the Northern Ireland economy. In 1979 employment in manufacturing and construction amounted to 177,700, some 35% of the total workforce. Of this number, 41,600 (23%) were engaged in the engineering and allied industries, which include shipbuilding and aircraft manufacture. The former predominance of shipbuilding has diminished, and the engineering sector now produces an impressive variety of goods: from textile machinery, air-conditioning plant and oilfield equipment to automobile and aero-engine components, data-processing and sound-reproduction equipment, and electronic components. The textile industry, with a workforce of 30,000, has traditionally been associated with linen, but man-made fibre production has brought diversification to the sector and now accounts for a quarter of the total output of synthetic and artificial fibres in the UK. The related clothing and footwear trades employ 18,900 people. Taken together, food, drink and tobacco account for 22,700 jobs, the remainder of the manufacturing sector comprising a multiplicity of trades, such as chemicals and oil-refining, rubber and plastic goods, and furniture accounting for 26,900. The construction industry employs over 37,600 people. The Government offers special encouragement towards the establishment of new and the expansion of existing industry, including substantial grants towards capital investment and the provision of government-built factories at a low rent or on repayment terms. At 31 Dec. 1979 there were 190 new firms and 441 schemes of expansion by existing firms, giving employment to over 61,000 workers.

Labour. The main source of statistics of employees in Northern Ireland is the census of employment which was conducted annually from 1971 to 1978. This provides industrial analyses of employees distinguishing between full-time and part-time

employees. The census is supplemented by a less detailed sample quarterly enquiry which since 1979 has been used to provide the main mid-year employment estimate. This showed that at June 1980 there were 503,350 jobs for employees in Northern Ireland; of which 279,950 were taken up by males.

Statistics of persons registered as unemployed in Northern Ireland are compiled monthly. The average rate of unemployment in Northern Ireland in 1980 was 13.8% compared with 11.3% in 1979. The average numbers registered as unemployed was 78,824. The Department of Manpower Services provides an all-age guidance and placement service through a network of Employment Service Offices and Job-markets situated in the principal towns of Northern Ireland. They maintain registers of persons seeking employment (either full- or part-time) and those already in employment who wish to change their job. In 1979 the number of vacancies filled in Northern Ireland by the Employment Service was 29,842 (adults and young persons).

Assistance is available to employers who transfer key workers temporarily or permanently to Northern Ireland from other countries or within Northern Ireland in connection with the establishment or expansion of an industrial undertaking.

The Department of Manpower Services maintains a register of disabled persons who are in the employment field and under the provisions of the Disabled Persons (Employment) Acts (NI) 1945 and 1960, makes efforts to find suitable work for those who are unemployed. Employment rehabilitation courses are provided at the Employment Rehabilitation Unit at Mill Road, Newtownabbey to assist unemployed disabled persons to readjust themselves to working conditions and to enhance their prospects of obtaining suitable employment. Allowances are paid to persons attending these courses.

Enterprise Ulster is a direct labor organization whose objective is to recruit workers from the unemployed register. Work is carried out mainly for public bodies and projects are of a community and amenity nature such as play areas, parks, playing fields, etc. In Sept. 1980, more than 80 schemes were in operation providing employment for 1,426 people.

There are 13 Government Training Centres in Northern Ireland which now provide some 3,300 training places and are capable of an annual output of over 5,000 trainees. Two of the centres provide 100 training places in traditionally female occupations. Apprentice training accounts for approximately two-thirds of training places. Most of the remaining places are reserved for adults but there are also special courses for young people under 18 years who have been unable to obtain an apprenticeship.

In the sphere of industrial relations a new independent and statutory body entitled The Labour Relations Agency was established under the Industrial Relations (NI) Order 1976 with the general duty to promote the improvement of industrial relations and to encourage the extension, development and, where necessary, the reform of collective bargaining machinery. The Agency is empowered to undertake research and provide an advisory service on industrial relations matters and to act as a forum for discussion of matters of mutual concern to management and unions. It also has a range of specific functions in the industrial relations field, including the settlement of disputes concerning trade-union recognition. In addition, the Agency has a major role in relation to the provision of conciliation and arbitration services. This means that, supplementing the procedures within industry for the prevention and settlement of disputes, the Agency plays an important part as an impartial third party in helping the sides to clarify issues in dispute and to settle their differences by agreement. Where conciliation fails, the Agency may arrange, if the parties agree, for independent arbitration by one or more persons appointed by the Agency or by the Industrial Court. Occasionally a settlement is promoted by the appointment of a Court of Inquiry. However, the great majority of industrial disputes are settled without stoppage of work, and Northern Ireland's record of days lost due to industrial disputes bears favourable comparison with that of the rest of the UK.

The Fair Employment Agency for Northern Ireland was established under the Fair Employment (NI) Act 1976, with the duties of promoting equality of op-

portunity in employments and occupations as between persons of different religious beliefs (including people without any religious belief), of working for the elimination of religious and political discrimination (made unlawful by the Act) in employments and occupations, and of keeping under review patterns and trends of employment and occupations.

The Equal Opportunities Commission for Northern Ireland was established under the Sex Discrimination (NI) Order 1976 with the duties of working towards the elimination of sex discrimination in the fields covered by the Order, of promoting equality of opportunity between men and women generally and of keeping under review the working of the Order and equal pay legislation.

The Department of Manpower Services is responsible for the administration of the Health and Safety at Work (NI) Order 1978 which came into force 1 May 1979. Existing statutory provisions including the Factories Act (NI) 1965 and the Office and Shop Premises Act (NI) 1966 together with many new provisions for the health, safety and welfare of persons at work are enforced by the Department's Health and Safety Inspectorate. The 1978 Order extends to all persons at work with the exception of private domestic employment and applies to persons at work in over 40,000 employment situations. The 1978 Order lays duties on employers, employees, self-employed, manufacturers and suppliers of materials and persons having control of buildings. Employers and self-employed have duties in regard to persons not employed by them but who may be affected by their operations at work. Provisions relating to quarries are enforced by the Department of Commerce and agricultural provisions by the Department of Agriculture. Some existing statutory provisions under factories and shops legislation continue to be enforced by district councils with some additional duties.

COMMERCE. Northern Ireland has a substantial export trade with countries overseas, but as a large part of it is routed through Great Britain, separate details are not available. The main markets outside the UK are the Irish Republic, USA, Saudi Arabia, Algeria, Japan, Romania, the EEC and EFTA. From 1975 no detailed trade figures of Northern Ireland were compiled.

Imports and exports, including trade with Great Britain (in £1m. sterling), for calendar years:

	1967	1968	1969	1970	1971	1972	1973	1974

Exports	507	596	669	745	843	917	1,175	1,368

In 1974, 74% of the total imports (by value) came from Great Britain or from foreign countries *via* Great Britain; 12% from the Irish Republic. Of the exports, 82% (by value) went to Great Britain or to foreign countries *via* Great Britain; 13% to the Irish Republic.

Principal imports in 1974 (including imports from Great Britain) were valued at: Textiles, fibres, yarns and fabrics, £341m.; machinery, £214m.; transport equipment, £158m.; petroleum and petroleum products, £115m.; chemicals, £90m.; manufactures of metal, fruit and vegetables, fresh and processed, £43m.

Principal exports in 1974 (including exports to Great Britain) were valued at: Textiles, fibres, yarns and fabrics, £485m.; machinery, £134m.; meat and meat preparations, £77m.; transport equipment, £65m.; clothing, £62m.

Tourism. Tourism earns a substantial amount of revenue for Northern Ireland and total spending by some 728,000 visitors in 1979 was estimated at £57m. Altogether tourism provides over 8,000 permanent jobs and some 3,000 temporary or seasonal jobs. The Northern Ireland Tourist Board plays a major role in promoting the development of tourist traffic in Northern Ireland.

The protection of scenic beauty, scientific and nature interest, and wildlife is fostered under the Amenities Lands Act (NI) 1965 and the Wild Birds Protection Acts (NI) 1931 to 1968 by the Department of the Environment for Northern Ireland, which is advised by the Ulster Countryside Committee, the Nature Reserves Committee and the Wild Birds Advisory Committee. Eight Areas of Outstanding Natural Beauty and 46 Areas of Scientific Interest have been designated, and in these areas special attention is given respectively to the amenity and

scientific aspects of planning applications. Country Parks have been established at Crawfordsburn and Scrabo, Co. Down, and the Roe Valley and Ness Wood, Co. Londonderry, Castle Archdale, Co. Fermanagh. Land for further parks has been acquired at Redburn, Co. Down and The Birches in N. Armagh. The Lagan Valley between Belfast and Lisburn is being administered as Northern Ireland's first Regional Park. Thirty-six National Nature Reserves have been declared, and steady progress is being made with the acquisition of further reserves. Nine areas have been designated as Bird Sanctuaries.

The Department is advised by the Historic Monuments Council on the exercise of its powers under the Historic Monuments Act (NI) 1971 in respect of the conservation of historic monuments and the preservation of objects of archaeological or historic interest. At present there are 148 monuments in State care, either in the Department's ownership or guardianship. The Department, advised by the Historic Buildings Council, is also responsible for listing buildings of special architectural or historic interest and for designating areas of similar interest the character or appearance of which it is desirable to preserve or enhance. To date some 4,600 buildings have been listed and 13 areas have been designated. Grants are payable by the Department to assist in the repair or maintenance of listed buildings.

COMMUNICATIONS

Road and Rail. All train services are operated by the Northern Ireland Railways Co. Ltd which is a subsidiary of the Northern Ireland Transport Holding Co. In Oct. 1979 there were 337 km (1,600 mm gauge) of railway open. Most bus services are operated by two other subsidiaries, Ulsterbus Ltd and Citybus Ltd. Ulsterbus runs services outside the Belfast area (except for a few services provided by privately owned bus undertakings) while all the services within the Belfast area are run by Citybus.

A public sector private enterprise system under licence is in operation for the carriage of goods by road for reward. Approximately 1,853 operators and 4,032 vehicles have been licensed; the biggest single operator is Northern Ireland Carriers Ltd.

The number of motor vehicles licensed at 30 Sept. 1977 was 428,956, comprising private cars, 347,091; motor cycles, 17,006; hackney vehicles, 1,858; goods vehicles, 39,658; agricultural tractors, 14,030. In addition, there were 9,283 vehicles which were not subject to licence duty.

The Department of the Environment (NI) is responsible for the provision and maintenance of all public roads, bridges and street lighting in the Province, the provision and operation of car parks, and for the operation of the Strangford Lough Ferry. In addition to a Headquarters Unit the Roads Service of the Department operates through Divisional Offices in Ballymena, Belfast, Coleraine, Craigavon, Downpatrick and Omagh and smaller offices in other centres.

At 1 April 1979 the total mileage of roads was 14,549, graded for administrative purposes as follows: Motorway, 67 miles; all purpose trunk, 332 miles; Class I, 1,037 miles; Class II, 1,757 miles; Class III, 2,946 miles; unclassified, 8,410 miles.

Aviation. Northern Ireland Airports Ltd is responsible for the operation of Belfast Airport. A major development programme, which will double the size of the terminal building and improve other operational facilities, is now under construction. In 1979, 1.4m. passengers and 16,000 tonnes of freight and mail were handled.

Passenger services operate between Belfast and London, Birmingham, Blackpool, Bristol, Cardiff, East Midlands, Edinburgh, Exeter, Glasgow, Leeds Bradford, Liverpool, Manchester, Newcastle upon Tyne, Southampton, Isle of Man, Prestwick, Luton, Kirkwall, Sumburgh, Stornaway and Scotsta.

Shipping. Passenger services operate between Belfast and Liverpool and between Larne and (i) Cairnryan and (ii) Stranraer. Conventional cargo services have given way in many cases to container, unit load and drive on drive off services. The latter type of service now operates between Belfast, Larne and Warrenpoint to various ports in UK.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The Lord Chancellor has responsibility for the administration of all courts in Northern Ireland through the Northern Ireland Court Service, and is responsible for the appointment of judges and resident magistrates.

The Court structure in Northern Ireland has 3 tiers—the Supreme Court of Judicature of Northern Ireland (comprising the Court of Appeal, the High Court and the Crown Court), the County Courts and the Magistrates' Courts. There are 25 Petty Sessions which when grouped together for administration purposes form 8 County Court Divisions and 4 Circuits.

The County Court has general civil jurisdiction subject to an upper monetary limit of £2,000. Appeals from the Magistrates' Courts lie to the County Court, while appeals from the County Court lie to the High Court. Circuit Registrars have jurisdiction to deal with most defended actions up to £500 and undefended actions up to £1,000. They also deal, by an informal arbitration procedure, with small claims whose value does not exceed £200. An appeal from the decision of a Registrar lies to the High Court.

Police. The police force consists of the Royal Ulster Constabulary, supported by the Royal Ulster Constabulary Reserve, a mainly part-time force.

Religion. The religious professions at the census of 1971 were: Roman Catholics, 477,919; Presbyterians, 405,719; Church of Ireland, 334,318 (including Church of England and Episcopal Church of Scotland); Methodists, 71,235; others and not stated, 230,449.

Education. Education in Northern Ireland is administered centrally by the Department of Education and locally by 5 education and library boards. The Department is concerned with the whole range of education from nursery education through to higher education and continuing education; for sport and recreation; for youth services; for the arts and culture (including libraries) and for community relations and community development. District councils are the main providers of sport, recreation and community facilities and the education and library boards have a responsibility where the facilities are intended primarily for education and youth service activities. The Department assists with grants as far as the district councils are concerned and meets the full cost in relation to education and library boards.

The 5 education and library boards which took over responsibility for the local administration of the education and library services on 1 Oct. 1973 are required to ensure that there are sufficient schools of all kinds to meet the needs of their area. They provide primary and secondary schools, special schools for handicapped pupils and institutions of further education. The boards also make contributions towards the cost of maintaining voluntary schools; award university and other scholarships; meet the tuition fees of the great majority of pupils attending grammar schools; provide milk and meals; free books and transport for pupils; enforce school attendance; regulate the employment of children and young people and secure the provision of recreational and youth service facilities. They are also required to develop a comprehensive and efficient library service for their areas. The following are the statistics for the 1978–79 academic year:

Universities. The Queen's University of Belfast (founded in 1849 as a college of the Queen's University of Ireland and reconstituted as a separate university in 1908) had 100 professors, 237 readers and senior lecturers, 468 lecturers and tutors and 5,816 full-time students.

The New University of Ulster at Coleraine, of which Magee University College, Londonderry, is now an integral part, had 28 professors, 38 readers and senior lecturers, 178 lecturers and demonstrators and 1,693 full-time students.

The Ulster Polytechnic is a central institution providing higher non-university education for the whole of Northern Ireland with a full-time academic staff of 537, 3,558 full-time and 2,936 part-time students on vocational and professional courses and 381 students on specialist teacher-training courses.

Secondary Education. 78 grammar schools with 57,582 pupils and 3,378 full-time teachers; 183 secondary (intermediate) schools with 106,155 pupils and 6,968 full-time teachers; the last technical intermediate school closed in June 1974.

The minimum general teacher-training course is of 3 years' duration and there were 2,831 students (878 men and 1,953 women) in training; these included students following teacher-training courses at university establishments and at Ulster Polytechnic.

Expenditure. Expenditure by the Department of Education in 1978-79 was £335.2m.

Health and Personal Social Services. Under the provisions of the Health and Personal Social Services (NI) Order 1972, the Department of Health and Social Services is responsible for the provision of integrated health and personal social services in Northern Ireland, designed to promote the physical and mental health of the people of Northern Ireland through the prevention, diagnosis and treatment of illness, and also to promote their social welfare. Four Health and Social Services Boards, Eastern, Northern, Southern and Western, established under the above Order, administer health and personal social services, as the Department directs, within their designated areas.

Social Security. The social security schemes in Northern Ireland are similar to those in force in Great Britain.

The system of social security established by the Social Security Acts 1975 to 1980, and the corresponding system established by the Social Security (NI) Acts 1975 to 1980, operate, by virtue of a reciprocal arrangement between Great Britain and Northern Ireland, as a single system throughout the UK. The National Insurance Joint Authority, consisting of the Secretary of State for Social Services and the Head of the Department of Health and Social Services for Northern Ireland is responsible under this reciprocal arrangement for making any necessary financial adjustments between the National Insurance funds of the two countries and also has responsibility for determining the administrative procedures necessary for the purpose of giving effect to the provisions of the reciprocal arrangement. There are comprehensive reciprocal agreements with the Isle of Man, and agreements covering reciprocity in respect of most benefits have been made by the Government of the UK, applying to the schemes in both Great Britain and Northern Ireland, with Australia, Austria, Belgium, Canada, Cyprus, Denmark, Finland, France, Germany (Fed. Rep.), Gibraltar, Guernsey, Irish Republic, Israel, Italy, Jamaica, Jersey, Luxembourg, Malta, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey and Yugoslavia. There are also limited agreements with Bermuda and the USA.

Since 1 April 1973 the reciprocal agreements between the UK and the other members of the EEC have been largely superseded by the Social Security Regulations of the Community.

National Insurance. During the year ended 31 March 1980, £27.5m. sickness benefit was paid to an average of 17,000 persons and £29.2m. unemployment benefit was paid to an average of 25,000 persons. Widows' benefits amounting to £20m. were paid to 16,000 persons and retirement pensions totalling £189.1m. were paid to an average of 182,000 persons. Invalidity pensions and allowances totalling £51.3m. were paid to approximately 30,000 persons. Accidents in respect of which claims to benefit are made occur at the rate of 280 per week and £1.3m. industrial injury benefit was paid in 1979-80 to an average of 870 persons. Industrial disablement benefit amounting to £6m. was paid to an average of 5,000 persons. Maternity benefit totalling £5.3m. was paid to approximately 25,000 persons. Receipts, including an item related to the financial adjustments mentioned above of the Northern Ireland Insurance Fund in the year ended 31 March 1979 were £309.7m. and payments were £305.4m.

Child Benefit. During the year ended 31 March 1980, £104.7m. was paid to an average of 208,800 families.

Supplementary Benefits. In 1979-80, £96.4m. was paid to an average of 121,000 persons.

Family Income Supplement. In 1979-80, £3.6m. was paid to an average of 8,000 persons.

The Island currently makes an annual contribution to the UK Government of 2.5% of net 'common purse' receipts (share of customs and excise duties and VAT received by Treasury) towards cost of defence and other common services provided by the UK Government. That contribution currently amounts to about £730,000.

The Secretaries to the Lieut.-Governors are their staff officers.

The Bailiffs are appointed by the Crown and are Presidents both of the Assembly of the States and of the Royal Courts of Jersey and Guernsey. They have in the States a casting vote.

Vital Statistics: Vital statistics are based on records of births, deaths, foetal deaths, marriages and divorces filed with registration officials of states and cities. Figures for the US include Alaska beginning with 1959 and Hawaii beginning with 1960.

Annual collection of mortality records from a national death-registration area was inaugurated in 1900. A national birth-registration area was established in 1915. These areas, which at their inception comprised 10 states and the District of Columbia, expanded gradually until 1933, when both the birth- and death-registration areas covered the entire continental US. Marriage and divorce statistics are compiled from reports furnished by state and local officials. Data on annulments are included in the divorce statistics. The marriage-registration area was established in 1957 with 29 states and 4 other areas. The divorce-registration area was established in 1958 with 14 states and 3 other areas. In Jan. 1972 the marriage-registration area included 41 states and 5 other areas, and the divorce-registration area included 29 states and one other area.

¹ Figures through 1959 include adjustment for under-registration (the 1959 registered count was 4,244,796); beginning 1960 figures represent number registered.

² Excluding foetal deaths and deaths among the armed forces overseas.

⁵ Deaths for 1968-74 (Eighth Revision, International Classification of Diseases, adapted, 1965). Deaths from deliveries and complications of pregnancy, childbirth and the puerperium. Deaths for 1958-67 were classified according to the Seventh Revision of the International Lists of Diseases and Causes of Death, those for 1949-57 according to the Sixth Revision and those for 1939-48, according to the Fifth Revision.

⁶ Excluding foetal deaths.

⁷ Based on a 50% sample.

⁸ Provisional.

The crude birth rate, based on total live-birth estimates per 1,000 total population, fell from 29.5 in 1915 to 18.4 in 1933; it rose to a peak of 26.6 in 1947—its highest for 25 years. This peak reflects demobilization (1945-46), the record number of marriages that followed, and the high levels of employment and income. The decrease in the following 3 years was moderate. In 1951 the rate moved upward and levelled off in 1957 at about 25 per 1,000 population. Since 1957 the crude birth rate has declined every year to 18.4 live births per 1,000 population in 1966. The crude

birth rate for 1977 was 15.4. Estimated number of illegitimate births in 1977 was 515,700, a ratio of 155 illegitimate births per 1,000 registered live births.

Deaths, excluding foetal deaths (per 1,000 population), declined from 17.2 in 1900 to 10 in 1946. The death rate has been below 10 per 1,000 since 1947, fluctuating slightly from year to year, mainly under the impact of occurrences of outbreaks of severe respiratory diseases. Since the record low of 9.2 in 1954 the rate has changed only between 9.3 and 9.7. Immigration: The Immigration and Nationality Act, as amended by Public Law 89-236, establishes a numerical ceiling of 170,000 visas for the Eastern Hemisphere and 120,000 for the Western Hemisphere, with a maximum of 20,000 visas available for any one country. The visas are allocated under a system of 7 preference categories, 4 of which are designed to reunite close relatives of US citizens and resident aliens of the US, 2 for skilled and professional workers and 1 for refugees. Visa numbers not used in any of the preference categories are made available to qualified non-preference immigrants. Spouses, children and parents of US citizens from both hemispheres are exempt from the numerical limitations.

During the year ended 30 Sept. 1977, 462,315 aliens became permanent residents of the US. Of the total immigrants admitted, 407,792 had obtained visas abroad and entered the US while aliens who were already in the US had their status adjusted to that of permanent residents.

CONSTITUTION AND GOVERNMENT. The form of government of the USA is based on the constitution of 17 Sept. 1787.

By the constitution the government of the nation is composed of three co-ordinate branches, the executive, the legislative and the judicial.

The National Government has authority in matters of general taxation, treaties and other dealings with foreign Powers, foreign and inter-state commerce, bankruptcy, postal service, coinage, weights and measures, patents and copyright, the armed forces (including, to a certain extent, the militia), and crimes against the USA; it has sole legislative authority over the District of Columbia and the possessions of the US.

The 5th article of the constitution provides that Congress may, on a two-thirds vote of both houses, propose amendments to the constitution, or, on the application of the legislatures of two-thirds of all the states, call a convention for proposing amendments, which in either case shall be valid as part of the constitution when ratified by the legislatures of three-fourths of the several states, or by conventions in three-fourths thereof, whichever mode of ratification may be proposed by Congress. Ten amendments (called collectively 'the Bill of Rights') to the constitution were added 15 Dec. 1791; two in 1795 and 1804; a 13th amendment, 6 Dec. 1865, abolishing slavery; a 14th in 1868, including the important 'due process' clause; a 15th, 3 Feb. 1870, establishing equal voting rights for white and coloured; a 16th, 3 Feb. 1913, authorizing the income tax; a 17th, 8 April 1913, providing for popular election of senators; an 18th, 16 Jan. 1919, prohibiting alcoholic liquors; a 19th, 18 Aug. 1920, establishing woman suffrage; a 20th, 23 Jan. 1933, advancing the date of the President's and Vice-President's inauguration and abolishing the 'lame-duck' sessions of Congress; a 21st, 5 Dec. 1933, repealing the 18th amendment; a 22nd, 26 Feb. 1951, limiting a President's tenure of office to 2 terms, or to 2 terms plus 2 years in the case of a Vice-President who has succeeded to the office of a President; a 23rd, 30 March 1961, granting citizens of the District of Columbia the right to vote in national elections; a 24th, 4 Feb. 1964, banning the use of the poll-tax in federal elections; a 25th, 10 Feb. 1967, dealing with Presidential disability and succession; a 26th, 22 June 1970, establishing the right of citizens who are 18 years of age and older to vote.

National flag: Seven red and 6 white alternating stripes, horizontal; with a blue canton, extending down to the lower edge of the 4th red stripe from the top, and displaying 50 white 5-pointed stars, one for each state. The stars have one point directed vertically upward, and they are arranged in 6 rows of 5 each, alternating with 5 rows of 4 each. On the admission of additional states, stars are added, effective on 4 July following the date of admission. Congress, by law of 22 Dec. 1942, has codified 'existing rules and customs' pertaining to the display of the flag, for civilians.

National anthem: The Star-spangled Banner, 'Oh say, can you see by the dawn's early light' (words by F. S. Key, 1814; tune by J. S. Smith; formally adopted by Congress 3 March 1931).

National motto: 'In God we trust'; formally adopted by Congress 30 July 1956.

Presidency. The executive power is vested in a president, who holds office for 4 years, and is elected, together with a vice-president chosen for the same term, by electors from each state, equal to the whole number of senators and representatives to which the state may be entitled in the Congress. The President must be a natural-born citizen, resident in the country for 14 years, and at least 35 years old.

The presidential election is held every fourth (leap) year on the Tuesday after the first Monday in November. Technically, this is an election of presidential electors, not of a president directly: the electors thus chosen meet and give their votes (for the candidate to whom they are pledged, in some states by law, but in most states by custom and prudent politics) at their respective state capitals on the first Monday after the second Wednesday in December next following their election; and the votes of the electors of all the states are opened and counted in the presence of both Houses of Congress on the sixth day of January. The total electorate vote is one for each senator and representative.

If the successful candidate for President dies before taking office the Vice-President-elect becomes President; if no candidate has a majority or if the successful candidate fails to qualify, then, by the 20th amendment, the Vice-President acts as President until a president qualifies. The duties of the Presidency, in absence of the President and Vice-President by reason of death, resignation, removal, inability or failure to qualify, devolve upon the Speaker of the House under legislation enacted 18 July 1947. And in case of absence of a Speaker for like reason, the presidential duties devolve upon the President *pro tem.* of the Senate and successively upon those members of the Cabinet in order of precedence, who have the constitutional qualifications for President.

The presidential term, by the 20th amendment to the constitution, begins at noon on 20 Jan. of the inaugural year. This amendment also installs the newly elected Congress in office on 3 Jan. instead of as formerly in the following December. The President's salary is \$200,000 per year, plus \$50,000 to assist in defraying expenses resulting from official duties. Also \$40,000 non-taxable for travel and official entertainment. The office of Vice-President carries a salary of \$62,500, plus \$10,000 allowance for travel.

The President is C-in-C. of the Army, Navy and Air Force, and of the militia when in the service of the Union. The Vice-President is *ex-officio* President of the Senate, and in the case of 'the removal of the President, or of his death, resignation, or inability to discharge the powers and duties of his office', he becomes the President for the remainder of the term.

President of the United States: Ronald Reagan, of California, born at Tampico, Illinois, in 1911; Governor of California, 1967-75.

At the Presidential election on 4 Nov. 1980 total vote cast, including men and women in the armed services, was 86,513,296, of which Ronald Reagan (R.) received 43,901,812 (50.7%), James Earl Carter (D.) 35,483,820 (41%) and John Anderson 5,719,722 (6.6%). Electoral college votes: Reagan 489; Carter 49; Anderson 0.

Cabinet. The administrative business of the nation has been traditionally vested in several executive departments, the heads of which, unofficially and *ex officio*, formed the President's Cabinet. Beginning with the Interstate Commerce Commission in 1887, however, an increasing amount of executive business has been entrusted to some 60 so-called independent agencies, such as the Veterans Administration, Housing and Home Finance Agency, Tariff Commission, etc.

All heads of departments and of the 60 or more administrative agencies are appointed by the President, but must be confirmed by the Senate.

The Cabinet consisted of the following (Jan. 1981):

1. *Secretary of State* (created 1789). Alexander M. Haig: President of the United Technologies Corporation; former Chief of Staff (1973–74) and Supreme Allied Commander NATO (1974–79); born 1924.
2. *Secretary of the Treasury* (1789). Donald Regan, of New York: Chairman of Merrill Lynch and Company, securities; born 1918.
3. *Secretary of Defense* (1947). Caspar Weinberger. Vice-President of the Bechtel Power Corporation; lawyer, former Secretary of Health, Education and Welfare; born 1917.
4. *Attorney-General* (Department of Justice, 1870). William French Smith, of California; lawyer; born 1917.
5. *Secretary of the Interior* (1849). James G. Watt, of Wyoming; lawyer; born 1938.
6. *Secretary of Agriculture* (1889). John R. Block, of Illinois; farmer; director of the Illinois Farm Bureau; born 1935.
7. *Secretary of Commerce* (1903). Malcolm Baldrige, of Connecticut; manufacturer; born 1922.
8. *Secretary of Labor* (1913). Raymond J. Donovan, of New Jersey; construction company executive; born 1930.

Congress: The legislative power is vested by the Constitution in a Congress, consisting of a Senate and House of Representatives.

Electorate: By amendments of the constitution, disqualification of voters on the ground of race, colour or sex is forbidden. Accordingly, the electorate consists theoretically of all citizens of both sexes over 18 years of age, but the franchise is not universal. There are requirements of residence varying in the several states as to length from 6 months to 2 years and differing requirements as to registration. In 20 states the ability to read (usually an extract from the constitution) is required—in

Alaska the ability to read English; in Hawaii, English or Hawaiian; in Louisiana, English or one's native tongue. In Alabama the voter must take an 'anti-Communist oath' and fill out a questionnaire to the satisfaction of the registrars. In some southern states voters are required to give a reasonable explanation of what they read. Estimate of Negroes registered in the 11 southern states of Ala., Ark., Fla., La., Miss., N.C., Okla., S.C., Tex., Tenn. and Va.: 1947, 595,000; 1956, 1,238,000; 1960, 1,414,000; 1970, 3,324,000; 1972, 5,678,939. In 1972 there were about 14.2m. registered Negro voters in the USA. In most states convicts are excluded from the franchise, in some states duellists and fraudulent voters.

Legislation designed to discourage the rise of third parties has been adopted in a few states. In Illinois a new party must present a petition signed by at least 25,000 voters, including at least 200 in each of 50 of the 102 counties.

The method of balloting varies greatly. Seventeen states use different ballots for federal, state and local elections. In Delaware and South Carolina the various political parties furnish their own ballot-papers to the voters as he or she enters the polling-booth.

Senate: The Senate consists of 2 members from each state, chosen by popular vote for 6 years, one-third retiring or seeking re-election every 2 years. Senators must be no less than 30 years of age; must have been citizens of the USA for 9 years, and be residents in the states for which they are chosen. The Senate has complete freedom to initiate legislation, except revenue bills (which must originate in the House of Representatives); it may, however, amend or reject any legislation originating in the lower house. The Senate is also entrusted with the power of giving or withholding its 'advice and consent' to the ratification of all treaties initiated by the President with foreign Powers, a two-thirds majority of senators present being required for approval. (However, it has no control over 'international executive agreements' made by the President with foreign governments; such 'agreements', representing an important but very recent development, cover a wide range and are actually more numerous than formal treaties.) It also has the power of confirming or rejecting major appointments to office made by the President, but it has no direct control over the appointment by the President of 'personal representatives' or 'personal envoys' on missions abroad. Members of the Senate constitute a High Court of Impeachment, with power, by a two-thirds vote, to remove from office and disqualify any civil officer of the USA impeached by the House of Representatives, which has the sole power of impeachment.

The Senate has 16 Standing Committees to which all bills are referred for study, revision or rejection. The House of Representatives has 21 such committees. In both Houses each Standing Committee has a chairman and a majority representing the majority party of the whole House; each has numerous sub-committees. The jurisdictions of these Committees correspond largely to those of the appropriate executive departments and agencies. Both Houses also have a few special Committees with limited duration; there are some Joint Committees.

House of Representatives. The House of Representatives consists of 435 members elected every second year. The number of each state's representatives is determined by the decennial census, in the absence of specific Congressional legislation affecting the basis. The states, in 1979, had the following representatives:

Alabama	7	Indiana	11	Nebraska	3	South Carolina	6
Alaska	1	Iowa	6	Nevada	1	South Dakota	2
Arizona	4	Kansas	5	New Hampshire	2	Tennessee	8
Arkansas	4	Kentucky	7	New Jersey	15	Texas	24
California	43	Louisiana	8	New Mexico	2	Utah	2
Colorado	5	Maine	2	New York	39	Vermont	1
Connecticut	6	Maryland	8	North Carolina	11	Virginia	10
Delaware	1	Massachusetts	12	North Dakota	1	Washington	7
Florida	15	Michigan	19	Ohio	23	West Virginia	4
Georgia	10	Minnesota	8	Oklahoma	6	Wisconsin	9
Hawaii	2	Mississippi	5	Oregon	4	Wyoming	1
Idaho	2	Missouri	10	Pennsylvania	25		
Illinois	24	Montana	2	Rhode Island	2		

The Supreme Court decided on 17 Feb. 1964, that the federal constitution re-

quires congressional districts within each state to be substantially equal in population. By almost invariable custom the representative lives in the district from which he is elected.

Representatives must be not less than 25 years of age, citizens of the USA for 7 years and residents in the states from which they are chosen. The District of Columbia, Guam and the Virgin Islands have one non-voting delegate each. The House also admits a 'resident commissioner' from Puerto Rico, who has the right to speak on any subject and to make motions, but not to vote; he is elected in the same manner as the representatives but for a 4-year term. Each of the two Houses of Congress is sole 'judge of the elections, returns and qualifications of its own members'; and each of the Houses may, with the concurrence of two-thirds, expel a member. The period usually termed 'a Congress' in legislative language continues for 2 years, terminating at noon on 3 Jan.

The salary of a senator or representative, also that of a resident commissioner in Congress, is \$60,662 per annum, with tax-free expense allowance and allowances for travelling expenses and for clerical hire. The salary of the Speaker of the House of Representatives is \$79,125 per annum, with a taxable allowance.

No senator or representative can, during the time for which he is elected, be appointed to any *civil* office under authority of the USA which shall have been created or the emoluments of which shall have been increased during such time; and no person holding *any* office under the USA can be a member of either House during his continuance in office. No religious test may be required as a qualification to any office or public trust under the USA or in any state.

The 97th Congress (1981-83) was constituted (Jan. 1981) as follows: Senate, 53 Republicans, 46 Democrats, 1 Independent; House of Representatives, 243 Democrats, 192 Republicans.

Indians: By an Act passed on 2 June 1924 full citizenship was granted to all Indians born in the USA, though those remaining in tribal units were still under special federal jurisdiction. Those remaining in tribal units constitute from one-half to three-fourths of the Indian population. The Indian Reorganization Act of 1934 gave the tribal Indians, at their own option, substantial opportunities to self-government and of self-controlled corporate enterprises empowered to borrow money, buy land, machinery and equipment; these corporations are controlled by democratically elected tribal councils; by 1945 roughly a third of the Indians had taken advantage of this Act. Recently a trend towards releasing Indians from federal supervision has resulted in legislation terminating supervision over specific tribes. Indian lands (1965) amounted to 55,319,000 acres, of which about 71% was tribally owned and 20% in trust allotments, with the remainder owned by the Government. Indian lands are held free of taxes. Indian population under jurisdiction of the Indian Bureau was about 343,000 in 1950; nearly one-half were in the three states of Oklahoma, Arizona and New Mexico. Total Indian population at the 1970 census was 791,839, of which Oklahoma, Arizona, California, North Carolina and New Mexico accounted for 53%.

State and Local Government: The Union comprises 13 original states, 7 states which were admitted without having been previously organized as territories, and 30 states which had been territories—50 states in all. Each state has its own constitution (which the USA guarantees shall be republican in form), deriving its authority, not from Congress, but from the people of the state. Admission of states into the Union has been granted by special Acts of Congress, either (1) in the form of 'enabling Acts' providing for the drafting and ratification of a state constitution by the people, in which case the territory becomes a state as soon as the conditions are fulfilled, or (2) accepting a constitution already framed, and at once granting admission.

Each state is provided with a legislature of two Houses (except Nebraska, which since 1937 has had a single-chamber legislature), a governor and other executive officials, and a judicial system. Both Houses of the legislature are elective, but the senators (having larger electoral districts usually covering 2 or 3 counties compared with the single county or, in some states, the town, which sends 1 representative to the Lower House) are less numerous than the representatives, while in 38 states their terms are 4 years; in 12 states the term is 2 years. Of the 4-year senates, Illinois,

Montana and New Jersey provide for two 4-year terms and one 2-year term in each decade. Terms of the lower houses are usually shorter; in 45 states, 2 years.

Members of both Houses are paid at the same rate, which varies from \$200 per biennium (New Hampshire) to \$64,140 per biennium (California). The trend is towards annual sessions of state legislatures; in 1976, 36 were constitutionally required to meet annually (in 1939, only 4), the other 14 holding biennial sessions, 12 in the odd-numbered and 2 in the even-numbered years. Of these 14, 6 met annually in practice by invoking flexible constitutional powers to reconvene at intervals during the biennium.

The Governor has power to summon an extraordinary session, but not to dissolve or adjourn. The duties of the two Houses are similar, but in many states money bills must be introduced first in the Lower House. The Senate sits as a court for the trial of officials impeached by the other House, and often has power to confirm or reject appointments made by the Governor.

State legislatures are competent to deal with all matters not reserved for the federal government by the federal constitution nor specifically prohibited by the federal or state constitutions. Among their powers are the determination of the qualifications for the right of suffrage, and the control of all elections to public office, including elections of members of Congress and electors of President and Vice-President; the criminal law, both in its enactment and in its execution, with unimportant exceptions, and the administration of prisons; the civil law, including all matters pertaining to the possession and transfer of, and succession to, property; marriage and divorce, and all other civil relations; the chartering and control of all manufacturing, trading, transportation and other corporations, subject only to the right of Congress to regulate commerce passing from one state to another; labour; education; charities; licensing; fisheries within state waters, and game laws (apart from the hunting of migratory birds, which is a federal concern under treaties with Canada and Mexico). Taxes on income were left to the states until 1913, when the 16th amendment authorized the imposition of federal taxes on income without regard to apportionment.

The Governor is chosen by direct vote of the people over the whole state. His term of office varies in the several states from 2 to 4 years, and his salary from \$10,000 (Arkansas) to \$85,000 (New York). His duty is to see to the faithful administration of the law, and he has command of the military forces of the state. He may recommend measures but does not present bills to the legislature. In some states he presents estimates. In all but one of the states (North Carolina) the Governor has a veto upon legislation, which may, however, be overridden by the two Houses, in some states by a simple majority, in others by a three-fifths or two-thirds majority. In some states the Governor, on his death or resignation, is succeeded by a Lieutenant-Governor who was elected at the same time and has been presiding over the state Senate. In several states the Speaker of the Lower House succeeds the Governor.

The chief officials by whom the administration of state affairs is carried on (secretaries, treasurers, members of boards of commissioners, etc.) are usually chosen by the people at the general state elections for terms similar to those for which governors hold office. State employees, Oct. 1970, numbered 2,755,033, earning \$1,612.1m. monthly; education accounted for 1.18m. employees (43%). Local government employees numbered 7,392,437, earning \$4,294.2m. monthly.

Local Government: The chief unit of local government is the county, of which there were (1976) 3,088 with definite functions; in addition, Rhode Island has 5 'counties' which have no functions; Alaska does not have 'counties' as such and, since Oct. 1960, there has been no active county government in Connecticut. Louisiana has 64 'parishes'. The counties maintain public order through the sheriff and his deputies, who may, in a crisis, be drawn temporarily from willing citizens; in many states the counties maintain the smaller local highways, other functions are the granting of licences and the apportionment and collection of taxes. In a few states they also manage the schools.

The unit of local government in New England is the rural township, governed directly by the voters, who assemble annually or oftener if necessary, and legislate in local affairs, levy taxes, make appropriations and appoint and instruct the local

officials (selectmen, clerk, school-committee, etc.). Townships are grouped to form counties. Where cities exist, the township government is superseded by the city government.

The **District of Columbia**, ceded by the State of Maryland for the purposes of government in 1791, is the seat of the US Government. It includes the city of Washington, and embraces a land area of 61 sq. miles. The Reorganization Plan No. 3 of 1967 instituted a Mayor Council form of government with appointed officers. In 1973 an elected Mayor and elected councillors were introduced; in 1974 they received power to legislate in local matters. Congress retains power to enact legislation and to veto or supersede the Council's acts. Since 1961 citizens have had the right to vote in national elections. On 23 Aug. 1978 the Senate approved a constitutional amendment giving the District full voting representation in Congress. This has still to be ratified.

The **Commonwealth of Puerto Rico**, **Guam** and the **Virgin Islands** each have a local legislature, whose acts may be modified or annulled by Congress, though in practice this has seldom been done. The President appoints the Governor and Federal District Judge in Guam. Puerto Rico since its attainment of commonwealth status on 25 July 1952, enjoys practically complete self-government, including the election of its governor and other officials. The conduct of foreign relations, however, is still a federal function and federal bureaux and agencies still operate in the island.

General supervision of territorial administration is exercised by the Office of Territories in the Department of Interior.

DEFENCE. The President is C-in-C. of the Army, Navy and Air Force.

The National Security Act of 1947 provides for the unification of the Army, Navy and Air Forces under a single Secretary of Defense with cabinet rank. The President is also advised by a National Security Council and the Office of Civil and Defense Mobilization.

The major components of the Department of Defense are the Office of the Secretary of Defense and the Joint Chiefs of Staff, who provide immediate staff assistance and advice to the Secretary; the departments of the Army, Navy and Air Force, each separately organized under a civilian head (not of cabinet rank); and the unified and specified commands.

Army. Secretary of the Army: John Marsh.

Central Administration. The Secretary of the Army is the head of the Department of the Army. Subject to the authority of the President as C-in-C. and of the Secretary of Defense, he is responsible for all affairs of the Department.

The Secretary of the Army is assisted by the Under Secretary of the Army, 4 Assistant Secretaries of the Army (Installations, Logistics and Financial Management; Research and Development; Manpower and Reserve Affairs, and Civil Works), the General Counsel, an Administrative Assistant, Chief of Legislative Liaison, Chief of Public Affairs and the Army Staff headed by the Chief of Staff, US Army. The office of the Under Secretary of the Army includes a Deputy Under Secretary (Operations Research).

The Chief of Staff is the principal military adviser of the Secretary of the Army, and performs his duties under the direction of the Secretary of the Army, except as otherwise prescribed by law, by the President or by the Secretary of Defense. He has supervision of all members and organizations of the Army. The Vice Chief of Staff assists and advises the Chief of Staff.

The Army General Staff is the principal element of the Army Staff and includes the offices of the Chief of Staff, Vice Chief of Staff, Director of Staff, the 4 Deputy Chiefs of Staff (Military Operations, Personnel, Logistics, and Research, Development and Acquisition), the Comptroller of the Army, the Assistant Chief of Staff for Intelligence, the Ballistic Missile Defense Program Manager and the Army Reserve Forces Policy Committee. Other elements of the Army Staff are the offices of the Judge Advocate General, Surgeon General, Adjutant General, Inspector General and Auditor General, Chief of Chaplains, Chief, Army Reserve, Chief, National Guard Bureau, and Chief of Engineers.

The Army consists of the Regular Army, the Army National Guard of the U.S., the Army Reserve and civilian workforce; and all persons appointed to or enlisted into the Army without component; and all persons serving under call or conscription, including members of the National Guard of the States, etc., when in the service of the U.S.

Department of the Army active authorized strength, including cadets, was (1979) 774,000, including 55,000 women, comprised, in major combat units, or 16 divisions and several separate brigades and regiments.

The US Army Forces Command, with headquarters at Fort McPherson, Georgia, commands the continental US Armies and all assigned Active Army and US Army Reserve troop units in the continental U.S., Alaska, Hawaii, Panama, Guam, Johnston Island, the Commonwealth of Puerto Rico, and the Virgin Islands of the USA. The headquarters of the continental US Armies are: First US Army, Fort George G. Meade, Maryland; Fifth US Army, Fort Sam Houston, Texas; Sixth US Army, Presidio of San Francisco, California. The US Army Training and Doctrine Command, with headquarters at Fort Monroe, Virginia, co-ordinates and integrates the total combat development effort of the Army as well as developing,

managing and supervising the training of individuals of the US Army and authorized foreign nationals. The US Army Health Services Command, with headquarters at Fort Sam Houston, Texas, provides health services in the continental US for the US Army and provides professional education and training for medical personnel of the US Army and authorized foreign national personnel. The US Army Materiel Development and Readiness Command, with headquarters in Alexandria, Virginia, is responsible for all US Army operations dealing with equipment development, procurement, delivery, supply and maintenance. The US Army Communications Command, with headquarters at Fort Huachuca, Arizona, provides worldwide communications to the Department of the Army and supports the Defense Communications Systems. The US Army Military District of Washington, with headquarters at Fort McNair, Washington, D.C. provides support to the Department of the Army and the Department of Defense at the seat of Government.

Some 35% of the Army is deployed overseas. Two divisions two-thirds of which are located in the USA keeps equipment in the Federal Republic of Germany and can be flown there in 48-72 hours. Headquarters of US Seventh and Eighth Armies are in Europe and Korea respectively.

Operational Commands and Weapons. The larger commands are the theater army and the corps. The typical theater army may consist of a variable number of corps: combat forces of armour and infantry; air defense artillery (*Nike-Hercules* and *Hawk* and short-range missile battalions); field artillery and Pershing missile battalions; combat support forces of aviation, engineer and signal elements; and combat service support forces. A typical corps consists of a variable number and mixture of infantry, mechanized infantry, armoured, airmobile, and airborne divisions; one or more separate infantry brigades; one or more armoured cavalry regiments; corps artillery (155-mm howitzer, 8-in. howitzer, 175-mm gun, *Lance* missile battalions); an air defense element of a size commensurate with the hostile air threat (*Nike-Hercules*, *Hawk* and *Chaparral Vulcan* battalions), and a target acquisition unit; combat support and combat service support forces.

US Army Divisions have a common base (containing command, aviation divisional artillery, combat, combat support units and combat service support units) and a varying mixture of 'combat manoeuvre battalions' (usually 10 or 11 in number in 3 brigades) to make up airborne, infantry, armoured, mechanized infantry and airmobile divisions. Divisions can in this way be 'tailored' to fit a variety of strategic or tactical situations. An infantry division, with about 16,900 men, may have 8 infantry battalions, an armoured battalion and a mechanized infantry battalion; a mechanized infantry division, with about 16,600 men, may have 6 mechanized infantry battalions and 4 armoured battalions; an armoured division, with about 16,900 men, may have 5 mechanized infantry battalions and 6 armoured battalions; an airborne division, with 13,000 men, may have 9 infantry (airborne) battalions.

Small arms include the M-16, which fires a 5.56-mm cartridge. The standard general-purpose machine-gun is the M-60 (23 lb.; 550 rounds of 7.63-mm per minute). Infantry weapons also include M-203 grenade launcher attachment for the M16A1 rifle, which fire a 40-mm grenade up to 400 metres, the *Tow* and *Dragon* anti-tank missile system, and the M-72 rocket, a light anti-tank weapon.

Combat vehicles of the US Army are the tank, armoured personnel carrier, armoured reconnaissance airborne assault vehicle and the armoured command and reconnaissance vehicle. The first-line tanks are the XM-1 Abrams tank, M-60A3 with 105-mm main armament. The M-60A2, a version of the M-60 series tank, fires both the *Shillelagh* missile and conventional ammunition. The standard armoured personnel carrier is the M-113A1; it carries a mechanized infantry squad. The M-113A1 is also being utilized as the ground scout vehicle in armoured cavalry regiments, squadrons and in scout platoons of armoured and mechanized infantry battalions. The M-551 'Sheridan' is an armoured reconnaissance airborne assault vehicle in armoured cavalry units and light armour battalions; it fires both *Shillelagh* missiles and conventional ammunition. Combat vehicles under development are mechanized infantry combat vehicle and armoured reconnaissance scout vehicle.

The approved calibres of artillery are: light, 105-mm howitzer, medium 155-mm

howitzer; the heavy, 175-mm gun and 8-in. howitzer. The 4.2-in. mortars and the 81-mm mortar are used by combat manoeuvre elements. The 90-mm, 106-mm recoilless rifles are being replaced by the *Dragon* and *Tow* anti-tank missile systems which are the primary anti-tank weapons. *Chaparral* and *Vulcan*, forward-area air-defence weapons, provide the capability of low-altitude defence against high-performance aircraft.

The Army has two categories of missiles—surface-to-surface (field artillery) and surface-to-air (air defence artillery). Surface-to-surface missiles are: *Pershing*, ballistic, nuclear warhead, range about 400 miles operational; *Lance*, guided, nuclear warhead, storable, liquid propellant, operational. Surface-to-air missiles, for air defence, are: *Nike-Hercules*, guided, field or fixed installation, nuclear warhead, operational; *Hawk*, homing type, low-to-mid-altitude, field, operational (an improved system has replaced the basic *Hawk*); *Chaparral*, infra-red homing, low-altitude, forward area, operational (improvements to the basic system are under development); *Redeye*, hand-held, infra-red homing, low-altitude, forward area, operational; *Patriot*, mid-to-high-altitude, replacement for *Hawk* and *Nike-Hercules*, under limited production; *Stinger*, hand-held infra-red homing, low-altitude, forward area, replacement for *Redeye* is under development. Anti-tank missiles are: *Tow*, tube launched, optically tracked, wire guided, anti-armour, forward area, operational; *Hellfire*, terminal homing under development.

The Army employs rotary- and fixed-wing aircraft as organic elements of its ground formations where their use is required on a full-time basis and their immediate and constant availability is essential. The front line commander exploits the benefits of aviation technology to perform traditional land battle tasks in the third dimension. This concept of airmobility for ground formation utilizes aerial vehicles as a highly integrated team to perform all five functions of land combat: reconnaissance, command and control, logistics and that inseparable combination, fire-power and manoeuvre.

Enlistment, Terms of Service. Since 1974 the Army has operated a 'zero draft' system making it, in effect, an all-regular force. Terms of service may be 3, 4, 5 or 6 years.

Men who enlist incur a 6-year obligation and must serve in the reserve any part of the period not served on active duty.

The Army National Guard is a reserve military component with a dual status and role. Enlistment is voluntary. The members are recruited by each state, but are equipped and paid by the federal government. Training is supervised by the active Army (FORSCOM), and unit organization parallels that for the active army; training facilities are made available by the USA and each state. As the organized militia of the several states, the District of Columbia, Puerto Rico and the Territory of the Virgin Islands, the Guard may be called into service for local emergencies by the sovereigns in those jurisdictions; and may be called into federal service by the President to thwart invasion or rebellion or to enforce federal law. In its role as a reserve component of the Army, the Guard is subject to the order of the President in the event of national emergency. The Air Guard provide 100% of the air defence of Hawaii.

The Army Reserve is designed to supply qualified and experienced units and individuals in an emergency. US Army Forces Command is charged with the command, support and training supervision of US Army Reserve units. Members are assigned to one of 3 categories: the Ready, Standby or Retired Reserve. A limited number of Ready Reservists is subject to call by the President in case of national emergency without declaration of war by Congress. The Standby Reserve and the Retired Reserve may be called only after declaration of war or national emergency by Congress.

The act of establishment stated the Coast Guard 'shall be a military service and branch of the armed forces of the United States at all times'. The Coast Guard did operate as part of the Navy during the First and Second World Wars. It also had some units serving in Vietnam. It comprises 260 ships including cutters of destroyer, frigate, corvette and patrol vessel types, powerful icebreakers, and para-military auxiliaries and tenders. It also maintains 50 fixed-wing aircraft and 120 helicopters. The Coast Guard missions include maintenance of aids to navigation, enforcement of maritime laws, enforcement of international treaties, environmental protection (especially waterway pollution), commercial vessel safety programmes, recreational boating safety, and search and rescue efforts. In the new construction programme are 9 cutters of frigate size and utility each capable of carrying a helicopter. The strength of personnel on 1 Jan. 1981 was 4,900 officers, 1,430 warrant officers and 31,300 enlisted men.

Air Force. *Secretary of the Air Force:* Verne Orr.

The Department of the Air Force was activated within the Department of Defense on 18 Sept. 1947, under the terms of the National Security Act of 1947. It is administered by a Secretary of the Air Force, assisted by an Under Secretary and 3 Assistant Secretaries (Research, Development and Logistics; Financial Management; and Manpower, Reserve Affairs and Installations). The USAF, under the administration of the Department of the Air Force, is supervised by a Chief of Staff, who is a member of the Joint Chiefs of Staff. He is assisted by a Vice Chief of Staff, Assistant Vice Chief of Staff, and 5 Deputy Chiefs of Staff (Manpower and Personnel; Programs and Evaluation; Research, Development and Acquisition; Operations, Plans and Readiness; and Logistics and Engineering).

The USAF consists of active duty Air Force officers and airmen, civilian employees, the Air National Guard and the Air Force Reserve. For operational purposes the service is organized into 11 major commands and 13 separate operating agencies. The Strategic Air Command, equipped with long-range bombers based both in the USA and overseas, and with intercontinental ballistic missiles, is maintained primarily for strategic air operations anywhere on the globe. Tactical Air Command is the Air Force's mobile strike force, able to deploy US general-purpose air forces anywhere in the world for tactical air combat operations. The Military Airlift Command provides air transportation of personnel and cargo for all military services on a worldwide basis; and is also responsible for Air Force audio-visual products, weather service, and aerospace rescue and recovery operations.

The other functional commands are the Air Force Systems Command, Air Force Logistics Command, Air Force Communications Command, Electronic Security Command, and Air Training Command.

The overseas commands are the Pacific Air Forces, the US Air Forces in Europe and the Alaskan Air Command. These commands conduct, control and co-ordinate offensive and defensive air operations according to tasks assigned by their respective theatre commanders. There are also a number of separate operating agencies which include the Air Force Accounting and Finance Center, Air Force Audit Agency, Air Force Commissary Service, Air Force Engineering and Services Center, Air Force Inspection and Safety Center, Air Force Intelligence Service, Air Force Office of Security Police, Air Force Manpower and Personnel Center, Air Force Medical Service Center, Air Force Service Information and News Center, Air Force Legal Services Center, Air Force Office of Special Investigations, and Air Force Test and Evaluation Center. The Air Force has several other direct reporting units, including the Air Force Academy, Air Force Reserve, and Aerospace Defense Center.

Of the fighter and interceptor aircraft in service, the F-15 Eagle, F-5 Tiger II, F-16 Fighting Falcon, F-105 Thunderchief, F-106 Delta Dart, F-111 and F-4 Phantom II fly faster than the speed of sound in level flight and can carry a variety of armament. The E-3A AWACS is a large long range airborne warning and control aircraft. The subsonic A-7 Corsair II and the A-10 Thunderbolt II are close-support aircraft. Strategic bombers are the B-52 Stratofortress heavy bomber and the 'swing-wing' FB-111A. The Strategic Air Command also operates the KC-135 Stratotanker for aerial refuelling and the SR-71 Blackbird and U-2 for strategic reconnaissance. Current transport types include the C-141 StarLifter, the C-5 Galaxy and the turboprop-powered C-130 Hercules. Intercontinental ballistic missiles in USAF service are Titan II and Minuteman II and III.

In 1981, the Air Force had 564,000 personnel. Total 1981 aircraft strength is 9,263.

¹ On 31 Aug. 1919 gross debt reached its First World War (1914–18) peak of \$26,596,702,000, which was the highest ever reached up to 1934; on 31 Dec. 1930 it had declined to \$16,026m., the lowest it has been since the First World War. On the 30 Nov. 1941, just preceding Pearl Harbor, debt stood at \$61,363,867,932. The highest Second World War debt was \$279,764,369,348 on 28 Feb. 1946.

² *Per capita* figures, beginning with 1960, have been revised; they are based on the Census Bureau's estimates of the total population of the U.S., including Alaska and Hawaii.

State and Local Finance: Revenue of the 50 states and all local governments (79,913 in 1977) from their own sources amounted to \$329,770m. in fiscal year 1978–79; in addition they received \$75,164m. in revenue from fiscal aid, shared revenues and reimbursements from the federal government, bringing total revenue from all sources to \$404,934m. Of the revenue from state and local sources, taxes provided \$205,514m., of which property taxes (mainly imposed by local governments) yielded \$64,944m. or 32% of all tax revenue; and sales taxes, both general sales taxes and selective excises, provided \$74,248m. (36%).

State tax revenue totalled \$124,908m. in fiscal year 1979. Largest sources of state tax revenue are general sales taxes (imposed during 1979 by 45 states), motor fuel sales taxes (all states), individual income (44 states), motor vehicle and operators' licences (49 states), corporation income (46 states), tobacco products (all states) and alcoholic beverage sales taxes (all states).

General revenue of local units from own sources in fiscal year 1978-79 totalled \$139,853m. In addition they received \$94,778m. from state and federal aids. Property taxes provided 29% of total general revenue.

Total expenditures of state and local governments were \$381,867m. in 1978-79, of which approximately 72% was for current operation. Education took \$119,448m. in current and capital expenditure; highways, \$28,440m.; welfare (chiefly public assistance), \$41,898m., and health and hospitals, \$28,218m. Capital outlays (construction, equipment and land purchases) totalled \$53,196m.

Gross debt of state and local governments totalled \$304,103m. or \$1,381 *per capita* at the close of their 1978-79 fiscal year. Total cash and investment assets of state and local governments were \$362,359m., about 24% being in cash and deposits, and the remainder in investments, mainly non-governmental securities.

National Income. The Bureau of Economic Analysis of the Department of Commerce prepares detailed estimates on the national income and product of the United States. The principal tables are published monthly in *Survey of Current Business*; the complete set of national income and product tables are published in the *Survey* regularly each July, showing data for recent years. *The National Income and Product Accounts of the United States, 1929-1974: Statistical Tables* (1976) contains a complete set of tables from 1929 through 1974. The conceptual framework and statistical methods underlying the US accounts were described in *US Income and Output* (1958), and in *Survey of Current Business* (Aug. 1965 and Jan. 1976).

Currency. Prior to the banking crisis that occurred early in 1933, the monetary system had been on the gold standard for more than 50 years. An Act of 14 March 1900 required the Secretary of the Treasury to maintain at a parity with gold all forms of money issued by the USA. For a description of these, see *THE STATESMAN'S YEAR-BOOK*, 1934, p. 491.

The old gold dollar had a par value of 49.32*d.*, or \$4.8666 to the £ sterling; it contained 25.8 grains (or 1.6718 grammes) of gold 0.900 fine. By the act of 12 May 1933 the President of the USA was given authority to reduce the gold content of the dollar by not more than 50%, and by the Gold Reserve Act of 30 Jan. 1934 the minimum reduction which he could make was fixed at 40%; on 31 Jan. 1934 he fixed its value at 59.06%, or 15.47 grains of gold 0.900 fine. This was equal to a price for gold of \$35 a fine oz. (old price, \$20.67183). The President's power to alter the gold content of the dollar to 50% of its value, which was extended by Congress in 1937, 1939 and 1941, was not again extended in 1943.

The Par Value Modification Act (Public Law 92 268), enacted on 31 March 1972, authorized and directed the Secretary of the Treasury to take the steps necessary to establish a new par value of the dollar of \$1 = 0.818513 gramme of fine gold or \$38 per fine troy oz. of gold. The Secretary of the Treasury, pursuant to the statutory directive, proposed the new par value for the US dollar to the International Monetary Fund, which par value became effective on 8 May 1972.

In Public Law 93 110, enacted on 21 Sept. 1973, Congress amended the Par Value Modification Act of 1972, and authorized and directed the Secretary of the Treasury to take the steps necessary to establish a new par value of \$1 equals 0.828948 Special Drawing Right or 1.42% of a fine troy ounce of gold. Pursuant

to the statutory directive, the Secretary of the Treasury notified the International Monetary Fund that, effective 18 Oct. 1973, the par value of the dollar would be changed from 1.38 to 1.42 $\frac{1}{10}$ a fine troy ounce of gold. Expressed in terms of gold, the new par value of the dollar is 0.736662 gramme of gold per dollar, or \$42.222 per fine troy ounce of gold. Expressed in percentage, the change in the par value of the dollar amounted to a reduction of 10% in the former gold content of the dollar. This is the equivalent to an 11.1% increase in the former dollar price of gold.

The USA, on 1 April 1978, accepted the second amendment to the Articles of Agreement of the International Monetary Fund. The par value of the dollar is no longer defined in terms of the Special Drawing Right and gold, and the USA is not obliged to establish and maintain a par value for the dollar.

At the time of the banking crisis in March 1933 gold payments by banks and the Treasury were suspended by the Government, and an embargo was placed on gold exports. Steps were taken to withdraw from circulation all gold coin and gold certificates and to prohibit the private ownership of all gold coin except for numismatic purposes. Public Law 93-373, 14 Aug. 1974, amended the Par Value Modification Act so as to provide for the termination of all governmental restrictions on private ownership of gold, including gold coins, no later than 31 Dec. 1974.

Currency in the USA for many years has comprised several varieties. Prior to May 1933 the legal tender qualities of the classes varied, but in that month all types of currency were made equally legal tender. Under the Coinage Act of 1965, all coins and currencies of the USA, regardless of when coined or issued, are legal tender for all debts, public and private.

Only two of the eight kinds of notes outstanding are now significant: Federal Reserve notes in denominations of \$1, \$2, \$5, \$10, \$20, \$50 and \$100; and US notes in denominations of \$100. The issue of (a) \$500, \$1,000, \$5,000 and \$10,000 Federal Reserve notes; of (b) silver certificates, and of (c) \$5 and \$2 US notes have been discontinued, although they are still in general circulation. The following issues were stopped many years ago and are in process of retirement: (1) Federal Reserve Bank notes; (2) National Bank notes; (3) Treasury notes of 1890; (4) fractional currency.

Federal Reserve notes are obligations of the USA and a first lien on the assets of the Federal Reserve Banks, through which they are issued. Each of the 12 banks issues them against the security of an equal volume of collateral.

Gold coins (of the old weight and fineness) were \$20, \$10, \$5 and \$2 $\frac{1}{2}$ pieces called *double eagles*, *eagles*, *half-eagles* and *quarter-eagles*. The old eagle weighed 258 grains or 16.7181 grammes 0.900 fine, and therefore contained 232.2 grains or 15.0463 grammes of fine gold. Except for collector's holdings, these are no longer in circulation. The stock of gold bullion held by the Treasury on 31 Oct. 1978 was 276.1m. fine oz., valued at \$11,700m.; stock of silver bullion was 39.2m. fine oz. (excluding 139.5m. fine oz. held for defence stockpile). Estimated stock of domestic coin on 30 Sept. 1978 was \$10,355m., of which \$482m. were standard silver dollars and the remainder silver and other subsidiary coin.

The silver dollar weighs 412.5 grains or 26.7296 grammes 0.900 fine, and contains 371.25 grains or 24.0566 grammes of fine silver. Subsidiary, 0.900 fine, silver coins contain 347.22 grains of fine silver per dollar. These are the half-dollar, quarter-dollar and dime (one-tenth). Minor coins currently issued are the cupro-nickel 5-cent piece and the bronze 1-cent piece. Pursuant to the Coinage Act of 1965, Congress authorized the minting and issuance of new silver clad half-dollars containing 40% silver and cupro-nickel quarter-dollars and dimes containing no silver. In an amendment to the Coinage Act enacted on 31 Dec. 1970, Congress provided that all coins minted thereafter, including dollar and half-dollar coins, be made of cupro-nickel composition. However, a provision in the 1970 law permitted the coining of 1.500 inch dollar coins containing 40% silver. These dollar coins, which bear the likeness of the late President Eisenhower, are sold at premium price to coin collectors. In Oct. 1978 there was authorization of a new dollar bearing the likeness of suffragette Susan B. Anthony. The new dollars, which are 1.043 inches in diameter and weigh 8.1 grammes, replace the cupro-nickel Eisenhower dollars.

Banking. On 31 Dec. 1979 there were 15,171 domestic banks doing a general deposit business with the public and having aggregate deposits of \$1,241,596m. Of these,

4,448 with deposits of \$594,970m. were national banks operating under charters granted by the federal government; the remaining banks, including trust companies and savings banks, were organized under the laws of the various states. Of the total number, 5,425 were members of the Federal Reserve System, namely, all the 4,448 national banks and 977 state banks admitted to membership.

The Federal Reserve System, established under an Act of 1913, comprises the Board of 7 Governors, the 12 regional Federal Reserve Banks with their 25 branches, the Federal Open Market Committee and the Federal Advisory Council. The 7 members of the Board of Governors are appointed by the President by and with the consent of the Senate. Each Governor is appointed to a full term of 14 years or an unexpired portion of a term, one term expiring every 2 years. No two may come from the same Federal Reserve District. The Board supervises the Reserve Banks and the issue and retirement of Federal Reserve notes; it designates 3 of the 9 directors of each Reserve Bank one of whom is designated Chairman; it passes on the admission of state banks to the System and has power to correct unsound conditions in State member banks or violations of banking law by them, including, if necessary, disciplinary action to remove officers and directors for unsafe or unsound banking practices or for continuous violations of banking laws; it also authorizes State member bank branches and approves mergers and consolidations if the acquiring, assuming or resulting bank is to be a State member; and it has power to control the expansion of bank holding companies and to require divestment of certain non-banking interests. The 12 members of the Federal Open Market Committee include the 7 members of the Board of Governors and 5 of the 12 Federal Reserve Bank presidents. The latter serve 1-year terms on the Committee in rotation except for the President of the Federal Reserve Bank of New York, who is a permanent member. The Federal Open Market Committee influences credit market conditions, money and bank credit, by buying or selling US Government securities; and it also supervises System operations in foreign currencies for the purpose of helping to safeguard the value of the dollar in international exchange markets and facilitating co-operation and efficiency in the international monetary system. The Board also influences credit conditions through powers to set member-bank reserve requirements, to approve discount rates at Federal Reserve Banks, and to fix margin requirements on stock-market credit.

The 12 Reserve Banks (one for each district) implement Federal Reserve policies, chiefly through their dealings with member banks, which, although outnumbered by non-member banks, hold about 73% of the country's total commercial banking deposits. The Reserve Banks hold bank reserves, advance funds to member banks, issue Federal Reserve notes, which are the principal form of currency in the US, act as fiscal agent for the Government and afford nation-wide cheque-clearing and fund transfer arrangements. They may issue notes, fully secured; discount paper for member banks; increase or reduce the country's supply of reserve funds by buying or selling Government securities and other obligations at the direction of the Federal Open Market Committee. Their capital stock is held by the member banks, but it carries no voting rights except in the election of directors.

Every member bank is required to subscribe to stock in the Reserve Bank of its district in an amount equal to 6% of its paid-up capital and surplus. Only one-half of the par value of the stock is paid in, the other half remaining subject to call by the Board of Governors. However, no call has been made for the second half of the subscription. The reserve balances which member banks must carry with Reserve Banks are based on the volume of their net demand and time deposits. The Board of Governors has the power to alter these requirements within limits. The Board of Governors also has authority to limit the rate of interest payable by member banks on time and savings deposits. Under provisions of the Defense Production Act of 1950 the Board of Governors prescribes regulations under which the Federal Reserve Banks act as fiscal agents of certain Government departments and agencies in guaranteeing loans made by banks and other private financing institutions to finance contracts for the procurement of materials or services which the guaranteeing agencies consider necessary for the national defence.

Under the Credit Control Act of 1969 the President is empowered to authorize

the Board of Governors to institute selective credit controls when necessary to curb inflation.

Beginning in 1968, the Congress passed a number of consumer credit protection acts, the first of which was the Truth in Lending Act (and including the Equal Credit Opportunity Act), Home Mortgage Disclosure Act, Consumer Leasing Act and the Fair Credit Billing Act, for which it has directed the Board to write implementing regulations and assume partial enforcement responsibility. To manage these responsibilities the Board has established a Consumers Affairs Division. To assist it, the Board consults with a Consumer Advisory Council, established by the Congress as a statutory part of the Federal Reserve System.

Another statutory body, the Federal Advisory Council, consists of 12 members (one from each district); it meets in Washington four times a year (or oftener) to advise the Board of Governors on general business and financial conditions.

Banks which participate in the federal deposit insurance fund have their deposits insured against loss up to \$40,000 for each depositor. The fund is administered by the Federal Deposit Insurance Corporation established in 1933; it obtains resources through annual assessments on participating banks.

All members of the Federal Reserve System are required to insure their deposits through the Corporation, and non-member banks may apply and qualify for insurance. On 31 Dec. 1979, 14,351 commercial banks with deposits of \$1,085,739m. were members of the insurance fund. This insurance also covered 324 mutual savings banks with deposits of \$132,338m. There were 496 uninsured banks comprising 357 commercial banks and trust companies and 139 mutual savings banks with deposits of \$23,519m. (in 1975 this figure included mutual savings banks only).

There are also banks which operate solely in the field of agricultural credits under the Farm Credit Administration; Federal Home Loan Banks makes advances to financial associations and institutions upon the security of home mortgages.

Weights and Measures. British weights and measures are usually employed, but the old Winchester bushel and wine gallon are used instead of the new or Imperial standards: *Wine gallon* = 0.83268 Imperial gallon; *Bushel* = 0.9690 Imperial bushel. Instead of the British cwt of 112 lb., one of 100 lb. is used; the *short* or *net ton* contains 2,000 lb.; the *long* or *gross ton*, 2,240 lb.

The two world wars and record levels of industrial production have hastened the depletion of once abundant supplies of metal and US is increasingly an importer. US is wholly or almost wholly dependent upon imports for industrial diamonds, bauxite, tin, chromite, nickel, strategic-grade mica and long-fibre asbestos; it imports the bulk of its tantalum, platinum, manganese, mercury, tungsten, cobalt and flake graphite, and substantial quantities of antimony, cadmium, arsenic, fluor spar, zinc, gypsum and bismuth.

In 1977 precious metals were mined mainly in Idaho, Arizona, Colorado, Utah, Montana and Missouri (in order of combined output of gold and silver). US output of gold (troy oz.), 1930-39, 31,453,370; 1940-49, 24,171,646; 1950-59, 18,817,241; total 1792-1970, 316,620,436. Output of silver (troy oz.), 1930-39, 466,412,499; 1940-49, 434,656,631; 1950-59, 374,055,521; total 1792-1970, 4,701,429,507.

Agriculture. Agriculture in the USA is characterized by its ability to adapt to widely varying conditions, and still produce an abundance and variety of agricultural products. From colonial times to about 1920 the major increases in farm production

were brought about by adding to the number of farms and the amount of land under cultivation. During this period nearly 320m. acres of virgin forest were converted to crop land or pasture, and extensive areas of grass lands were ploughed. Improvident use of soil and water resources was evident in many areas.

During the next 20 years the number of farms reached a plateau of about 6.5m., and the acreage planted to crops held relatively stable around 330m. acres. The major source of increase in farm output arose from the substitution of power-driven machines for horses and mules. Greater emphasis was placed on development and improvement of land, and the need for conservation of basic agricultural resources was recognized. A successful conservation programme, highly co-ordinated and on a national scale—to prevent further erosion, to restore the native fertility of damaged land and to adjust land uses to production capabilities and needs—has been in operation since early in the 1930s.

Following the Second World War the uptrend in farm output has been greatly accelerated by increased production per acre and per farm animal. These increases are associated with a higher degree of mechanization; greater use of lime and fertilizer; improved varieties, including hybrid maize and grain sorghums; more effective control of insects and disease; improved strains of livestock and poultry; and wider use of good husbandry practices, such as nutritionally balanced feeds, use of superior sites and better housing. During this period land included in farms decreased slowly, crop land harvested declined somewhat more rapidly, but the number of farms declined sharply.

Some significant changes during these transitions are:

All land in farms totalled less than 500m. acres in 1870, rose to a peak of over 1,200m. acres in the 1950s and declined to 1,088m. acres in 1974, even with the addition of the new States of Alaska and Hawaii in 1960. The number of farms declined from 6.35m. in 1940 to 2.68m. in 1978, as the acreage size of farms doubled. The average size of farms in 1978 was 400 acres, but ranged from 3 to many thousand acres. In 1969, 162,111 farms (170,706 in 1974) were 10 acres or less; 473,465 (453,187), 10–49 acres; 1,001,706 (852,800), 50–179 acres; 726,363 (612,176), 180–499 acres; 215,659 (205,970), 500–999 acres; 91,039 (92,653), 1,000–9,999 acres; 59,907 (62,634) over 2,000 acres.

Farms operated by owners or part-owners, 1974, were 2,052,000 (89% of all farms), by all tenants, 262,000 (11%). The proportion of farms operated by tenants is declining, and currently is three-tenths of the peak recorded in 1930. The average size of farms in 1974 was 252 acres for full-owners, 852 acres for part-owners and 467 acres for tenants. Farms with white operators numbered 1,631,926, and non-white operators 30,616. A higher proportion of non-white operators were tenants and operated a significantly smaller acreage than white operators.

Farms also vary widely in degree of specialization and output. About 60% of all farms received over half their farm income from a single enterprise, such as dairying, or from a single crop, such as cotton, wheat, tobacco or fruit. In 1978 (with 1960 figures in parentheses) large-scale, highly mechanized farms with sales of agricultural products totalling over \$20,000 per farm made up 33.7% (9%) of all farms and accounted for 91.2% (51%) of the value of farm products sold. Farms selling between \$2,500 and \$20,000 worth of products per farm were 32% (45%) of all farms and sold 8% (43%) of all sales. The remaining 34.3% (46%) of farms sold less than \$1,100 worth of products per farm in 1978, 0.9% (6%) of total sales. Many farms in this lowest sales class are called part-time or part-retirement farms. Operators in every sales category received off-farm income, but operators selling less than \$2,500 per year received 90.9% of their average income of \$18,943 from non-farm sources.

A century ago three-quarters of the total US population was rural, and practically all rural people lived on farms. In April 1978 less than 30% of the population was rural, and the 8m. farm residents comprised less than 4% of the total population.

Hired farm workers in 1978 averaged about 1.3m., and farm family workers, including operators, about 2.7m. In 1950 there were nearly 10m. farm workers. At that time each farm worker supplied farm products for 15 people, in 1974, 56 people, and in 1977, 59 people.

Forestry. In 1977 the US forest lands, including Alaska and Hawaii, capable of producing timber for commercial use, covered 482,485,900 acres (more than one-fifth of the land area), classified as follows: Saw-timber stands, 215,435,700 acres; pole timber stands, 135,609,900 acres; seedling and sapling stands, 115,032,100 acres; non-stocked and other areas, 16,408,200 acres. Ownership of commercial forest land is distributed as follows: Federal government, 99,410,400 acres; state, county, municipal and Indian, 36,311,200 acres; privately owned, 346,764,300 acres, including 115,777,100 acres on farms. Of the saw-timber stand (2,578,940m. bd ft) Douglas fir constitutes 514,317; Southern yellow pine, 321,563; Western yellow (ponderosa and jeffrey) pine, 192,638; other softwoods, 956,890; hardwoods, 593,532. In 1976 growing stock timber removals amounted to 14,229,023,000 cu. ft compared to net annual growth of about 21,664,316,000 cu. ft. Saw-timber removals amounted to 65,176,618,000 bd ft against an annual growth of 74,620,832,000 bd ft. The net area of the 154 national forests and other areas in USA and Puerto Rico administered by the US Forest Service, including commercial and non-commercial forest land, was on 30 Sept. 1979, 187,450,840 acres.

Fire takes a heavy annual toll in the forest; total area burned over in 1979 was 2,986,826 acres, of which 21% was commercial forest; 1,463,745,000 acres of land are now under organized fire-protection service. The area planted or seeded in forest and wind barrier nursery stock in the year ending 30 Sept. 1978 was 2,088,568 acres, an increase of 110,398 acres over the previous year.

Fisheries. The main fishing industries are in California (anchovy, tuna and sole); Alaska (notably salmon); Washington (salmon and halibut); Florida (the main source of turtles and sponges); Massachusetts, Maine, North Carolina and Oregon. Total catch, 1975, 5,350m. lb. tons valued at \$1,353m.

Tennessee Valley Authority. Established by Act of Congress, 1933, the TVA is a multiple-purpose federal agency which carries out its duties in an area embracing some 41,000 sq. miles, in 125 counties (aggregate population, about 7.2m.) in the 7 Tennessee River Valley states: Tennessee, Kentucky, Mississippi, Alabama, North Carolina, Georgia and Virginia. In addition, 76 counties outside the Valley are served by TVA power distributors. Its 3 directors are appointed by the President, with the consent of the Senate; headquarters are in Knoxville, Tenn. There were 48,800 employees in Aug. 1979.

Under the Act its chief duties are flood control; the maintenance of navigation; generation, transmission and sale of electric power; the development and production of fertilizers and munitions; assistance in forestry development; and related activities in a single unified approach to resource development. There are 59 dams and reservoirs (29 built by TVA) operating in TVA's integrated water control system. A navigable channel 650 miles long, connecting with the American system of inland waterways, in 1977 carried 26.6m. tons of traffic in iron and steel products, grains, coal, petroleum, chemicals and other products. Flood damages averted by river control exceed \$1,900m.

TVA supplies electric power to 160 local distribution systems serving 2.7m. customers in an area of 80,000 sq. miles. The TVA power system originated with the water-power development of the Tennessee River, but has become predominantly a coal-fired system as power requirements have outgrown the region's hydro-electric potential. In fiscal year 1978 the TVA system generated 117,370m. kwh.; the same region used 1,500m. kwh. in 1933 before TVA operations began. Installed capacity, 1978, was about 28.3m. kw., with another 19.6m. kw. under construction in nuclear and pumped-storage installations. Residential consumers served by TVA power distributors used an average of 16,190 kwh. in fiscal year 1978 at an average rate of about 2.7 cents per kwh.; US averages were 8,849 kwh. and about 4 cents.

Another activity is experimentation in the development and manufacture of mineral fertilizers accompanied by programmes designed to encourage proper fertilizer use in all parts of the country. The TVA works closely with other federal agencies, and with state and local authorities in combating soil erosion, improving forest resources, improving agriculture and to the development of local industries based on natural resources.

In the depression year, 1933, the average *per capita* income in the Valley region was \$168 compared with the national average of \$375; in 1977 the region's *per capita* income had multiplied over 33 times to \$5,630 while the national average had increased 18 times.

Other TVA activities include demonstration of effective ways of reclaiming strip-mined areas, development of new and improved methods of controlling air and water pollution, and a leading role in the US programme of energy development and conservation.

Power operations are financially self-supporting from revenues. In fiscal year 1978 power revenues were \$2,350.1m. and net income \$216.6m. Power facilities are financed from revenues and the sale of revenue bonds and notes, and TVA is repaying appropriations previously invested in power facilities. In fiscal year 1978 TVA paid the US Treasury \$20m. as a capital repayment and \$61.7m. in dividends on the remaining appropriation investment, making a total of \$1,505m. to date paid to the Treasury from power revenues. Other TVA resource development programmes continue to be financed primarily from appropriations, which amounted to \$138m. in fiscal year 1978.

INDUSTRY AND TRADE

Industry. The following table presents industry statistics of manufactures as reported at various censuses from 1909 to 1977 and from the Annual Survey of Manufactures for years in which no census was taken. The figures for 1958 to 1977 include data for some establishments previously classified as non-manufacturing. The figures for 1939, but not for earlier years, have been revised to exclude data for establishments classified as non-manufacturing in 1954. The figures for 1909-33 were previously revised by the deduction of data for industries excluded from manufacturing during that period.

The statistics for 1958, 1963, 1967, 1972 and 1977 relate to all establishments employing 1 or more persons anytime during the year; for 1950, 1956-57, 1959-62, 1964-66 and 1968-74 on a representative sample of manufacturing establishments of 1 or more employees; for 1929 through 1939, those reporting products valued at \$5,000 or more; and for 1909 and 1919, those reporting products valued at \$500 or more. These differences in the minimum size of establishments included in the census affect only very slightly the year-to-year comparability of the figures.

The annual Surveys of Manufactures carry forward the key measures of manufacturing activity which are covered in detail by the Census of Manufactures. The estimate for 1950 is based on reports for approximately 45,000 plants out of a total of more than 260,000 operating manufacturing establishments; those for 1956-57 on about 50,000, and those for 1959-62, 1964-66 and 1968-74 on about 60,000 out of about 300,000. Included are all large plants and representative samples of the much more numerous small plants. The large plants in the surveys account for approximately two-thirds of the total employment in operating manufacturing establishments in the US.

¹ For the period 1954-67 value added represents adjusted value added and for earlier years unadjusted value added. Unadjusted value is obtained by subtracting cost of materials, supplies and containers, fuel, electricity and contract work from the value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account value added by merchandizing operations plus net change in finished goods and work-in-process inventories between the beginning and end of the year.

For comparison of broad types of manufacturing, the industries covered by the Census of Manufactures have been divided into 20 general groups according to the

Standard Industrial Classification. This was revised in 1972; 1967 figures are not therefore strictly comparable.

Wholesale price index of iron and steel (1967 = 100) was: 1950, 59.4; 1960, 96.4; 1970, 114.3; 1975, 197.2; 1976, 209.8; 1977, 229.9; 1978, 254.4; 1979, 280.4.

Leading producers of pig-iron in 1978 were: Indiana, 18.81m. net tons; Pennsylvania, 18.15m.; Ohio, 14.3m.; Illinois, 6.9m.

Consumption of ore, 1979, was 128.57m. net tons, of which blast-furnaces took 104.7m. tons; agglomerating plants, 22.79m. tons; and steel producing furnaces, 1,039,000 tons.

The iron and steel industry in 1979 employed 341,931 wage-earners (compared with 449,888 in 1960), who worked an average of 37.5 hours per week and earned an average of \$12.55 per hour; total wages were \$8.397m. and total salaries for 111,250 employees were \$3,085m.

Labour. The American trade unions comprise about 174 national and international unions plus a large number of small independent local or single-firm unions. In 1979 total membership was approximately 21.7m., including 1.5m. Canadian workers affiliated with American unions and under 120,000 others outside the USA. The American Federation of Labor (founded 1881 and taking its name in 1886) and the Congress of Industrial Organizations merged into one organization, named the AFL-CIO, in Dec. 1955, representing 17m. workers in 1978.

Unaffiliated or independent unions, inter-state in scope, including those organizing coalminers, teamsters and government employees and railroad workers, had an estimated total membership excluding all foreign members (1978) of about 4.5m. In addition, 34 professional and state employee associations represent approximately 2.6m. members for collective bargaining purposes. Together, unions affiliated with the AFL-CIO, unaffiliated unions and professional and state employee associations represented 22.7m. workers or 22.3% of the labour force in 1978.

The Labor-Management Relations (Taft-Hartley) Act, 1947, applicable to industries affecting inter-state commerce, prohibits the closed shop, but permits union-shop arrangements except where forbidden by state laws. Statutes regulating, restricting or prohibiting closed shop or other types of union security agreements are

in effect in 20 states which ban all types of union security agreements (Alabama, Arizona, Arkansas, Florida, Georgia, Iowa, Kansas, Louisiana, Mississippi, Nebraska, Nevada, North Carolina, North Dakota, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia and Wyoming). Colorado and Wisconsin ban all union agreements unless a certain percentage of employees have voted for them; in Hawaii an all-union agreement may be entered into unless a majority of employees votes against it. Thirteen states have acts to prevent industrial disputes between public utilities and their employees by means of compulsory arbitration or seizure however, a number of these laws have been declared unconstitutional in so far as industries in inter-state commerce are concerned. Laws to restrict or regulate picketing or other strike activities have been enacted in over half the states. About one-half of the states also prohibit certain types of strikes, as 'sit down', jurisdictional or sympathy strikes.

The Employee Retirement Income Security Act of 1974 protects the interests of workers and their beneficiaries who are entitled to benefits from employee pension and welfare plans. The law requires disclosure of plan provisions and financial information and establishes standards of conduct for trustees and administrators of welfare and pension plans. It provides funding, participation and vesting requirements for pension plans and makes termination insurance available for most pension plans. The Department of Labor and the Internal Revenue Service share administration of the law. The pension plan termination insurance programme is administered by the Pension Benefit Guaranty Corporation.

The law does not require a company to establish a welfare or pension plan. But it does provide that any employee not covered by a pension plan, other than Social Security, may put aside a certain amount of his income, tax-free, to take care of his retirement needs.

Minimum wage laws governing private employers are in operation in 45 jurisdictions: 41 states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands have minimum wage laws and minimum wage rates. As of 1 Aug. 1978, all but one of the laws cover men, women and, usually, minors. The exception covers only women and minors. The minimum wage rate under federal law is \$3.35 per hour for employees who are engaged in commerce, in the production of goods for commerce or in certain enterprises which are engaged in commerce as well as federal employees.

A total of 4,825 strikes and lockouts occurred in 1979, involving 1.7m. workers and 34.8m. idle days; the number of idle days was 0.15% of the year's total working time of all workers.

There are 3 federal agencies which provide formal machinery for the adjustment of labour disputes: (1) The Federal Mediation and Conciliation Service, now an independent agency, whose mediation services are available 'in any labor dispute in any industry affecting commerce'; under Executive Order 11491, as amended, to federal agencies and organizations of federal employees involved in negotiation disputes; and in state and local government collective bargaining disputes when adequate dispute resolution machinery is not available to the parties. Its aim is to prevent and minimize work stoppages. (2) The National Mediation Board (1934) provides much the same facilities for the railroad and air-transport industries pursuant to the Railway Labor Act. (3) The National Railroad Adjustment Board (1934) acts as a board of final appeal for grievances arising over the interpretation of existing collective agreements under the Railway Labor Act; its decisions are binding upon both sides and enforceable by the courts.

The National Labor Relations Act, as amended by the Labor Management Relations (Taft Hartley) Act, 1947 (*see* THE STATESMAN'S YEAR-BOOK, 1955, p. 617), was amended by the Labor Management Reporting and Disclosure Act, 1959, and again amended in 1974. The 1959 Act requires extensive reporting and disclosure of certain financial and administrative practices of labour organizations, employers and labour relations consultants. In addition, certain powers are vested in the Secretary of Labor to prevent abuses in the administration of trusteeships by labour organizations, to provide minimum standards and procedures for the election of union officers and to establish rules prescribing minimum standards for determining the adequacy of union procedures for the removal of officers. Other provisions impose a fiduciary responsibility upon union officers and provide

for the exclusion of those convicted of certain named felonies from office for specified periods; more stringently regulate secondary boycotts and banning of 'hot' cargo agreements; put limitations upon organizational and recognition picketing and permit States to assert jurisdiction over labour disputes where the National Labor Relations Board declines to act. The Act also contains a 'Bill of Rights' for union members (enforceable directly by them) dealing with such things as equal rights in the nomination and election of union officers, freedom of speech and assembly subject to reasonable union rules, and safeguards against improper disciplinary action.

The Census of Population (1 April 1970) showed that the total labour force was 82,048,781 (58.2% of those 16 years and over); the armed forces accounted for 1,997,735 and the civilian labour force for 80,051,046, of whom 76,553,599 were employed and 3,497,447—or 4.4%—were unemployed. The following table shows employment by industry group and sex and percentage distribution of the total:

The Bureau of Labor Statistics estimated the average total labour force (including armed forces) during 1979 at 105m., of the civilian labour force (102.91m.), 6m. persons (6%) were unemployed; 3.3m. were working in agriculture and 94m. in non-agricultural industries. The Bureau estimated that an average of 21.06m. persons were employed in manufacturing, 20,269,000 in trade and 15.92m. in civilian government services.

Tourism. In 1975, 15,698,000 tourists visited the USA and spent \$4,875m. They came mainly from Canada (9.9m.), Mexico (2.15m.), Japan (746,000), the UK (438,000) and the Federal Republic of Germany (298,000).

COMMUNICATIONS

Roads. On 31 Dec. 1978 the total US highway mileage, including rural and urban roads, amounted to 3,885,452 miles, of which 3,202,799 miles were surfaced roads. The total mileage cited includes 704,421 miles of rural roads under control of the states, 2,255,526 miles of local roads, 230,850 miles of federal park and forest roads, and 694,655 miles of municipal roads and streets. Expenditures for construction and maintenance amounted to \$23,874m. in 1978.

By the end of 1978, toll roads, financed by private capital through bond issues and administered by state toll authorities, totalled 4,812 miles (including some under construction) compared with 344 miles in 1940. Additional toll-road programmes contemplated at present will add approximately 1,578 miles to the toll-road network.

Motor vehicles registered in the calendar year 1978 were (Federal Highways Administration) 148,777,965, including 116,574,999 automobiles, 500,362 buses and 31,702,604 trucks.

Road haulage of goods by motor lorries and trucks in 1978 used 31,702,604 vehicles (250,048 in 1916). The motor vehicle-related industry (1977) employed 13.9m. workers, or 1 out of every 5 employed in the USA.

Inter-city trucks (private and for hire) averaged 602,000m. revenue net ton-miles in 1978. Of the 500,362 buses in service in 1978, 396,387 were school buses. Inter-city service operated a total of 1,082m. bus-miles and carried a total of 4,406m. revenue passengers in 1978.

There were 49,500 deaths in road accidents in 1977.

Railways. Railway history in the USA commences in 1828, but the first railway to convey both freight and passengers in regular service (between Baltimore and Ellicott's Mills, Md., 13 miles) dates from 24 May 1830. Mileage rose to 52,922 miles in 1870; to 167,191 miles in 1890, and to a peak of 266,381 miles in 1916, falling thereafter to 261,871 in 1925; 246,739 in 1940 and 222,164 in 1969 (these include some duplication under trackage rights and some mileage operated in Canada by US companies). The ordinary gauge is 4 ft 8½ in. (about 99.6% of total mileage). The USA has about 29% of the world's railway mileage.

In addition to the independent railroad companies, railway service is provided by two federally-assisted organizations, the National Railroad Passenger Corporation (Amtrak), and the Consolidated Rail Corporation (Conrail).

Amtrak was set up on 1 May 1971 to maintain a basic network of inter-city passenger trains with government assistance, and is responsible for almost all non-commuter services with 27,000 miles of route.

Conrail is the organization established on 1 April 1976 to run freight services in the industrial north-east formerly operated by the bankrupt Penn Central, Reading, Lehigh Valley, Central of New Jersey, Erie Lackawanna, Lehigh & Hudson railroads, and Pennsylvania-Reading Seashore Lines.

The following table, based on the figures of the Interstate Commerce Commission, shows some railway statistics for 4 calendar years:

Aviation. In civil aviation there were, on 31 Dec. 1979, 814,667 certified pilots (including 210,180 student pilots) and 251,516 registered civil aircraft.

Airports on 31 Dec. 1979: Air carrier, 730; general aviation, 14,016. Of these airports, 12,064 were conventional land-based, while 524 were seaplane bases, 2,107 were heliports and 50 stolports (STOL—Short Take-Off and Landing).

Statistics from the Civil Aeronautics Board indicate that for 12 months ended June 1979 on US flag carriers in scheduled international service there were 24.4m. enplanements with 319m. aircraft miles (excluding all-cargo) for a total of 53,953m. revenue passenger-miles. The non-scheduled airlines had a total of 6,526m. revenue passenger-miles internationally. Domestically US scheduled airlines in 1979 had 286.7m. enplanements with a total of 2,443m. aircraft miles for 207,430m. revenue passenger-miles. Non-scheduled airlines in the US recorded 454m. revenue passenger-miles in 1979. (A revenue passenger-mile is one paying passenger carried per mile.)

Shipping. On 1 Sept. 1979 the US merchant marine included 870 sea-going vessels of 1,000 gross tons or over, with aggregate dead-weight tonnage of 23m. This included 305 tankers of 15.2m. DWT.

On 1 Sept. 1979 US merchant ocean-going vessels were employed as follows: Active, 558 of 19m. DWT, of which 266 of 9.2m. tons were foreign trade, 226 of 8.6m. tons in domestic trade and 66 of 1.2m. tons in other US agency operations. Inactive vessels totalled 4m. DWT; 42 of 1.2m. DWT privately owned were laid up and 270 of 2.7m. tons were in the National Defense reserve fleet. Of the total vessels in the US fleet, 576 of 20m. DWT were privately owned.

US exports and imports carried on dry cargo and tanker vessels in the year 1977 totalled 775.3m. long tons, of which 34.8m. long tons or 4.5% were carried in US flag vessels.

Post and Broadcasting. The telephone business is largely in the hands of the American Telephone and Telegraph Company and its telephone operating subsidiaries, which together are known as the Bell Telephone System. There are, however, many hundreds of smaller telephone companies having no common ownership affiliation with the Bell companies, but which connect with them for universal service, countrywide and worldwide. The message telegraph and telex services are in the hands of The Western Union Telegraph Company, but it competes with the telephone industry in providing private leased lines.

The number of telephones in service in the USA has increased in the period since the close of the Second World War much more proportionately than has the population. Among principal reasons there may be cited the facts that an increasingly high percentage of families have telephones installed in their homes, and extension phones associated with the main home telephones have become increasingly common.

In marked contrast, the number of public telegrams has decreased by more than 80%. Telegrams have lost favour due to shifts in user preference to the air-mail and

to the telephone. The telex services of the telegraph company have also found broad acceptance in place of telegrams for business purposes. The following table contains key data items on a comparative basis for the domestic telephone and message telegram services:

International communication services, providing overseas connexions with all parts of the world, are furnished principally by the American Telephone and Telegraph Company and three telegraph companies. The old-type telegraph-only-transmission-capability ocean cables have all been abandoned in favour of using telegraph circuits derived from voice channels in the newer telephone ocean cables which have also made inroads on the use of high-frequency radio. More recently, satellite communications facilities have been utilized not only for telephone and telegraph services but for television transmission as well.

International overseas telegrams, inbound to and outbound from the continental U.S. numbered 12.5m. in 1978 (13.2m. in 1976). This service has tended to decline in volume in recent years. It has lost ground to the air-mail and, in addition, in more recent years to the telex and telephone services. For the US and its possessions the volume of international overseas telephone calls has grown enormously with the availability of the excellent voice-transmission qualities provided in the telephone ocean cables and in the satellite radio relays. Whereas, international telephone calls were 990,000 in 1955, the last year in which there was no cable service available, there were 94.6m. such calls in 1978.

On 1 Jan. 1975 there were in the USA and Territories, 7,068 authorized commercial radio stations, 711 commercial television stations; of non-commercial stations 717 were for radio, 241 for television.

Cinemas. Cinemas increased from 17,003 in 1940 to 20,239 in 1950 and decreased to 12,187 in 1967.

Newspapers. Of the daily newspapers being published in the USA in 1971, 339 were morning papers with a circulation of 26,116,000, and 1,425 were evening papers with a circulation of 36,115,000. The 590 Sunday papers had a total circulation of 19.7m.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Legal controversies may be decided in two systems of courts: the federal courts, with jurisdiction confined to certain matters enumerated in Article III of the Constitution, and the state courts, with jurisdiction in all other proceedings. The federal courts have jurisdiction exclusive of the state courts in criminal prosecutions for the violation of federal statutes, in civil cases involving the government, in bankruptcy cases and in admiralty proceedings, and have jurisdiction concurrent with the state courts over suits between parties from different states, and certain suits involving questions of federal law.

The highest court is the Supreme Court of the US, which reviews cases from the lower federal courts and certain cases originating in state courts involving questions of federal law. It is the final arbiter of all questions involving federal statutes and the Constitution; and it has the power to invalidate any federal or state law or executive action which it finds repugnant to the Constitution. This court, consisting of 9 justices who receive salaries of \$60,000 a year (the Chief Justice, \$62,500), meets from Oct. until June every year and disposes of about 3,380 cases, deciding about 380 on their merits. In the remainder of cases it either summarily affirms lower court decisions or declines to review. A few suits, usually brought by state governments, originate in the Supreme Court, but issues of fact are mostly referred to a master.

The US courts of appeals number 11 (in 10 circuits composed of 3 or more states and 1 circuit for the District of Columbia); the 97 circuit judges receive salaries of \$42,500 a year. Any party to a suit in a lower federal court usually has a right of appeal to one of these courts. In addition, there are direct appeals to these courts from many federal administrative agencies. In the year ending 30 June 1976 more than 18,400 appeals were filed in the courts of appeals.

The trial courts in the federal system are the US district courts, of which there are 89 in the 50 states, 1 in the District of Columbia and 1 each in the territories of Puerto Rico, Virgin Islands, Canal Zone and Guam. Each state has at least 1 US district court, and 3 states have 4 apiece. Each district court has from 1 to 27 judgeships. There are 400 US district judges (\$40,000 a year), who handle about 130,600 civil cases and 55,000 criminal defendants every year.

In addition to these courts of general jurisdiction, there are special federal courts of limited jurisdiction. The Court of Claims (7 judges at \$42,500 a year) decides claims for money damages against the federal government in a wide variety of matters; the Customs Court (9 judges at \$40,000 a year) determines controversies concerning the classification and valuation of imported merchandise; and the Court of Customs and Patent Appeals (5 judges at \$42,500 a year) hears appeals from the Customs Court, the Tariff Commission and the Patent Office.

The judges of all these courts are appointed by the President with the approval of the Senate; to assure their independence, they hold office during good behaviour and cannot have their salaries reduced. This does not apply to the territorial judges, who hold their offices for a term of years. The judges may retire with full pay at the age of 70 years if they have served a period of 10 years, or at 65 if they have 15 years of service, but they are subject to call for such judicial duties as they are willing to undertake. Only 9 US judges up to 1974 have been involved in impeachment proceedings, of whom 3 district judges and 1 commerce judge were convicted and removed from office.

Of the 130,597 civil cases filed in the district courts in the year ending 30 June 1976, about 70,372 arose under various federal statutes (such as labour, social security, tax, patent, securities, antitrust and civil rights laws); 25,736 involved personal injury or property damage claims; 23,998 dealt with contracts; and 8,475 were actions concerning real property.

Of the 37,667 criminal cases filed in the district courts in the year ending 30 June 1974, about 1,900 were charged with alleged infractions of the immigration laws; 3,000, the transport of stolen motor vehicles; about 3,225 larceny and theft; 4,700, embezzlement and fraud; about 650, liquor laws, and 7,400 narcotics laws.

Persons convicted of federal crimes are either fined, released on probation under the supervision of the probation officers of the federal courts, confined in prison for

a period of up to 6 months and then put on probation (known as split sentencing) or confined in one of the following institutions: 3 for juvenile and youths; 7 for young adults; 7 for intermediate term adults; 7 for short-term adults; 2 for females; 1 hospital and 15 community service centres. In addition, prisoners are confined in centres operated by the National Institutes of Mental Health. In addition, prisoner drug addicts may be committed to US Public Health Service hospitals for treatment. In 1972-73 about 1,500 of the federal prison population were placed on work release, that is, they were confined in community treatment centres at night and permitted to work at gainful employment during the weekdays. Prisoners confined in institutions operated by the US Bureau of Prisons for the year ending 30 June 1973, numbered 23,336.

The state courts have jurisdiction over all civil and criminal cases arising under state laws, but decisions of the state courts of last resort as to the validity of treaties or of laws of the US, or on other questions arising under the Constitution, are subject to review by the Supreme Court of the US. The state court systems are generally similar to the federal system, to the extent that they generally have a number of trial courts and intermediate appellate courts, and a single court of last resort. The highest court in each state is usually called the Supreme Court or Court of Appeals with a Chief Justice and Associate Justices, usually elected but sometimes appointed by the Governor with the advice and consent of the State Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. Their salaries range from \$14,000 to \$40,000 a year. The lowest tribunals are usually those of Justices of the Peace; many towns and cities have municipal and police courts, with power to commit for trial in criminal matters and to determine misdemeanours for violation of the municipal ordinances; they frequently try civil cases involving limited amounts.

The Federal Bureau of Investigation estimates the number of major crimes in the US and its possessions as follows:

<i>Crime index classification</i>	<i>1959-61 average</i>	<i>1975</i>	<i>Crime index classification</i>	<i>1959-61 average</i>	<i>1975</i>
Murder	8,670	20,510	Burglary	789,300	3,252,100
Forcible rape	15,860	56,090	Larceny over \$50	464,300	5,977,700
Robbery	87,570	464,970	Motor car theft	312,000	1,000,500
Aggravated assault	129,400	484,710			
			Total	1,807,100	11,256,600

The death penalty is illegal in Alaska, Hawaii, Iowa, Maine, Minnesota, Oregon, West Virginia, Wisconsin and Michigan; in North Dakota it is legal only for treason and first-degree murder committed by a prisoner serving a life sentence for first-degree murder, in Rhode Island only for murder committed by a prisoner serving a life sentence and in Vermont and New York for the murder of a peace officer in the line of duty and for first-degree murder by those who kill while serving a life sentence for murder. The death penalty, although still legal in most states, has fallen into disuse and has been abolished *de facto* in many states. The US Supreme Court has held the death penalty, as applied in general criminal statutes, to contravene the eighth and fourteenth amendments of the US constitution, as a cruel and unusual punishment when used so irregularly and rarely as to destroy its deterrent value.

In 1967 only 2 persons were executed under civil authority; both for murder. There were no executions 1968-76. In 1977 a convicted murderer requested that he should be executed and after a lengthy legal dispute the sentence was carried out at Utah state prison. In Jan. 1977, 350 prisoners were reported under sentence of death.

The total number of civilian executions carried out in the US from 1930 to 1967 was 3,859, including 1,751 white persons (20 women), 2,066 Negroes (12 women) and 42 persons of other races.

Federal 'Political' Crimes. Prosecutions for what may be loosely described as 'political' offences, or crimes directed towards the overthrow by violence of the federal government, which were somewhat numerous in the early 1950s, have declined sharply over the last 15 years and are now exceedingly rare. During the fiscal year 1975-76 the following number of defendants appeared in federal courts: Espionage, none; Subversive Activities Control Act, 1950, none; contempt of Congress, none.

Education. Under the system of government in the USA, elementary and secondary education is committed in the main to the several states. Each of the 50 states and the District of Columbia has a system of free public schools, established by law, with courses covering 12 years plus kindergarten. There are 3 structural patterns in common use: the K8-4 plan, meaning kindergarten plus 8 elementary grades followed by 4 high school grades; the K6-3-3 plan, or kindergarten plus 6 elementary grades followed by a 3-year junior high school and a 3-year senior high school; and the K6-6 plan, kindergarten plus 6 elementary grades followed by a 6-year high school. All plans lead to high-school graduation, usually at age 17 or 18. Vocational education is an integral part of secondary education. In addition, some states have, as part of the free public school system, 2-year colleges in which education is provided at a nominal cost. Each state has delegated a large degree of control of the educational programme to local school districts (numbering 15,929 in autumn 1979), each with a board of education (usually 3 to 9 members) elected locally and serving mostly without pay. The school policies of the local school districts must be in accord with the laws and the regulations of their state Departments of Education. While regulations differ from one jurisdiction to another, in general it may be said that school attendance is compulsory between the ages of 7 to 16.

The Census Bureau estimates that in Nov. 1969 only 1,433,000 or 1% of the 143m. persons who were 14 years of age or older were unable to read and write; in 1930 the percentage was 4.8. In 1940 a new category was established—the 'functionally illiterate', meaning those who had completed fewer than 5 years of elementary schooling; for persons 25 years of age or over this percentage was 3.5 in March 1979 (for the non-white population alone it was 9.2%); it was 1 for white and 0.9% for non-whites in the 25-29-year-old group. The Bureau reported that in March 1979 the median years of school completed by all persons 25 years old and over was 12.5, and that 16.4% had completed 4 or more years of college. For the 15-29-year-old group, the median school years completed was 12.9 and 23.1% had completed 4 or more years of college.

In the autumn of 1979, 11,569,899 students (5,682,877 men and 5,887,022 women) were enrolled in 3,150 colleges and universities; 2,502,896 were first-time students. Total enrolment in colleges and universities represents a number equal to 39.5 per 100 persons between the ages of 18 and 24.

Public elementary and secondary school revenue is supplied from the county and other local sources (44.5% in 1978-79), state sources (45.7%) and federal sources (9.8%). In 1978-79 expenditure for public elementary and secondary education totalled about \$89,000m., including \$79,300m. for regular day school programmes, \$1,200m. for other programmes, \$5,900m. for capital outlay and \$2,600m. for interest on school debt. The current expenditure per pupil in average daily attendance was about \$2,062. The total cost per pupil, also including capital outlay and interest, amounted to about \$2,284. Estimated total expenditures, for private elementary and secondary schools in 1978-79 were \$10,600m. In 1978-79 the 3,134 universities and colleges expended \$50,721m. from current funds, of which \$33,733m. was spent by institutions under public control. The federal government contributed 15.1% of total current-fund revenue; state governments, 31.6%; student tuition and fees, 20.6%; and all other sources, 32.7%.

Vocational education below college grade, including the training of teachers to conduct such education, has been federally aided since 1918. During the school year 1978-79 enrolments in the vocational classes were: Agriculture, 971,726; distributive occupations, 942,057; health occupations, 798,520; home economics, 4,300,124; trade and industry, 3,436,089; technical education, 484,076; office occupations, 3,469,134; other programmes, 2,866,316. Federal support funds were \$550,896,000.

Summary of statistics of regular schools (public and non-public), teachers and pupils in autumn 1979 (compiled by the US National Center for Education Statistics):

Most of the non-public elementary and secondary schools are affiliated with religious denominations. Of the children attending non-public elementary and secondary schools in 1978-79, 3.27m. or 64.3% were enrolled in Roman Catholic schools.

During the school year 1978-79 high-school graduates numbered 3,134,000 (1,532,000 boys and 1,602,000 girls). Institutions of higher education conferred 921,390 bachelor's degrees for the academic year 1978-79, 477,344 to men and 444,046 to women; 301,079 master's degrees, 153,370 to men and 147,709 to women; 32,730 doctorates, 23,541 to men and 9,189 to women; and 68,848 first professional degrees, 52,652 to men and 16,196 to women.

During the academic year, 1978-79, 263,940 foreign students were enrolled in American colleges and universities. The percentages of students coming from various areas were: Asia, 55.7; Latin America, 15.6; Africa, 12.9; Europe, 8.2; North America, 5.9; Oceania, 1.6.

School enrolment, Oct. 1979, embraced 96% of the children who were 5 and 6 years old; 99% of the children aged 7-13 years; 94% of those aged 14-17, 45% of those aged 18 and 19, 30% of those aged 20 and 21, and 16% of those aged 22-24 years.

The US National Center for Education Statistics estimates the total enrolment in the autumn of 1980 at all of the country's regular educational institutions (public and non-public) at 58m. (58,491,000 in the autumn of 1979); this was 26.5% of the total population of the USA as of 1 Sept. 1979.

Enrolment at the elementary and secondary school level is expected to be down by 1.9% in autumn 1980 and total enrolment in the colleges and universities to rise by 3.2%.

The number of teachers in the public and non-public elementary and secondary schools in the autumn of 1980 is expected to decrease slightly to 2.45m. The average annual salary of the public school teachers was about \$16,100 in 1979-80.

Health and Welfare. Admission to the practice of medicine (for both doctors of medicine and doctors of osteopathic medicine) is controlled in each state by examining boards directly representing the profession and acting with authority conferred by state law. Although there are an increasing number of variations, the usual time now required to complete basic training is 8 years beyond the secondary school with an additional year of graduate training. Certification as a specialist may require as much as 5 more years of graduate training plus experience in practice. In academic year 1979-80 the 140 US schools (including 14 osteopathic and 126 medical) graduated 15,970 physicians. About 27% of first-year students were women. In Dec. 1979 the total estimated number of active physicians (MD and DO - in all forms of practice) in the US, Puerto Rico and outlying US areas was 598,340. The distribution of physicians throughout the country is uneven, both by state and by urban-rural areas.

In 1979-80 the 60 dental schools graduated 5,424 dentists. Active dentists in Dec. 1979 numbered 118,330. New York state had 1 active civilian dentist to 1,479 population and Mississippi, 1 to 3,458.

In Oct. 1979, there were 1,374 registered nursing programmes in the US and (1978), 77,132 graduates of registered nursing programmes. In Dec. 1979 an estimated 1,119,100 registered nurses were employed full- or part-time (1 to 198 inhabitants).

Number of hospitals listed by the American Hospital Association in 1978 was 7,015, with 1,381,000 beds and 37,243,000 admissions during the year; average daily census was 1,020,000. Of the total, 370 hospitals with 122,000 beds were operated by the federal government; 1,843 with 215,000 beds by state and local government; 3,360 with 684,000 beds by non-profit organizations (including church groups), 732 with 81,000 beds are proprietary. The categories of non-federal hospitals are 5,935 short-term general and special hospitals with 980,000 beds; 169 non-federal long-term general and special hospitals with 41,000 beds; 526 psychiatric hospitals with 235,000 beds; 15 tuberculosis hospitals with 3,000 beds. Hospital beds in short-term general facilities range from 2 (Alaska) to 6.2 (North Dakota) hospital beds per 1,000 population¹; the national average is 4.4. It was estimated that, in 1979, more than 130,000 additional beds in general hospitals and 127,429 additional long-term care beds (nursing homes and chronic disease hospitals) were needed.

¹ Excluding District of Columbia.

Social welfare legislation was chiefly the province of the various states until the adoption of the Social Security Act of 14 Aug. 1935. This as amended provides for a federal system of old-age, survivors and disability insurance; health insurance for the aged and disabled; supplemental security income for the aged, blind and disabled; federal state unemployment insurance; and federal grants to states for public assistance (medical assistance for the aged and aid to families with dependent

children generally) and for maternal and child-health and child-welfare services. The Social Security Administration of the Department of Health, Education and Welfare has responsibility for the programmes—old-age, survivors and disability insurance, supplemental security income and aid to families with dependent children. The Health Care Financing Administration, an agency of the same Department, has federal responsibility for health insurance for the aged and disabled (Medicare) and medical assistance (Medicaid). The Department's Office of Human Development administers all human development and social services programmes, and its Public Health Service is responsible for maternal and child-health services. Unemployment insurance is the responsibility of the Department of Labor.

The Social Security Act provides for protection against the cost of medical care through the two-part programme of health insurance for people 65 and over and for certain disabled people under 65, who receive disability insurance payments or who have permanent kidney failure (Medicare). During fiscal year 1978, payments totalling \$17,400m. were made under the hospital insurance part of Medicare on behalf of 6m. people. During the same period, \$6,900m. was paid under the voluntary medical insurance part of Medicare on behalf of 15.6m. people.

In 1978 about 110m. persons worked in employment covered by old-age, survivors and disability insurance.

In June 1978, over 34m. beneficiaries were on the rolls, and the average benefit paid to a retired worker (not counting any paid to his dependants) was about \$260 per month.

Benefits paid during fiscal year 1978 totalled \$88,600m., including \$11,900m. paid to disabled workers and their dependants.

In calendar year 1977, over 11m. persons (adults and children) were receiving payments under aid to families with dependent children (average monthly payment, \$237.97 per family). Total payments under aid to families with dependent children were \$10,200m. for the calendar year.

In Sept. 1978, more than 4.2m. persons were receiving supplemental security income payments, including over 1.9m. persons aged 65 or over; 77,258 blind persons, and over 2.1m. disabled persons. Payments, including supplemental amounts from various states, totalled \$550m.

During the fiscal year 1970-71 federal appropriations for grants to states were made for maternal and child health services amounting to \$59.2m.; for crippled children's services, \$58.6m., and for child welfare services, \$46m. I. STATISTICAL INFORMATION

Within the federal government of the USA, responsibilities for the collection, compilation, analysis and publication of statistics are decentralized among a number of agencies, with specified responsibilities for general-purpose statistics in particular areas. In addition, most agencies of the Government collect statistical data as a by-product of their administrative or operating responsibilities in specific fields. Responsibility for co-ordinating the decentralized statistical activities rests in the Office of Statistical Standards, Bureau of the Budget, Washington 25, D.C., as a part of the Executive Office of the President. This Office reviews all proposed collections of statistical data to avoid duplication or overlapping; promotes the use of improved statistical techniques; develops standard definitions and classifications so that the data collected by different agencies are comparable; serves as liaison between federal agencies and international organizations and as an information centre on government statistical programmes. The Division does not itself collect or publish statistics.

The major general-purpose statistical agencies and their principal areas of responsibility are:

(1) Bureau of the Census in the Department of Commerce (A. Ross Eckler, Director). Decennial censuses of population and housing and quinquennial censuses of agriculture, manufactures and business; current statistics on population and the labour force, manufacturing activity and commodity production, retail and wholesale trade and services, foreign trade, and state and local government finances and operations.

(2) Bureau of Labor Statistics in the Department of Labor (Geoffrey H. Moore, Commissioner). Current statistics on employment, earnings, man-hours, labour turnover, industrial accidents, work stoppages, wage rates; collective bargaining agreements; construction; industrial productivity, wholesale prices, retail prices and urban consumers' price indexes; income and expenditures of urban families.

(3) Statistical Reporting Service and Economic Research Service in the Department of Agriculture. Statistics on crop and livestock production and inventories, crop forecasts; food processing and food consumption; farm population, labour and wages; farm management; farm ownership values, transfers; taxation and finance; prices farmers pay and receive; farm income; accidents; studies of land and water uses.

(4) National Center for Health Statistics in the Public Health Service, Department of Health, Education and Welfare (Theodore D. Woolsey, Chief). Current statistics on births, deaths, marriages and divorce.

(5) Bureau of Mines in the Department of the Interior (John F. O'Leary, Director). Statistics on production, consumption and stocks of metals and minerals, and on injuries in mineral industries.

Other agencies in which statistics are an important by-product of regulatory or other administrative functions include Social Security Administration in the Department of Health, Education and Welfare, Internal Revenue Service in the Treasury Department, Federal Power Commission, Federal Trade Commission, Interstate Commerce Commission, and the Securities and Exchange Commission.

Among the more important statistical publications of a fairly general nature are:

Statistical Abstract of the United States, published by the Bureau of the Census, Department of Commerce. Annual. Important summary statistics on the industrial, social, political and economic organization of the USA, with a representative selection from most of the important statistical publications. *Survey of Current Business*, published by the Office of Business Economics, Department of Commerce. Monthly. Monthly. Tables and charts presenting current data on the total output of the economy, prices, employment and wages, production and business activity, purchasing power, money, banking and federal finance. *Monthly Labor Review*, published by the Bureau of Labor Statistics, Department of Labor. *Federal Reserve Bulletin*, published by the Board of Governors of the Federal Reserve System. Monthly. Current data on money and banking and selected other economic series. Federal Reserve indexes of industrial production, etc.; international financial statistics. *Treasury Bulletin*, published by the Office of the Secretary, Department of the Treasury. Monthly. An annotated bibliography of about 100 periodical statistical publications is included in *Statistical Services of the United States Government*, a pamphlet issued by the Division of Statistical Standards, Bureau of the Budget, describing the general organization of the statistical system of the USA and the principal types of economic statistics.

STATES AND TERRITORIES

For information as to State and Local Government, see under UNITED STATES, pp. 1386-88.

Against the names of the Governors and the Secretaries of State, (D.) stands for Democrat and (R.) for Republican.

Figures for the revenues and expenditures of the various states are those of the Federal Bureau of the Census unless otherwise stated, which takes the original state figures and arranges them on a common pattern so that those of one state can be compared with those of any other.

Official publications of the various states and insular possessions are listed in the *Monthly Check-List of State Publications*, issued by the Library of Congress since 1910. Their character and contents are discussed in J. K. Wilcox's *Manual on the Use of State Publications* (1940). Of great importance bibliographically are the publications of the Historical Records Survey and the American Imprints Inventory, which record local archives, official publications and state imprints. These publications supplement those of state historical societies which usually publish journals and monographs on state and local history. An outstanding source of statistical data is the material issued by the various state planning boards and commissions, to which should be added the annual *Governmental Finances* issued by the US Bureau of the Census.

ALASKA

HISTORY. Discovered in 1741 by Vitus Bering, its first settlement, on Kodiak Island, was in 1784. The area known as Russian America with its capital (1806) at Sitka was ruled by a Russo-American fur company and vaguely claimed as a Russian colony. Alaska was purchased by the United States from Russia under the treaty of 30 March 1867 for \$7.2m. It was not organized until 1884, when it became a 'district' governed by the code of the state of Oregon. By Act of Congress approved 24 Aug. 1912 Alaska became an incorporated Territory; its first legislature in 1913 granted votes to women, 7 years in advance of the Constitutional Amendment.

Alaska officially became the 49th state of the Union on 3 Jan. 1959.

AREA AND POPULATION. Alaska is bounded north by the Beaufort Sea, west and south by the Pacific and east by Canada. It has the largest area of any state, being more than twice the size of Texas. The gross area (land and water) is 586,400 sq. miles; the land area is 571,065 sq. miles, of which 96.4% was in federal ownership in 1975. Census population, 1 April 1980 (preliminary), was 400,481, including military personnel, an increase of 32.5% over 1970. Births, 1978 (provisional), were 8,761 (21.7 per 1,000 population); deaths, 1,762 (4.4); infant deaths, 143 (16.3 per 1,000 live births); marriages, 5,102 (12.7); divorces, 3,353 (8.3).

Census population: 1880, 33,426; 1900, 63,592; 1910, 64,356; 1940, 72,526; 1950, 128,643; 1960, 226,167; 1970, 302,173; 1980 (preliminary), 400,481.

The white population in 1970 numbered 236,767 (163,258 males and 137,124 females); Indians, Aleuts, Eskimos and others, 54,704; Negroes, 8,911.

The largest town is Anchorage, which had a 1980 census population of 173,992. Metropolitan area populations (1976). Anchorage, 185,200; Fairbanks, 51,500; Juneau, 18,800; Ketchikan, 11,400. There are 11 major incorporated boroughs. The total assessed valuation of cities and boroughs was \$8,607.2m. in 1977. There were 11 home-rule cities, 20 first-class cities and about 110 second-class cities in Jan. 1976.

CONSTITUTION AND GOVERNMENT. An important provision of the Enabling Act is that the state has the right to select 103,55m. acres of vacant and unappropriated public lands in order to establish 'a tax basis'; it can open these lands to prospectors for minerals, and the state is to derive the principal advantage in all gains resulting from the discovery of minerals. In addition, certain federally administered lands reserved for conservation of fisheries and wild life have been transferred to the state. Special provision is made for federal control of land for defence in areas of high strategic importance.

The constitution of Alaska was adopted by public vote, 24 April 1956. The state legislature consists of a Senate of 20 members (elected for 4 years) and a House of

Representatives of 40 members (elected for 2 years). The state sends 2 senators and 1 representative to Congress. The franchise may be exercised by all citizens over 18 years of age.

The capital is Juneau. A new capital site near Anchorage was chosen in 1976. In the 1980 presidential election Reagan polled 86,112 votes, Carter 41,842.

Governor: Jay S. Hammond (R.), 1979– (\$50,000).

Lieut.-Governor: Lowell Thomas, Jr (R.) (\$44,000).

ECONOMY

Budget. Total state government revenue for the year ended 30 June 1978 (Annual Financial Report figures) was \$1,095m. (\$544.4m. from taxation, \$310.6m. from federal sources). Total expenditure was \$1,152m. (including \$317.2m. for personal services and \$446m. for grants, claims and shared revenue).

In 1976 a Permanent Fund was set up for the deposit of at least 25% of all mineral-related revenue. Cash and investment holdings at 30 Sept. 1978, \$73.7m.

Net bonded debt on 30 June 1973 was \$274m.

Per capita income (1977) was \$10,438.

Banking. Total assets at 30 Sept. 1978 were \$2,198m., total deposits \$1,858m.

ENERGY AND NATURAL RESOURCES

Oil and Gas. Commercial production of crude petroleum began in 1959 and by 1961 had become the most important mineral by value. Production: 1961, 6,327,000 bbls (of 42 gallons); 1965, 11m. bbls; 1976, 67m. bbls; 1977, 169m. bbls, value \$989m. Estimate for 1978, the first full year of production for the Prudhoe Bay oilfield, 450m. bbls. Oil comes mainly from Prudhoe Bay, the McArthur River field and several Cook Inlet fields. Natural gas production, 1977, 187,889m. cu. ft., value \$75.5m. Alaska receives 90% of all royalties (12.5%) from oil, gas and coal production on federal lands and the full 12.5% royalty for oil and gas production in state lands (coal royalties are being negotiated). Revenue to the state from oil and gas production tax in 1977 was \$23.9m. and from reserves tax \$720.6m. In 1969, the state conducted a major competitive lease sale for the arctic coastal region where reserves are estimated to be as large as 50,000m. bbls.

Oil from the Prudhoe Bay arctic field is now carried by the Trans-Alaska pipeline to Prince William Sound on the south coast, where a tanker terminal has been built at Valdez.

Minerals. Value of production, 1977, \$160m.: sand and gravel (66m. short tons), \$134.25m.; gold (18,962 troy oz.), \$2.81m.; others, including silver, gemstones, lead, copper, tin, barite and platinum group minerals, \$22.79m.

Agriculture. In some parts of the state the climate during the brief spring and summer (about 100 days in major areas and 152 days in the south-eastern coastal area) is suitable for agricultural operations, thanks to the long hours of sunlight, but Alaska is a food-importing area. In 1964, 1,959,440 acres were classified as agricultural land, 90% of this was unimproved pasture primarily government leases for grazing of sheep and beef cattle in south-west Alaska. In 1977 about 20,000 acres was cultivated. In 1979 (preliminary) there were 8,500 cattle, 3,900 milch cows, 1,100 hogs and 5,500 sheep stock.

Farm production in 1978: Milk, \$2.6m.; eggs, \$458,000; silage, \$457,000; potatoes, \$932,000; hay, \$2.65m.; beef and veal, \$435,000; barley, \$570,000; vegetables, \$560,000.

There were about 31,000 reindeer in western Alaska in 1969, owned by individual Eskimo herders except for 750 at Nome owned by the Government. Reindeer meat production, 1977, \$275,000.

Forestry. In south-eastern Alaska timber fringes the shore of the mainland and all the islands extending inland to a depth of 5 miles. The state's enormous forests could produce an estimated annual sustained yield of 1,500m. bd ft of lumber, nearly twice Alaska's record 1973 cut. Alaska has 2 national forests: the Tongass of 16.8m. acres and the Chugach of 4.8m. acres. An estimated total of 602.4m. bd

ft was cut in 1977, of which 491.5m. came from national forests and 60.2m. from state forests. Alaska has 2 large pulp-mills at Ketchikan and Sitka.

Fisheries. The catch for 1977 (estimate) was 674.5m. lb. of fish and shellfish having a value to fishermen of \$350.8m. This compares with 471m. lb. in 1971 with a value of \$85.5m. Salmon remains the highest per unit value species, with a catch in 1977 of 306.7m. lb. valued to the fishermen at \$173.2m.

INDUSTRY. Main industries with employment, 1977: Government, 50,700; trade, 28,500; services, 27,400; contract construction, 19,500; manufacturing, 10,900; oil and gas 4,600.

The major manufacturing industry was food processing, followed by timber industries. Total employment outside agriculture, 166,000. Total wages and salaries, \$3,538,881,000.

A gas liquefaction plant is under construction on the Kenai Peninsula; there is already a fertilizer plant in Kenai. An oil refinery and petrochemical complex is being built at Valdez.

TOURISM. About 430,000 tourists visited the state in 1978.

COMMUNICATIONS

Roads. Alaska's highway and road system, 1974, totalled 9,848 miles, including marine highway systems, local service roads, borough and city streets, national park, forest and reservation roads and military roads, of which 4,692 miles were surfaced primary roads; unsurfaced secondary roads totalled 3,654 miles. Registered motor vehicles, 1977, 329,672.

The Alaska Highway extends 1,523 miles from Dawson Creek, British Columbia, to Fairbanks, Alaska. It was built by the US Army in 1942, at a cost of \$138m. The greater portion of it, because it lies in Canada, is maintained by the Canadian Government.

Railways. There is a railway of 111 miles from Skagway to the town of Whitehorse, in the Canadian Yukon region. The government-owned Alaska Railroad runs from Seward to Fairbanks, a distance of 471 miles.

Aviation. In 1974 the state had about 766 airports, of which about 545 were publicly owned. Passengers by air to and from Alaska's international airports Anchorage and Fairbanks (1977) numbered 2.8m. at Anchorage and 548,600 at Fairbanks; freight handled, 132,500 short tons at Anchorage and 76,300 at Fairbanks. General aviation aircraft in the state per 1,000 population was about ten times the US average.

Shipping. Regular shipping services to and from the US are furnished by 2 steamship lines and several barge lines operating out of Seattle and other Pacific coast ports. Two Canadian companies also furnish a regular service from Vancouver, B.C. Freight handled at the Port of Anchorage, 1977 (short tons): Bulk petroleum, 1.13m.; vans, flats and containers, 978,584; cement and drilling mud, 37,943; vehicles, 40,360; total 2.2m.

A 490-mile ferry system for motor cars and passengers (the 'Marine Highway') operates from Seattle, Washington and Prince Rupert (British Columbia) to Juneau, Haines (for access to the Alaska Highway) and Skagway. A second system extends throughout the south-central region of Alaska linking the Cook Inlet area with Kodiak Island and Prince William Sound.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There is no death penalty in Alaska.

Religion. In Alaska are many religious missions representing the Russian Orthodox, Roman Catholic, Episcopalian, Presbyterian, Methodist and other denominations.

Education. During 1977-78 there were 87,094 pupils at public schools, 3,178 at private schools. The Bureau of Indian Affairs schools had 2,983 pupils attending schools in the state. The University of Alaska (founded in 1922) had (1978) 4,382

students on the main campus, 3,341 at its branches in Anchorage and Juneau and 13,958 in community colleges. Other colleges had 674 students in 1978.

Other minerals include sand and gravel (28m. short tons), zinc (4,460 short tons in 1977) and lead (445 short tons in 1978). Total value of minerals mined in 1979 was \$2,487,995,000.

Agriculture. Arizona, despite its dry climate, is well suited for agriculture along the water-courses and where irrigation is practised on a large scale from great reservoirs constructed by the US as well as by the state government and private interests. Irrigated area, 1977, 4.3m. acre-feet. The wide pasture lands are favourable for the rearing of cattle and sheep, but numbers are either stationary or declining compared with 1920.

In 1976 Arizona contained 5,900 farms and ranches with 1.3m. acres (1979 estimate) of crop land, out of a total farm and pastoral area of 37.2m. acres. The average farm (1977) was estimated at 6,640 acres. Farming is highly commercialized and mechanized and concentrated largely on cotton (1,500 cotton farms 1976) picked by machines and by Indian, Mexican and migratory workers.

Areas under cotton (1979), 618,300 acres; 1.3m. bales (of 500 lb.) of upland and 57,000 bales of American Pima cotton were harvested in 1979.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. A 'right-to-work' amendment to the constitution, adopted 5 Nov. 1946, makes illegal any concessions to trade-union demands for a 'closed shop'.

The Arizona state prison 30 June 1980 held 1,945. There have been no executions

since 1963; from 1930 to 1963 there were 38 executions (lethal gas) all for murder, and all men (28 whites, 10 Negro).

Religion. The leading religious bodies are Roman Catholics and Mormons (Latter Day Saints); others include Methodists, Presbyterians, Baptists and Episcopalians. No recent statistics of membership are available.

In 1629 a written constitution was adopted which, it is claimed, was the first in the history of the world formed under the concept of a social compact. DISTRICT OF COLUMBIA

HISTORY. The District of Columbia, organized in 1790, is the seat of the Government of the US. for which the land was ceded by the state of Maryland to the US as a site for the national capital. It was established under Acts of Congress in 1790 and 1791. Congress first met in it in 1800 and federal authority over it became vested in 1801.

AREA AND POPULATION. The District forms an enclave on the Potomac River, where the river forms the south-west boundary of Maryland. The area of the District of Columbia is 69.245 sq. miles, 8 sq. miles being inland water. The federal government on 30 June 1968 owned 13,314 acres (43.3% of the land area).

Census population, 1 April 1980 (preliminary), was 637,651, a decrease of 15.6% from that of 1970. Metropolitan statistical area of Washington, D.C. Md-Va. (1978 estimate), 3.5m. Estimated average annual growth rate, 50,000. Density of population in the District, 1978, 10,627 per sq. mile. Births, 1978, in the District were 19,054 (28.3 per 1,000 population); resident deaths, 8,737 (13.0); infant deaths, 440 (23.1 per 1,000 live births); marriages, 4,618 (7); divorcees, 3,492 (5.2).

Population in 5 census years (with distribution by sex, 1960) was:

Local government, from 1 July 1878 until Aug. 1967, was that of a municipal corporation administered by a board of 3 commissioners, of whom 2 were appointed from civil life by the President, and confirmed by the Senate, for a term of 3 years each. The other commissioner was detailed by the President from the Engineer Corps of the Army. Reorganization Plan No. 3 of 1967 submitted by the President to Congress on 1 June 1967 abolished the Commission form of government and instituted a new Mayor Council form of government with officers appointed by the President with the advice and consent of the Senate. On 24 Dec. 1973 the appointed officers were replaced by an elected Mayor and councillors, with full legislative powers in local matters as from 1974. Congress retains the right to legislate, to veto or supersede the Council's acts. On 23 Aug. 1978 the Senate approved a constitutional amendment giving the District full voting representation in Congress. In order to become part of the constitution the amendment must be ratified by 38 state legislatures within 7 years. It would give the District 2 senators and a number of representatives according to population.

BUDGET. The District's revenues are derived from a tax on real and personal property, sales taxes, taxes on corporations and companies, licences for conducting various businesses and from federal payments.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Prisons on 20 Oct. 1980 had 7,147 men and 214 women; the total equalled 177 per 100,000 population, a high rate, which may be explained by the fact that Maryland incarcerates domestic relations law violators in state prisons, state prisons

also receive a considerable number of persons committed for misdemeanours by magistrates' courts of the counties as well as from Baltimore's court system.

Since 1930 there have been 68 executions (by lethal gas since 1957; earlier by hanging)—7 whites and 37 Negroes for murder, and 6 whites and 18 Negroes for rape. Last execution was June 1961.

Maryland's prison system has conducted a work-release programme for selected prisoners since 1963. All institutions have academic and vocational training programmes.

In accordance with the 1950 Supreme Court decisions declaring segregation unconstitutional, the University of Maryland and other public and private colleges admitted Negro students in Sept. 1956. Elementary and secondary schools accept the ruling, and gradual integration is under way in all counties under different methods.

Religion. Maryland was the first US state to give religious freedom to all who came within its borders. Present religious affiliations of the population are approximately: Protestant, 32%; Roman Catholic, 24%; Jewish, 10%; remaining 34% is non-related and other faiths.

Education. Education is compulsory from 6 to 16 years of age. In Sept. 1979 the public elementary schools (including kindergartens and secondary schools) had 777,725 pupils. Teachers and principals in the elementary and secondary schools numbered 44,648. Average salary of principals and teachers in elementary and secondary schools (1978-79) was \$16,941. Current expenditure by local school boards on education, 1978-79, was \$1,694.8m., of which the state's contribution was \$600m.

In 1979 there were 31 degree-granting 4-year institutions and 19 2-year colleges. The largest two were the University of Maryland system, with 60,536 students (Sept. 1979) and Towson State College with 15,283 students (Sept. 1979).

Health. In Oct. 1979, 79 hospitals (22,047 beds) were licensed by the State Department of Health and Mental Hygiene.

The Maryland State Department of Health, organized in 1874, was in 1969 made part of the Department of Health and Mental Hygiene which performs its functions through its central office, 23 county health departments and the Baltimore City Health Department. For the financial year 1979 the department's budget was \$739,367,064, of which \$517,036,275 were general funds and \$16,181,295 special funds appropriated by the General Assembly. The balance of the budget, \$206,149,494, derives from federal funds.

During financial year 1979 Maryland's programme of medical care for indigent and medically indigent patients covered an average of 365,854 persons. The programme, which covers inpatient and outpatient hospital services, laboratory services, skilled nursing home care, physician services, pharmacy services, dental services and home health services, cost approximately \$326.3m.

Social Security. Under the supervision of the Department of Employment and Human Resources, local social service departments administer public assistance for needy persons. In June 1980 families with dependent children received \$15,204,233 (206,397 recipients, average actual monthly payment \$72.17); general public assistance payments were \$2,360,460 (21,628 recipients, average actual monthly payments \$107.58); foster care of children cost \$1,481,930 (7,731 recipients, average actual payment \$193.77).

Justice. The 1963 Constitution provides that no person shall be denied the equal protection of the law; nor shall any person be denied the enjoyment of his civil or political rights or be discriminated against in the exercise thereof because of religion, race, colour or national origin. A Civil Rights Commission was established, and its powers and duties were implemented by legislation in the extra session of 1963. Earlier statutory enactments guaranteeing civil rights in specific areas are as follows. An Act of 1885, last amended in 1956, orders all places of public accommodation and resort, etc., to furnish equal accommodations without discrimination. An Act of 1941, as last amended, forbids the Civil Service in counties with population exceeding 1m. to discriminate against employees or applicants on the ground of political, racial or religious opinions or affiliations. An Act of 1881 incorporated into the school code of 1955 forbids any discrimination in school facilities. NEW MEXICO

HISTORY. The first settlement was established in 1598. Until 1771 New Mexico was the Spanish kings' 'Kingdom of New Mexico'. In 1771 it was annexed to the northern provinces of New Spain. When New Spain won its independence in 1821, it took the name of Republic of Mexico and established New Mexico as its northernmost department. When the war between the US and Mexico was concluded on 2 Feb. 1848 New Mexico was recognized as belonging to the US, and on 9 Sept. 1850 it was made a Territory. Part of the Territory was assigned to Texas; later Utah was formed into a separate Territory; in 1861 another part was transferred to Colorado, and in 1863 Arizona was disjoined, leaving to New Mexico its present area. New Mexico became a state in Jan. 1912.

AREA AND POPULATION. New Mexico is bounded north by Colorado, north-east by Oklahoma, east by Texas, south by Texas and Mexico and west by Arizona. Land area 121,412 sq. miles (221 sq. miles water). Public lands, administered by federal agencies (1975) amounted to 26.7m. acres or 34% of the total area. The Bureau of Indian Affairs held 7.3m. acres; the State of New Mexico held 9.4m. acres; 34.4m. acres were privately owned.

Census population, 1 April 1980 (preliminary), 1,299,968, an increase of 283,968 or 28% since 1970. Vital statistics, 1977: Births, 23,066 (18.1 per 1,000 population); deaths, 8,073 (6.8); infant deaths, 319 (14.5 per 1,000 live births); marriages, 16,385 (13.8); divorces, 9,143 (7.7).

The population in 5 census years (with distribution by sex, 1970) was:

NEW YORK STATE

HISTORY. From 1609 to 1664 the region now called New York was claimed by the Dutch; then it came under the rule of the English, who governed the country until the outbreak of the War of Independence. On 20 April 1777 New York

adopted a constitution which transformed the colony into an independent state; on 26 July 1788 it ratified the constitution of the US, becoming one of the 13 original states. New York dropped its claim to Vermont after the latter was admitted to the Union in 1791. With the annexation of a small area from Massachusetts in 1853, New York assumed its present boundaries.

AREA AND POPULATION. New York is bounded west and north by Canada with Lake Erie, Lake Ontario and the St Lawrence River forming the boundary; east by Vermont, Massachusetts and Connecticut, south-east by the Atlantic, south by New Jersey and Pennsylvania. CONSTITUTION AND GOVERNMENT. The present constitution dates from 1894; a later constitutional convention, 1938, is now legally considered merely to have amended the 1894 constitution, which has now had 93 amendments. The Constitutional Convention of 1967 (4 April through 26 Sept.) was composed of 186 delegates who proposed a new state constitution; however this was rejected by the registered voters on 7 Nov. 1967. The Senate consists of 60 members, and the Assembly of 150 members, both elected every 2 years. The Governor and Lieut.-Governor are elected for 4 years. The right of suffrage resides in every adult who has been a citizen for 90 days, and has the usual residential qualifications; new voters must establish, by certificates or test, that they have had at least an elementary education.

The state is represented in Congress by 2 senators and 34 representatives.

In the 1980 presidential election Reagan polled 2,893,831 votes, Carter 2,728,372 and Anderson 467,801.

The state capital is Albany. For local government the state is divided into 62 counties, 5 of which constitute the city of New York. New York leads in state parks and recreation areas, covering 252,984 acres in 1979.

Cities are in 3 classes, the first class having each 175,000 or more inhabitants and the third under 50,000. Each is incorporated by charter, under special legislation. The government of New York City is vested in the mayor (Edward Koch), elected for 4 years, and a city council, whose president and members are elected for 4 years. The council has a President and 37 members, each elected from a state senatorial district wholly within the city. The mayor appoints all the heads of departments, except the comptroller, who is elected. Each of the 5 city boroughs (Manhattan, Bronx, Brooklyn, Queens and Richmond) has a president, elected for 4 years. Each borough is also a county bearing the same name except Manhattan borough, which, as a county, is called New York, and Brooklyn, which is Kings County.

OKLAHOMA

HISTORY. An unorganized area in the centre of the present state was thrown open to white settlers on 22 April 1889. The Territory of Oklahoma, organized in 1890 to include this area and other sections, was opened to white settlements by runs or lotteries during the next decade. In 1893 the Territory was enlarged by the addition of the Cherokee Outlet, which fixed part of the present northern boundary. On 16 Nov. 1907 Oklahoma was combined with the remaining part of the Indian Territory and admitted as a state with boundaries substantially as now.

AREA AND POPULATION. Oklahoma is bounded north by Kansas, northeast by Missouri, east by Arkansas, south by Texas (the Red River forming part of the boundary) and, at the western extremity of the 'panhandle', by New Mexico and Colorado. In 1979, there were 38,449 full-time farmers or ranchers, 22,847 part-owners and 8,423 tenants. Large-scale commercial farming is predominant.

Soil erosion is serious. The conservation and development of the renewable natural resources of the state has received close attention by local, county and state governments during the past 40 years. All of the land in the state is within the boundaries of one of the 88 conservation districts. Of the total surface (44m. acres), 30.6m. acres are being operated under a basic conservation plan prepared by the conservation district with assistance from the Soil Conservation Service. There were (1975-76) 99,037 district co-operators. In May 1978, 121,510 acres had suffered damage from wind erosion, during the year compared with 206,840 in 1976-77. The Oklahoma Conservation Commission reported that good conservation measures by farmers, such as minimum tillage and crop residue management, are helping to conserve the moisture and protect crops from wind erosion. Through June 1976, 60 work plans had been approved for the important Washita River Watershed, which was established in 1946 to aid flood control. In addition, 1,007 flood-prevention dams and 20 multi-purpose dams have been built or contracted under this project. In 1978, 16,816,620 acres were within the boundaries of the 185 watersheds in Oklahoma, including 52,450 acres which made up the 6 planned or completed Resource Conservation and Development Projects.

The largest change in land use has been the conversion of 170,284 acres of cropland to grass. This is a continuation of a trend of the last 40 years; cattle and calves rank first in agricultural products, valued, 1979, at \$1.462m., winter wheat is second, at \$845m.

Cash income from crops and livestock products 1979, \$3.162m. The most valuable crop is winter wheat. Value of shipments of lumber and forest products in 1979 was estimated at \$500m.

Among manufacturing industries the most important by payroll employment (1979) were: Machinery, 35,700 employees; fabricated metal products, 22,000; food and kindred products, 16,600; electric and electronic equipment, 13,500; transport equipment, 18,500. CONSTITUTION AND GOVERNMENT. The present constitution dates from 1859; some 80 items in it have been amended. The Legislative Assembly consists of a Senate of 30 members, elected for 4 years (half their number retiring every 2 years), and a House of 60 representatives, elected for 2 years. The Governor is elected for 4 years. The constitution reserves to the voters the rights of initiative and referendum and recall. In Nov. 1912 suffrage was extended to women.

The state sends to Congress 2 senators and 5 representatives.

In the 1980 presidential election Reagan polled 571,044 votes, Carter 456,890 and Anderson 112,389.

The capital is Salem. There are 36 counties in the state.

Governor: Victor Atiyeh (R.), 1979-83 (\$53,394 plus \$1,000 monthly for expenses).

Secretary of State: Norma Paulus (R.), 1977-81 (\$43,949).

BUDGET. Oregon has 2-year financial periods. General revenues for the biennium 1979-81 were \$13,700,529,247 (federal funds, \$1,216m.); general expenditures, \$10,092,696,424 (education, \$2,150.43m.; economic development and consumer services, \$3,414m.; human resources, \$2,195m.).

On 14 Oct. 1980 the outstanding bonded debt was \$4,856,136,000.

Per capita personal income (1979) was \$8,938.

ENERGY AND NATURAL RESOURCES

Electricity. Four privately owned utilities, 11 municipally owned utilities, 16 co-operatives and 4 utility districts provide electricity in the state. The privately owned companies serve 73.45% of the electricity. Private utilities sold 25,014,195,957 kwh. of electric power in 1979.

A federal agency, the Bonneville Power Administration, also markets electric power from 30 federal dams in the Pacific Northwest to 160 public and private utilities and large industrial plants. The dams, which are operated by the Army

Corps of Engineers or the Bureau of Reclamation, had on 31 Dec. 1979 a total generating capacity of 17,926,788 kw. The Bonneville transmission network now covers the states of Oregon, Washington, Idaho, Western Montana, and parts of California, Nevada, Utah and Wyoming.

Minerals. Oregon's mineral resources include gold, silver, copper, lead, mercury, chromite, sand and gravel, stone, clays, lime, silica, diatomite, expansible shale, scoria, pumice and uranium. There is geothermal potential. Oregon is the only state producing nickel in the US. Value of mineral products, 1978, was \$123m.

Agriculture. Oregon, which has an area of 61,557,184 acres, is divided by the Cascade Range into two distinct zones as to climate. West of the Cascade Range there is a good rainfall and almost every variety of crop common to the temperate zone is grown; east of the Range stock-raising and wheat-growing are the principal industries and irrigation is needed for row crops and fruits. In 1975 there were 2.18m acres under irrigation

There were, in 1979, 30,000 farms with an acreage of 18.6m. (30.29% of the land area), including (1974) 5.3m. acres of total crop land; average farm size in 1979 was 622 acres; most are family-owned corporate farms.

Cash receipts from crops in 1978 amounted to \$812.7m., and from livestock and livestock products, \$455.6m. Principal crops are hay, wheat, potatoes, peppermint, ryegrass seed, pears, onions, snap beans, sweet corn and barley.

Livestock, 1 July 1980: Milch cows, 93,000; cattle and calves, 1.5m.; sheep and lambs, 350,000; swine, 100,000.

In 1979 the wool clip yielded 3.8m. lb.

Forestry. About 29.8m. acres is forested, almost half of the state. Of this amount, 24.2m. is commercial forest land suitable for timber production; ownership is as follows (million acres): US Forestry service, 11.6 (48%); Forest Industry, 5 (22.8%); Small non-industrial landowners, 3.6 (14.7%); US Bureau of Land Management, 2.2 (9%); State of Oregon, 820,000 acres (3.4%) and other owners (city, county, Indian), 496,000 acres (2.1%). Oregon's commercial forest lands provide an annual harvest of 7,800m. board feet of logs, as well as the benefits of recreation, water, grazing, wildlife and fish. Trees vary from the coastal forest of hemlock and spruce to the state's primary species, Douglas-fir, throughout much of western Oregon. In eastern Oregon, ponderosa pine, lodgepole pine and true firs are found. Here, forestry is often combined with livestock grazing to provide an economic operation. Along the Cascade summit and in the mountains of northeast Oregon, alpine species are found. Forest products manufacturing is Oregon's leading industry, and provides for 20% of the country's softwood lumber needs, 40% of its plywood and more than 25% of the hardboard. More than one-third of the economy depends directly or indirectly on timber industries; about 85,000 (1980) people are employed, the annual value of primary production is \$4,420m., the payroll is \$1,500m.

Fisheries. All food and shellfish landings in the calendar year 1978 amounted to 135,043,614 lb., valued at \$55.5m., including salmon, 8,704,892 lb. (\$11.62m.); tuna, 18.4m. lb. (\$10.3m.); crabs, 12,502,137 lb. (\$9.6m.); bottom fish, 37,056,208 lb. (\$8m.); shrimp, 57m. lb. (\$14.9m.).

The bases on which a person would be subject to examination by the Board are: (a) if such person would be likely to procreate children having an inherited tendency to mental retardation or mental illness, or (b) if such person would be likely to procreate children who would become neglected or dependent because of the person's inability by reason of mental illness or mental retardation to provide adequate care. RHODE ISLAND

HISTORY. The earliest settlers in the region which now forms the state of Rhode Island were colonists from Massachusetts who had been driven forth on account of their non-acceptance of the prevailing religious beliefs. The first of the settlements was made in 1636, settlers of every creed being welcomed. In 1647 a patent was granted for the government of the settlements, and on 8 July 1663 a charter was executed recognizing the settlers as forming a body corporate and politic by the name of the 'English Colony of Rhode Island and Providence Plantations, in New England, in America'. On 29 May 1790 the state accepted the federal constitution and entered the Union as the last of the 13 original states.

The decline of lumbering and mining in the northern section of the state has increased dependency on the recreation industry. GUAM

HISTORY. Magellan is said to have discovered the island in 1521; it was ceded by Spain to the US by the Treaty of Paris (10 Dec. 1898). The island was captured by the Japanese on 10 Dec. 1941, and retaken by American forces from 21 July 1944. Guam is of great strategic importance; substantial numbers of naval and air force personnel occupy about one-third of the usable land.

AREA AND POPULATION. Guam is the largest and most southern island of the Marianas Archipelago, in 13° 26' N. lat., 144° 43' E. long. The length is 30 miles, the breadth from 4 to 10 miles, and there are about 210 sq. miles (450 sq. km). Agaña, the seat of government is about 8 miles from the anchorage in Apra Harbour. The census on 1 April 1970 showed a population of 84,996, an increase of 17,952 or 26.8% since 1960; those of Guamanian ancestry numbered about 52,000; foreign-born, 13,484; density was 321 per sq. mile. On 1 Jan. 1970 transient residents connected with the military were estimated at 19,307. Estimated population, 1975, 105,400. The Malay strain is predominant. The native language is Chamorro; English is the official language and is taught in all schools.

CONSTITUTION AND GOVERNMENT. Guam's constitutional status is that of an 'unincorporated territory' of the US. Entry of US citizens is unrestricted; foreign nationals are subject to normal regulations. In 1949 the President transferred the administration of the island from the Navy Department (who held it from 1899) to the Interior Department. The transfer was completed by 1 Aug. 1950, on the passage of the Organic Act, which conferred full citizenship on the Guamanians, who had previously been 'nationals' of the US.

The Governor and his staff constitute the executive arm of the government. He is advised by a Cabinet, and a Sub-Cabinet composed of elected representatives of the 19 municipalities. The Legislature is unicameral; its powers are similar to those of an American state legislature. At the general election of Nov. 1980, the Democratic Party won 10 seats and the Republicans 11. All adults 18 years of age or over are enfranchised. Guam returns one non-voting delegate to the House of Representatives.

Governor: Paul MacDonald Calvo (R.), 1978-82

COMMONWEALTH OF PUERTO RICO

HISTORY. Puerto Rico, by the treaty of 10 Dec. 1898 (ratified 11 April 1899), was ceded by Spain to the US. The name was changed from Porto Rico to Puerto Rico by an Act of Congress approved 17 May 1932. Its territorial constitution was determined by the 'Organic Act' of Congress (2 March 1917) known as the 'Jones Act', which ruled until 25 July 1952, when the present constitution of the Commonwealth of Puerto Rico was proclaimed.

AREA AND POPULATION. Puerto Rico is the most easterly of the Greater Antilles and lies between the Dominican Republic and the U.S. Virgin Islands. The island has a land area of 3,435 sq. miles (8,891 sq. km) and a population, according to the census of 1980, of 3,187,566, an increase of 475,533 or 17.5% over 1970. Of the population in 1970 about 529,000 were bilingual, Spanish being the mother tongue and (with English) one of the two official languages. Rural population (1970), 1,180,391 (43.6%).

Vital statistics (1978): Births, 75,066 (23.5 per 1,000 population); deaths, 19,876 (6%); deaths under 1 year, 1,390 (18.5 per 1,000 live births).

Chief towns (1980) are: San Juan, 432,973; Bayamón, 195,965; Ponce, 188,219; Carolina, 165,207; Caguas, 118,020; Mayaguez, 95,886.

The Puerto Rican island of Vieques, 10 miles to the east, has an area of 51.7 sq. miles and 7,628 inhabitants. The island of Culebra, with 1,265 inhabitants, between Puerto Rico and St Thomas, has a good harbour.

CONSTITUTION AND GOVERNMENT. Puerto Rico has representative government, the franchise being restricted to citizens 18 years of age or over, residence (1 year) and such additional qualifications as may be prescribed by the Legislature of Puerto Rico, but no property qualification may be imposed. Women were enfranchised in 1932 (with a literacy test) and fully in 1936. Puerto Ricans do not vote in the US presidential elections, though individuals living on the mainland are free to do so subject to the local electoral laws. The executive power resides in a Governor, elected directly by the people every 4 years. Fourteen heads of departments form the Governor's advisory council, also designated as his Council of Secretaries. The legislative functions are vested in a Senate, composed of 27 members (2 from each of the 8 senatorial districts and 11 senators at large), and the House of Representatives, composed of 51 members (1 from each of the 40 representative districts and 11 elected at large). Puerto Rico sends to Congress a Resident Commissioner to the US, elected by the people for a term of 4 years, but he has no vote in Congress. Puerto Rican men are subject to conscription in US services.

On 27 Nov. 1953 President Eisenhower sent a message to the General Assembly of the UN stating 'if at any time the Legislative Assembly of Puerto Rico adopts a resolution in favour of more complete or even absolute independence' he 'will immediately thereafter recommend to Congress that such independence be granted'.

For an account of the constitutional developments prior to 1952, see *THE STATESMAN'S YEAR-BOOK*, 1952, p. 742. The new constitution was drafted by a Puerto Rican Constituent Assembly and approved by the electorate at a referendum on 3 March 1952. It was then submitted to Congress, which struck out Section 20 of Article 11 covering the 'right to work' and the 'right to an adequate standard of living'; the remainder was passed and proclaimed by the Governor on 25 July 1952.

At the election on 7 Nov. 1976 the New Progressive Party (advocates of statehood), headed by Carlos Romero Barceló, polled 682,607 votes (46.6% of the total); the Popular Democratic Party, headed by Rafael Hernández Colon, polled 634,941 votes (43.3% of the total); the Independence Party (full independence by constitutional means), 58,556 (4% of the total); Partido Socialista Puertorriqueño (full independence), 9,761 votes (0.7% of the total).

Governor: Carlos Romero Barceló (New Progressive Party), 1977-80 (\$35,000).

AMERICAN SAMOA

HISTORY. The Samoan Islands were first visited by Europeans in the 18th century; the first recorded visit was in 1722. On 14 July 1889 a treaty between the USA, Germany and Great Britain proclaimed the Samoan islands neutral territory, under a 4-power government consisting of the 3 treaty powers and the local native government. By the Tripartite Treaty of 7 Nov. 1899, ratified 19 Feb. 1900, Great Britain and Germany renounced in favour of the US all rights over the islands of the Samoan group east of 171° long. west of Greenwich, the islands to the west of that meridian being assigned to Germany (now the Independent State of Western Samoa, see p. 1593). The islands of Tutuila and Aunu'u were ceded to the US by their High Chiefs on 17 April 1900, and the islands of the Manu'a group on 16 July 1904. Congress accepted the islands under a Joint Resolution approved 20 Feb. 1929. Swain's Island, 210 miles north-north-west of the Samoan Islands, was annexed in 1925 and is administered as an integral part of American Samoa.

AREA AND POPULATION. The islands are approximately 650 miles north-east of Fiji. The total area of American Samoa is 76.1 sq. miles (197 sq. km); population, 1970, 27,159, nearly all Polynesians or part-Polynesians. 1977 population estimate, 30,600. The Island of Tutuila, 80 miles from Apia, has an area of 53 sq. miles, with a population (1970) of 24,973 (28,669 in 1977) (including the island of Aunu'u). Ta'u has an area of 17 sq. miles, and the other islands (Ofu and Olosega) of the Manu'a group have an area of about 5 sq. miles with a population of 2,112 in 1970 (1,700 in 1976). Swain's Island, circular in shape, has an area of 1.9 sq. miles and a population, 1970, of 74 (31 in 1977). Rose Island (uninhabited) is 0.4 sq. mile in area. In 1975 there were 1,154 births and 160 deaths.

CONSTITUTION AND GOVERNMENT. American Samoa is constitutionally an unorganized unincorporated territory of the US administered under the Department of the Interior. Its indigenous inhabitants are US nationals and are classified locally as citizens of American Samoa with certain privileges under local laws not granted to non-indigenous persons. Polynesian customs (not inconsistent with US laws) are respected.

Fagatogo is the seat of the Government.

The islands are organized in 14 counties grouped in 3 districts; these counties and districts correspond to the traditional political units. On 25 Feb. 1948 a bicameral legislature was established, at the request of the Samoans, to have advisory legislative functions. With the adoption of the Revised Constitution of American Samoa, effective 1 July 1967, the legislature was vested with limited law-making authority. The lower house, or House of Representatives, is composed of 20 members elected by universal adult suffrage and 1 non-voting member for Swain's Island. The upper house, or Senate, is composed of 18 members elected, in the traditional Samoan manner, in meetings of the chiefs.

Governor: Peter Tali Coleman.

Lieut.-Governor: High Chief Tufele Lia.

ECONOMY

Planning. The first formal Economic Development and Planning Office completed its first year in 1971. Much has been done to promote economic expansion within the Territory and a large amount of outside investment interest has been stimulated.

The Office initiated the first Territorial Comprehensive Plan. This plan when completed will, with periodic updating, provide a guideline to territorial development for the next 20 years. The planning programme was made possible under a Housing and Urban Development '701' grant programme.

The focus will be on physical development and the problems of a rapidly increasing population with severely limited land resources.

Budget. The chief sources of revenue are annual federal grants from the US, and local revenues from individual and corporate income taxes, import duties, sale of utilities, rents and leases and liquor sales. During the fiscal year 1976 the Government had a revenue of \$45.4m. including local appropriation of \$3.9m. and federal appropriations of \$41m.

Banking. The American Samoa branch of the Bank of Hawaii offers all commercial banking services. The Development Bank of American Samoa, government owned, is concerned primarily through loans and guarantees with the economic advancement of the Territory. The American Savings and Loan Bank has a branch in American Samoa.

ENERGY AND NATURAL RESOURCES

Electricity. Net power generated (1976) was 62.6m. kwh., of which 31.6m. kwh. was supplied to large power users and 16m. kwh. to householders. All the Manu'a islands have electricity.

Agriculture. There are virtually no public lands in American Samoa. Nearly all the land is owned by Samoans and, with a few exceptions, cannot be sold except to persons having at least one-half Samoan blood. Of the 48,640 acres of land area, 11,000 acres are suitable for tropical crops, 1,000 acres for most temperate vegetables, 8,000 acres only to such crops as coconut and cacao with good conservation practice, 5,000 acres to controlled forestation and about 22,500 to indigenous and introduced forest with strict conservation measures; 1,000 acres are roads, building sites and villages. Principal crops are taro, bread-fruit, yams, bananas, coconuts, arrowroot and papayas.

Livestock (1978): Pigs, 8,000; goats, 9,000; poultry, 39,000.

INDUSTRY AND TRADE

Industry. Fish canning is important, employing the second largest number of people

(after government). Attempts are being made to provide a variety of light industries. Tuna fishing and local inshore fishing are both expanding.

Commerce. In 1977 American Samoa exported goods valued at \$81,232,067 and imported goods valued at \$54,941,048. Chief exports are canned tuna, watches, pet foods and handicrafts. Chief imports are cement, lumber, rice, flour, fish, meat, fuel oil, sugar.

COMMUNICATIONS

Roads. There are about 45.2 miles of paved roads, 30.8 miles of unpaved and 5.4 miles of secondary roads. There are 12.7 miles of secondary unpaved roads maintained mainly on Tutuila. Motor vehicles registered, 1977, 4,127.

Aviation. PANAM operates between Western America, Honolulu, New Zealand, American Samoa and Tahiti. South Pacific Island Airways and Polynesian Airlines operate daily services between American Samoa and Western Samoa. The islands are also served by Air New Zealand and UTA. Total landings at Pago Pago, 1977, 11,992.

Shipping. The harbour at Pago Pago, which nearly bisects the island of Tutuila, is the only good harbour for large vessels in Samoa. By sea, there is a twice-monthly service between Western America, New Zealand and Australia and regular service between US, South Pacific ports and Japan. In 1977, 779 vessels entered and 737 cleared Pago Pago harbour.

Post and Broadcasting. A commercial radiogram service is available to all parts of the world through 3 principal trunks, Hawaii, Fiji and Western Samoa. Commercial phone services are operated to all parts of the world on a 24-hour service. Number of telephones (June 1978), 4,570.

JUSTICE, EDUCATION AND WELFARE

Justice. Judicial power is vested in a High Court. Fifty-nine district courts, traffic courts and small claims courts are heard without record and appeals therefrom are tried, *de novo*, in the trial division of the High Court. The trial division also has original jurisdiction of all criminal and civil cases. The probate division has jurisdiction of estates, guardianships, trusts and other matters. The land and title division decides cases relating to disputes involving communal land and Matai title court rules on questions and controversy over family titles. The appellate division hears appeals from trial, land and title and probate divisions as well as having original jurisdiction in selected matters. The appellate court is the court of last resort. Two American judges sit with 5 Samoan judges permanently. In addition there are 8 temporary judges or assessors who sit occasionally on cases involving Samoan customs.

Education. Education is compulsory between the ages of 6 and 18. The Government (1978) maintains 24 consolidated elementary schools, 4 senior high schools with technical departments, 1 community college, special education classes for the handicapped and 100 Early Childhood Education Centres for pre-school children. Total elementary and secondary enrolment (1978), 7,492; in ECE schools, 1,505; classes for the handicapped, 102; total elementary and secondary classroom teachers, 435. Eight private schools had 1,820 students. Learning is by a variety of media including television.

Health. The Department of Health provides the only medical and dental care in American Samoa. It operates a general hospital (181 beds including 31 bassinets), 2 dispensaries on Tutuila, 4 dispensaries in the Manu'a group, 1 on Aunu'u and 1 on Swain's Island. A \$3.5m. tropical medical centre was completed and placed in service in 1968. This now embraces the general hospital as well as out-patient clinics for surgery, obstetrics, gynaecology, emergencies, family practice, internal medicine, paediatrics; there are clinics for treatment of the eye, ear, nose and throat, dental and public health departments.

VIRGIN ISLANDS OF THE UNITED STATES

HISTORY. The Virgin Islands of the United States, formerly known as the Danish West Indies, were named and claimed for Spain by Columbus in 1493. They were later settled by Dutch and English planters, invaded by France in the mid-17th century and abandoned by the French c. 1700, by which time Danish influence had been established. St Croix was held by the Knights of Malta between two periods of French rule.

They were purchased by the United States from Denmark for \$25m. in a treaty ratified by both nations and proclaimed 31 March 1917. Their value was wholly strategic, inasmuch as they commanded the Anegada Passage from the Atlantic Ocean to the Caribbean Sea and the approach to the Panama Canal. Although the inhabitants were made US citizens in 1927, the islands are, constitutionally, an 'unincorporated territory'.

AREA AND POPULATION. The Virgin Islands group, lying about 40 miles due east of Puerto Rico, comprises the islands of St Thomas (28 sq. miles), St Croix (84 sq. miles), St John (20 sq. miles) and about 50 small islets or cays, mostly uninhabited. The total area of the 3 principal islands is 132 sq. miles, of which the US Government owns 9,599 acres as National Park.

The population, according to the census of 1 April 1970, was 62,800, an increase of 30,701 or 96% since 1960. This figure was afterwards revised to 75,151. Population had slowly declined since 1835, when it stood at 43,000, but began to recover in the 1940s. Estimated population, 1980, was 118,960: St Croix, 60,830; St Thomas, 55,560; St John, 2,570. About 20-25% are native-born, 35-40% from other Caribbean islands, 10% from mainland USA and 5% from Europe. St Croix has over 40% of Puerto Rican origin or extraction, Spanish speaking. In 1979-80 financial year births were 2,512 and deaths, 532.

The capital and only city, Charlotte Amalie, on St Thomas, had a population (1976) of 15,041; there are two towns on St Croix, Christiansted with 3,579 and Frederiksted with 1,939.

CONSTITUTION AND GOVERNMENT The Organic Act of 22 July 1954 gives the US Department of the Interior full jurisdiction; some limited legislative powers are given to a single-chambered legislature, composed of 15 senators elected for 2 years representing the two legislative districts of St Croix and St Thomas St John.

The Governor is elected by the islanders. A new Constitution was under consideration in March 1979, but was rejected by the electorate; a further constitutional convention was held in 1980. A new document was submitted to the President of the United States and to Congress; if approved, it will be submitted to the Virgin Islands electorate in a referendum during 1981. A Status Commission was appointed to advise on and guide towards greater self-determination; government and community are represented.

For administration, there are 13 executive departments, 12 of which are under commissioners and the other, the Department of Law, under an Attorney-General. The US Department of the Interior appoints a Federal Comptroller of government revenue and expenditure.

The franchise is vested in residents who are citizens of the United States, 18 years of age or over. In 1978 there were 27,954 voters, of whom 21,610 participated in the local elections that year.

They do not participate in the US presidential election but they have a non-voting representative in Congress.

The capital is Charlotte Amalie, on St Thomas Island.

Governor: Juan Luis (\$45,000).

Lieut.-Governor: Henry A. Millin (\$44,000).

ECONOMY

Budget. Under the 1954 Organic Act finances are provided partly from local re-

venues—customs, federal income tax, real and personal property tax, trade tax, excise tax, pilotage fees, etc.—and partly from Federal Matching Funds, being the excise taxes collected by the federal government on such Virgin Islands products transported to the mainland as are liable.

Revenue for fiscal year ending 30 Sept. 1980, \$189.2m., and expenditure \$161.7m. with another \$27m. committed.

Currency and Banking. United States currency became legal tender on 1 July 1934. Banks are the Chase Manhattan Bank; the Bank of Nova Scotia; the First Federal Savings and Loan Association of Puerto Rico; Barclays Bank International; Bank of America; Citibank; Deposit Insurance National Bank; First Pennsylvania Bank, and the Royal Bank of Canada.

ENERGY AND NATURAL RESOURCES

Electricity. The Virgin Islands Water and Power Authority provides electric power from generating plants on St Croix and St Thomas; St John is served by power cable and emergency generator.

Water. There is a shortage of pure water, of which rain-water is the most reliable source. Every building must have a cistern to provide rain-water for drinking, even in areas served by mains (10 gallons capacity per sq. ft of roof for a single-storey house). There are 6 desalinization plants with a maximum capacity of 8.7m. gallons of fresh water per day. Three others have been obtained and will be put into operation during 1981.

Agriculture. With the phasing out of the sugar-cane industry in St Croix, and the accelerated construction activities carried on in all three islands, the number of farms decreased, but there has recently been a revival of interest in food crops.

Land for fruit, vegetables and animal feed is available on St Croix, and there are tax incentives for development. Sugar has been terminated as a commercial crop and over 4,000 acres of prime land could be utilized for food crops.

Livestock (1980): Cattle, 6,678; goats, 5,346; pigs, 1,739; sheep, 1,562.

Fisheries. There is a fishermen's co-operative with a market at Christiansted. There is a shellfish-farming project at Rust-op-Twist, St Croix.

INDUSTRY AND TRADE

Industry. The main occupations on St Thomas are tourism and government service; on St Croix manufacturing is more important. Manufactures include watches, textiles, pharmaceuticals, rum and fragrances. The Martin Marietta Alumina plant processes bauxite from Africa for refining in mainland USA. The Amerada Hess oil refinery has a capacity of 700,000 bbls per day.

The Virgin Islands offer liberal tax exemptions to persons, firms or companies prepared to invest \$50,000 in new industries or in the promotion of tourism.

Commerce. Exports, calendar year 1979, totalled \$3,092.6m. and imports \$3,766m.

Total trade between the US Virgin Islands and UK (financial years, British Department of Trade returns, in £1,000 sterling):

	1976	1977	1978	1979	1980
Imports to UK	15	11	127	851	39
Exports and re-exports from UK	3,010	3,155	3,255	3,273	18,518

Tourism. Tourism is the most important business. There were about 1.2m. visitors in 1979 spending \$333m.

About 602,000 tourists came on cruise ships which made more than 821 calls, mainly at St Thomas which has a good, natural deepwater harbour.

COMMUNICATIONS

Roads. The Virgin Islands have 531.6 miles of roads, and 35,070 motor vehicles were registered in 1979.

Aviation. There is a daily cargo and passenger service between St Thomas and St Croix. Hamilton Airport on St Croix can take all aircraft except Concorde. Harry S. Truman Airport on St Thomas takes 727-class aircraft. There are air connexions to mainland USA, other Caribbean islands, Latin America and Europe.

Shipping. The whole territory has free port status. There is an hourly boat service between St Thomas and St John.

Post and Broadcasting. All three Virgin Islands have a dial telephone system. In Nov. 1980 there were 40,690 telephones. Direct dialling to Puerto Rico and the mainland is now possible. Worldwide radio telegraph service is also available.

The islands are served by 7 radio stations, 4 television stations and 5 newspapers, 2 of them dailies.

RELIGION AND EDUCATION

Religion. There are churches of the Protestant, Roman Catholic and Jewish faiths in St Thomas and St Croix and Protestant and Roman Catholic churches in St John.

Education. Education is compulsory between the ages of 5½ and 16 years, inclusive. In 1980-81 there were 35 public schools (ranging from kindergarten to high schools); enrolment was 25,201; other schools had 7,010 pupils; the public school budget was \$42.7m. In 1980 the College of the Virgin Islands had 2,203 registered students: 561 full-time undergraduates, 1,423 part-time undergraduates and 219 graduate students. The College is part of the United States land-grant network of higher education.

TRUST TERRITORY OF THE PACIFIC ISLANDS

HISTORY. Under the Treaty of Versailles (1919) Japan was appointed mandatory to the former German possessions north of the Equator. In 1946 the US agreed to administer the former Japanese-mandated islands of the Caroline, Marshall and Mariana groups (except Guam) as a Trusteeship for the United Nations; the trusteeship agreement was approved by the Security Council 27 April 1947 and came into effect on 18 July 1947. The Trust Territory was administered by the US Navy until 1951, when all the islands except Tinian and Saipan in the Marianas were transferred to the Secretary of the Interior. In 1962 the Interior Department assumed responsibility for them also. On 17 June 1975 the voters of the Northern Mariana Islands, in a plebiscite observed by the UN, adopted the covenant to establish a Commonwealth of the Northern Mariana Islands in Union with the USA. In April 1976 the covenant was approved by the US government and the administration of the Northern Marianas was separated from that of the rest of the Trust Territory; the group has a constitution and a constitutional government, installed 9 Jan. 1978. The rest of the Trust Territory is divided into 3 entities, each with its own constitution. The Marshall Islands, the Federated States of Micronesia (Yap, Kosrae, Truk and Ponape) and the Republic of Belau are all negotiating a status of free association with the US government. Free association will grant the USA the authority to control military and defence activities in return for federal government assistance and budget supports to the autonomous constitutional governments. Termination of the UN Trusteeship Agreement is contingent upon establishing a political status, either free association or independence, for the islands. Negotiations were proceeding in 1981.

AREA AND POPULATION. The Trust Territory extends from 1° to 22° N. lat. and from 142° to 172° E. long. The area is generally known as Micronesia, or 'land of the small islands' (Guam, Kiribati and Nauru not part of the Trust Territory, are also ethnically and geographically Micronesian); total land area 708 sq. miles; population (1979 estimate), 133,500.

The estimated population of the 6 administrative districts as of Oct. 1977 was: Truk, 35,220; Ponape, 21,187; Marshall Islands, 27,096; Belau, 13,519; Yap, 8,482; Kosrae, 4,471. Nine different languages are spoken, each with variations; English is used in the schools and is the official language.

CONSTITUTION AND GOVERNMENT. Constitutional governments are functioning in the Mariana Islands (1978), the Marshall Islands (1979), the Federated States of Micronesia (1979) and the Republic of Belau (1981). Each of the 4 entities is autonomous from the other 3 but all are still legally under the single Trust Territory system. The citizens are Trust Territory citizens until the termination of the Trusteeship. Majuro is the capital of the Marshall Islands. Kolonia, Ponape, is the capital of the Federated States, Koror is the headquarters of Palau and Saipan is the capital of the Commonwealth of the Northern Marianas, as well as the US administrative headquarters.

High Commissioner: Adrian P. Winkel.

INDUSTRY. Tourism is the main source of income from overseas; industrial development is limited. There is some commercial fishing and agriculture, a coconut-processing plant and a tuna-packing plant.

COMMUNICATIONS

Aviation. The island groups are served by Continental Air Micronesia via Honolulu. Internal commuter airlines operate in Ponape, Yap, Marshalls, Belau and the Marianas. There are connexions to international routes at Guam and Hawaii.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The Trust Territory Code, local constitutions and the Trusteeship Agreement are the foundations for law. Local police are responsible for enforcement. There is a Trust Territory High Court, constitutional courts and lesser courts. Local customs are recognized and protected in legal practice, when not in conflict with higher law.

Religion. Freedom of religion is guaranteed in the Trust Territory Code and all constitutions.

Education. Education is free and compulsory through elementary school (grades 1-8). There are public and private elementary and secondary schools and government post-secondary education.

Health. The public health system, which includes 6 district hospitals as well as other hospitals and clinics in outlying areas, is carried on by a staff consisting chiefly of trained Micronesian medical and dental officers and assistants under senior US doctors.

UPPER VOLTA

Capital: Ouagadougou

Population: 6.6m. (1979)

GNP per capita: US\$160 (1978)

République de Haute-Volta

HISTORY. A separate colony of Upper Volta was in 1919 carved out of the colony of Upper Senegal and Niger, which had been established in 1904. It was suppressed in 1932 and its territory divided between Ivory Coast, Sudan and Niger. On 4 Sept. 1947 the Territory of Upper Volta was re-established, comprising the area of the old colony of Upper Volta as at 5 Sept. 1932. The Republic of Upper Volta became independent on 5 Aug. 1960 and was admitted to the UN in 1960. On 3 Jan. 1966 the government of Maurice Yameogo was overthrown by a military *coup* led by Leut.-Col. Sangoulé Lamizana, who assumed the Presidency. Constitutional rule was resumed on 21 June 1970 but suspended from 8 Feb. 1974 until May 1978 and again from Nov. 1980.

HISTORY. The Republic of Uruguay, formerly a part of the Spanish Vice-royalty of Río de la Plata and subsequently a province of Brazil, declared its independence 25 Aug. 1825 which was recognized by the treaty between Argentina and Brazil signed at Rio de Janeiro 27 Aug. 1828. The first constitution was adopted 18 July 1830.

CONSTITUTION AND GOVERNMENT. Since 1900 Uruguay has been unique in her constitutional innovations, all designed to protect her from the emergence of a dictatorship. The favourite device of the group known as the 'Batllistas' (a *Colorado* faction) which, until defeated at the 1958 elections, held the majority for over 90 years, has been the collegiate system of government, in which the two largest political parties were represented.

One such pattern lasted from 1917 to 1933, when it was abolished by a dictator who re-established the system of an individual President. Until 1951 Presidents were elected every 4 years and they selected their own Cabinet Ministers (*see* list of Presidents in *THE STATESMAN'S YEAR-BOOK*, 1956, p. 1493). In 1951, on the initiative of the 'Batllistas', the Constitution was amended: the individual presidency was abolished and the executive power vested in a National Council of Government of 9 members (6 from the majority and 3 from the minority parties).

As a result of a referendum held on 27 Nov. 1966, Uruguay returned to the presidential system. The President appoints a council of 11 Ministers; the Vice-President presides over the Senate and the General Assembly when this takes place. A new Constitution was rejected by referendum in Dec. 1980.

President: Dr Aparicio Méndez (sworn in for a 5-year term on 1 Sept. 1976).

The Cabinet in April 1980 was as follows:

Interior: Gen. Manuel J. Nuñez. *Foreign Affairs:* Adolfo Folle Martínez. *Justice:* Dr Fernando Bayardo Bengoa. *Economy and Finance:* Dr Valentin Arismendi. *Transport and Public Works:* Eduardo Sampson. *Public Health:* Dr Antonio Cañellas. *Industry and Energy:* Ing. Francisco Turrelles. *National Defence:* Dr Walter Ravenna. *Agriculture and Fisheries:* Juan Cassou. *Education:* Daniel Darraeq. *Labour and Social Security:* Dr Carlos Alberto Maeso. *Secretary to Presidency:* Luis Vargas Garmendia.

Parliament was dissolved by Presidential decree on 27 June 1973 but a return to democratic government has been promised by 1981. A new Constitution was prepared during 1980.

The electorate in 1971 numbered 1.7m.; women constituted 50%.

The Colorado party favours 'statism' and social-welfare legislation. Most banking and all forms of insurance are government monopolies, as are also the railways and all the public utilities. The Government controls cement, fuel, petroleum and alcohol, including the manufacture of *caña*.

National flag: Nine horizontal stripes of white and blue, a white canton with the 'Sun of May' in gold.

National anthem: Orientales, la patria ó la tumba (words by Francisco Acuña de Figueroa; music by Francisco José Deballi).

DEFENCE

Army. The Army is composed of the active army and its reserves. The active army is formed of volunteers, who contract for 1 year or 2 years' service. In 1980 there were 2 regiments of cavalry, 4 artillery and 13 infantry battalions, 5 engineer battalions and 1 air defence battalion. Peace-time strength, 22,000 men.

The reserve is formed by elements who, for some reason or other, retire from the active army. It is reckoned that about 120,000 men could be mobilized in case of war.

Navy. The Navy consists of 3 frigates (*ex-US* old destroyer escorts), 2 escorts (*ex-US* fleet minesweepers), 1 patrol vessel (*ex-coastal* minesweeper), 6 patrol craft, 2 survey ships, 1 salvage vessel, 2 minor amphibious craft, 3 oilers and 3 tenders. Personnel in 1981: 3,500 officers and ratings including naval infantry.

There is a small US-equipped naval air service of 18 aircraft and helicopters with 3 bases on the river Plate estuary.

Air Force. Organized with US aid, the Air Force has about 3,000 personnel and 110 aircraft, including 1 fighter-bomber squadron with 5 AT-33 armed jet trainers, 8 A-37B light strike aircraft, 2 transport squadrons with 4 turboprop FH-227 F.27 Friendships, 6 Brazilian-built EMB-110 Bandeirantes (1 equipped for photographic duties), 10 C-47s and 7 Queen Airls, a search and rescue squadron with light helicopters, and a number of Cessna U-17A 182 and Super Cub aircraft for liaison and reconnaissance duties. Basic training types are the T-41 and T-34.

INTERNATIONAL RELATIONS

Membership. Uruguay is a member of UN, OAS and LAIA (formerly LAFTA).

ECONOMY

Budget. The receipts and expenditure of the national accounts as approved by the National Council of Government (UR\$1m.):

	1974	1975	1976	1977	1978	1979
Revenue	587,909	985,501	1,721,679	2,937,583	4,349,819	8,423,600
Expenditure	789,502	1,348,779	2,047,354	3,178,197	4,750,533	8,300,700

Now covering a 5-year period the budget is presented during the year following election of each new government; differences in actual annual income and expenditure and amendments to the budget (including new taxes) must be approved by Parliament each year-end; these usually come forward in July each year.

Expenditures in 1975 (in 1m. nuevo pesos) included 19,463 for education and welfare, 219,237 for defence, 82,757 for health, 152,632 for interior, 43,608 for finance and public works, 7,991 for agriculture and 22,497 for transport and tourism. Expenditure on public works is separately financed from specific revenues (e.g., fuel tax). A law inaugurating income tax came into operation on 1 July 1961, but was repealed on 1 March 1974.

Foreign debt outstanding on 31 Dec. 1979 was US\$1,492m. Total reserves of the Banco Central on 31 March 1980 were US\$635.2m.

Currency. There is no gold in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso oro*, gold content of which was fixed, Dec. 1964, at 0.05924 gramme. It is equal to 100 *pesos*. The unit of currency is the *Nuevo Peso* (1,000 old pesos) of 100 *centésimos*. The actual circulating medium consists of paper notes issued by the Central Bank in denominations of 10,000, 5,000 and 1,000 old *pesos*. (Some notes have been restamped N\$5 and N\$10.) New notes in *Nuevo Peso* denominations of 50, 100, 500 and 1,000 are also in circulation, as is a *Nuevo Peso* 5 coin. There are bronze and aluminium coins of 50, 20 and 10 old *pesos*.

In March 1981 there were N\$10.27 to the US\$; N\$22.36 = £1.

Banking. The Bank of the Republic (founded 1896), whose president and directors are appointed by the Government, has a paid-up capital of UR\$1.852m. The Banco Central was inaugurated on 16 May 1967. Note circulation on 31 March 1980 was UR\$488,500m.

A state-owned National Insurance Bank (*Banco de Seguros del Estado*) has a monopoly of new insurance business of all kinds. The Bank re-insures much of its business in London.

Of the 36 banks in Uruguay the Bank of London and South America (British) has a main office and 12 branch agencies.

Weights and Measures. The metric system was adopted in 1862.

ENERGY AND NATURAL RESOURCES

Electricity. The supply of electricity for light, power and traction has been a State monopoly since 1897. In Jan. 1949 the first hydro-electric plant at the site of the dam of Rincón del Bonete was completed with an installed capacity of 128 megawatts. Another plant at Rincón de Baygorria on the Rio Negro came into operation in 1960, with a capacity of 108 megawatts. Five turbines of the Salto Grande hydro-electric dam were operating by Oct. 1980. Power output in Dec. 1979 was 2,749m. kwh.

Oil. An extension of the ANCAP refining plant, opened at Montevideo on 6 Dec. 1961, gives a capacity of 7,500 cu. metres daily of high-octane petrol and high-grade gas for domestic and industrial use.

Agriculture. Uruguay is primarily a pastoral country. Of the total land area of 46m. acres some 41m. are devoted to farming, of which 90% to livestock and 10% to crops. Some large *estancias* have been divided up into family farms; rural landlordism is much less than elsewhere. Uruguay is said to be the only Latin American country in which agricultural workers have the protection of a minimum-wage law. Animals and animal products constituted 43% of the exports in 1977. The 1966 census reported on 79,101 farms of all kinds, totalling 16.5m. hectares.

There were (1979) 10m. cattle, 18.7m. sheep, 525,000 horses, 400,000 pigs, 12,000 goats and 7.6m. poultry.

Wool production in 1979 exceeded 61,000 tonnes.

Agricultural products are raised chiefly in the departments of Paysandú, Rio Negro, Colonia, San José, Soriano and Florida. The average farm is about 250 acres. The principal crops and their estimated yield (in tonnes) in 2 crop years were as follows:

	1978	1979		1978	1979
Wheat	173,200	174,200	Barley	38,000	57,400
Linseed	39,800	31,200	Maize	171,700	70,900
Oats	17,300	23,000	Rice	225,600	248,000

Uruguay is self-sufficient in rice, with a surplus for export. Three sugar refineries handle cane and (mainly) beet, their total production being approximately 90,000 tonnes, and approaching self-sufficiency.

Wine is produced chiefly in the departments of Montevideo, Canelones and Colonia, about enough for domestic consumption. The country has some 6m. fruit trees, principally peaches, oranges, tangerines and pears.

Forestry. In 1974 roundwood removals were 1,077,000 cu. metres, of which 1,001,000 cu. metres was softwood.

Fisheries. In 1979, the total catch was 108,000 tonnes. Exports amounted to 47,000 tonnes valued at US\$36.2m.

INDUSTRY AND TRADE

Industry. In 1978 there were nearly 77,000 registered enterprises with 405,000 employees. These cover activities such as meat packing, oil refining, cement manufacture, foodstuffs, beverages, leather and textile manufacture, chemicals, light engineering and transport equipment. There are about 100 textile mills, but with the exception of half a dozen large plants, these are on the whole small.

The development of industry is an important economic policy objective and there is a liberal attitude to foreign investment for industrial promotion.

There are a number of public works programmes including airport modernization, port of Montevideo modernization, highways improvements, Montevideo sewage disposal, power production and transmission and telecommunications.

Trade Unions. Trade unions number about 150,000 members. About 1,036,000 (40%) of the population are classed as gainfully occupied.

COMMUNICATIONS

Roads. The main highways, linking Montevideo with the interior, have a total length of 9,899 km, of which about 5,000 km are paved. Other roads, unpaved, are about 4,726 km. Considerable improvements, financed both internally and by international loans, have been carried out in the last few years.

Registered motor vehicles, 31 Dec. 1978, are estimated at 220,000 passenger cars and 92,150 trucks and buses.

Railways. The 4 principal railway systems, embracing 2,987 km, were all built by British capital amounting to £14,513,000. The Uruguayan Government in 1948 bought these railways for £7.15m., assuming control in that year. The East Coast Railway (125.5 km) and 3 minor lines were already controlled by the State under a separate administration. In Oct. 1952 the railways were brought under a single administration and a major programme of track upgrading and rolling stock rehabilitation was in progress in 1977. The total railway system open for traffic was (1980) 3,004 km of 1,435 mm gauge. In 1978 it carried 494m. passengers-km, 303m. tonne-km of freight. In 1979 the 27 km line between Mercedes and Ombucito was opened, providing a direct route from Montevideo to Fray Bentos.

Aviation. Carrasco, 22.5 km from Montevideo, is the most important airport. US, Argentine, Brazilian, Chilean, Dutch, French, Fed. German, Italian, Scandinavian and Paraguayan airlines fly to and from Uruguay. The state-operated civil airline PLUNA runs services in the interior of the country and to Brazil, Paraguay and Argentina.

Shipping. On 31 Dec. 1978 the 8 merchant vessels and 4 tankers under the Uruguayan flag had a GRT of 103,336. In 1979, 1,461 vessels cleared Montevideo, 50 being British. River transport (1,270 km) is extensive, its main importance being to link Montevideo with Paysandú and Salto.

Post and Broadcasting. The telegraph lines in operation have a total length of 12,083 km. The telephone system in Montevideo is controlled by the State; small companies operate in the interior. Telephone instruments, 1978, numbered 268,026. There are 1,277 post offices. Uruguay has 54 long-wave and 17 short-wave broadcasting stations. There are about 1m. wireless sets and 200,000 television receivers. There are 4 television stations. The State itself operates one of the most powerful sound broadcasting stations in South America. Two cable companies connect Montevideo with the US and Europe.

Cinemas (1979). Cinemas numbered 85 with seating capacity of 47,000.

Newspapers (1977). There were 5 daily newspapers in Montevideo with aggregate daily circulation of about 210,000; most of the 25-30 provincial newspapers appear bi-weekly.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The Ministry of Justice was created in 1977 to be responsible for relations between the Executive Power and the Judiciary and other jurisdictional entities. The Court of Justice is made up by 5 members appointed by the Council of the Nation at the suggestion of the Executive Power, for a period of 5 years. This court has original jurisdiction in constitutional, international and admiralty cases, and hears appeals from the appellate courts, of which there are 4, each with 3 judges.

In Montevideo there are also 8 courts for ordinary civil cases, 3 for government (*Juzgado de Hacienda*), as well as criminal and correctional courts. Each departmental capital has a departmental court; each of the 224 judicial divisions has a justice of peace court. In Sept. 1907 the death penalty was abolished, replaced by penal servitude for a period of 30-40 years.

Religion. State and Church are separated, and there is complete religious liberty. The faith professed by the majority of the inhabitants is Roman Catholic. The archbishopric of Montevideo has 9 suffragan bishops in Salto, Melo, Florida, Minas, San José, Canelones, Tacuarembó, Mercedes and Maldonado.

Protestants numbered about 10,500 in 1957.

Education. Primary education is obligatory; both primary and superior education are free.

In 1979 there were 1,050 primary public schools with 364,910 pupils and approximately 10,300 teachers; in 1979, 249 secondary schools had 196,462 pupils. There are also evening courses for adults. Illiteracy is now confined largely to the older age groups.

The University of the Republic at Montevideo, inaugurated in 1849, has about 16,200 students; tuition is free to both native-born and foreign students; there are 10 faculties. There are 43 normal schools for males and females, and a college of arts and trades with about 33,000 students. There are also many religious seminaries throughout the Republic with a considerable number of pupils, a school for the blind, 2 for deaf and dumb and a school of domestic science.

Capital: Vila

Population: 112,596 (1979)

GNP per capita: US\$540 (1978)

Republic of Vanuatu

HISTORY. The group was administered for some purposes jointly, for others unilaterally, as provided for by Anglo-French Convention of 27 Feb. 1906, ratified 20 Oct. 1906, and a protocol signed at London on 6 Aug. 1911 and ratified on 18 March 1922. On 30 July 1980 the Condominium of the New Hebrides achieved independence and became the Republic of Vanuatu.

AREA AND POPULATION. The Vanuatu group lies roughly 500 miles west of Fiji and 250 miles north-east of New Caledonia. The estimated land area is 5,700 sq. miles (14,760 sq. km). The larger islands of the group are: Espiritu Santo, Malekula, Epi, Pentecost, Aoba, Maewa, Paama, Ambrym, Efate, Erromanga, Tanna and Aneityum.

There are 3 active volcanoes, on Tanna, Ambrym and Lopevi, respectively. Earth tremors are of common occurrence. Rainfall at Vila (the capital, population (1979) 14,000) averages 90 in. per annum.

The first complete census was taken in 1967. The total population was found to be 77,988, of whom 72,243 were Vanuatuans. Census, Jan. 1979, 112,596.

CONSTITUTION AND GOVERNMENT. General elections took place in Nov. 1975 to elect a 42-member Representative Assembly, replacing the former advisory council. Further general elections took place in Nov. 1979. A committee system was instituted and the Assembly chose its own President from its own members in 1977. The President replaced the Co-Presidents, who were the Resident Commissioners.

ECONOMY

Budget. The budget for 1980 (estimate): Revenue, 1,520m. NH francs; expenditure, 2,682m. NH francs. The main sources of revenue were import and export duties.

Currency. In Sept. 1979, 100 NH francs = \$A1.35 Australian decimal currency was introduced in 1966. It and the New Hebrides *franc* are the currencies in use.

Banking. Because of the absence of direct taxation, with the exception of an added value tax on sales of sub-divided land, there has been growing interest in Vanuatu as a finance centre and 500 overseas companies are using Vila and have contributed 450m. NH francs in invisible export earnings. There were 8 banks in Vila in 1980 and there has been a corresponding growth in other professions associated with the finance industry. There is a National Development Bank operated by the government and branches of the Bank of Indochine et de Suez at Vila and Santo. Barclays Bank International has a branch in Santo.

NATURAL RESOURCES

Minerals. The manganese mine, established at Forari on Efate by the Compagnie Française de Phosphates de l'Océanie, closed in 1968 but was reopened in 1970 by Southland Mining of Australia. Manganese exports, 1979, 25m. NH francs.

Agriculture. The main commercial crops are copra, cocoa and coffee. Yams, taro, manioc and bananas are grown for local consumption. A large number of cattle are reared on plantations, and an up-grading programme using pure-breed Charolais, Limousins and Illawarras has begun. A beef industry is developing.

Livestock (1979): Cattle, 97,000; goats, 7,000; pigs, 65,000; poultry, 140,000.

Forestry. An active forestry development programme is in progress and more than 26 plantations of South American hardwoods have been established.

Fisheries. The principal catch is tuna (1980, 10,000 tonnes) mainly exported to USA.

INDUSTRY AND TRADE

Industry. There is no heavy industry but there is increasing activity in light industries. Industries include a saw-mill, a soft drinks factory, meat canneries and a modern abattoir, and a fish-freezing plant. A few indigenous crafts, such as basketry, canoe building and pottery, are practised. Subsistence fishing is done by the Vanuatuans, and a plant for freezing of tuna and bonito commenced operation in 1957. The plant, which is sited on Santo, freezes and packages for export to Japan and elsewhere, fish caught by Taiwanese and other vessels under contract to the British company running the plant. There are over 300 co-operative societies handling 85% of the distribution of goods in the islands.

Commerce. Imports and exports were (in 1m. NH francs).

	1977	1978	1979
Imports	3,145	3,691	4,180
Exports	2,535	2,682	2,850

In 1979 the main exports were Copra, 39,821 tonnes, 1,505m. NH francs, fish, 7,623 tonnes, 831m. NH francs, beef, 750 tonnes, 135m. NH francs. Australia, France and Japan were the major sources of imports and principal imports were food and drink, manufactured goods and petroleum products.

Tourism. Tourism is a growing industry and in 1979 there were 30,454 visitors to Vanuatu.

COMMUNICATIONS

Aviation. External air services are provided by Air Pacific, UTA (Unions de Transport Aériens) and Air Nauru. Air Pacific has two services a week Nandi-Vila-Honiara-Brisbane, and one Nandi-Vila-Noumea-Brisbane. UTA has daily flights from Noumea, and a weekly flight to Wallis. Air Nauru gives a weekly service Vila-Nauru. Inter-island flights are provided by Air Melanesiae. The principal airports are Bauer Field (for Vila) and Pekoa (for Santo). Seventeen smaller airfields provide an internal network. In 1977 there were 1,000 overseas aircraft arrivals in Vanuatu carrying 59,141 passengers.

Shipping. Several international shipping lines serve Vanuatu, linking the country with Australia, New Zealand, other Pacific territories notably Hong Kong, Japan, North America and Europe. The chief ports are Vila and Santo. In 1977, 394 vessels arrived including 48 cruise ships carrying 40,412 visitors. 92,340 tons of cargo were exported and 102,867 tons discharged. Small vessels provide frequent inter-island services.

Telecommunications. Internal telephone and telegram services are provided by the Posts and Telecommunications and Radio Departments. There are automatic telephone exchanges at Vila and Santo; rural areas are served by a network of telegraph radio stations. In 1978 there were 2,409 telephones.

There are direct circuits to Noumea, Sydney, Hong Kong and Paris and high quality communications are available on a 24-hour basis to most countries in the world. Air radio facilities are provided. Teacher training for both English and French language teachers is conducted in Vanuatu.

There were (1980) 115 French language primary and 3 secondary schools and 161 English language primary and 5 secondary schools.

Health. Medical care is provided through a network of 106 hospitals, health centres, clinics and dispensaries administered by the Government with the help of a number of voluntary agencies, and WHO. Public health measures and the control of communicable diseases are the responsibility of the public health administration. Local training schemes are devoted to basic community nurse training at hospitals in Vila, to rural health training and refresher courses at a special training health centre in North Efate, or by attachment to other suitable clinics and health centres, and to training of village sanitarians or health orderlies.

Malaria is still the most serious of the major endemic diseases which also include tuberculosis, leprosy, filariasis and venereal disease. During 1975-76 yaws recurred on some islands and there were epidemic outbreaks of dengue, influenza and gastro-enteritis.

VATICAN CITY STATE

Stato della Città del Vaticano

HISTORY. For many centuries the Popes bore temporal sway over a territory stretching across mid-Italy from sea to sea and comprising some 17,000 sq. miles, with a population finally of over 3m. In 1859-60 and 1870 the Papal States were incorporated with the Italian Kingdom. The consequent dispute between Italy and successive Popes was only settled on 11 Feb. 1929 by three treaties between the Italian Government and the Vatican: (1) A Political Treaty, which recognized the full and independent sovereignty of the Holy See in the city of the Vatican; (2) a Concordat, to regulate the condition of religion and of the Church in Italy; and (3) a Financial Convention, in accordance with which the Holy See received 750m. lire in cash and 1,000m. lire in Italian 5% state bonds. This sum was to be a definitive settlement of all the financial claims of the Holy See against Italy in consequence of the loss of its temporal power in 1870. The treaty and concordat were ratified on 7 June 1929. The treaty has been embodied in the Constitution of the Italian Republic of 1947.

The Vatican City State is governed by a Commission appointed by the Pope. The reason for its existence is to provide an extra-territorial, independent base for the Holy See, the government of the Roman Catholic Church.

In 1930 the issue of Papal coinage was resumed, after a lapse of 60 years. In virtue of a special convention between the Vatican City and the Italian Government (last renewed in 1962), each state allows the currency of the other to circulate in its territory. The Vatican City has, however, given an undertaking that the total value of its coins issued in ordinary years will not exceed 100m. lire, 200m. lire in years of 'Sede vacante' or holy years, or 300m. in the year of the opening of a Council.

AREA AND POPULATION. The area of the Vatican City is 44 hectares (108.7 acres). It includes the Piazza di San Pietro (St Peter's Square), which is to remain normally open to the public and subject to the powers of the Italian police. It has its own railway station (opened Nov. 1932), postal facilities, coins and radio. Twelve buildings in and outside Rome enjoy extra-territorial rights, including the Basilicas of St John Lateran, St Mary Major, St Paul without the Walls and the Pope's summer villa at Castel Gandolfo. On 8 Oct. 1951 extra-territorial rights were also granted to a new Vatican radio station on Italian soil. *Radio Vaticana* is broadcasting an extensive service in 31 languages from transmitters in the Vatican City and in Italy.

The Vatican City has about 1,000 inhabitants.

CONSTITUTION. The Pope exercises the sovereignty and has absolute legislative, executive and judicial powers. The judicial power is delegated to a tribunal in the first instance, to the Sacred Roman Rota in appeal and to the Supreme Tribunal of the Signature in final appeal.

The Pope is elected by the College of Cardinals, meeting in secret conclave. The election is by scrutiny and requires a two-thirds majority.

ROMAN CATHOLIC CHURCH. The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting in Jan. 1981 of 126 Cardinals appointed by him from senior ecclesiastics who are either the bishops of important Sees or the heads of departments at the Holy See. In addition to the College of Cardinals, the Pope has created a 'Synod of Bishops'. This consists of the Patriarchs and certain Metropolitans of the Catholic Church of Oriental Rite, of elected representatives of the national episcopal conferences and religious orders of the world, of the Cardinals in charge of the Roman Congregations and of other persons nominated by the Pope. The Synod meets as and when decided by the Pope; its first session was held in the autumn of 1967 and its third session in Oct. 1974.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, each composed of a number of Cardinals and diocesan bishops (both appointed for 5-year periods), with Consultors and Officials. Besides the Secretariat of State and the Council for Public Affairs of the Church (which deals with external relations) there are now 9 Sacred Congregations, viz.: Doctrine, Oriental Churches, Bishops, the Sacraments and Divine Worship, Clergy, Religious, Catholic Education, Evangelization of the Peoples and Causes of the Saints. There are also 3 Secretariats: for Christian Unity, Non-Christians and Non-Believers; a Prefecture of Economic Affairs, a Prefecture of the Pontifical Household and a Statistical Office. Furthermore, the Roman Curia contains 3 tribunals, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature and the Sacred Roman Rota; and, lastly, various other councils and commissions dealing with the Laity, Justice and Peace, Women, the Family, the Revision of Canon Law, Social Communications, Migration and Tourism. The Pontifical Academy of Sciences was revived by Pius XI in 1936 with 70 members.

More than 2,500 Roman Catholic prelates and 99 observer-delegates from 27 other Christian Churches attended the Second Vatican Council which met 11 Oct. 1962 and 8 Dec. 1965. Sixteen Constitutions and Decrees were approved at the Council, and 7 commissions were set up to implement these decisions.

DIPLOMATIC REPRESENTATIVES

In its diplomatic relations with foreign countries the Holy See is represented by the Council for Public Affairs of the Church. It maintains permanent observers to the UN in New York and Geneva and to UNESCO and FAO. The Holy See is a member of IAEA and the Vatican City State is a member of UPU and ITU. It therefore attends as a member those international conferences open to State members of the UN and specialized agencies.

Envoy and Minister to the Holy See: Sir Mark Heath KCVO, CMG. *First Secretary:* J. H. Callan, MVO, OBE.

*Apostolic Delegate*¹ for Great Britain, Bermuda and Gibraltar: Mgr Bruno Heim, Titular Archbishop of Xanto.

¹ Apostolic delegate is a representative of the Holy See without diplomatic status or privileges.

The constitution of 1958 provides for popular election for a term of 5 years of a President, a National Congress, and State and Municipal legislative assemblies, and guarantees the freedom of labour, industry and commerce. Aliens are assured of treatment equal to that extended to nationals.

Congress consists of a Senate and a Chamber of Deputies. At least 2 Senators are elected for each State and for the Federal District. Senators must be Venezuelans by

birth and over 30 years of age. Deputies must be native Venezuelans over 21 years of age; there is 1 for every 50,000 inhabitants. The territories, on reaching the population fixed by law, also elect deputies. Voting (by proportional representation) is compulsory for men and women over 18. Owing to the high rate of illiteracy, voting is by coloured ballot cards.

The President must be a Venezuelan by birth and over 30 years of age; he has a qualified power of veto.

The following is a list of presidents since 1941:

The city of Caracas is the capital. The 20 states, autonomous and politically equal, have each a legislative assembly and an elected governor. The states are divided into 156 districts and 613 municipalities. There are also 2 federal territories with 7 departments, and a federal district with 2 departments and 2 parishes. Each district has a municipal council, and each municipio a communal junta. The federal district and the 2 territories are administered by the President of the Republic.

DEFENCE. In 1958 a Joint Staff Organization was established under the Minister of Defence for the closer integration of defence policy and administration of the three Services and the National Guard.

Army. All Venezuelans on reaching 18 years of age are liable for 2 years in the Armed Forces. They can opt for the Air Force or the Navy instead of the Army, but their allocation is finally dependent upon current requirements. The Army's established strength of approximately 27,000 all ranks furnishes 1 cavalry battalion, 11 infantry and 2 mechanized battalions, 3 ranger battalions, 3 tank battalions and supporting engineering, artillery, anti-aircraft and supply services. There is a military academy for cadets, a school for staff studies and other technical training schools. Women can also be conscripted, as nurses, clerks, etc.

Navy. Strength includes 3 diesel-powered patrol submarines (2 new built in Federal Republic of Germany and 1 old ex-US submarine), 2 old destroyers (ex-US), 6 frigates built in Italy (4 new and 2 old), 6 fast missile-armed patrol craft built in Britain in 1974-75, 3 landing ships, 1 transport landing ship (ex-repair ship), 1 survey ship, 2 survey launches, 2 transports and 13 tugs. Coastal patrol boats operated by the National Guard now number 43.

New construction includes 2 more frigates, armed with guided missiles and equipped with helicopter, hangar and flight deck, ordered from Italy, and 2 more submarines from the Federal Republic of Germany.

There is a naval academy for the training of officer cadets and a school of staff studies and various technical training schools. Personnel in 1981 exceeded: 7,500 officers and men including 4,000 of the Marine Corps.

Air Force. Formed in 1920, the Air Force of some 4,500 officers and men is a small, but well-equipped service with a total of about 250 aircraft. There are 5 combat squadrons. One is equipped with 9 Mirage IIIE and 4 Mirage 5 supersonic fighters and 2 Mirage 5D trainers. Two others have a total of 15 Canadair CF-5A fighter-bombers and 2 two-seat CF-5Bs. Two bomber squadrons are equipped respectively with 23 modernized Canberra jet-bombers and 20 F-86K Sabre interceptors, 15 OV-10E Bronco twin-turboprop counter-insurgency aircraft, supported by 2 Canberra reconnaissance aircraft. A helicopter force consists of more than 35 Bell JetRangers and 212s, UH-1B/D/H Iroquois and Alouette IIIs. Transport units are equipped with 12 C-123 Providers, 6 C-130H Hercules, 2 HS.748 and 15 C-47s. Communications aircraft are Queen Airs and other types. T-34 Mentors are used for training, together with 24 T-2D Buckeye advanced jet trainers, which have a secondary attack role. A battalion of paratroops comes within Air Force responsibility. There is a staff college and a cadet academy.

National Guard, a volunteer force of some 15,000 under the Ministry of Defence, is broadly responsible for internal security. It includes customs and forestry duties among its tasks.

INTERNATIONAL RELATIONS

Membership. Venezuela is a member of UN, OAS, LAIA (formerly LAFTA), OPEC and the Andean Group.

Aid. Venezuela has lent about US\$500m. to the World Bank, SDR 650m. to the IMF and US\$100m. to the UN Emergency Fund. A trust fund administered by the Inter-American Development Bank is to distribute US\$500m. during 1975-80, and there are separate agreements with a number of Central and Southern American states.

ECONOMY

Planning. The sixth 5-year plan (1981-85) aims to achieve economic growth but with a reorientation of priorities towards social programmes: Education, housing and public services. There are 5 major projects: Caracas metro, Guri hydro-electric scheme, INOS water supply, major housing schemes and the Corpozulia coal and steel complex. These will cost Bs. 67,000m. over 5 years. Oil production will continue at current target levels of 2.2m. bbls. per day but prices are projected to double over the period, resulting in increased earnings, despite growing domestic consumption. GDP is forecast to grow 6% in 1981-85, this is below the 5th plan target of 8.2% but above 5.6% which was actually achieved 1976-80.

Budget. The revenue and expenditure for calendar years were, in Bs.lm., as follows:

	1974	1975	1976	1977	1978	1979
Revenue	42,799	41,270	43,143	51,179	44,480	50,588
Expenditure	40,059	40,266	44,571	50,694	44,273	51,236

The heavy investment required to develop the oil, steel and aluminium industries has created substantial debts, the debt service in 1979 being Bs.8,071m. (9.4% of GDP and 16% of exports) and by 1981 it is forecast to be Bs.16,587m. (18.1% of GDP and 27% of exports). In 1978 the petroleum industry accounted for 49.6% of total government revenues; in 1981 oil revenues are projected at Bs.39,300m.

Currency. The official monetary unit is the *bolivar*. As a result of exchange reforms of Jan. 1964 the selling rate to the public was changed to Bs.4.50 = US\$1. The selling rate applicable to iron and petroleum companies is Bs.4.30 = US\$1. Cocoa and coffee exporters may sell exchange to the Central Bank at Bs.4.485. Importers of wheat and powdered milk are eligible for subsidies amounting to the difference between the previous selling rate of Bs.3.35 and the current sellers' Bs.4.30 = US\$1. In March 1981, £ = Bs.9.34; US\$1 = 4.29.

The *bolivar* (Bs.) is divided into 100 *céntimos*. Gold coins, 100 (*pachanos*), 20 and 10 *bolivars* have been minted but are no longer in circulation; silver coins are 5 (*fuerte*), 2, 1 *bolivars*; nickel, 50 (*real*), 25 (*medio*) and 12.5 *céntimos* (*locha*), copper-nickel, 5 *céntimos* (*puya*).

The bank-notes in circulation are 500, 100, 50, 20 and 10 *bolívares*. The circulation of foreign bank-notes is forbidden.

Banking. The ten major banks are (1980):

	Assets		Deposits

Banco Industrial de Venezuela	9,413	6.36	5,091	5.85
Banco de Venezuela	8,822	5.96	6,358	7.31
Banco nacional de Descuento	8,675	5.86	5,632	6.47
Banco Unión	8,555	5.78	6,958	8.00
Banco Mercantil y Agrícola	8,286	5.60	6,390	7.34
Banco de los Trabajadores de Venezuela	7,272	4.92	3,853	4.43
Banco Provincial SAICA	4,845	3.27	4,022	4.62
Banco Latino	4,559	3.08	3,664	4.21
Banco de Maracaibo	4,023	2.72	2,291	3.78
Banco Unido	3,717	2.51	352	0.40

The 5 largest banks attract 30% of all deposits, the largest 2 banks are state controlled and the third largest is run by the government.

ENERGY AND NATURAL RESOURCES

Oil. (1979) Venezuela is the sixth largest petroleum exporting country in the world and the seventh largest producer; production began in 1917 with 18,000 cu. metres. The oil-producing region around Maracaibo, covering some 30,000 sq. miles, produces about three-quarters of Venezuelan petroleum, and the country is likely to remain a major producer of oil well into 21st century. Deposits in the Orinoco region are likely to prove one of the largest heavy oil reserves in the world. Nationalization of the privately owned oil sector in 1976 has proved successful. New distribution channels have been established, with the result that the major transnational companies which took 80% of Venezuela's oil in 1976 handled only 50% in 1980.

Oil production peaked at 3.7m. bbls per day in 1970, but a conservation policy plus reduced export demand has resulted in output dropping to 2.1m. bbls per day in the first half of 1980.

Proven reserves in mid-1979 stood at 18,500m. bbls, probable reserves at 15,000m. and possible at 102,000m. However, these are considered conservative estimates and new fields off-shore have estimated reserves of 6,000–40,000m. bbls. The massive Orinoco tar sands belt has reserves variously estimated at between 700,000m. bbls. and 3,000,000m. bbls. Orinoco is expected to produce 300,000 bbls. per day by 1988.

Minerals. Bauxite is being exploited in the Guayana region by Bauxien, a state agency. There are important goldmines in the region south-east of Bolívar State, and new deposits have been discovered near El Callao (1959) and Sosa Méndez (1961) in the Guayana region. Output, 1977, amounted to 541 kg. Imports of 7,000 kg per annum are necessary for industrial purposes. Diamond output, from Amazonas territory, was 687,000 carats in 1977. Manganese deposits, estimated at several million tons, were discovered in 1954. Phosphate-rock deposits (yielding from 64 to 82% tricalcium phosphate) are found in the state of Falcón; reserves of 15m. tons of high-quality rock have been established. The state of Sucre has large sulphur deposits. Coal is worked in the states of Táchira, Aragua and Anzoátegui, production in 1977 being 115,000 tonnes. Coal proven reserves in Zulia (160m. ton) are to be developed to service a new thermal power station in the Maracaibo area. An important nickel deposit (at Loma de Hierro near Tejerías) is estimated to equal 600,000 tons of pure nickel. Saltmines are now worked by the Government on the Araya peninsula; output, 1964, 202,000 tonnes. Asbestos and copper pyrite are being exploited.

Iron ore is exploited in Bolívar State by the Orinoco Mining Co. and Iron Mines of Venezuela, subsidiaries respectively of the US Steel Corp. and the Bethlehem Steel Co. Proven reserves at the end of 1963 were 1,513m. tonnes. National output of iron ore, 1977, 14.4m. tonnes.

Agriculture. Venezuela is divided into 3 distinct zones—the agricultural, the pastoral and the forest zone. In the first are grown coffee, cocoa, sugar-cane, maize, rice, wheat (grown in the Andes), tobacco, cotton, beans, sisal, etc.; the second affords grazing for more than 6m. cattle and numerous horses; and in the third, which covers a very large portion of the country, tropical products, such as caoutchouc, balatá (a gum resembling rubber), tonka beans, dividivi, copaiba, vanilla, growing wild, are worked by the inhabitants. The 1979 livestock estimate showed cattle, 10m.; pigs, 2.1m.; goats, 1.4m.; sheep, 314,000; poultry, 34m. Area under cultivation is 5,530,898 acres. Agriculture is the weakest sector of the economy, accounting for only 6% of GDP and employing 16.3% of the national workforce. Over 50% of all farmers are engaged in subsistence agriculture and growth rates in agricultural production have not kept pace with the high population increase. Government has introduced a programme of price support, tax incentives and price increases but cattle farming is at present the only profit opportunity.

Production in tonnes in 1978: Coffee, 72,000; maize, 740,000; rice, 600,000, sugar-cane, 5.15m.

The coffee plantations number 62,673, covering 543,400 acres with 135m. bushes. The Venezuelan cocoa, from 13,000 plantations, is considered to be of high quality; it is grown chiefly in the states of Sucre and Miranda. The sugar industry has 6 government and 20 privately owned mills.

Forestry. Resources have been barely tapped; 600 species of wood have been identified. Output of roundwood timber, 1977, broadleaved 8m. cu. metres.

Fisheries. The fishing industry is to be developed by the provision of port and processing facilities, research and training.

Total catch (1977) was 152.2m. tonnes.

INDUSTRY AND TRADE

Industry. Under the 5th National Plan, ending in 1980, a programme has been undertaken to establish the Guayana integrated industrial complex: by mid-1980, Bs.25,000m. had been invested. Plans involved expanding the capacity of the Guri dam to 9,000 mw as a power supply, raising steel capacity at the Sidor mill from 1.2m. to 4.8m. tonnes per annum (a new steel complex is also to be built in Zulia region) and establishing an integrated aluminium industry in the region.

Aluminio del Caroni (Alcasa) is to increase output from 54,000 to 120,000 tonnes per year, and a new facility, Venezolana de Aluminio (Venalum) is to be installed with a capacity of 280,000 tonnes per year, the largest in Latin America. An alumina factory, Interalumina, is to be built.

The shipbuilding industry is being developed and will become the largest in South America. Venezuela is the biggest and most advanced motor vehicle producer within the Andean Pact, with General Motors, Ford, Jeep, Rover, FIAV (Fiat) and Pegaso all having plants in the country.

Industrial development is concentrated in capital intensive areas where it can have a competitive advantage within the Andean Group, whereas in more labour intensive industries, the low labour costs of other member countries gives them an advantage. However, Venezuela currently produces 90% of its requirements of processed food, beverages, tobacco, clothing and textiles.

Labour. The labour force in 1979 was 4.2m. (including 1.25m. legal immigrants), some 32% of the total population (the low percentage is due to 55% of the population being under 20). 17% of the working population is in the primary sector, 27% in secondary and 56% in tertiary.

Job creation is a high priority in the 6th National Plan, with an aim of 200,000 new jobs per year. Unemployment increased from 4.8% to 6% in 1979. However, official statistics exclude the 3m. *indocumentados* (illegal immigrants) who find work on major construction projects such as the Guri dam.

Wages are the highest in Latin America, there is a high turnover of labour and a corresponding rate of absenteeism.

45% of the labour force is unionized. The most powerful confederation is the CTV (*Confederacion de Trabajadores de Venezuela*, formed 1947), which is domin-

ated by the Accion Democratica party. Estimated membership, 1.1m., claims 2m. Comprises 68 regional and industrial federations with over 6,000 unions, including: FCV (peasants), 700,000; FETRACONS (construction workers), 1000,000; FET-RASALUD (health workers), 45,000; FETRAMETAL (metal workers and miners), 32,000; the very important FEDEPETROL (oil workers), 6,000; Federacion Venezolana de Maestros (teachers).

Other confederations are CUTV (*Confederacion Unitaria de Trabajadores Venezolanos*, formed 1963). Estimated membership, 40,000, claims 100,000. Comprises 8 regional and 5 industrial federations in 185 local unions; and, CODESA (*Confederacion de Sindicatos Autonomos de Venezuela*, formed 1964). Estimated membership, 10,000, claims 35,000. Dominated by COPEI party. Comprises 120 local unions, including textile, petrol distribution, public health and education workers federations.

Commerce. Venezuela's exports and imports (in US\$1m.):

	1976	1977	1978	1979
Exports	9,149	9,661	9,174	13,615
Imports	6,086	10,339	11,022	10,691

Main export markets in 1978 were USA (Bs.13,949m.), Netherlands Antilles (Bs.8,699m.) because of its oil refining and transshipment facilities, Canada (Bs.4,244m.), Puerto Rico (Bs.2,238m.), Italy (Bs.888m.) and Spain (Bs.715m.).

Principal imports are machinery and equipment, manufactured goods, chemical products, foodstuffs.

The USA supplied imports valued at Bs.17,940m. (40% of all imports) in 1978, followed by Federal Republic of Germany (Bs.4,785m), Japan (Bs.4,004m.), Italy (Bs.2,507m.) and the UK (Bs.1,677m.).

Total trade between UK and Venezuela (British Department of Trade returns, in £1,000 sterling):

	1976	1977	1978	1979	1980
Imports to UK	117,636	67,017	71,684	100,823	117,614
Exports and re-exports from UK	128,794	175,035	188,904	137,722	131,684

Tourism. 652,000 tourists visited Venezuela in 1977.

COMMUNICATIONS

Roads. There were, 1977, 58,560 km of road fit for traffic the year round; of these 20,000 km are paved. There are 10,097 km of high-speed 4-lane motorway type. The motorway system runs from Caracas to Puerto Cabello via Valencia and will shortly be linked direct with one from La Guaira to Caracas. Venezuela has received two World Bank loans for US\$45m. and 30m. in connexion with this programme, for improvements of the express-ways in Caracas and for 2 roads in the south-west of the country. Motor vehicles, 1975, totalled 1,324,600 and included 955,200 passenger cars and 369,400 commercial vehicles. The 1,678-metre Angostura bridge linking the Orinoco cities of Ciudad Bolivar and Soledad was opened in Jan. 1967.

Railways. Plans have existed since 1950 for large scale railway construction but only the Puerto Cabello to Barquisimeto line (175 km-1,435 mm gauge) has been completed. A metro is under construction in Caracas.

Aviation. The chief Venezuelan airlines are LAV (Lineas Aéreas Venezolanas), a government-owned concern, and AVENSA (Aerovias Venezolanas). Both operate numerous internal services. VIASA operates international routes in conjunction with KLM. There are also 3 specialist air freight companies. In all there are over 100 commercial aircraft in operation. In addition to Venezuelan international services, a number of US and Latin American and European lines operate services to Venezuela. British Caledonian operates twice-weekly flights between London and Caracas.

Shipping. Foreign vessels are not permitted to engage in the coasting trade, except by special concessions or by contract with the Government. La Guaira, Maracaibo, Puerto Cabello, Puerto Ordaz and Guanta are the chief ports. In Dec. 1978 the

merchant fleet had an aggregate gross tonnage of 824,000; this included tankers of 368,000 gross tons.

The principal navigable rivers are the Orinoco and its tributaries Apure and Arauca, from San Fernando to Tucupita through Ciudad Bolívar, Puerto Ordaz and San Félix; San Juan from Caripito to the Gulf of Paria; and Esculante in Lake Maracaibo.

Post and Broadcasting. The telegraph system had a network, 1975, of 45,000 km with 600 telegraph offices. It is supplemented by wireless telegraphy, with 72 stations, and by wireless telephony. There are telephone systems in the principal towns (nationalized in 1954). There were 847,318 instruments in 1978; 98,192 were in Caracas. The telephone network is to be extended by 100,000 additional lines over the next 3 years. An international telex service operates in the Caracas metropolitan zone. There is a submarine telephone link with USA.

There are 77 radio stations at Caracas, Maracaibo, Maracay and other towns. There are 3 television stations in Caracas (two privately owned), of which 2 cover, with relays, most of the country. In 1979 there were about 1.9m. homes with TV receivers.

Cinemas (1977). There were 563 cinemas and 25 drive-ins.

Newspapers (1976). There were 47 daily newspapers, 32 weeklies and 134 magazines.

JUSTICE, RELIGION AND EDUCATION

Justice. The Supreme Court, which operates in Divisions, each with 5 members, is elected by Congress for 5 years. The country is divided into 20 legal districts. They select their own President and Vice-President. The Federal Procurator-General is appointed for 5 years. There are lower federal courts.

Each state has a Supreme Court with 3 members, a superior court, or superior tribunal, courts of first instance, district courts and municipal courts. In the territories there are civil and military judges of first instance, and also judges in the municipios. Finally, there is an income-tax claims tribunal.

Religion. The Roman Catholic is the prevailing religion, but there is toleration of all others. There are 4 archbishops, 1 at Caracas, who is Primate of Venezuela, 2 at Mérida and 1 at Ciudad Bolívar. There are 19 bishops. In the state primary schools instruction is given only to those children whose parents expressly request it. Protestants number about 20,000.

Education. Elementary instruction is free and, from the age of 7 to 13 (the completion of the primary grade), compulsory. In 1974-75 Venezuela had 11,098 primary schools with (1976-77) 63,198 teachers and a total enrolment of 2,204,000 pupils. In 1976-77 there were 720,000 pupils in secondary schools and the number of students in higher education was 248,000 with 15,972 teaching staff. There were 14 universities. The education budget for 1978-79 was Bs. 7,212,000m.

HISTORY. The recorded history of Vietnam can be traced to Tonkin (now known as the northern part of Vietnam) at the beginning of the Christian era. Conquered by the Chinese (Han dynasty) in B.C. 111, the kingdom of Nam-Viet, as it was then called, broke free of Chinese domination in 939, though at many subsequent periods it again became a nominal vassal of the Chinese emperors.

By the end of the 15th century the Vietnamese had conquered most of the kingdom of Champa (in Annam, now known as the central part of Vietnam) and by the end of the 18th had acquired Cochinchina (now known as the southern part of Vietnam), formerly Cambodian territory.

French interest in Vietnam started in the late 16th century with the arrival of French and Portuguese missionaries. The most notable of these was Alexander de Rhodes, who, in the following century, romanized Vietnamese writing. At the end of the 18th century a French bishop and several soldiers of fortune helped to establish the Emperor Gia-Long (with whom Louis XVI had signed a treaty in 1787) as ruler of a unified Vietnam, known then as the Empire of Annam.

An expedition sent by Napoleon III in 1858 to avenge the death of some French missionaries led in 1862 to the cession to France of part of Cochinchina, and thence, by a series of treaties between 1874 and 1884, to the establishment of French protectorates over Tonkin and Annam, and to the formation of the French colony of Cochinchina. By a Sino-French treaty of 1885 the Empire of Annam (including Tonkin) ceased to be tributary to China. Cambodia had become a French protectorate in 1863, and in 1899, after the extension of French protection to Laos in 1893, the Indo-Chinese Union was proclaimed.

In 1940 Vietnam was occupied by the Japanese and used as a military base for the invasion of Malaya. During the occupation there was considerable underground activity among nationalist, revolutionary and Communist organizations. In 1941 a nominally nationalist coalition of such organizations, known as the Vietminh League, was founded by the Communists.

On 9 March 1945 the Japanese interned the French authorities and proclaimed the 'independence' of Indo-China. In Aug. 1945 they allowed the Vietminh movement to seize power, dethrone Bao Dai, the Emperor of Annam, and establish a republic known as Vietnam, including Tonkin, Annam and Cochinchina, with Hanoi as capital. In Sept. 1945 the French re-established themselves in Cochinchina and on 6 March 1946, after a cease-fire in the sporadic fighting between the French forces and the Vietminh had been arranged, a preliminary convention was signed in Hanoi between the French High Commissioner and President Ho Chi Minh by which France recognized 'the Democratic Republic of Vietnam' as a 'Free State within the Indo-Chinese Federation'. Subsequent conferences convened in the same year at Dalat and Fontainebleau to draft a definitive agreement broke down chiefly over the question of whether or not Cochinchina should be included in the new republic. On 19 Dec. 1946 Vietminh forces made a surprise attack on Hanoi, the signal for hostilities which were to last for nearly 8 years.

An agreement signed by the Emperor Bao Dai on behalf of Vietnam on 8 March 1949 recognized the independence of Vietnam within the French Union, and certain sovereign powers were forthwith transferred to Vietnam. The Paris agreements of 29 Dec. 1954 completed the transfer of sovereignty to Vietnam. Supreme authority in the military field remained with the French until the departure of the last French

C.-in-C. in April 1956. Treaties of independence and association were initialled by representatives of the French and Vietnamese governments on 4 June 1954.

An agreement on the cessation of hostilities in Vietnam was reached on 20 July 1954 at the Geneva conference. The agreement was signed on behalf of the C.-in-C. of the French Forces in Indo-China and on behalf of the C.-in-C. of the People's Army of Vietnam. The Government of Vietnam did not sign the agreement.

The final declaration of the Geneva conference (21 July 1954) declared that general elections should take place in July 1956. These did not take place, and Vietnam remained divided until 1976.

In Paris on 27 Jan. 1973 an agreement was signed ending the war in Vietnam. After the US withdrawal, however, hostilities continued between the North and the South until 1975, when North Vietnamese forces brought about the defeat of the South Vietnamese forces. President Thieu resigned on 21 April. He was replaced by the Vice-President, Tran Van Huong, who was in turn replaced by Gen. Duong Van Minh who surrendered to the Communist forces on 30 April. 150,000–200,000 South Vietnamese fled the country, including the former President Thieu. By 30 April Saigon had fallen.

For details of the former Republic of Vietnam (South Vietnam), see *THE STATESMAN'S YEAR-BOOK*, 1975–76. After the collapse of President Thieu's regime the Provisional Revolutionary Government established an administration in Saigon on 6 June 1975 under the presidency of Huynh Tan Phat. A North-South conference on reunification of Nov. 1975 announced that agreement on 'the basic problems' had been reached. A general election was held on 25 April 1976 for a National Assembly representing the whole country. Voting was by universal suffrage of all citizens of 18 or over, except former functionaries of South Vietnam undergoing 're-education'. The unification of North and South Vietnam into the Socialist Republic of Vietnam took place formally on 2 July 1976. After previous US vetoes the new administration of President Carter indicated that it was not opposed to Vietnam's application to join the UN, and Vietnam was admitted unanimously and without a vote on 20 Sept. 1977. In June 1978 Vietnam was admitted to Comecon and in Nov. 1978 signed a 25-year treaty of friendship and co-operation with the USSR. Relations with China correspondingly deteriorated, an especially exacerbating factor being the successful Vietnamese military intervention in Kampuchea. On 17 Feb. 1979 China invaded North Vietnam, but claimed that its troops had all withdrawn by 19 March. Peace negotiations were commenced on 18 April 1979 but broken off by the Chinese on 6 March 1980.

AREA AND POPULATION. The country has a total area of 329,566 sq. km and is divided administratively into 35 provinces and 3 cities. Areas and populations (in 1,000) at the census of 5 Feb. 1976 were as follows:

Population (1981), 54m. (Ho Chi Minh 3.5m.; Hanoi, 2m. (1979)); growth rate (1980) 2.9% per annum.

84% of the population are Vietnamese (Kinh). There are also over 60 minority groups thinly spread in the extensive mountainous regions. The largest minorities are (1976 figures in 1,000): Tay (742); Khmer (651); Thai (631); Muong (618); Nung (472); Meo (349); Dao (294). In 1981 0.5m. Vietnamese were living abroad, mainly in USA.

During 1975-79 some 750,000 refugees ('boat people') left Vietnam, of whom about 70% were of Chinese origin. On 2 June 1979 Vietnam signed a treaty with the UN High Commission for Refugees regulating this exodus, and agreed to halt it altogether in July 1979. In Dec. 1979 an agreement was reached between Vietnam and the UN on behalf of the USA for the settlement of further refugees in the West.

CONSTITUTION AND GOVERNMENT. A new Constitution was adopted in Dec. 1980. It states that Vietnam is a state of proletarian dictatorship and is developing according to Marxism-Leninism. The former, second, North Vietnamese Constitution dated from 1960 (the first was promulgated in 1946).

At the elections for the new National Assembly held on 25 April 1976 turnout was 98.77%. 605 candidates stood and 492 were elected (243 from the South), including 132 women, 67 representatives of ethnic minorities and 13 representatives of religious organizations. New elections were due to be held on 26 Apr. 1981.

Local government authorities are the people's councils, which appoint executive committees. Local elections were held in Ho Chi Minh City and the 38 provinces of the former South Vietnam on 5 May 1977. A special form of autonomous administration has been established in the regions inhabited by the ethnic minorities.

President: Nguyen Huu Tho (*ad interim*).

Chairman of the Standing Committee of the National Assembly: Truong Chinh.

All political power stems from the Communist Party of Vietnam (until Dec. 1976 known as the Workers' Party of Vietnam), founded in 1930; it had 1m. members in Dec. 1979 (8.8% workers; 17% women). In April 1981 the Politburo consisted of Le Duan (*First Secretary*); Truong Chinh (*Chairman of the National Assembly*); Pham Van Dong (*Prime Minister*); Pham Hung (*Deputy Prime Minister and Minister of the Interior*); Le Duc Tho; Vo Nguyen Giap (*Deputy Prime Minister*); Nguyen Duy Trinh (*Deputy Prime Minister*); Le Thanh Nghi (*Deputy Prime Minister*); Gen. Van Tien Dung (*Minister of Defence*); Le Van Luong; Nguyen Van Linh; Vo Chi Cong (*Deputy Prime Minister*); Gen. Ministers not in the Politburo include: Nguyen Lam (*Deputy Prime Minister and Chairman, State Planning Commission*); Nguyen Co Thach (*Foreign Minister*); Huynh Tan Phat (*Deputy Prime Minister*); Hoang Anh (*Finance*); Le Khac (*Foreign Trade*); Tran Phuong (*Home Trade*); Dinh Duc Thien (*Transport*); Nguyen Thi Binh (*Education*); Nguyen Ngoc Trieu (*Agriculture*). National flag: Red, with a yellow 5-pointed star in the centre.

National anthem: 'Tien quan ca' ('The troops are advancing').

DEFENCE. Conscription is for 3 years at age 18.

Army. Estimated strength in 1980, 1m. organized in 38 infantry divisions (plus 2 training divisions), 2 artillery divisions, 1 armoured regiment, 1 AA division, about 15 independent infantry regiments and 35 independent artillery regiments. There are also 25 SAM regiments and 50 independent AA artillery regiments.

Navy. Before the North Vietnamese victory in 1975 the Navy comprised 3 old coastal escorts, 2 fast missile boats, 28 fast torpedo boats, 22 fast motor gunboats, 34 small patrol boats, 24 landing craft, 4 minesweeping boats, 10 tenders, 100 auxiliaries and 200 armed junks. It also had 10 Mi-4 SAR helicopters.

At least 1 frigate, several other major warships and a considerable number of auxiliaries were captured after the South Vietnamese surrender.

The fleet reportedly includes 2 old frigates, 3 corvettes, 3 old patrol chasers, 2 fast missile boats, 14 fast torpedo boats, 22 fast gunboats, 14 patrol craft, 10 landing ships, 7 landing craft, 15 riverine craft, 24 minesweeping launches, 15 auxiliaries and many armed junks; but it is difficult to accurately assess the operational availability, fitness for sea or steaming capacity of this heterogeneous collection or the availability of trained personnel.

Air Force. The Air Force, built up with Soviet and Chinese assistance, has about 25,000 personnel and 500 combat aircraft, including modern US types captured in war. There are reported to be 2 squadrons of variable-geometry MiG-23s, 7 squadrons of MiG-17s, 4 squadrons of Su-7s and Su-20s, and at least 6 squadrons of Northrop F-5A/Es and Cessna A-37s for attack duties; about 120 MiG-21 and 60 F-6 (Chinese-built MiG-19) interceptors; up to 70 C-130 Hercules, An-12, Li-2, An-24, and Il-14 transports; and a strong helicopter force with CH-47 Chinook, UH-1 Iroquois, Mi-4, Mi-6 and Mi-8 helicopters. Fighter pilots are trained in the USSR. 'Guideline', 'Goa' and 'Gainful' missiles are operational in large numbers.

INTERNATIONAL RELATIONS

Membership. Vietnam is a member of UN and Comecon.

ECONOMY

Planning. Long-term forward planning envisages the creation of local industry geared to agriculture manned by surplus peasant labour as a first step towards the development of a heavy industrial base. Targets for the second 5-year plan (1976-80) were not met. Growth in agriculture, 18.7%; industry, 17.3%. The third 5-year plan covers 1981-85.

Curtailment of imports, floods and resistance to new economic measures have contributed to a serious shortage of consumer goods, which it is hoped to correct by stimulating regional industry and utilizing the expertise of former businessmen. (For previous plans see THE STATESMAN'S YEAR-BOOK, 1976-77, p. 1473.)

Currency. The monetary unit is the *dong* = 100 *hao*. There are coins of 1, 2 and 5 *hao*, and notes of 1, 2, 5 and 10 *dong*. In March 1981, £1 = 4.75 *dong*; US\$1 = 2.18 *dong*. In May 1978 the currency system was unified. The northern *dong* and the southern *piastre* were replaced by a unified *dong* which has the same exchange rate as the old northern *dong*.

Banking. The bank of issue is the National Bank of Vietnam (founded in 1951). There is also a Bank for Foreign Trade (Vietcombank). In 1980 this bank ceased all transactions with US banks.

NATURAL RESOURCES

Electricity. In 1979, 365m. kwh. of electricity were produced. A hydro-electric power station with a capacity of 2m. kw. is being built at Hoa-Binh with Soviet assistance.

Minerals. North Vietnam is rich in anthracite, lignite and hard coal: total reserves are estimated at 20,000m. tonnes. Anthracite production in 1975 was 5m. tonnes. Coal production is estimated at 5m. tonnes per year. There are deposits of iron ore, manganese, titanium, chromite, bauxite and a little gold. Chromite production in 1962 was 35,000 tons. Reserves of apatite are some of the biggest in the world. Estimated production of phosphates in 1971, 1.1m. tonnes; salt, 150,000 tonnes. In 1973 and 1974 the former Vietnamese Government awarded concessions for offshore oil exploration. Oil and natural gas have been found. There are large limestone deposits in Kien Giang, Chau Doc and Thua Thien provinces. A recent geological survey reported on the prospects of valuable bauxite deposits. There is a small coal-bearing region at Nong-Son.

Agriculture. In 1977, 90% of the population was engaged in agriculture. Cereal production was 13.5m. tonnes in 1979. In the North in 1975 agricultural co-operatives were reorganized into larger units. (Previously there had been about 18,000 co-operatives, each comprising 200–400 households and averaging 200 hectares of land each.) In 1977 there were 15,200 co-operatives in the North averaging 300–500 hectares (less than 100 hectares in mountain regions) and a workforce of 1,000–2,000. There were 105 state farms employing in all 70,000 workers and with 55,000 hectares arable and 50,000 hectares of pasture. Other crops include maize, sugar-cane, sweet potatoes and cotton. The cultivated area in 1973 was 3.4m. hectares; in 1964, 2.4m. hectares were irrigated.

In the South to redress the disproportionate urbanization of the southern population during the war (40% of the population were living in Ho Chi Minh City by April 1975) resettlement of family units in rural areas began after the Communist take-over. Each family was allotted an average of 5,000 sq. metres of land, a dwelling and agricultural equipment. 1,000 sq. metres of this total are for private plots. Families are grouped by twenties in 'mutual aid and labour cells'. Rice is the main crop cultivated. In 1972, 83,300 hectares produced 20,000 tonnes of rubber. In 1977 there were 74 state farms and a few experimental co-operatives.

The production figures of other crops, 1979, were as follows: Maize (520,000 tonnes from 460,000 hectares), sugar-cane (2.9m. tonnes from 72,000 hectares), tobacco (28,000 tonnes from 32,000 hectares), sweet potatoes (2.4m. tonnes from 380,000 hectares), sorghum (35,000 tonnes from 30,000 hectares), beans (45,000 tonnes from 93,000 hectares), tea (21,000 tonnes), coffee (15,000 tonnes), soybeans (26,000 tonnes). Serious losses to the rice harvest were sustained through typhoons and flooding in 1978 and 1980. Production was some 14m. tonnes in 1980, 4.4m. tonnes short of requirements.

Livestock (1979): Cattle 1.6m.; pigs, 9.3m.; goats, 200,000; poultry, 57.1m.

Forestry. 50% of the North is forested; 3.5m. cu. metres of timber are produced annually.

Fisheries. Fishing is important, especially in Halong Bay. In 1976, 6m. tonnes of sea fish and 180,000 tonnes of freshwater fish were caught (representing only 83% of the planned target.)

INDUSTRY AND TRADE

Industry. In the North next to mining, food processing and textiles are the most important industries; there is also some machine building. Older industries include cement, cotton and silk manufacture. Local industries and handicrafts account for 50% of production.

Production in 1964 (in 1,000 tonnes): Steel, 50; cement, 595; paper, 19.4; sugar, 26.7; mineral fertilizers, 177; cotton fabrics, 105.2m. metres; irrigation pumps, 2,064 units.

Private businesses were taken over in 1978. Foreign firms, principally French, are continuing to function, but all US property has been nationalized. There is little heavy industry. Most industry is concentrated in the Ho-Chi-Minh area.

The following are some figures of production in 1972: Beer, 143.1m. litres; soft drinks, 115.6m. litres; rice alcohol, 12.3m. litres; ice, 309,000 tonnes; acetylene gas, 211,000 cu. metres; carbon dioxide, 102 tonnes.

Production (1979, in 1,000 tonnes): Coal, 6,000; (1980) cement, 729; fertilizer, 700.

Kenaf yarn production was 1,615 tons in 1972

Total production of paper products reached 46,376 tons in 1972.

Labour. Average wage (1980) 40–60 dong per month. In 1967 trade unions had 1.1m. members.

Commerce. USSR and Japan are Vietnam's main trading partners; others are Singapore and Hong Kong. Main exports are coal, farm produce, sea produce and livestock. Imports: technical equipment, industrial raw materials, foodstuffs and medical supplies. The Vietnamese Government recognizes a need for foreign aid and credit for the development of an industrial base. The USSR has given substantial

aid, but the amount is declining: 1.4m. tonnes of food in 1975 as against 0.6m. in 1980. (Total aid was 0.8m. tonnes in 1980). There are aid agreements with Japan and France. In 1977 the UN ratified a recommendation of its Economic Commission that international aid should be given for the reconstruction of Vietnam's economy and in 1978 the World Bank approved a virtually interest-free loan of US\$90m. repayable over 50 years. Foreign investments are encouraged and guaranteed for 15 years. Profits may be transferred and indemnities paid in the event of nationalization. In the case of foreign firms installed in Vietnam all capital may remain in foreign hands if goods are produced for export only; otherwise the Vietnamese Government will retain 51% of shares.

Trade between Vietnam and UK (British Department of Trade returns, in £1,000 sterling):

	1977	1978	1979	1980
Imports to UK	4,859	152	140	70

WESTERN SAMOA

Capital: Apia

Population: 157,000 (1978)

GNP per capita: US\$350 (1976)

Samoa i Sisifo

HISTORY. Western Samoa, a former German protectorate (1900 to the First World War), was administered by New Zealand from 1920 to 1961, at first under a League of Nations Mandate and since 1946 under a United Nations Trusteeship Agreement. In May 1961 a plebiscite held under the supervision of the United Nations on the basis of universal adult suffrage voted overwhelmingly in favour of independence as from 1 Jan. 1962, on the basis of the Constitution, which a Constitutional Convention had adopted in Aug. 1960. In Oct. 1961 the General Assembly of the United Nations passed a resolution to terminate the trusteeship agreement as from 1 Jan. 1962, on which date Western Samoa became an independent sovereign state.

Under a treaty of friendship signed on 1 Aug. 1962 New Zealand acts, at the request of Western Samoa, as the official channel of communication between the Samoan Government and other governments and international organizations outside the Pacific islands area. Liaison is maintained by the New Zealand High Commissioner in Apia, who is the only diplomatic representative accredited to the Government of Western Samoa.

AREA AND POPULATION. Western Samoa lies between 13° and 15° S. lat. and 171° and 173° W. long. It comprises the two large islands of Savai'i and Upolu, the small islands of Manono and Apolima, and several uninhabited islets lying off the coast. The total land area is 1,093 sq. miles (2,830.8 sq. km), of which 659.4 sq. miles (1,707.8 sq. km) are in Savai'i, and 431.5 sq. miles (1,117.6 sq. km) in Upolu; other islands, 2.1 sq. miles (5.4 sq. km). The islands are of volcanic origin, and the coasts are surrounded by coral reefs. Rugged mountain ranges form the core of both main islands and rise to 3,608 ft in Upolu and 6,094 ft in Savai'i. The large area laid waste by lava-flows in Savai'i is a primary cause of that island supporting less than one-third of the population of the islands despite its greater size than Upolu.

The population at the 1976 census was 151,983, of whom 109,765 were in Upolu (including Manono and Apolima) and 42,218 in Savai'i. The capital and chief port is Apia in Upolu (population 32,099 in 1976).

CONSTITUTION AND GOVERNMENT. The Constitution provides for a Head of State known as 'Ao o le Malo', which position from 1 Jan. 1962 was held jointly by the representatives of the two royal lines of Tuiaana Tuiatua and Malietoa. On the death of HH Tupua Tamasese Mea'ole, CBE, on 5 April 1963, HH Malietoa Tanumafili II, CBE, became, as provided by the constitution, the sole Head of State for life. Future Heads of State will be elected by the Legislative Assembly and hold office for 5-year terms.

The executive power is vested in the Head of State, who appoints the Prime Minister and, on the Prime Minister's advice, the 8 Ministers to form the Cabinet which has general direction and control of the executive Government.

Parliament comprises the Head of State and the Legislative Assembly. The Legislative Assembly has 45 members elected from territorial constituencies on a franchise confined to matais or chiefs (of whom there are about 11,000) and 2 members elected on universal adult suffrage from the individual voters roll, which has replaced the old European roll (approximately 1,350 in 1971).

The Constitution also provides for a Council of Deputies. It may have 3 members.

The only present member is the Hon. Tupua Tamasese Lealofi IV, who assumed the position in 1976.

The official languages are English and Samoan.

Head of State: HH Malietoa Tanumafili II, CBE.

WEST INDIES

HISTORY. The West Indies Federation, established on 3 Jan. 1958, was dissolved in Feb. 1962 after Jamaica and Trinidad had opted out of it.

In 1967 new constitutional arrangements were made for the 'West Indies Associated States'. Antigua, St Kitts-Nevis-Anguilla (on 27 Feb.), Dominica, St Lucia (on 1 March), Grenada (on 3 March) and St Vincent (on 1 June) were given self-government in association with Britain which retains powers and responsibilities for defence and external affairs. Grenada became independent in Feb. 1974; Dominica, 3 Nov. 1978; St Lucia, 22 Feb. 1979, and St Vincent on 27 Oct. 1979.

DEFENCE. The responsibility for defence rests with the British Government. International relationships and defence policy are conducted in close consultation with the Associated States by the British Government Representative (J. S. Arthur, CMG).

CURRENCY. After Trinidad and British Guiana had withdrawn from the British Caribbean Currency Board, Barbados, the Leeward Islands (Antigua, St Kitts-Nevis-Anguilla, Montserrat), and the Windward Islands (St Vincent, St Lucia, Dominica) united under the East Caribbean Currency Authority to issue new currency notes of \$1, 5, 20 and 100, with effect from 6 Oct. 1965. Barbados subsequently withdrew from ECCA and has established its own central bank.

TRADE. The Caribbean Free Trade Area (CARIFTA now CARICOM) was established on 1 May 1968. *See* International Organizations section in this edition.

SHIPPING. The West Indies Shipping Corporation continues to provide a regular shipping service for passengers and cargo, the West Indies Shipping Corporation Act 1961 continuing with adaptation to be part of the law of the territories, including Jamaica and Trinidad and Tobago.

The West Indies Meteorological Service continues on a completely reorganized basis. It also serves Guyana, British Honduras and British Virgin Islands.

TELECOMMUNICATIONS. The territories are linked by cable, radio-telegraph and radio-telephone. Cable & Wireless (W.I.) Ltd have installed a multi-channel tropospheric scatter-link between Trinidad and Barbados and a network of VHF circuits covering the other territories.

JUSTICE. The Supreme Court of Grenada and the West Indies Associated States has replaced the West Indies Associated States Court of Appeal. In each of the independent countries there is a Court of Appeal.

EDUCATION. The University College of the West Indies, situated at Mona, Jamaica, was affiliated to London University, but became independent in April 1962. It received a Royal Charter in 1949 and has faculties of Medicine, Arts, Natural Sciences and a Department of Education. The former Imperial College of Tropical Agriculture in Trinidad is the faculty of Agriculture and Engineering; a College of Arts and Science has been added. Barbados also has a campus of the University of the West Indies where training is offered in Arts, Natural Science, the Social Sciences, and Law.

YEMEN ARAB REPUBLIC

Capital: San'a

Population: 6.5m. (1975)

GNP per capita: US\$580 (1978)

al Jamhuriya al
Arabiya al Yamaniya

HISTORY. On the death of the Iman Ahmad on 18 Sept. 1962, army officers seized power on 26-27 Sept., declared his son, Saif Al-Islam Al-Badr (Iman Mansur Billah Muhammad), deposed and proclaimed a republic. The republican regime was supported by Egyptian troops, whereas the royalist tribes received aid from Saudi Arabia. On 24 Aug. 1965 President Nasser and King Faisal signed an agreement according to which the two powers are to support a plebiscite to determine the future of the Yemen; a conference of republican and royalist delegates met at Haradh on 23 Nov. 1965, but no plebiscite was agreed upon. At a meeting of the Arab heads of state in Aug. 1967 the President and the King agreed upon disengaging themselves from the civil war in Yemen. At the time there were still about 50,000 Egyptian troops in the country, holding San'a, Ta'iz, Hodeida and the plains, whereas the mountains are in the hands of the royalist tribes. By the end of 1967 the Egyptians had withdrawn.

AREA AND POPULATION. In the north the boundary between the Yemen and Saudi Arabia has been defined by the Treaty of Taif concluded in June 1934. This frontier starts from the sea at a point some 5 or 10 miles north of Ma'di and runs due east inland until it reaches the hills some 30 miles from the coast, whence it runs northwards for approximately 50 miles so as to leave the Sa'da Basin within the Yemen. Thence it runs in an easterly and south-easterly direction until it reaches the desert area near Nejran. The area is about 73,300 sq. miles (195,000 sq. km) with a population of 6,471,893, census 1975. There were 1.23m. citizens working abroad mainly in Saudi Arabia and the United Arab Emirates not included in the census total. The capital is San'a with a population of 447,898.

The most important towns are the port of Hodeida (population, 147,982), and Ta'iz (320,323); other towns are Ibb, Yerim, Dhamar and the ports of Mokha and Loheiya.

CONSTITUTION AND GOVERNMENT. On 31 Oct. 1962, 13 April 1963, 17 April 1964, 9 May 1965 the revolutionary council issued 'interim' constitutions and on 28 Dec. 1970 a first permanent constitution was announced with provision for a Council of 179 members (20 members would be chosen by the President and the remainder by general franchise).

In Feb. 1979 fighting started between Yemen Arab Republic and the People's Democratic Republic of Yemen. A ceasefire was established in March and an agreement to unite the 2 countries was reached on 31 March 1979.

On 6 Feb. 1978 a 99-man People's Constituent Assembly was established.

Capital: Aden

Population: 2m. (1980)

GNP per capita: US\$420 (1978)

Jumhuriyah al-Yemen
al Dimuqratiyah
al Sha'abijah—
Southern Yemen

HISTORY. Between Aug. and Oct. 1967 the 17 sultanates of the Federation of South Arabia (see map in the STATESMAN'S YEAR-BOOK, 1965-66) were overrun by the forces of the National Liberation Front (NLF). The rulers were deposed, resigned or fled. At the same time the rival organization of FLOSY (Front for the Liberation of Occupied South Yemen) fought a civil war against NLF and harassed the British forces and civilians in Aden. In Nov. the UAR withdrew its support from FLOSY, and with the backing of the Army the NLF took over throughout the country.

The last British troops left Aden on 29 Nov., and on 30 Nov. the Southern Yemen People's Republic was proclaimed and the name subsequently changed to the People's Democratic Republic of Yemen.

AREA AND POPULATION. The People's Democratic Republic of Yemen is bounded north by Saudi Arabia, east by Oman, south by the Gulf of Aden and west by the Yemeni Arab Republic. The Republic covers an area of approximately 61,890 sq. miles (160,300 sq. km). The population was (estimate, 1980) 2m. The main towns are Aden (capital) (population, 264,326), including Shaikh Othman (30,000), Mukalla, (100,000) and Mulla (44,626).

The island of **Kamaran** in the Red Sea (area 70 sq. miles) was in British occupation from 1915 to 1967, when the inhabitants opted in favour of remaining with the Republic but Yemen Arab Republic occupied it in 1972.

The island of **Perim** was first occupied by the French in 1738. In 1799 the British took formal possession but evacuated the island the same year. It was re-occupied by the British in Jan. 1851 and was later used as a coaling station. In Nov. 1967 the inhabitants opted in favour of remaining with the Republic.

The island of **Socotra** lying to the east of the Horn of Africa in the Arabian sea (area 1,400 sq. miles) was formerly part of the Sultanate of Qishn and Socotra and became part of the Republic in 1967.

The Navy comprises 2 fast missile craft, 2 fast torpedo-boats, 2 fast attack craft, 2 anti-submarine patrol vessels, 9 patrol craft, 1 fleet minesweeper, 3 in-shore minesweepers, 3 medium landing ships and 3 minor landing craft, nearly all transferred from the Soviet Navy. Personnel in 1981 totalled 450 officers and men.

Banking. The leading bank is the National Bank of Yemen. All foreign banks have been nationalized.

NATURAL RESOURCES

Agriculture. Agriculture is the main occupation of the people. This is largely of a subsistence nature, sorghum, sesame and millet being the chief crops, and wheat and barley widely grown at the higher elevations. Of increasing importance, however, are the cash crops which have been developed since the Second World War, by far the most important of which is the Abyan long-staple cotton, now the country's major export.

Owing to paucity of rainfall, cultivation is largely confined to fertile valleys and flood plains on silt, built up and irrigated in the traditional manner. These traditional methods are being augmented and replaced by the use of modern earth-moving machinery and pumps. Irrigation schemes with permanent installations are in progress. Production (1979 in 1,000 tonnes): Millet, 70; wheat, 25; cotton lint and seed, 15; sesame, 4; barley, 2.

Livestock (1979): Cattle, 110,000; sheep, 970,000; goats, 1.3m.; poultry, 1.5m.

Fisheries. There is a thriving fisheries industry, fish being the Republic's major export after cotton.

INDUSTRY AND TRADE

Industry. Light industry is being established and paint, match and textile factories in production.

Commerce. Trade is mainly transshipment and entrepôt, Aden serving as a centre of distribution to and from neighbouring territories. Transit trade is mainly in cotton piece-goods, grains, coffee, hides and skins, and cheap consumer goods.

In 1976 imports totalled 116m. dinar; exports and re-exports, 61.2m. dinar.

Total trade between Republic of Yemen and UK (British Department of Trade returns, in £1,000 sterling):

	1976	1977	1978	1979	1980
Imports to UK	781	187	208	2,713	5,685
Exports and re-exports from UK	12,325	22,613	29,030	18,920	25,425

COMMUNICATIONS

Roads. There are 1,150 miles of roads. Registered motor vehicles in 1972 numbered 19,373.

Aviation. Twelve airlines operate scheduled services: Alyemda, Air-India, Ethiopian Airlines, Middle East Airlines, Sudan Airways, Yemen Airlines, Aeroflot, Somali Air, Saudi Airlines, Kuwait Airways, East Africa Airlines and Air Jibuti.

Shipping. Because of its favourable geographical position and its efficient service to ships, Aden used to be one of the busiest oil-bunkering ports in the world, handling some 550 ships a month.

Post. The automatic telephone system provided service to about 9,876 subscribers in 1973.

Radio telephone services are available with London (with extensions to Europe and America), Kenya (with extensions to Tanzania and Uganda), Bombay, Jibuti, Bahrain and Addis Ababa.

Cinemas (1971). There were 19 cinemas with a seating capacity of about 20,000.

The Yugoslav (*i.e.*, South Slav) languages proper are Slovene, Macedonian and Serbo-Croat, the latter having 2 variants (Serbian and Croatian) which are regarded as constituting one language. There are claims, largely politically-motivated, that Croatian is a separate language and Macedonian a dialect of Bulgarian. Macedonian is and Serbian may be written in the Cyrillic alphabet. There are also substantial Albanian and Hungarian-speaking minorities. Art. 246 of the Constitution lays down that 'The languages of the nations and nationalities and their alphabets shall be equal throughout the territory of Yugoslavia'. In practice Serbo-Croat serves as a *lingua franca* throughout the country.

CONSTITUTION AND GOVERNMENT. The Constitution passed on 31 Jan. 1946 declared the Federal Republic to be composed of 6 republics, Serbia, Croatia, Slovenia, Bosnia and Herzegovina, Macedonia and Montenegro.

On 13 Jan. 1953 a new Constitution (Fundamental Law) confirmed the management of all public affairs by the workers and their representatives (which was introduced in 1950) as the basis of the entire social, economic and political system of Yugoslavia.

The Constitution promulgated 7 April 1963 changed the name of the country into the Socialist Federal Republic of Yugoslavia, composed of the socialist republics of Bosnia and Herzegovina, Crna Gora (Montenegro), Croatia, Macedonia, Serbia and Slovenia (*i.e.*, now ranking in alphabetical order), and the 2 socialist autonomous provinces of Kosovo and Vojvodina within the framework of Serbia.

Under this Constitution, social self-government was exercised by the representative bodies of communes, districts, autonomous provinces, republics and the Federation and the rights to self-government and distribution of income proclaimed in 1953 were extended to those employed in public services. The former Council of Producers, in which only workers and employees engaged in economic production were represented, was replaced by Councils of Working Communities representing the working people employed in every field of social activity.

All the means of production and all natural resources are social property. Exceptions are peasants' holdings (up to 10 hectares of arable land) and handicrafts. Citizens may be owners of houses and dwellings for personal and family needs.

A new Constitution was proclaimed on 21 Feb. 1974. The political principle of this Constitution is the direct transfer of economic and political decision making power to the working people through the 'assembly system'. An assembly is defined (Art. 132) as 'a body of social self-management and the supreme organ of power within the framework of the rights and duties of its socio-political community'.

Assemblies are based upon the work-place or community and take various forms depending upon the nature of employment. Art. 133 states, 'Working people in basic self-managing organizations and communities and in socio-political organizations shall form delegations for the purpose of the direct exercise of their rights, duties and responsibilities and of organized participation in the performance of the functions of the assemblies of the socio-political communities', and Art. 135, 'Candidates for members of delegations of basic self-managing organizations and communities shall be proposed and determined by the working people in these organizations and communities in the Socialist Alliance of the Working People . . . or in trade union organizations'. At the apex of the assembly system is the federal legislature, the Assembly of the Socialist Federal Republic of Yugoslavia which has 2 Chambers: the Federal Chamber and the Chamber of Republics and Provinces.

The Federal Chamber consists of 30 delegates of self-managing organizations, communities and socio-political organizations from each Republic, and 20 delegates from each Autonomous Province. The Chamber of Republics and Provinces consists of 12 delegates from each Republican Assembly and of 8 delegates from each Provincial Assembly.

The Federal Executive Council consists of a President, 14 members, 8 Federal Secretaries and 6 Chairmen of Federal Committees. Members of the Federal Executive Council are elected in conformity with the principle of equal representation of the Republics with corresponding representation of Autonomous Provinces.

The President of the Federal Executive Council is elected by the Chambers of the Assembly of the SFRY at the proposal of the Presidency; Members of the Council, at the proposal of the candidate President of the Federal Executive Council.

The Presidency of the Republic is elected every 5 years. It has 8 members representing each of the republics and autonomous regions, and an annual President who is head of state.

Every citizen over the age of 18 has the suffrage (16 if employed). At the general election of March–May 1978 turn-out was over 96% of the electorate.

With the death of Josip Broz Tito on 4 May 1980 his constitutionally unique office of President for an unlimited term lapsed.

The membership of the collective Presidency in April 1981 was as follows:

Bosnia and Herzegovina: Cvijetin Mijatović (*President*); *Croatia*: Vladimir Bakarić; *Macedonia*: Lazar Koliševski; *Montenegro*: Vidoje Zarković; *Serbia*: Petar Stambolić (*Vice-President-Elect as of May 1981*); *Slovenia*: Sergej Krajger (*Vice-President and President-Elect as of May 1981*); *Kosovo*: Fadilj Hodža; *Vojvodina*: Stevan Doronjski.

République du Zaïre

HISTORY. Until the middle of the 19th century the territory drained by the Congo River was practically unknown. When Stanley reached the mouth of the Congo in 1877, King Leopold II of the Belgians recognized the immense possibilities of the Congo Basin and took the lead in exploring and exploiting it. The Berlin Conference of 1884–85 recognized King Leopold II as the sovereign head of the Congo Free State.

The annexation of the state to Belgium was provided for by treaty of 28 Nov. 1907, which was approved by the chambers of the Belgian Legislature in Aug. and Sept. and by the King on 18 Oct. 1908. The law of 18 Oct. 1908, called the Colonial Charter (last amended in 1959), provided for the government of the Belgian Congo, until the country became independent on 30 June 1960. For subsequent history to 1977 see *The STATESMAN'S YEAR-BOOK*, 1980–81, p. 1613.

AREA AND POPULATION. Zaïre is bounded north by the Central African Republic, north-east by Sudan, east by Uganda, Rwanda, Burundi and Lake Tanganyika, south by Zambia, south-west by Angola, north-west by Congo. There is a short Atlantic coastline between the two last-named.

The area of the republic is estimated at 2,345,409 sq. km (895,348 sq. miles). The population is composed of 3 ethnical groups: Negroes (Bantu, Sudanese, Nilotics), Pygmies and Hamites (in the east). In the census (1970) the population was 21,637,876. Estimate (1979) 29·27m.

The area (in sq. km) and populations (estimate) at 1 July 1976 of the regions are as follows, together with their capitals:

HISTORY. The independent Republic of Zambia (formerly Northern Rhodesia) came into being on 24 Oct. 1964 after 9 months of internal self-government following the dissolution of the Federation of Rhodesia and Nyasaland on 31 Dec. 1963.

By an Order in Council dated 4 May 1911 the two provinces of North-eastern and North-western Rhodesia were amalgamated under the name of Northern Rhodesia, with effect from 17 Aug. 1911.

By an Order in Council dated 20 Feb. 1924, the office of Governor was created, an executive council constituted and provision made for the institution of a legislative council which, since 1945, had an unofficial majority. On 1 April 1924 the British South Africa Company was relieved of the administration of the territory by the Crown.

The republic is divided into 9 provinces. Their names, headquarters, area (in sq. km) and estimated population in 1978 were as follows:

<i>Province</i>	<i>Headquarters</i>	<i>Area</i>	<i>Population</i>	<i>Province</i>	<i>Headquarters</i>	<i>Area</i>	<i>Population</i>

Its full-time executive organ (headed by a Secretary-General) is the Central Committee, whose 24 members are elected by the National Council of the Party. The Central Committee has precedence over the legislative body, the National Assembly, which is led by the Prime Minister and consists of 125 elected members and up to 10 nominated members, including a cabinet of 18 ministers.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The Judiciary consists of the Supreme Court, the High Court and 4 classes of magistrates' courts; all have civil and criminal jurisdiction.

The Supreme Court hears and determines appeals from the High Court. Its seat is at Lusaka.

The High Court exercises the powers vested in the High Court in England, subject to the High Court ordinance of Zambia. Its sessions are held where occasion requires, mostly at Lusaka and Ndola.

All criminal cases tried by subordinate courts are subject to revision by the High Court.

Religion. Freedom of worship is one of the constitutional rights of Zambian citizens. Minority groups, such as the Asian community, are free to practise the religions of Hinduism and Islam, and the views of the leaders of these communities are respected by the Government. The Lumpa Church was banned in 1965 for security reasons, following considerable loss of life, but the Jehovah's Witnesses are allowed to continue their way of life despite the conflict of authority in their views and the views of politicians.

The Christian faith has largely replaced traditional African religion, and the Christian Churches number about 500,000 members and adherents. The Churches, founded mainly from the Western world, are slowly finding their autonomy—as illustrated by the United Church of Zambia (formerly British and French missions) and the Reformed Church of Zambia (formerly South African mission).

There is close co-operation between Catholic and Protestant churches, and the Protestant churches themselves work in the fields of radio, television, education, medicine, refugee aid, etc., through the Christian Council of Zambia. The United Church and the Anglican Church are holding union discussions, and Roman Catholic, Anglican and United Church leaders meet together for consultation, and together they discuss matters of common concern with the President of Zambia, Dr Kaunda.

Education. In 1977 the primary school enrolments were 936,817, secondary school enrolments were 83,757 and 3,752 students were enrolled for teacher-training. In 1977 the University of Zambia had 3,111 full-time students. Government expenditure on education in 1974 was K91.36m.

Health. In 1978 there were 82 hospitals and over 1,000 children's clinics served by 423 doctors.

Agriculture. The most important single food crop in Zimbabwe is maize, the staple food of a large proportion of the population; production in 1977-78 was 1,102,000 tonnes. The livestock industry is second to tobacco as regards its export potential. The country is self-sufficient in dairy production and sales of milk to the Dairy Marketing Board in 1977-78 were 149.8m. kg.

The citrus estates of the British South Africa Company, the state-owned deciduous orchards at Inyanga and a scheme for large-scale citrus growing at Hippo Valley form the basis of the citrus fruit industry in Zimbabwe. However, many parts of the country between 2,500 and 4,000 ft above sea-level are suitable for citrus culture, and large numbers of deciduous fruit trees planted in the Melssetter and Inyanga areas are coming into production.

In 1977-78 seed cotton production was 147,000 tonnes and irrigated wheat production (1978) was 203,000 tonnes.

Zimbabwe has 7 large tea plantations, 2 of which are in the Inyanga district and 5 in Chipinga; production in 1979 was 3,000 tonnes. Coffee growing is of increasing importance. Other crops grown in substantial quantities include small grains (sorghums and millet), soya beans, groundnuts and vegetables. These crops form the basis of much subsistence farming undertaken by the African population.

Tobacco is the most important single product, amounting to about half the total agricultural output (by value). In 1965 tobacco accounted for Z\$65m. out of a total agricultural output of Z\$136m.; 1978, Z\$84m. out of a total of Z\$418m.

There is a system of national employment bureaux, including youth employment and careers advisory services.

The conditions of service for all workers in industry are negotiated through the 21 Industrial Councils and the 69 Industrial Boards established under the Industrial Conciliation Act. The training, including full-time technical training, and conditions of employment for apprentices are determined by Apprenticeship Committees established in terms of the Apprenticeship Training and Skilled Manpower Development Act.

Workmen's compensation is by compulsory insurance through a government established fund. Health and safety in industry is safeguarded through the Factories and Works Act.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The High Court consists of an appellate division and a general division. The appellate division consists of the Chief Justice, the Judge President and at least one other judge of appeal. The general division consists of a number of puisne judges. The appellate division considers appeals from the general division and the lower courts; the general division has full jurisdiction, civil and criminal, over all persons and matters within Zimbabwe. The Chief Justice is the head of the judiciary of Zimbabwe. The Judge President presides over the appellate division in the absence of the Chief Justice. The Courts sit at Salisbury and Bulawayo, and sittings of the general division are held at 3 other principal towns three times a year.

Regional Courts, established in Salisbury and Bulawayo, are intermediate in jurisdiction between the magistrates courts and the High Court, but have no civil jurisdiction. There are 19 principal courts of magistrates and 64 periodical courts presided over by magistrates.

African Courts have jurisdiction over African persons in civil matters which are decided in accordance with African law and custom.

Religion. The largest religious groups are the Anglicans with 86,000 members (36% of the non-African populations), the Presbyterians with 29,000 members (12%) and the Roman Catholics with 35,500 (15%). There are no accurate figures for Africans.

Education. Education is non-racial at all levels and not compulsory.

Government primary schools offer free tuition; government secondary schools charge from Z\$8-Z\$36 per term. All instruction is given in English. There are also over 3,000 private primary schools and over 140 private secondary schools, all of which must be registered by the Ministry of Education and Culture.

A number of community schools have been established throughout the country, the teachers for which are provided by the government.

There are 8 teacher's training colleges, 4 of which are in association with the University of Zimbabwe.

The University of Zimbabwe provides facilities for higher education. In 1979 the total enrolment of full- and part-time students in the 6 Faculties of Arts, Education, Engineering, Medicine, Science and Social Studies, was 1,931. Of the 1,481 full-time students, 966 were Africans.
